THE

TWENTY-SEVENTH REPORT

OF THE

COMMISSIONERS OF NATIONAL EDUCATION IN IRELAND,

(FOR THE YEAR 1860.)

TO HIS EXCELLENCY GEORGE WILLIAM FREDERICK EARL OF CARLISLE, K.G.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

May it please your Excellency,

I.—1. We, the Commissioners of National Education in Ireland, submit to your Excellency this our Twenty-seventh Report.

II.—2. On the 31st of December, 1859, we had 5,496 schools in operation, which had on their rolls, for the year then ended, 806,510 children; with an average daily attendance, for the same period, of 269,203 children; and an average number of children on the rolls for the year, of 519,175. At the close of the year 1860, the number of schools in operation was 5,632, being an increase in the schools in operation of 136, for the year 1860, as compared with the year 1859. The *average daily attendance* of children for the same period was 262,823, and the *average number of children on the rolls*, for the year, was 510,638, while the total number of distinct children at any time on the rolls for the year was 804,000.* Number of schools in operation.

3. There appears to be a decrease in the daily average attendance for the year 1860, as compared with the year 1859, of 6,380, being about 1·1 for each school. As there does not appear to be a proportionate decrease in the number of children on the rolls, this trifling decrease in the average must be attributed to the severity of the weather during the greater portion of the past year, and the consequent interruption to the regularity of the children's attendance.

4. We have made grants, at various times, amounting to £8,299 3*s.* 3*d.*, towards the erection of 47 ordinary National *School-houses*, not yet opened, which will contain in the whole 62 separate *school-rooms*. In addition to the ordinary National Schools not yet built, there are also in course of erection 7 Model School-houses of various kinds, containing in the whole 20 school-rooms. When these 54 buildings shall have been completed, they will afford accommodation to 7,655 additional chil- Building grants.

* (I.) By the *total number of children on rolls during year* is meant the gross aggregate of distinct individual children whose names have appeared on the school rolls at any time during the entire year.

(II.) By the *average number of children* on the rolls during the year is meant the *mean* or average of the several numbers appearing on the rolls throughout the year, and which in point of fact vary from week to week, and from month to month.

(III.) By the *average daily attendance* of children during the year is meant the *mean* or average of the numbers found in *actual* attendance—not on rolls merely, but present in their classes, from day to day throughout the year.

dren. Of the above 47 grants, for the erection of ordinary school-houses, 12 were awarded during the year 1860, involving liabilities to the amount of £2,282 15*s.* 7*d.*

Total No. of schools struck off and suspended during the year.

5. The number of schools struck off, during the year 1860, was 98, of which 82 had been previously in operation, and 9 had been suspended; the remaining 7 were simply cases in which grants for building had, from time to time, been awarded, but for various reasons have now been cancelled. The reasons in each case for their being removed from our rolls are given in the Appendix. The number of schools in the "suspended list," at the close of the year, was 62, of which number 7 were suspended during the year 1860. It is to be borne in mind that many of these suspended schools may hereafter be reopened.

6. During the year, 230 schools were added to our roll, and the entire number of schools we had in connexion on the 31st December, 1860, was 5,776, including those in operation, those suspended, and those towards the building of which we have promised aid.

The number of schools in operation, and the number of children on the rolls from 1833 to 1859.

7. The following Table shows the number of National Schools in operation, together with the number of children in attendance therein, as specified in our several Reports, to the 31st of December, 1859.

No. and Date of Report.	No. of Schools in operation.	No. of Children on the Rolls for half-years ending

No. 24, do. 1857,	5,337	"	803,610
No. 25, do. 1858,	5,408	"	806,510
No. 26, do. 1859,	5,496	"	

* In this year, 1857, the Commissioners for the first time thought it right to ascertain and record, not the average number of children on the rolls merely, nor yet the average daily attendance, but in addition the *total number of distinct children* appearing on the rolls during the entire year. Hence the large increase in the number of children appearing in above table for year 1857, as compared with the year 1856.

8. Taking the *total* number of *distinct* children appearing *at any time* on the rolls, for the year 1860, as 804,000, we have for the 5,632 schools in operation an average for *each* school of 142·7; while if we take the *average* number only appearing on the rolls of the same 5,632 schools as 510,638, we get an average for each school of 90·6 children; and taking the total daily average attendance at the 5,632 schools as 262,823, the average number of children in daily attendance at each school appears to be 46·6. Average of pupils, per school.

9. The following Table shows in Counties and Provinces the number of children of each religious denomination on the rolls of the schools for which such returns have been received, for the quarter ended 31st December, 1860:— Religious denominations of pupils, last quarter of 1860.

Province and County.	Total Number of Children returned for the Quarter ended Dec. 31, 1860.	Religious Denominations.			
		Established Church.	Roman Catholic.	Presbyterian	Other Dissenters.

TABLE showing the Religious Denomination of Pupils—*continued.*

PROVINCE AND COUNTY.	Total Number of Children returned for the Quarter ended Dec 31, 1860.	Religious Denominations.			
		Established Church.	Roman Catholic.	Presbyterian	Other Dissenters.
CONNAUGHT:					
Galway, . . .	18,580	224	18,334	19	3
Leitrim, . . .	13,580	989	12,547	33	11
Mayo, . . .	19,911	434	19,431	44	2
Roscommon, . .	14,345	204	14,122	18	
Sligo, . . .	12,175	434	11,701	31	9
Total, . . .	78,591	2,285	76,136	145	25
Ulster, . . .	183,190	23,152	99,284	58,308	2,446
Munster, . . .	151,443	2,192	148,858	328	65
Leinster, . . .	134,914	3,234	131,304	305	71
Connaught, . .	78,591	2,285	76,136	145	25
Grand total, . .	548,138	30,863	455,582	59,086	2,607

10. The following Table exhibits the centesimal proportion of the children of the various religious denominations set forth in the preceding Table, as compared with the total:—

PROVINCE.	Established Church.	Roman Catholic.	Presbyterian.	Others.
Ulster, ...	12·64	54·20	31·83	1·33
Munster, . .	1·45	98·30	0·21	0·04
Leinster, . .	2·40	97·32	0·23	0·05
Connaught, . .	2·91	96·88	0·18	0·03
Per-centage on the total, . .	5·63	83·11	10·78	0·48
Increase, compared with 1859, . .	0·53	.	0·28	.
Decrease, compared with 1859, . .	.	0·82	.	.

11. Owing to the difficulty, in many cases, of obtaining reliable information for periods long gone by, the preceding return of the religious denominations of the pupils on the rolls was necessarily restricted to the last quarter of the year 1860. But we may assume that, had we ascertained the religious denominations of the total number of children passing through our schools during the whole of the year, *i.e.*, 804,000, there would appear an addition to the respective numbers of the pupils of each of the various religious

denominations for the *year*, in the same proportions that at present exist with respect to the pupils whose religions have been ascertained for the *December quarter* only. The number of each religious denomination would then stand thus:—

Established Church.	Roman Catholics.	Presbyterians.	Others.	Total on Rolls.
45,269	668,243	86,666	3,822	804,000

That is—

Protestants of all denominations, . 135,757
Roman Catholics, ... 668,243

12. The subjoined Table shows the distribution of the schools and pupils according to the several provinces.

TABLE showing the total number of Schools in operation in each Province on the 31st December, 1860, with the total number of *distinct* pupils appearing at any time on the Rolls, for the year ending 31st December, 1860; also the *average* number on the Rolls and the average daily attendance for the same period.

Number of National Schools in each province, with the number on the rolls, the average on the rolls, and average number of children in attendance.

PROVINCE.	No. of Schools in operation on the 31st Dec., 1860.	*Total* No. of *Distinct* Pupils on the Rolls for the year ending 31st Dec., 1860.	*Average* No. of Pupils on Rolls for year ending 31st December, 1860.	Average daily attendance for year ending 31st December, 1860.
Ulster, . . .	2,064	276,437	166,067	84,771
Munster, . .	1,405	211,814	141,649	76,280
Leinster, . . .	1,325	196,814	126,542	65,844
Connaught, . .	838	118,935	76,380	35,928
Total, . .	5,632	804,000	510,638	262,823

13. We have ascertained the literary proficiency of 548,156 children, whose classification in our various Lesson Books has been returned to us by the Managers of National Schools for the last quarter of the year. The following table exhibits the centesimal proportion that the number in each class bears to the total:— Literary proficiency of pupils.

PROVINCE.	I. Book.	II. Book.	Sequels.	III. Book.	IV. and higher Books.
Ulster, . . .	38·0	26·9	16·0	13·3	5·8
Munster, . .	35·4	26·7	17·6	13·0	7·3
Leinster, . .	39·4	27·1	15·9	11·6	6·0
Connaught, . .	41·2	27·4	15·4	11·4	4·6
Per-centage in the Total, . .	38·1	27·0	16·3	12·5	6·1

14. On comparing the numbers in this table with the programmes of the minimum of proficiency strictly required for each class, and which is published in the Appendix, it will be seen that the pupils attending our schools are receiving as fair a degree of literary, scientific, and industrial instruction, as it is in the nature of primary education to ensure.

Number of National Schools in each province, distinguishing Operation, Building, and Suspended Schools.

15. The following summary exhibits the number of National Schools in each province on the 31st December, 1860, distinguishing those schools which were in operation, those to which we have promised building grants, and those suspended:—

Province.	Schools in operation on 31st Dec., 1860.	Schools to which there are outstanding Building Grants.	Suspended.	Total Number of Schools in connexion, on the 31st Dec., 1860.
Ulster, . .	2,064	27	26	2,117
Munster, . .	1,405	30	14	1,449
Leinster, . .	1,325	7	14	1,346
Connaught, . .	838	18	8	864
Total, . .	5,632	82	62	5,776

Return of new schools in 1860, arranged in provinces.

16. The annexed Tabular Return of the 230 schools added to our list, during the year 1860, shows the number in each province, with the nature of the aid granted.

Province.	Salary and Books.	Books only, to Workhouse and other Schools.	Towards Building and Furnishing Schools.	Total.
Ulster, . .	112	.	2	114
Munster, . .	38	.	5	43
Leinster, . .	28	.	2	30
Connaught, .	36	1	6	43
Total, . .	214	1	15*	230

Number and religious denominations of the Patrons or Managers of the new schools added in 1860.

17. Of the 230 schools specified in the preceding table, 228 are under the management of 186 individuals, many of them having more than one school under their care. The following is the number of Patrons of each religious denomination:—Church of England—clerical, 30; lay, 22; Presbyterian—clerical, 18; lay, 9; Dissenters—clerical, 4; lay, 2; Roman Catholic—clerical, 90; lay, 11. Total Protestants of all persuasions, clerical and lay, 85; total Roman Catholic, clerical and lay, 101. The remaining 2 cases—one of which is a Workhouse School, and one an ordinary National School—were added upon joint applications from persons of different religious denominations.

Schools with a low average attendance, and nature and extent of aid to be granted to them.

18. It having been ascertained that there are throughout the country, and that, owing to various causes, there must continue to be, a considerable number of schools, the attendance at which would by our rules, Part III. § iii. Par. 3 and 4, exclude them from participation in the public grants; we, last year, determined upon modifying these rules, so as to extend the advantages of our system to such schools, and decided upon making grants in future on the following conditions:—

* That is, 15 *schools* as distinguished from *school-houses*;—there being sometimes two schools, male and female, in the same house.

MODIFICATION of the terms on which schools are to be taken into connexion, and the nature and extent of aid to be granted:—

I. *Attendance, under* 15 *Pupils.*—Schools with an average attendance under fifteen, conducted on the principles and the system of the Board, will not be admitted to the enjoyment of salary, but will be entitled to inspection and to books and apparatus under existing regulations. The teachers will be eligible for training; and their service, from their connexion with the Board, will count to their credit in respect to supplemental salaries, retiring allowances, &c., should their schools afterwards become entitled to regular grants of salary, or should they be removed to others so entitled.

II. *Attendance,* 15 *but under* 20 *Pupils.*—When the average attendance is fifteen but under twenty, in addition to inspection, books, &c., and training, the Commissioners will make an award of salary to the teacher to the amount of two-thirds of a probationer's salary.

III. *Attendance,* 20 *but under* 25 *Pupils.*—When the average attendance is twenty but under twenty-five, the full salary of a probationer, but no more, will be awarded to the teacher.

IV. *Attendance,* 25 *but under* 30 *Pupils.*—When the average attendance is twenty-five but under thirty, salary as high as that of first division of third class, but no higher, will be awarded to the teacher, should his qualifications in other respects entitle him to such classification.

V. *Attendance,* 30 *but under* 35 *Pupils.*—When the average attendance is thirty but under thirty-five, salary as high as that of first division of second class, but no higher, will be awarded to the teacher, should his qualifications in other respects entitle him to such classification.

VI. *Attendance,* 35 *Pupils and upwards.*—When the average attendance is thirty-five or above it, the teacher, if otherwise qualified, will be entitled to the salary of first class of any grade.

VII. *Limitation.*—The Commissioners reserve to themselves the power of preventing the unnecessary multiplication of schools in any district, and they will require that the Managers of these schools shall be either clergymen, or other persons of position in society.

Note.—The above regulations will apply equally to the existing National schools, except that, in case of a diminution of salary being rendered necessary by their operation, the Commissioners will defer making any reduction in the amount, until a period of six months shall have elapsed from the termination of the quarter in which the attendance falls below the required minimum.

Number of schools brought into operation in 1860.

19. There were 8 vested schools opened during the year, towards the erection of which we had made grants, and 4 suspended schools reopened. These are included in the 5,632 schools in operation on the 31st December, 1860, and their names will be found inserted in a list in the Appendix.

Total number of vested and non-vested schools.

III.—20. At the termination of the year 1860, we had on our list, vested either in Trustees or in our Board, 1,136 school-houses, containing 1,697 rooms, accommodating distinct schools. The number of non-vested schools was 4,073, several of which, as in many cases of vested schools, are held under the same roof, though in separate rooms. There are, in addition, 4 school-houses about to be vested in the Board, the leases of which are in course of execution. These 4 school-houses will contain 6 distinct apartments.

21. The number of schools vested in Trustees, on the 31st December, was 937. In addition, there were 665 (including 150 assigned) vested in us in our corporate capacity, and 95 schools for which we held bonds for the observance of our rules. There were also 6 schools, towards which we had made building grants, the leases for which were not then executed.

22. The following Table shows the counties and provinces in which the preceding vested schools and houses are situated, distinguishing the number held under each species of security:—

TABLE showing the number of vested Schoolhouses in each County and Province, with the number of separate Schools held in those houses.

COUNTIES.	No. of School-houses Vested.						No. of School-rooms with Roll Nos. in Vested Houses.

IV.—23. The number of applications brought under consideration for grants to new schools in the year 1860, was 315. To 230 of these we promised the requisite assistance, either for building, or for salaries and books. The remaining 85 applications were rejected for various reasons, of which official records are kept. Applications for grants to new schools.

V.—24. The total amount of salaries, premiums, gratuities, and allowances paid, in 1860, to the principal literary Teachers of National Schools, Assistants, Paid Monitors, Workmistresses, Teachers of Central and other Model Schools, Agricultural Schools, Evening Schools, Workhouse Schools, and Organizing Teachers, was £182,265 19*s.* 4*d.* Total amount of salaries, gratuities, &c., paid in 1860.

25. We also paid to 161 Monitors in our District and Minor Model Schools, the sum of £1,241 18*s.* Monitors in these schools are paid at the following rates:—

First year,	£6
Second year,	£8
Third year,	£10
Fourth year,	£12

VI.—26. The amount received for books and school requisites sold at reduced prices to National Schools, in the year 1859, was £9,293 2*s.* 11*d.*; in 1860 the amount received was £8,906 1*s.* 1*d.*, being a decrease, as compared with the previous year, of £387 1*s.* 10*d.* The number of orders for books for National Schools received in 1860, was 9,208. National School Books.

27. The estimated value of the grants of books and school requisites given as Free Stock, in 1860, was £4,873 8*s.* 11*d.* The number of grants was 1,943.

28. In our Twenty-third Report, for 1856, we stated that we had established a Depository for the sale of school apparatus to National Schools, at reduced prices; during the year 1860 we received for the purchase of requisites of this class, £2,193 4*s.* 8*d.*, representing a value of £3,509 3*s.* 5*d.*, comprising 1,099 distinct orders. Apparatus.

29. We have also made, during the same period, free grants of apparatus, of which the total value is £1,240 6*s.* 10*d.* The majority of these grants were awarded to a considerable number of ordinary National Schools which had received the benefits of organization, and also to the District Model Schools. We learn from the Reports of our Inspectors that the aid afforded to National Schools by means of this department has tended materially to promote their efficiency.

VII.—30. The sum expended in the year 1860, in premiums for the encouragement of cleanliness and good order, amounted to £1,089 10*s.*—which was distributed according to the following scale, viz., in each district:— Number and amount of premiums for the encouragement of cleanliness, &c.

		£	*s.*	*d.*		£	*s.*	*d.*
1	Premium of	4	0	0	.	4	0	0
2	„ of	3	0	0	.	6	0	0

5	„ of	1	0	0	.	5	0	0
Total in each District, 13 Premiums, amounting to,						£22	10	0

Gratuities to Teachers of Workhouse Schools.

31. The amount paid as gratuities to the Literary Teachers of Workhouse National Schools during the year 1860, was £308, in accordance with the following scale:—

Male Teachers,	First Class,	Twenty at the rate of	£6 a-year each.
	Second Class,	Twenty „	£4
Female Teachers,	First Class,	Twenty „	£5
	Second Class,	Twenty „	£3

Total number of children on the rolls of our Central Model Schools on 31st Dec., 1860, with their religious denominations.

VIII.—32. The number of pupils on the rolls of our Model Schools, in Marlborough-street, upon the 31st of December, 1860, was—males, 491; females, 497; infants, 421; making a total of 1,509.

33. The religious denominations of the 1,509 children on the rolls of the Model Schools, Marlborough-street, at the above date, are specified in the following return:—

	Males.	Females.	Infants.	Total.
Established Church,	81	75	25	181
Roman Catholics,	483	386	369	1,238
Presbyterians,	23	27	24	74
Other Dissenters,	3	6	1	10
Jews,	1	3	2	6
Total,	591	497	421	1,509

Additional Schools contiguous to the Central Model Schools.

34. In reference to the announcement made in previous Reports that we had resolved upon establishing seven additional schools, contiguous to the present Central Schools in Marlborough-street, and which, being designed on a scale of accommodation corresponding to the different classes of schools existing throughout the country, would serve as models to our teachers in training, we have to report that these schools will soon be opened for the reception of pupils.

Number of Teachers trained in 1860.

IX.—35. We trained during the year, and supported at the public expense, 253 National Teachers, of whom 164 were males, and 89 females. We also trained 38 Teachers not connected with National Schools, who supported themselves during their attendance at the Model Schools. The total number of Teachers trained in 1860 was 291. Of the 253 Teachers of National Schools trained during the year, 23 were of the Established Church, 40 were Presbyterians, and 190 Roman Catholics. The total number of male and female teachers trained from the commencement of our proceedings to the 31st December, 1860, is 5,640. We do not include in this last number those Teachers who, at the time of their training, were unconnected with National Schools.

Training departments.

36. The respective establishments in which the Teachers, both male and female, attending at our training institution, are boarded and lodged, continue to be efficiently conducted. The inmates have been distinguished, as heretofore, for the general correctness of their conduct, for the maintenance of order and discipline, for

the exercise of kindly feeling towards each other, and for the careful observance of their religious duties. We have enlarged our training establishment, as alluded to in our last Report, and are now able to extend the advantages of training to a much greater number of female Teachers than we were previously able to accommodate.

Classification of Teachers trained during 1860.

37. We subjoin two Tabular Returns—No. 1 showing to what class the Teachers belonged at the commencement of their course of training, and at its termination; No. 2 showing the classification of the National Teachers trained during the year 1860.

No. 1.—TABLE showing the number of National Teachers trained in 1860, with the Number in each Class at the *Commencement* and *Expiration* of the course of training.

Number of Teachers in Board's service at end of 1860.

38. The following Table shows that we had in our service, at the end of the year 1860, 5,174 Principal, and 823 Assistant Teachers, making, in the whole, 5,997*—of whom 2,867 are trained; also, that we had in our service, at the same period, 630 Workmis-

* This number is exclusive of Teachers in the Workhouse and Prison Schools, in connexion with us, and Teachers in Convent Schools, no record being kept of their classification—the former not being paid by the Board, and the latter being paid according to the average daily attendance in their respective schools. Teachers of District Model Schools are also not included.

tresses—of whom 182 act in the further capacity of Junior Literary Assistants:—

If classed 3^2, ...		.	16
If classed 3^1, or higher, ...		.	20
Workmistresses—			
Teachers of Needlework only, ...		.	8
Acting also as Junior Literary Assistants, . .		.	14

Number of Paid Monitors in Board's service at end of 1860.

40. The following Table exhibits the number of Senior and Junior Monitors in our service in Ordinary National Schools, at 31st December, 1860, distinguishing Males from Females, and showing the numbers in each year of service:—

Year of Service.	Senior.		Junior.	
	Males.	Females.	Males.	Females.
1st year, . .	337	326	116	126
2nd „ . .	213	283	90	88
3rd „ . .	136	130	56	42
4th „ . .	84	84	.	.
Total, .	770	823	262	256
	1,593		518	

41. The following is the scale in operation for the payment of Monitors in our Ordinary Schools:— Scale of Salaries to Monitors.

Senior. Year of Service.	Salary per Annum.	Junior. Year of Service.	Salary per Annum
First, . . .	£5	First, . . .	£2
Second, . . .	6	Second, . . .	3
Third, . . .	8	Third, . . .	4
Fourth, . . .	10		

42. The following is the number of grants made to Teachers of Ordinary National Schools, during the year 1860, for instruction in Gratuities for instruction in Vocal Music, Drawing, and Navigation.

Vocal Music, .. 31 | Drawing, . . . 6 | Navigation, –

Scale of Payment for such Service.

	Yearly Gratuity.
Vocal Music.—Certificated Music Teachers, according to success and number under instruction, .	£2 to £5
Drawing.—Teachers with Certificate from Drawing Master of Central Model School, or from Master of a School of Art, according to success and average attendance, . .	3 to 10
Navigation.—Teachers with Certificate from Masters of Belfast, Limerick, or Waterford Model Maritime Schools, who shall give evidence of having an average attendance of at least six pupils under instruction in Navigation, an annual gratuity of £5 for an attendance of six pupils, and £10 for an attendance of twelve or more, . . .	5 to 10

43. The intended Navigation classes at ordinary National Schools have not yet commenced; but means have been adopted to instruct the teachers of the most eligibly situated schools in this branch of science; after which training they will be able to effectively impart the theory—and, as far as possible, the practice—to the advanced pupils under their care.

44. We have included in our Estimate for 1861-62 a sum of £12,000, which will be applied to meet the salaries of Teachers of National Schools, taken into connexion during the year 1860–61, to meet the increases of salaries of same Teachers, as also of all others antecedently in the service, consequent on advance in classification within the year, and to provide for the improved scale of salaries at present in operation. Increased estimate for Teachers' salaries.

45. The following table exhibits, in counties and provinces, the total amount of local emoluments received, in aid of salaries, by the teachers of National Schools (excluding Workhouse Schools, Prison Schools, and Closed or Suspended Schools) during the year 1860; also the average per each school and each pupil in daily average attendance. Amount of local emoluments received in aid of salaries.

AMOUNT of LOCAL EMOLUMENTS received in aid of Salaries of Teachers of National Schools in 1860.

Average amount of teachers' salaries.

46. There has been no change made in the salaries of our Teachers since the increase mentioned in our last Report. It was there shown that under the improved scale proposed to Her Majesty's Treasury, and afterwards sanctioned by Parliament, the

* In this sum is included the amount received in school fees at our District and Minor Model Schools. The fees thus received are allowed to the teachers in certain proportions; the balance necessarily remaining in hands after such distribution, being lodged to our credit, and made good to the teachers in different species of rewards.

average salary to a Classed Male Teacher would be £26 11*s.* 4*d.*; and to a Classed Female Teacher, £22 12*s.*—exclusive of good service salary and other gratuities. And from the foregoing Table of Local Emoluments it may be seen that the average of such local aid to each of our Teachers, of all grades, and male or female, is £8 1*s.* 5*d.*—exclusive of free residences in many instances attached to National Schools.

47. Our system of awarding good service salaries, in addition to the ordinary class salaries, has been productive of much advantage to our schools, by stimulating our Teachers to a more efficient and zealous performance of their school duties. And Parliament having sanctioned the expenditure of the additional sum estimated for by us—as mentioned in our Report for last year—we have been enabled to extend this species of reward to a greater number of Teachers than had been previously in the enjoyment of this distinction. Good Service salaries.

48. The following Table exhibits the number of Teachers in receipt of Good Service Salary, at end of year 1860; also their classification, and term of service completed since first classed. Number of Teachers in receipt of Good Service salary.

Workhouse Schools.

X.—50. At the close of the year 1859, we had 139 Workhouse Schools under our Board. On the 31st of December, 1860, the number was 140. Of these schools 29 are in Ulster, 49 in Munster, 34 in Leinster, and 28 in Connaught, showing an increase of one school during the year.

51. The *total* number of distinct children appearing on the rolls, in 140 Workhouse Schools, for the year ending 31st December, 1860, was 13,483, and the average daily attendance, 6,654, while the *average* number on the rolls was 8,625.

District and Minor Model Schools.

XI.—52. We refer to the Reports of our Head Inspectors, which will be found in the Appendix, on the condition of the District and Minor Model Schools. There are now 16 in operation. The number of children on the rolls of these schools for the *year ended* the 31st of December, 1860, was 9,258, and the average daily attendance for the same period, 3,839·0. In the following Table the total number on the rolls is divided into males, females, and infants:—

County.	School.	No. of *distinct* Pupils on the Rolls for year ended 31st December, 1860.				Average daily attendance for year ended Dec. 31, 1860.
		Males.	Females.	Infants.	Total.

Number of children on the rolls on the 22nd Dec., 1860.

53. We have obtained from our Inspectors the subjoined returns, showing the number of children on the rolls of the District and Minor Model Schools for *the week ended* the 22nd December, 1860, with their religious denominations.

54. It appears from these Returns, that the total number of children on the rolls of our District and Minor Model Schools for that period was 5,024; of which 1,126 were of the Established Church, 2,333 Roman Catholics, 1,272 Presbyterians, and 293 were Protestant Dissenters.

55. The District Model Schools at Newtownards and Sligo are rapidly advancing towards completion. Newtownards, Sligo, Londonderry, Enniscorthy, and Cork District Model Schools.

56. The District Model Schools at Londonderry and Enniscorthy have been completed, and arrangements are in progress for their being speedily opened.

57. A site for the Cork District Model School has been selected, and arrangements for the erection of the buildings are in progress.

58. The Board of Works have included in their estimates a sum sufficient to enable them to commence the building of the District Model School which is to be established at Enniskillen. Enniskillen proposed District Model.

59. In our last Report we stated that we had favourably entertained memorials from the inhabitants of Lurgan and Ballinahinch for the establishment of Minor Model Schools in those towns. Since then, the owner of the soil not having decided upon granting a site for the school at Ballinahinch, we have allocated the sum available for the erection of that school towards the erection of the school at Lurgan—subject to the approval of the Lords of the Treasury. Grants for Ballinahinch Minor Model School cancelled.

60. The Parsonstown Minor Model School was opened on the 22nd of October, 1860. Parsonstown, Monaghan, Carrickfergus, N.T. Stewart and Lurgan Minor Model Schools.

61. The Minor Model School at Monaghan is nearly completed.

62. The Minor Model School at Carrickfergus has been completed, and is now in satisfactory operation.

63. The Minor Model School at Newtownstewart has been completed, and will soon be ready for the reception of pupils.

64. The negotiations for the site and quantity of ground to be leased for the erection of Lurgan Minor Model School have been concluded, and the building will be proceeded with immediately.

65. The number of District Model Schools in operation is 13; the number being built is 4; the number to be yet built is 2; total, 19.

66. The number of Minor Model Schools now in operation is 4;* the number being built is 2; the number to be built is 1; total, 7.

67. The total number of District and of Minor Model Schools already erected, together with those which the Board had previously to the recent addition to its members agreed to erect, amounts to 26.

XII. 68. Dr. Kirkpatrick, our Agricultural Inspector, has furnished his Annual Report on the School Farms in operation during the year, and on the Albert Institution, Glasnevin. We publish this document in the Appendix. Dr. Kirkpatrick's Annual Report on Agricultural Schools.

69. The School Farms of the First Class are divided into two classes—the first, those under our own exclusive control; the second, those under the management of local patrons, and towards which we have made building grants and awarded salaries and books.

70. The total number of School Farms in operation on the 31st December, 1860, was 121, of which 19 were School Farms, of the First Class, under the exclusive management of the Board, and 17 were School Farms of the First Class, under local management. The remaining number, 85, were ordinary School Farms, of which 41 are attached to Workhouses.

* This number includes the Carrickfergus Minor Model School—not in operation at the date to which the Statistics in this Report are given.

71. The following is a list of the School Farms of the First Class:—

Under management of Commissioners of National Education.

No. 1.—Nineteen SCHOOL FARMS of the FIRST CLASS under EXCLUSIVE MANAGEMENT of COMMISSIONERS.

County.	School.	County.	School.

	Grand Total,	36	42	2	41	121

The following Table shows the Number of School Farms in the years 1852, 1853, 1854, 1855, 1856, 1857, 1858, 1859, and 1860. Number of School Farms, from 1852 to 1860.

YEAR.	Number of School Farms in each Year.				
	First Class.	Ordinary.	School Gardens.	Workhouse.	Total.
1852,	27	39	3	23	92
1853,	33	43	3	50	129
1854,	35	47	3	70	155
1855,	37	46	3	79	165
1856,	37	51	3	77	168
1857,	39	48	3	76	166
1858,	42	47	3	64	156
1859,	38	45	2	58	143
1860,	36	42	2	41	121

73. It will be seen from the foregoing table that the number of Workhouse School Farms has gradually decreased since 1855, the decrease having reached its maximum last year. This result is, happily, to be ascribed to the rapid advance of the rural districts in prosperity, the decrease in pauperism, and the increased demand for juvenile labour. Decrease in those attached to Workhouses.

74. An unwillingness having been expressed towards any further extension of the Agricultural Department of National Education, we have not, during the year, taken into connexion any of the class denominated "First Class School Farms," nor have we Non-addition to First Class School Farms.

enlarged existing School Farms. We have attached the Tervoe to the Limerick School Farm, thereby effecting a saving; and other measures are under consideration by which we confidently expect to diminish very considerably the cost of this department without impairing its efficiency.

Competitive examination for Agricultural Pupilships.

75. It has been arranged, that all candidates for admission into the Albert National Agricultural Institution, and for *free* places at the minor Agricultural Schools, must in future submit to strict competitive examinations. Full information on this important matter is given in the Prospectuses of the Albert Agricultural Institution, and of the First Class School Farms, which are published in the Appendix.

76. It is confidently expected that this arrangement will not only prove a means of rewarding merit and exemplary conduct, but likewise stimulate the pupils of the National Schools—Literary and Agricultural—throughout Ireland to increased application to their studies.

77. The results, &c., of the first competitive examinations of candidates for admission to the Albert Agricultural Institution, are given in Dr. Kirkpatrick's Report.

Table of Agricultural Statistics in Appendix.

78. We insert in the Appendix, Returns showing the progress of the Agricultural Department for the year 1860, which are contained in the Report of our Agricultural Inspector.

Competitive examination for appointment of Inspector under our Board.

XIII.—79. We publish in the Appendix the programmes of subjects laid down by us for examination of persons seeking the office of Inspector of National Schools. We intend to nominate four candidates for each vacancy, the most successful of whom shall receive the appointment.

XIV.—80. On the 27th of March, 1861, we received a communication announcing the appointment of several additional members to this Board, which now consists of twenty Commissioners. Their names, together with a copy of the supplemental Charter of Incorporation which authorizes the number of Commissioners to be increased from fifteen to twenty, will be found in the Appendix to this Report.

Financial statement.

XV.—81. We publish, in the usual form, a full statement of our receipts and expenditure for the year ending 31st of December, 1860.

XVI.—82. We submit this, as our Report for the past year to your Excellency, and in testimony thereof have caused our Corporate Seal to be hereunto affixed, this Nineteenth day of July, One Thousand Eight Hundred and Sixty-one.

SEAL.

(Signed)

MAURICE CROSS,
JAMES KELLY, } *Secretaries.*

OF

COMMISSIONERS OF NATIONAL EDUCATION IN IRELAND.

(1860.)

APPENDIX A.

Appendix A.

SUPPLEMENTAL CHARTER.

PATENT GRANTING SUPPLEMENTAL CHARTER TO THE COMMISSIONERS OF NATIONAL EDUCATION IN IRELAND.

VICTORIA, by the Grace of God of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and soforth, To all unto whom these presents shall come, greeting. WHEREAS, the Body Corporate and Politic of the Commissioners of National Education in Ireland was incorporated under and by virtue of our Charter or Letters Patent under the Great Seal of that part of Our United Kingdom of Great Britain and Ireland, called Ireland, bearing date the Twenth-sixth day of August, in the Ninth year of Our Reign, being in the year of Our Lord One Thousand Eight Hundred and Forty-five, and which said Charter was enrolled in the Office of the Rolls of Our High Court of Chancery in Ireland, on the First day of September, One Thousand Eight Hundred and Forty-five, the tenor of which Charter or Letters Patent is as follows:—"VICTORIA, by the Grace of God of the United Kingdom of Great "Britain and Ireland, Queen, Defender of the Faith, and soforth, To all to whom "these presents shall come, greeting. WHEREAS, in order to promote the wel-"fare, by providing for the Education of the Poor of Ireland, it is expedient "that the Commissioners of National Education in Ireland should be invested "with the powers and privileges herein contained. KNOW YE THEREFORE, that "We, of our special grace, certain knowledge, and mere motion, by and with the "advice and consent of our right trusty and well-beloved Counsellor, WILLIAM "BARON HEYTESBURY, Knight Grand Cross of the most Honorable Military "Order of the Bath, our Lieutenant-General and General Governor of Ireland, "and according to the tenor of our Letter, under our Privy Signet and Royal "Sign Manual, bearing date at our Court at St. James's, the Seventh day of "August, One Thousand Eight Hundred and Forty-five, in the Ninth Year of "our Reign, and now enrolled in the Rolls of our High Court of Chancery in "Ireland, have granted, constituted, and declared, and by these presents for Us, "our Heirs, and Successors, We do grant, constitute, and declare, that the Most "Reverend Father in God, our right trusty and right entirely beloved Cousin "and Counsellor, RICHARD, ARCHBISHOP OF DUBLIN, Primate of Ireland, our "trusty and well-beloved the Most Reverend Archbishop DANIEL MURRAY, our "trusty and well-beloved FRANC SADLIER, Doctor in Divinity, Provost of "Trinity College, Dublin, our right trusty and well-beloved Counsellor, Sir "PATRICK BELLEW, Baronet, our trusty and well-beloved RICHARD WILSON "GREENE, Esquire, our Solicitor-General in that part of our said United King-"dom called Ireland, our trusty and well-beloved POOLEY SHULDHAM HENRY, "Doctor in Divinity, our trusty and well-beloved JOHN RICHARD CORBALLIS, "Esquire, one of our Counsel at Law, our trusty and well-beloved ALEXANDER

Appendix A. SUPPLEMENTAL CHARTER.

"MACDONNELL, Esquire, and our trusty and well-beloved CHARLES WILLIAM "FITZGERALD, commonly called the MARQUIS OF KILDARE, Commissioners of "National Education in Ireland, and all and every other person and persons, "who shall from time to time be appointed Commissioners of National Education "in Ireland, by the Lord Lieutenant or other Chief Governor or Governors of "Ireland for the time being (the said Commissioners, and all and every other "person and persons so appointed by the Lord Lieutenant or other Chief "Governor or Governors of Ireland for the time being, to be removable at his "or their pleasure), shall be for ever hereafter one Body Corporate, called '*The "Commissioners of National Education in Ireland*,' and them by the name "of '*Commissioners of National Education in Ireland*,' into one Body Corporate "and Politic, in deed, fact, and name for ever, WE DO for Us, our Heirs, and "Successors, erect, constitute, establish, confirm, and declare, by these presents, "and We do for Us, our Heirs, and Successors, grant and declare that by the "same name of '*The Commissioners of National Education in Ireland*,' they "shall have perpetual succession, and that they and their Successors by that "name, from time to time, and at all times hereafter, shall be able and capable "in Law, without our licence in Mortmain, to have, take, purchase, receive, "hold, enjoy, and retain to them and their Successors, in fee and perpetuity, "any manors, lands, tenements, rents, annuities, privileges, liberties, possessions, "and hereditaments of what kind, nature, or quality soever in Ireland, not ex- "ceeding, in the whole, the clear yearly value of Forty Thousand Pounds Ster- "ling. AND moreover to purchase and acquire any goods and chattels what- "soever, and also to take and receive any sum or sums of money, or any manner "or portion of goods and chattels that shall to them be given, granted, devised, "or bequeathed, by any person or persons, Bodies Corporate and Politic "capable of making a gift or devise thereof, and therewith and therewith "to erect, maintain, and support in all places of that part of our said United "Kingdom called Ireland, where they shall deem the same to be most necessary "and convenient, such and as many schools as they shall think proper. AND "also to give, grant, alien, assign, and dispose of any manors, lands, tenements, "rents, hereditaments, goods, and chattels, and to do and execute all and singular "other matters and things necessarily relating thereunto. AND also to give and "grant any lease or leases of any lands or tenements belonging to, or which may "hereafter belong to the said Body Corporate and Politic for any term not ex- "ceeding Three lives or Thirty-one years, Provided that any such alienation, "and that every such lease or leases be made with the approbation of the major "part of the Members of the said Body Corporate then present (such major "part being at least three in number), and every lease so to be made shall be of "lands in possession, and not in reversion. AND WE DO also for Us, our Heirs, "and Successors, give and grant to every subject and subjects whatsoever of "Us, our Heirs, and Successors, whether incorporated or not incorporated, "special license, power, faculty, and authority, to give, grant, sell, alien, assign, "dispose, or bequeath unto the said Commissioners of National Education in "Ireland, and their Successors, for the use and benefit of them, and their "Successors, any manors, lands, tenements, rents, privileges, liberties, posses- "sions, and hereditaments, of what nature or kind soever within that part "of our said United Kingdom called Ireland, so as the same do not "exceed in the whole the clear yearly sum of Forty Thousand Pounds Sterling; "and that the said Body Corporate, and their Successors, by the name of '*The "Commissioners of National Education in Ireland*,' shall and may plead and be "impleaded, sue and be sued, answer and be answered, defend and be defended, "in all or any Courts and places, and before any Judges, Justices, Officers of "Us, our Heirs, and Successors, in all and singular actions, pleas, suits, plaints, "matters, and demands of what kind or quality soever they shall be, in the same "manner and form, and as fully and amply as any of our subjects of our Realm, "may or can do, sue or be sued, plead or be impleaded, answer or be answered, "unto, defend or be defended. AND that the said Body Corporate shall and "may have and use a common Seal for the affairs and business of National "Education in Ireland, and that it shall and may be lawful for the said Body "Corporate, and their Successors, the same Seal from time to time to change, "alter, or make new, as to them shall seem proper. AND WE DO HEREBY for "Us, our Heirs, and Successors, ordain, declare, and direct that, whenever the

"said Commissioners, or either or any of them, or any other person or persons "to be appointed in their place or in succession to them, or any of them, shall "by death, resignation, removal, or otherwise, cease to be a Commissioner or "Commissioners of National Education in Ireland, then and in every such case "it shall and may be lawful for the Lord Lieutenant, or other Chief Governor "or Governors of Ireland for the time being, by warrant under Hand and Seal, "to appoint one other person in the place and stead of any such person so "ceasing to be such Commissioner respectively, and any such person so to be "appointed shall accordingly be and become one of the Commissioners of "National Education in Ireland, and Member of the Corporation hereby con-"stituted. AND WE DO HEREBY for Us, our Heirs, and Successors, grant, "declare, and appoint, that it shall and may be lawful for the Lord Lieutenant, "or other Chief Governor or Governors of Ireland, for the time being, if it "shall appear fit to him or them respectively, to increase the number of the "Commissioners of National Education in Ireland: Provided, however, that the "whole number of persons intended by virtue of these presents to be incorpo-"rated as aforesaid, do not at any time exceed Fifteen, but may consist of any "less number. LASTLY, WE DO by these presents, for Us, our Heirs, and "Successors, grant unto the said Body Corporate by the name of '*The Com-"missioners of National Education in Ireland*,' and to their Successors, that "these, our Letters Patent, or the enrolment hereof, shall be in and by all "things good, firm, valid, sufficient, and effectual in the Law, according to the "true intent and meaning thereof, and shall be taken, construed, and adjudged "in the most favourable and beneficial sense for the best advantage of the said "Body Corporate, and their Successors, as well in all Courts of Records as "elsewhere, and by all and singular the Officers and Ministers whomsoever and "wheresoever of Us, our Heirs, and Successors. PROVIDED ALWAYS, that these "our Letters Patent be enrolled in our High Court of Chancery in Ireland, "within the space of Six Calendar Months next ensuing the date hereof.—In "witness whereof We have caused these our Letters to be made Patent. *Wit-"ness*, WILLIAM BARON HEYTESBURY, our Lieutenant-General and General "Governor of Ireland, at Dublin, the Twenty-sixth day of August, in the Ninth "Year of our Reign." AND WHEREAS the Body Corporate and Politic of the said Commissioners of National Education in Ireland at present consists of the following named persons—that is to say, The Right Honorable PATRICK LORD BELLEW, formerly Sir PATRICK BELLEW, Baronet, the Reverend POOLEY SHULDHAM HENRY, Doctor of Divinity, the Right Honorable ALEXANDER MACDONNELL, formerly ALEXANDER MACDONNELL, Esquire, and the Right Honorable CHARLES WILLIAM FITZGERALD, commonly called the MARQUIS OF KILDARE, being four of the Commissioners named in and created Members of the said Body Corporate and Politic by the said Charter, and of the Right Honorable MAZIERE BRADY, our Lord Chancellor of Ireland, ROBERT ANDREWS, Esquire, Q.C., LL.D., JAMES GIBSON, Esquire, the Very Reverend WALTER MEYLER, Doctor of Divinity, JEREMIAH JOHN MURPHY, Esquire, Master in Chancery, the Right Reverend WILLIAM HIGGIN, Lord Bishop of Derry and Raphoe, the Honorable MOUNTIFORT LONGFIELD, LL.D., Judge of our Landed Estates Court, Ireland, the Right Honorable THOMAS O'HAGAN, our Attorney-General in Ireland, being Eight of the said Commissioners, since duly appointed in the manner prescribed by the said Charter. AND WHEREAS in and by the said Charter, it was provided that the number of persons intended by virtue thereof to be incorporated should not at any time exceed Fifteen, but might consist of any less number. AND WHEREAS, in order further to promote the welfare by providing for the Education of the Poor of Ireland, it appears to us expedient that the number of the Commissioners of National Education in Ireland should be increased, so that the persons constituting the said Body Corporate and Politic should not at any time exceed Twenty, of whom Ten and not more than Ten, shall be Protestants, and Ten and not more than Ten, shall be Roman Catholics, but that the said persons constituting the said Body Corporate and Politic may consist at any time of a less number than Twenty. AND FURTHER, that to make up the number of said Commissioners to Twenty, as aforesaid, the persons next hereinafter named shall be forthwith created Members of the said Body Corporate and Politic in conjunction with the present Members thereof hereinbefore set forth—that is to say, the Right Honorable

Appendix A.

SUPPLEMENTAL CHARTER.

EDWIN RICHARD WINDHAM, EARL OF DUNRAVEN, the Right Honorable JAMES HENRY MONAHAN, Lord Chief Justice of our Common Pleas in Ireland, the Right Honorable DAVID RICHARD PIGOT, Lord Chief Baron of our Exchequer in Ireland, JAMES ANTHONY LAWSON, Esquire, LL.D., our Solicitor-General in Ireland, the Reverend JOHN HALL, LAWRENCE WALDRON, Esquire, M.P., JOHN LENTAIGNE, Esquire, and JOHN O'HAGAN, Esquire. KNOW YE THEREFORE, that We, of our special grace, certain knowledge, and mere motion, by and with the advice and consent of our right trusty and right well-beloved Cousin and Counsellor, GEORGE WILLIAM FREDERICK, Earl of Carlisle, K.G., our Lieutenant-General and General Governor of that part of our said United Kingdom of Great Britain and Ireland, called Ireland; and according to the tenor and effect of our Letter, under our Privy Signet and Royal Sign Manual, bearing date at our Court at St. James's, the Twentieth day of February, One Thousand Eight Hundred and Sixty-one, in the Twenty-fourth Year of our Reign, and now enrolled in the Rolls of our High Court of Chancery in Ireland aforesaid, have granted, constituted, and declared, and by these presents for Us, our Heirs, and Successors, We do grant, constitute, and declare, that the Right Honorable PATRICK LORD BELLEW, the Reverend POOLEY SHULDHAM HENRY, Doctor of Divinity, the Right Honorable ALEXANDER MACDONNELL, the Right Honorable CHARLES WILLIAM FITZGERALD, commonly called the MARQUIS OF KILDARE, the Right Honorable MAZIERE BRADY, our Lord Chancellor of Ireland, ROBERT ANDREWS, Esquire, Q.C., LL.D., JAMES GIBSON, Esquire, the Very Reverend WALTER MEYLER, Doctor of Divinity, JEREMIAH JOHN MURPHY, Esquire, Master in Chancery, the Right Reverend WILLIAM HIGGIN, Lord Bishop of Derry and Raphoe, the Honorable MOUNTIFORT LONGFIELD, LL.D., Judge of our Landed Estates Court, Ireland, the Right Honorable THOMAS O'HAGAN, our Attorney-General in Ireland, the Right Honorable EDWIN RICHARD WINDHAM, EARL OF DUNRAVEN, the Right Honorable JAMES HENRY MONAHAN, Lord Chief Justice of our Common Pleas in Ireland, the Right Honorable DAVID RICHARD PIGOT, Lord Chief Baron of our Exchequer in Ireland, JAMES ANTHONY LAWSON, Esq., LL.D., our Solicitor-General in Ireland, the Reverend JOHN HALL, LAWRENCE WALDRON, Esquire, M.P., JOHN LENTAIGNE, Esquire, and JOHN O'HAGAN, Esquire, be the Commissioners of National Education in Ireland, and all and every other person and persons who shall from time to time be appointed a Commissioner or Commissioners of National Education in Ireland by the Lord Lieutenant or other Chief Governor or Governors of Ireland for the time being (the said Commissioners, and all and every other person and persons so appointed by the Lord Lieutenant or other Chief Governor or Governors of Ireland for the time being, to be removable at his or their pleasure) to be for ever hereafter one Body Corporate and Politic in deed and in name, and that the said Body Corporate shall be called "*The Commissioners of National Education in Ireland*," and them by the name of "*The Commissioners of National Education in Ireland*," into one Body Corporate and Politic in deed, fact, and name, for ever, for Us, our Heirs, and Successors, to direct, constitute, establish, confirm, and declare; and that the said Commissioners of National Education in Ireland shall exercise and enjoy all and singular the gifts, grants, liberties, privileges, and immunities, possessions, real and personal, whatsoever, by any Act or Acts of Parliament, or by the said recited Letters Patent, or by any Letters Patent granted and confirmed unto, and lawfully acquired by the said Body Corporate and Politic, or which might be exercised and enjoyed by them as Members for the time being of the said Corporation, and not hereby altered or amended. AND We do hereby for Us, our Heirs, and Successors, ordain, declare, and direct, that when the said Commissioners, or either or any of them, or any other person or persons to be appointed in their place or in succession to them or any of them, shall by death, resignation, removal, or otherwise, cease to be a Commissioner or Commissioners of National Education in Ireland, that then and in every such case it shall and may be lawful for the Lord Lieutenant, or other Chief Governor or Governors of Ireland for the time being, by Warrant, under Hand and Seal, to appoint one other person in the place and stead of any such person so ceasing to be such Commissioner respectively, so, however, that in case at the time of such appointment the minority in number of the Members of the said Body Corporate and Politic shall be Protestants, the person so to be appointed shall be a Protestant, and in case at the

time of such appointment the minority in number of the Members of the said Body Corporate and Politic shall be Roman Catholics, the person so to be appointed shall be a Roman Catholic; it being our intention, that as far as practicable, one-half of the Members of said Body Corporate and Politic shall always be Protestants, and the other half Roman Catholics; and every such person so to be appointed shall accordingly be, and become one of the Commissioners of National Education in Ireland, and Member of the Corporation by the said recited Letters Patent and by these our Letters Patent to be constituted. AND We do hereby for Us, our Heirs, and Successors, grant, declare, and affirm, that it shall and may be lawful for the said Lord Lieutenant, or other Chief Governor or Governors of Ireland for the time being, if it shall appear fit to him or them respectively, to keep up the full number of Twenty persons as Commissioners of National Education in Ireland; and that at all times, so long as the said full number of Twenty persons shall be kept up, Ten and not more than Ten of such persons shall be persons professing the Roman Catholic religion: Provided, however, that the whole number of persons intended by virtue of such Letters Patent to be incorporated as aforesaid do not at any time exceed Twenty, but may consist of any less number. AND FURTHER, We do hereby for Us, our Heirs, and Successors, grant, declare, and appoint, that the said recited Letters Patent, dated the Twenty-sixth day of August, in the Ninth Year of our Reign, are to be in all respects confirmed, save as to so much thereof as relates to the names, number, and religious profession of the persons as aforesaid hereafter to constitute the Members of the said Corporation, and the appointments to be from time to time made in future of the persons to fill the place of Members ceasing to be Commissioners as aforesaid. AND LASTLY, We do by these Presents, for Us, our Heirs, and Successors, grant unto the said Body Corporate, by the name of "*The Commissioners of National Education in Ireland*," and to their Successors, that these, our Letters Patent, or the enrolment hereof, shall be in and by all things good, firm, valid, sufficient, and effectual in the Law, according to the true intent and meaning thereof, and shall be taken, construed, and adjudged in the most favourable and beneficial sense, for the best advantage of the said Body Corporate and their Successors, as well in all Courts of Records as elsewhere, and by all and singular the Officers and Ministers whomsoever and wheresoever of Us, our Heirs, and Successors: Provided always, that these our Letters Patent be enrolled in the Rolls of our High Court of Chancery in Ireland, within the space of Six Calendar Months next ensuing the date hereof.—In Witness whereof We have caused these our Letters to be made Patent. *Witness*, GEORGE WILLIAM FREDERICK, Earl of Carlisle, our Lieutenant-General and General Governor of Ireland, at Dublin, the Eleventh day of March, in the Twenty-fourth Year of our Reign.

RALPH CUSACK, Clerk of the Crown and Hanaper. SEAL.

Enrolled in the Office of the Rolls of Her Majesty's High Court of Chancery in Ireland on the Twenty-sixth day of March, One Thousand Eight Hundred and Sixty-one.

JOHN REILLY.

Appendix B.

APPENDIX B.

Rules and Regulations of Commissioners.

RULES AND REGULATIONS OF THE COMMISSIONERS OF NATIONAL EDUCATION IN IRELAND.

PART I.

PART I.

I.—OBJECT AND FUNDAMENTAL PRINCIPLE OF THE SYSTEM OF NATIONAL EDUCATION.

§ I.

1. The object of the system of National Education is to afford *combined* literary and moral, and *separate* religious instruction, to children of all persuasions, as far as possible, in the same school, upon the fundamental principle, that no attempt shall be made to interfere with the peculiar religious tenets of any description of Christian pupils.

2. It is the earnest wish of Her Majesty's Government, and of the Commissioners, that the Clergy and Laity of the different religious denominations should co-operate in conducting National Schools.

3. The Commissioners by themselves, or their Officers, are to be allowed to visit and examine the Schools whenever they think fit. Those who visit on the part of the Commissioners are furnished with credentials under their Seal.

4. The Commissioners will not change any fundamental Rule without the express permission of His Excellency the Lord Lieutenant.

II.—*Management of National Schools.*

§ II.

1. The local government of the National Schools is vested in the local Patrons thereof.

2. The Commissioners recognise as the local Patron the person who applies in the first instance to place the School in connexion with the Board, unless it be otherwise specified in the application.

3. If a School be under the local management of a School-Committee, such Committee has all the rights of an individual Patron.

4. The Patron has the right of nominating any fit person to act as his representative in the local management of the School; such representative to be designated the "Local Manager." The Patron may, at any time, resume the direct management of the School, or appoint another Local Manager.

This rule applies equally whether the Patronship be vested in one or more individuals.

5. When a school is vested in Trustees, they have the right to nominate the Local Manager.

6. When a School is vested in the Commissioners, the name of the Patron or Patrons is inserted in the lease.

7. In the case of a vacancy in the Patronship by death, the representative of a lay Patron, or the successor of a clerical Patron, is recognised by the Board (where no valid objection exists) as the person to succeed to the Patronship of the School.

8. If a Patron wishes to resign the office, he has the power of nominating his successor, subject to the approval of the Board.

9. In all cases, the Commissioners reserve to themselves the power of determining whether the Patron, or the person nominated by him, either as his successor, or as local Manager, can be recognised by them as a fit person to exercise the trust.

10. In all cases, whether the School be vested or non-vested, the Patron, when nominating a local Manager, ought to notify to the Commissioners, whether or not the person so nominated is to exercise all the rights of Patron during the period he acts as Manager.

11. When a School is under the control of a Committee, or of joint Patrons, a "Local Manager" should be appointed, to correspond with the office, sign documents, &c., &c.

III.—*Description of Schools to which Commissioners grant aid.*

§ III.

1. The Schools to which the Commissioners grant aid are divided into two classes, viz.:—1st, Vested Schools, which are vested in the Commissioners, or

were vested previously to the incorporation of the Board, in Trustees, for the purpose of being permanently maintained as National Schools; 2ndly, Non-Vested Schools, which are the property of private individuals. Both these classes of Schools are under the control of local Patrons or Managers.

2. There are also Model Schools, Literary and Agricultural, of which the Commissioners are themselves the Patrons, but which are conducted on the same fundamental principles as the ordinary National Schools.

3. The Commissioners encourage Industrial Instruction in National Schools in all suitable cases.

4. The Commissioners require that, in Schools attended by females, instruction shall be given (if practicable) in plain needlework.

IV.—*Religious and Secular Instruction.* § IV.

1. Opportunities are to be afforded (as hereinafter provided for) to the children of all National Schools for receiving such religious instruction as their parents or guardians approve of.

2. Religious instruction must be so arranged, that each School shall be open to children of all communions; that due regard be had to parental right and authority; that, accordingly, no child be *compelled* to receive, or to be present at, any religious instruction of which his parents or guardians disapprove; and that the time for giving it be so fixed, that no child shall be thereby, in effect, excluded, directly or indirectly, from the other advantages which the School affords.

3. A public notification of the times for religious instruction must be inserted in large letters in the "Time Table" supplied by the Commissioners, who recommend that, as far as may be practicable, the general nature of such religious instruction be also stated therein.

4. The "Time Table" must be kept constantly hung up in a conspicuous place in the School-room.

5. The Teacher must, immediately before the commencement of religious instruction, announce distinctly to the pupils, that the hour for religious instruction has arrived, and must, at the same time, put and keep up, during the period allotted to such religious instruction, and within the view of all the pupils, a notification thereof, containing the words "Religious Instruction," printed in large characters, on a form to be supplied by the Commissioners.

6. When the secular instruction precedes the religious instruction, in any National School, there shall be a sufficient interval between the announcement and the commencement of the religious instruction; and whether the religious or the secular instruction shall have priority in any National School, the books used for the instruction first in order, shall be carefully laid aside, at its termination, in the press or other place appropriated for keeping the School-books.

7. No secular instruction, whether literary or industrial, shall be carried on in the same apartment, during school hours,* simultaneously with religious instruction.

8. In schools, towards the building of which the Commissioners have contributed, and which are VESTED in Trustees, for the purposes of National Education, or which are vested in the Commissioners in their corporate capacity, such pastors or other persons as shall be approved of by the parents or guardians of the children respectively, shall have access to them *in the School-room*, for the purpose of giving them religious instruction there, at convenient times to be appointed for that purpose.

9. In Schools, NOT VESTED, and which receive no other aid than Salary and Books, it is for the Patrons or Managers to determine whether any, and if any, what religious instruction shall be given *in the School-room;* but if they do not permit it to be given in the School-room, the children whose parents or guardians so desire, must be allowed to absent themselves from the School, at reasonable times, for the purpose of receiving such instruction ELSEWHERE.

In such Schools, the Commissioners do not insist that opportunities shall be afforded (as in the case of Vested Schools) for religious instruction being given *in the School-room*, by such Pastors, or other persons, as shall be approved by the parents or guardians of the children.

10. The reading of the Scriptures, either in the Protestant Authorized, or

* The term "SCHOOL HOURS," is always to be understood to mean the entire time, in each day, from the opening of the School to the closing of the same for the dismissal of the pupils.

Appendix B.

Rules and Regulations of Commissioners.

PART I. § IV.

Douay Version,—the teaching of Catechisms,—public prayer,—and all other religious exercises, come within the rules as to religious instruction.

11. The Patrons and Managers of *all* National Schools have the right to permit the Holy Scriptures (either in the Authorized or Douay Version) to be read, at the time or times set apart for religious instruction; and in *all Vested Schools* the parents or guardians of the children have the right to require the Patrons and Managers to afford opportunities for the reading of the Holy Scriptures, in the School-room, under proper persons approved of by the parents or guardians for that purpose.

12. Religious instruction, prayer, or other religious exercises, may take place, at any time, before and after the ordinary School business (during which all children, of whatever denomination they may be, are required to attend); but must not take place *more than once* at *an intermediate* time, between the commencement and the close of the ordinary School business. The Commissioners, however, will not sanction any arrangement for religious instruction, prayer, or other religious exercises *at an intermediate time*, in cases where it shall appear to them, that such arrangement will interfere with the usefulness of the School, by preventing children of any religious denomination from availing themselves of its advantages, or by subjecting those in attendance to any practical inconvenience.

13. The secular School business must not be interrupted, or suspended, by any spiritual exercise whatsoever.

Note.—The Commissioners earnestly recommend that Religious Instruction shall take place either immediately before the commencement, or immediately after the close, of the ordinary School business; and they further recommend that, whenever the Patron or Manager thinks fit to have religious instruction at an intermediate time, a separate apartment shall (when practicable) be provided for the reception of those children whose parents or guardians may disapprove of their being present thereat.

14. Patrons, Managers, and Teachers, are not required to *exclude* any children from any religious instruction given in the School; but all children are to have full power to absent themselves, or to withdraw, from it. If any parents or guardians object to the religious instruction given in a National School, it devolves upon them to adopt measures to prevent their children from being present thereat.

15. Patrons, Managers, and Teachers, are not to use any means, directly or indirectly, to induce children to attend any religious instruction, contrary to the wishes of their parents or guardians. The Commissioners will regard such interference as opposed to the whole spirit of the system of National Education.

16. If any child of a religious persuasion different from that of the Teacher of any National School, attend during the time or times set apart for religious instruction given by such Teacher, it shall be his or her duty, on the *first attendance* of every such child, during the time for such religious instruction given by such Teacher in such School, *forthwith* to notify the same to the parent or guardian of such child on, and by, a Form to be furnished by the Commissioners.

17. The Teachers are required to keep a record of the names of the children to whose parents they have sent the printed Form of notification.

18. The Registry kept in each School, according to the Form furnished by the Commissioners, must show the religious denomination of each child on the School Roll.

19. A sufficient number of hours, to be approved of in each case by the Commissioners, is to be appropriated to the ordinary School business, during which all children, of whatever denomination they may be, are required to attend.

20. In all National Schools (except those in which Industrial instruction is the *chief* object) there must be Literary instruction for at least *four* hours, upon five days in the week.

21. In Schools in which Industrial instruction is the *chief* object, the Commissioners require that not less than *two* hours, daily, shall be devoted to Literary instruction.

§ V.

V.—*Use of School-houses.*

1. In Non-Vested Schools, the Commissioners do not, in ordinary cases, exercise control over the use of the School-houses on Sundays, or before or after the School hours on the other days of the week; such use being left altogether to the local Patrons or Managers, of all religious persuasions, subject to the interference of the Board in cases leading to contention or abuse.

2. No National School-house shall be employed, at any time, even temporarily,

as the *stated* place of DIVINE WORSHIP of any religious community; or for the celebration or administration of the Sacraments or Rites of any Church.

3. No aid will be granted to a School *held in a place of worship;* nor will the Commissioners sanction the *transfer* of an existing School, to a place of worship, even for a temporary period.

4. When a School-room is in any way connected with a place of worship, there must not be any *direct internal* communication between the School-room and such place of worship.

5. Vested School-houses must be used, *exclusively, for the education* of the children attending them: except on Sundays, when they may be employed for Sunday Schools, with the sanction of the Patrons or Managers, subject, in cases leading to contention or abuse, to the interference of the Commissioners.

6. No political meetings shall be held in National School-houses, whether Vested or Non-Vested; nor shall any political business *whatsoever* be transacted therein.

§ VI.

VI.—*Use of Books or Tablets.*

1. The use of the books published by the Commissioners is not compulsory; but the titles of all other books which the Patrons or Managers of Schools intend for the ordinary School business, are to be notified to the Commissioners; and none are to be used to which they object. The approval of any such books is to extend only to the particular edition which has been submitted to the Commissioners.

2. If any other books than the Holy Scriptures, or the *standard* books of the Church to which the children using them belong, be employed in communicating religious instruction, the title of each is to be made known to the Commissioners whenever they deem it necessary.

3. The Commissioners do not insist on the "Scripture Lessons" or book of "Sacred Poetry" being read in any of the National Schools, nor do they allow them to be read as part of the ordinary School business (during which all children, of whatever denomination they may be, are required to attend) in any School attended by children whose parents or guardians object to their being read by their children.

In such cases the Commissioners prohibit the use of these books, except at times set apart for the purpose, either before or after such ordinary School business, and under the following conditions:—

First—That no child, whose parent or guardian objects, shall be required, directly or indirectly, to be present at such reading.

Second—That in order that any children, whose parents or guardians object, may be at liberty to absent themselves, or to withdraw, at the time set apart for the reading of the books above specified, public notification of the time set apart for such reading shall be inserted in large letters in the Time-table of the School—that there shall be a sufficient interval between the conclusion of such ordinary School business and the commencement of such reading; and that the Teacher shall, immediately before its commencement, announce distinctly to the pupils, that any child whose parent or guardian so desires may then retire.

Third—That in every such case there shall be, exclusive of the time set apart for such reading, sufficient time devoted each day to the ordinary School business, in order that those children who do not join in the reading of the books may enjoy ample means of literary instruction in the School-room.

4. When using the Scripture Lessons, the Teachers are prohibited, except at the time set apart for religious instruction, from putting to the children any other questions than those appended to the end of each lesson.

5. The Commissioners require that the principles of the following Lesson, or of a Lesson of a similar import (to be approved of by the Commissioners), shall be strictly inculcated, during the hours of united instruction, in all Schools received into connexion with the Board, and that a copy of the Lesson itself be hung up in each School.

> Christians should endeavour, as the Apostle Paul commands them, to "live peaceably with all men" (Rom. ch. xii. v. 17), even with those of a different religious persuasion.
>
> Our Saviour, Christ, commanded his disciples to "love one another." He taught them to love even their enemies, to bless those that cursed them, and to pray for those who persecuted them. He himself prayed for his murderers.
>
> Many men hold erroneous doctrines, but we ought not to hate or persecute them. We ought to seek for the truth, and to hold fast what we are convinced is the truth; but not

Appendix B.

Rules and Regulations of Commissioners.

PART I.

§ VI.

to treat harshly those who are in error. Jesus Christ did not intend his religion to be forced on men by violent means. He would not allow his disciples to fight for him.

If any persons treat us unkindly, we must not do the same to them; for Christ and his apostles have taught us not to return evil for evil. If we would obey Christ, we must do to others, not as they do to us, but as we would wish them to do to us.

Quarrelling with our neighbours and abusing them, is not the way to convince them that we are in the right, and they in the wrong. It is more likely to convince them that we have not a Christian spirit. We ought, by behaving gently and kindly to every one, to show ourselves followers of Christ, who, "when he was reviled, reviled not again" (1 Pet. ch. ii. v. 23).

6. The use of the Tablet, furnished by the Commissioners, containing the Ten Commandments, is not compulsory.

7. The rules as to religious instruction do not apply to the matter contained in the common School-books, in the Scripture Lessons, in the book of Sacred Poetry, or in any other book, the use of which the Commissioners may at any time sanction for the purpose of united instruction.

§ VII.

VII. *Appointment and Dismissal of Teachers.*

1. The local Patrons (or Managers) of Schools have the right of appointing the Teachers, subject to the approval of the Board, as to character and general qualifications; the local Patrons (or Managers) have also the power of removing the Teachers of their own authority. National Teachers should be persons of Christian sentiment, of calm temper, and discretion; they should be imbued with a spirit of peace, of obedience to the law, and of loyalty to their sovereign; they should not only possess the art of communicating knowledge, but be capable of moulding the mind of youth, and of giving to the power which education confers a useful direction. These are the qualities for which Patrons of Schools, when making choice of Teachers, should anxiously look. They are those which the Commissioners are anxious to find, to encourage, and to reward.

2. No clergyman of any denomination, or (except in the case of Convent Schools) member of any religious order, can be recognised as the Teacher of a National School.

3. Teachers of National Schools are not permitted to carry on, or engage in, any business or occupation, that will impede, or interfere with, their usefulness as Teachers. Teachers of National Schools are especially forbidden to keep public houses, or houses for the sale of spirituous liquors.

4. Should the Commissioners consider any Teacher in a vested school unfit for his office, or otherwise objectionable, they will require that he be dismissed, and another provided: in non-vested schools the grant of salary will be withheld until a suitable Teacher be procured. Teachers are also liable to be fined or suspended, at all times, when the Commissioners shall deem it necessary, on sufficient cause being shown.

§ VIII.

VIII. *Inspection by the Commissioners or their Officers.*

1. As the Commissioners do not take the control or regulation of any School, except their own Model Schools, directly into their own hands, but leave all Schools aided by them under the authority of the local Patrons or Managers (as stated in § II.); the *Inspectors* are not to give *direct orders*, as on the part of the Board, respecting any necessary regulations, but to point out such regulations to the local Patrons or Managers of the Schools, that *they* may give the requisite orders.

2. The Commissioners require that every National School be inspected by the *Inspector of the District*, at least three times in each year.

3. The *District Inspector*, after each inspection, is to communicate with the local Patron or Manager, for the purpose of affording information concerning the general state of the School, and pointing out such violations of rule, or defects, if any, as he may have observed; and he is to make such suggestions as he may deem necessary.

4. Upon ordinary occasions, the Inspector is not to give any intimation of his intended visit; but when the inspection is to be public, he is to make such previous arrangements with the local Patrons or Managers, as will facilitate the attendance of the parents of the children, and other persons interested in the welfare of the Schools.

5. The Inspector is to report to the Commissioners the result of each visit, and to use every means to obtain accurate information as to the discipline, management, and methods of instruction pursued in the School.

6. When applications for aid are referred to the District Inspector, he is to have an interview with the applicant; and also to communicate personally, or by writing, with the clergymen of the different denominations, and with other parties in the neighbourhood, with a view of ascertaining their opinions on the application, and whether they have any, and what, objections thereto.

7. The Inspector is also to supply the Commissioners with such local information as they may from time to time require from him, and to act as their agent in all matters in which they may employ him; but he is not invested with authority to decide upon any question affecting a National School, or the general business of the Commissioners, without their direction.

IX. *Admission of Visitors.* § IX.

1. The public generally must have free access to every National School (whether Vested or Non-Vested) during the hours devoted to secular instruction,—not to take part in the ordinary business, or to interrupt it, but, as Visitors, to observe how it is conducted.

2. Every Teacher of a National School is to receive courteously Visitors of all denominations, to afford them free access to the School-room, and full liberty to examine the Register, Daily Report Book, and Class Rolls; to observe what books are in the hands of the children, or upon the desks, what tablets are hung up on the walls, and what is the method of teaching; but the Teachers are not required to permit any person to interrupt the business of the school, by asking questions of children, examining classes, calling for papers or documents of any kind, except those specified, or in any other way diverting the attention of either Teachers or Scholars from their usual business.

3. Should any Visitors wish for information which they cannot obtain by such an Inspection, it is the duty of the Teachers to refer them to the Patron or Manager of the School for such information.

4. Every Teacher is required to have his Visitors' or Daily Report Book lying upon his desk, that Visitors may, if they choose, enter remarks in it. Such remarks as may be made, the Teachers are by no means to alter or erase; and the Inspector of the district is required to transmit to the Commissioners copies of such remarks as he may deem of sufficient importance to be made known to them.

5. As the religious instruction of the children given in the School-room, is under the control of the Clergyman or Lay person, communicating it with the approbation of their parents, the *Commissioners* can give no liberty to any Visitor whether Clergyman or other person, to interfere therewith, or to be present thereat.

X. *Miscellaneous.* § X.

1. When any School is received by the Commissioners into connexion with them, the inscription, "NATIONAL SCHOOL," shall be put up in plain and legible characters on the School-house, or on such other place as may render it conspicuous to the public. When a School-house is built partly by aid from the Commissioners, a stone is to be introduced into the wall having that inscription cut upon it. The Commissioners will not, when granting aid *in future*, sanction the inscription of any title of a *denominational character*, or which may appear to them to indicate that the school is one belonging to any particular religious body. The Commissioners, however, do not object to the terms, Male, Female, or Infant: or to the proper local designation of the city, town, parish, street, village, or townland, in which the School may be situated; or to the name of the founder being stated on the Inscription.

2. Patrons and Managers are permitted to close their respective Schools for a reasonable time or times during the year, subject to the interference of the Commissioners in case of abuse.

3. No emblems or symbols of a *denominational* nature shall be exhibited in the School-room, during the hours of united instruction; nor will the Commissioners, in future, grant aid to any School which exhibits on the exterior of the buildings any such emblems.

Appendix B.
Rules and Regulations of Commissioners.
PART I. § X.

4. No emblems or symbols of a *political* nature shall at *any time* be exhibited in the School-room, or affixed to the *exterior* of the buildings: nor shall any placards whatsoever be affixed thereto.

5. The Commissioners regard the attendance of any of their Teachers at meetings held for *political purposes*, or their taking part in elections for Members of Parliament, or for Poor Law Guardians, &c., except by voting, as incompatible with the performance of their duties, and as a violation of rule which will render them liable to dismissal.

6. The Commissioners require that a Copy of Part I. of their Rules, on a form to be furnished by them, shall be suspended in every National School-room.

PART II. § I.

PART II.—DIFFERENT CLASSES OF NATIONAL SCHOOLS.

I. *District Model Schools.*

1. District Model Schools are built and supported entirely out of the funds placed by Parliament at the disposal of the Commissioners, and are therefore under their exclusive control.

2. The chief objects of District Model Schools are to promote united education; to exhibit the most improved methods of literary and scientific instruction, and to train young persons for the office of Teacher.

3. In District Model Schools, the Commissioners appoint and dismiss, of their own authority, the Teachers and other officers; regulate the course of instruction, and exercise all the rights of Patrons. The Commissioners afford the necessary opportunities for giving religious instruction to the pupils, by such Pastors or other persons as are approved of by their parents or guardians, and in separate apartments allotted to the purpose.

4. Some of the District Model Schools have farms attached to them, for the purpose of affording instruction in agriculture.

§ II.

II. *Agricultural Schools.*

1. Agricultural Schools of every class must have a literary department annexed to them, conducted on the principles of ordinary National Schools.

2. Agricultural Schools consist of two classes, Model and Ordinary.

3. Model Agricultural Schools are divided into two classes, viz., those under the exclusive control of the Commissioners, and those under local Patrons.

4. In all Model Agricultural Schools the Commissioners will grant salary to a Teacher for the literary department *exclusively*, when the extent of the farm and other circumstances render such an appointment necessary.

§ III.

III. *Model Agricultural Schools under the exclusive control of the Commissioners.*

1. The Commissioners defray the greater portion of the cost of erecting the necessary buildings; but they require the local parties to contribute in such proportion as may be deemed necessary, according to the circumstances of each case.

2. The Commissioners undertake the *entire* cost of the furniture, fittings, rent, taxes, maintenance, implements, stock, &c., &c.

3. A Farm of sufficient extent must be conveyed to the Commissioners, at a moderate rent, and on a satisfactory lease.

4. The Commissioners exercise all the rights of Patrons, as in the case of District Model Schools.

5. The Commissioners admit into these Schools a limited number of free, and also of paying resident Agricultural Pupils.

6. The Commissioners contribute a small weekly payment to the Class of Day Pupils who work on the Farm.

§ IV.

IV. *Model Agricultural Schools (Vested and Non-vested) under Local Patrons.*

1. *Vested Model Agricultural Schools.*

1. The Commissioners contribute a certain amount of assistance towards the erection of the buildings, in proportion to the amount of local contribution, and the extent of the farm. The remaining portion of the cost of the buildings and

furniture, and the whole cost of implements, stock, seed, &c., must be contributed by local parties. *Appendix B.*

2. The site of the buildings must be legally vested in the Commissioners free of rent. Rules and Regulations of Commissioners.

3. The only aid granted by the Commissioners towards the *maintenance* of such Schools, consists of salary to the Master (who must be competent to conduct both the literary and agricultural departments); a sum towards the support of a limited number of resident Agricultural pupils, and a weekly payment to the class of day pupils who work on the farm. PART II. § IV.

2. *Non-vested Model Agricultural Schools.*

1. The entire cost of the necessary buildings, furniture, implements, stock, seed, &c., must be defrayed by local parties, and a farm of sufficient extent must be provided.

2. The Commissioners grant the usual salary to the Master, according to his class, as a literary Teacher, and an additional sum of £10 a-year for his services as Agriculturist. They contribute also towards the support of a limited number of resident Agricultural pupils, and a weekly payment to the class of day pupils who work on the farm.

V. *Ordinary Agricultural Schools.* § V.

1. This class of Schools consists of Ordinary National Schools, (either Vested or Non-vested), to which a small farm (from one to three acres), is annexed. The Teacher must be competent to give instruction both in the theory and practice of Agriculture, and must cultivate the land, with the assistance of his pupils.

2. The only aid granted by the Commissioners, is an addition of £5 a-year to the class salary of the Teacher, and in some special cases, a small weekly payment to an Industrial class of pupils.

3. To entitle a School to such aid, the Commissioners require to be satisfied from the Reports of the Agricultural Inspectors, that the Agricultural department is efficiently conducted.

VI. *Agricultural Schools connected with Workhouses.* § VI.

1. In Workhouse Schools to which farms are attached, the Commissioners award to the Agricultural Teacher, a gratuity, not exceeding £15 in one year, and make a free grant of books on Agriculture. These gratuities and grants are awarded on the recommendation of the Agricultural Inspectors.

VII. *School Gardens.* § VII.

1. The Commissioners award gratuities, on the recommendation of the Agricultural Inspectors, to the Teachers of National Schools, who exhibit the best specimens of garden culture, on ground attached to their respective Schools, the ground to be cultivated by the pupils.

VIII. *Industrial Schools.* § VIII.

1. In these Schools, embroidery and other advanced kinds of needlework are taught. The Commissioners grant salaries to the Teachers, on the following conditions:—

First. That *all* the pupils of the industrial department shall receive literary instruction, for at least *two hours* daily.

Second. That no religious instruction or religious exercise shall take place during the time the pupils are engaged in industrial occupation.

Third. That a separate room be provided for industrial instruction.

Fourth. That in addition to the literary Teacher, there shall be a suitable person appointed to conduct the industrial department.

2. None but lay Teachers are entitled to a salary from the Commissioners, for conducting an Industrial Department in connexion with a *Convent School.*

3. The amount of salary will depend upon the circumstances of each case.

Appendix B.

Rules and Regulations of Commissioners.

PART II. § IX.

IX. *Convent Schools.*

1. Convent Schools receive aid under the conditions applicable to Non-vested Schools, and they are subject to the same Rules and Regulations.

2. The members of the community may themselves discharge the office of Teachers, with, or without, the aid of such other persons as they may see fit to employ; the salaries of the assistants to be defrayed by the community.

3. The amount of salary awarded to Convent Schools is regulated by the average number of children in daily attendance, according to a scale laid down by the Commissioners.

4. The Commissioners will grant aid to *one School only*, in *connexion with the same* Convent.

§ X.

X. *Workhouse Schools.*

1. Such Schools are received into connexion, and grants of Books made thereto, on condition that they shall be subject to inspection by the Commissioners, or their Officers, and that all the Rules of the Board applicable to Non-vested Schools be faithfully observed.

2. The Commissioners award annual gratuities to a certain number of the Teachers of Workhouse Schools in each District, on the recommendation of the Inspector.

§ XI.

XI. *Schools attached to Prisons.*

Such Schools are received into connexion, upon the same general principles as the Workhouse Schools, and grants of Books are made thereto. In special cases gratuities are awarded to the Teachers.

§ XII.

XII. *Evening Schools.*

The Commissioners grant aid towards the support of Evening Schools, where the wants of the locality render such institutions desirable. The aid is limited to salary and books.

PART III.

PART III.

§ I.

I. CONDITIONS UPON WHICH AID IS GRANTED TOWARDS BUILDING SCHOOL-HOUSES; TOWARDS PAYMENT OF TEACHERS' SALARIES.—CLASSIFICATION OF TEACHERS.—SCALE OF SALARIES TO TEACHERS, MONITORS, &c.—GENERAL REGULATIONS RESPECTING THE TRAINING OF TEACHERS, &c., &c.

1. The Commissioners of National Education grant aid under two general heads, viz.:—

First.—Towards building School-houses and providing suitable fittings and furniture. In such cases the Commissioners also grant aid towards the payment of Teachers, supply of Books, &c., as hereafter explained.

Secondly.—Towards the support and maintenance of Schools established by local parties, without any assistance from the Commissioners towards the erection of the buildings, or providing furniture.

2. The Commissioners desire it to be distinctly understood that they reserve to themselves the right to withdraw any grant of salary or books, whenever they see fit.

§ II.

II. *Building (Vested Schools).*

1. Before any grant is made towards building a School house, the Commissioners are to be satisfied that a necessity exists for such a School, that an eligible site has been procured, that a satisfactory lease of the site will be executed to the Commissioners in their Corporate capacity; and that the applicant parties are prepared to raise, by local contribution, at least one-third of the whole sum which the Commissioners deem necessary for the erection of the house, providing furniture, &c.

2. If the proposed site be for a School in a rural district, and be within three statute miles of a School-house, towards the erection of which the Commissioners have contributed aid, no grant can be made.

3. Although the Commissioners do not absolutely refuse aid towards the erection of School-houses on ground connected with a place of Worship, yet they much prefer having them erected on ground which is not so connected, where it

can be obtained; they therefore require that, before Church, Chapel, or Meeting-house ground be selected as the site of a School-house, *strict* inquiry be made whether another convenient site can be obtained, and that the result shall be stated to them.

4. The School premises must be vested in the Commissioners, at a nominal rent, and for such term, under the circumstances, as they may deem necessary.

5. The Commissioners will keep in repair the School-house and furniture, where the premises are vested in them in their Corporate capacity.

6. When the School premises have been vested in Trustees, for the purposes of National Education, it devolves on the Trustees to keep the house, furniture, &c., in repair.

7. When grants are voted towards the building, &c., of a School-house, the conveyance must be duly executed *before the works are commenced.*

8. No grant can be made until the District Inspector shall have reported upon all the circumstances of the case; until the Board of Works shall have reported on the eligibility of the proposed site; and the Law Adviser of the Commissioners shall have given his opinion, from the information laid before him, that a satisfactory lease can be executed.

9. The Commissioners determine, from the information afforded them, what amount of School accommodation should be provided in the proposed building.

10. The Commissioners cannot, in any case, sanction more than two-thirds of the sum which they may deem necessary for the erection of the School-house (including furniture, &c.); and they invariably require that the remaining one-third, at least, shall be locally provided for.

11. The cost of the house, &c., is determined by the number of children which it is intended to accommodate.

12. The Board of Works will furnish instructions as to the plan and specification, to which the parties receiving aid are bound strictly to adhere.

13. The Commissioners do not contribute to the ornamenting of School-houses but merely to such expenditure as may be necessary for having the children accommodated in plain, substantial buildings. If buildings of another description be preferred, the whole of the extra expense must be provided by the applicants.

14. The Commissioners do not contribute towards the expense of erecting residences for the Teachers.

15. The Commissioners do not make grants to purchase School-houses, nor to purchase, alter, or furnish other houses, for the purpose of being converted into School-houses.

III. *Aids to Schools previously established.* § III.

(*Such Schools come under the class of "Non-Vested Schools." See* PART I., *Sec.* 3.)

1. The aid granted to Schools previously established is limited to Salary and Books, and the benefits of Inspection and Training.

2. The Commissioners do not contribute towards Repairs, Fittings, Furniture, or to the Rent of the School-house.

3. Before aid can be granted, the Commissioners must be satisfied that the case is deserving of assistance; that there is reason to expect that the School will be efficiently and permanently supported; that some local provision will be made in aid of the Teacher's Salary, in addition to the School-fees; that the School-house is in good repair, and provided with a sufficient quantity of suitable Furniture; that a competent Teacher has been appointed; and that the School is in operation.

4. Before the Commissioners consider any application for aid, they require, from the Inspector of the District, a Report upon all the circumstances of the case.

5. To entitle a School to a continuance of aid, the House and Furniture must be kept in sufficient repair by means of local contributions; the School conducted in all respects in a satisfactory manner, and in accordance with the regulations of the Commissioners; and it must appear from the Records of the School that there is a sufficient average daily attendance of pupils.

6. In Mixed Schools, *i.e.*, Schools in which male and female children are

Appendix B.

Rules and Regulations of Commissioners.

taught in the same room, the Teacher may be either male or female, as the circumstances of the School may require; but when a Mixed School has been received into connexion, by the Commissioners, under a male or a female Teacher, the Commissioners will not sanction the appointment of a Teacher of a different sex, unless previous application be made to them to sanction such change.

PART III. §. III.

7. When a school has been taken into connexion, as a School for Males, or for Females solely, the Commissioners will not sanction the change from a male to a female school, or *vice versâ*, without their permission having been previously obtained.

§ IV.

IV. *Workhouse Schools and Schools attached to Prisons.*

(*See* PART II., *Sections* 10 *&* 11.)

§ V.

V. *Classification and Salaries of Teachers, Monitors, &c.*

1. All National Teachers are either "Classed Teachers" or "Probationers." The former are divided into three classes:—

The class in which each Teacher is ranked depends upon his or her qualifications, as determined after examination by the Professors, or by the Inspectors.

All Teachers, on first entering the service of the Board, or who have not been classed, are termed Probationers.

There are, also, Assistant-Teachers, Teachers of Needlework, Paid Monitors.

2. The Commissioners have determined upon a course of study for each class, in which the Teachers are to be examined, as a test of their fitness for promotion.

3. Every National Teacher will be furnished, on application to the District Inspector, with a copy of the programme of the course of study above referred to, in which is stated the minimum of proficiency required for each class.

4. No Teacher will be admitted to examination with a view to promotion, on whose School a decidedly unfavourable report has been made by the District Inspector within the previous year.

5. Teachers will not be eligible for promotion, unless, in addition to satisfactory answering in the course prescribed for the Class to which they aspire, it appears from the reports of the respective District Inspectors, that the Schools are properly organized and well conducted; that adequate exertions have been made to keep up a sufficient average attendance; that the junior classes are carefully taught, and that a fair proportion of the pupils of the higher classes, besides being proficients in the ordinary branches of Reading, Spelling, and Writing, are possessed of a respectable amount of knowledge in, at least, Grammar, Geography, and Arithmetic. In Female Schools it will be further requisite that instruction in plain Needlework, including sewing, knitting, and cutting-out, be given to all girls capable of receiving it, and that they exhibit a due proficiency in this department.

6. It must also appear from the reports of the Inspectors, that the School accounts have been regularly and correctly kept; that the School premises have been preserved with neatness and order, and that cleanliness in person and habits has been enforced on the children attending them.

7. The Head and District Inspectors are authorized to recommend that such Teachers be removed, fined, or lowered in their classification, as may have conducted themselves improperly, or in whose Schools the attendance has considerably decreased, or who, from any other cause, may seem to these officers to merit such punishment.

8. All Teachers, who have not been classed, will be paid as Probationers, until they be classed at the first General or Special Examination, to which they shall have been summoned. Those who then obtain classification, will be paid from the commencement of their service under the Board, according to the rate of salary attached to their class. This rule will not extend to any Teachers who when summoned, shall fail, from any cause whatever, to present themselves for examination. No unclassed Teacher shall receive salary from the Board until he or she have been examined, and pronounced qualified by one of their officers. If pronounced unqualified, no salary will be paid.

9. All Teachers, not previously classed, who shall be summoned to a course of

training, are to undergo a preliminary examination on their arrival in Dublin; and if then classed, shall receive the benefit of *such classification*, from the date of appointment to the date of the termination of the course of training; and they will receive the benefit of any promotion obtained at their second classification at the termination of the course, from the latter date.

10. All Teachers who have been unsuccessful at their first examination, and who may be retained on trial, will receive the salary of the class to which they may be promoted at any subsequent examination, from the commencement of the quarter in which their classification shall be determined.

11. Teachers who, after their first examination, have been retained on trial as Probationers, if not recommended for promotion by the Head or District Inspectors, at the next ensuing examination, or by the Professors, after training, cannot be continued in the service of the Board; but their salaries will be paid for one month subsequent to the date of dismissal.

12. All Teachers newly appointed to National Schools, who, after examination by the Inspectors, may be found wholly unqualified, must be removed from the School; but Salary will be paid, at the rate of a Probationer, up to the date of the order for removal.

13. If a Teacher who has been dismissed from a National School for any cause, be appointed to another National School, the Commissioners reserve to themselves the right to determine whether the appointment can be sanctioned, or any salary paid to such Teacher. Teachers who may be dismissed for incompetency shall not be eligible for re-appointment for at *least six months* after the date of his or her dismissal.

14. If a Teacher who has been a considerable period out of the service of the Board, shall again enter it, the Commissioners reserve to themselves the right to determine, in each case, whether such Teacher shall retain the class he was in, previous to quitting the service of the Board.

15. The Pupil-Teachers of District Model Schools, on taking charge of National Schools after the completion of their course of training, shall rank as Third Class Teachers (provided they be deemed qualified for that class by the Head Inspector) until they shall have been classed at the first General or Special Examination held after their appointment, in the district in which their Schools are situated, when they will be paid according to their classification, from the date of such examination.

16. All Teachers must remain at least one year in a lower division of any class, before they are eligible for promotion to a higher division; and they must remain two years in the same class before they can be promoted to a higher class. These conditions, however, being fulfilled, Teachers of superior attainments may be advanced from any division of one class to any division of another after their first classification (except untrained Teachers who cannot be placed in the first class) without being required to pass through the intermediate divisions: such promotion to date from the 1st of April in the year in which the examinations are held.

17. This regulation does not apply to Teachers who may be promoted on the recommendation of the Professors at the termination of their course of training.

18. No Teachers can be raised to any division of the First Class, unless they shall have been trained at the Normal School of the Commissioners, and recommended for promotion by the Professors.

19. Trained Teachers, except at their own request, and with the sanction of the District Inspector, will not be required to attend any examination that may be held during the three years subsequent to the date of their classification by the Professors at the expiration of the course of training.

20. National Teachers, forty-five years of age and upwards, who have served under the Board for a period of not less than fifteen years, or Teachers who have attained fifty years of age, and served not less than ten years, will not be required to attend any examination, provided they have been already examined and classed by the Professors, or by the Inspectors.

21. Teachers who may have absented themselves, without satisfactory reason assigned, from the examinations of previous years, will be liable to be dismissed should they not present themselves when again summoned.

22. All Teachers also who may be *specially* summoned, and who shall be absent without a sufficient reason, will be liable to be fined or depressed.

Appendix B.

Rules and Regulations of Commissioners.

PART III. § VI.

VI. *Scale of Salaries to Teachers, Monitors, &c.*

1. *Ordinary National Schools.*

I. The Commissioners grant salaries to Teachers of National Schools at the following rates, subject to the foregoing and annexed regulations:—

Principal Teachers:—	Males.	Females.				
First Class, 1st Division,	£52	£42	average attendance to be at least 35.			
First Class, 2nd „	44	36				
First Class, 3rd „	38	30				
Second Class, 1st Division,	32	26	do.	do.	do.	30.
Second Class, 2nd „	28	24				
Third Class, 1st Division,	24	20	do.	do.	do.	25.
Third Class, 2nd „	18	16				
Probationers,	15	14	do.	do.	do.	20.
Male Assistants:—						
Unclassed,	15	—	do.	do.	do.	60.
If classed 3²,	18	—				
If classed 3¹, or higher,	24	—	do.	do.	do.	65.
Female Assistants in Girls' and Mixed Schools:—						
Unclassed,	—	14	do.	do.	do.	50.
If Classed 3²,	—	16				
If Classed 3¹, or higher,	—	20	do.	do.	do.	55.
Workmistresses:—						
As Teachers of Needlework only,	—	8	do.	do.	do.	45.
Acting also as Junior Literary Assistants,	—	14				

In Schools where the average attendance amounts to 15, and is under 20, the Teacher is allowed only two-thirds of Probationary Salary; but to Schools whose average attendance falls below 15, aid from the Board is limited to Books and Apparatus, and the benefits of Inspection and Training.

2. The Commissioners require that a further income be secured to the Teacher, either by Local Subscription or School-fees, to such amount in each case as they may direct; and the Commissioners also require that the payments made by the Children shall not be diminished in consequence of any increase of Salary which may be awarded to the Teacher.

2. *Model Agricultural School Farms under exclusive control of the Board.*

Teachers of Model Agricultural Schools under the exclusive control of the Board, receive such amount of Salary as the Commissioners deem sufficient, according to the circumstances of each case.

3. *Model Agricultural School Farms under Local Patrons.*

Masters of Model Agricultural Schools under Local Patrons, who are competent to conduct both the Literary and Agricultural Departments, receive £10 per annum, in addition to the salary of the class in which they may be placed; but if their income from the Board, with this addition, should fall short of £30 per annum, the difference will be granted to them, so that in all cases, such Teachers shall have secured to them for their *combined* services a salary of £30 a-year at least.

4. *Ordinary Agricultural School Farms.*

Masters of Ordinary Agricultural Schools receive £5 per annum in addition to the salary of their class, provided they are competent to conduct both the Literary and Agricultural Departments, and that the Commissioners shall have previously approved of Agriculture being taught in the School.

5. *Assistant Teachers.*

1. The Commissioners will not grant a salary to a male Assistant Teacher in any School in which there is not an average daily attendance of at least sixty pupils for three months previous to the date of application; nor to a female Assistant, unless there appears an average attendance of at least fifty, during a similar period. In Schools whose respective average attendances do not rise considerably above these, and which are already provided with Paid Monitors, Assistants cannot be recognised by the Board.

2. Assistant Teachers will not be sanctioned whose qualifications are not at least equal to those required of Probationers, or who are under eighteen years of age.

6. *Workmistresses.*

1. The Commissioners will not grant salary to Workmistresses, unless there be a sufficient average daily attendance of pupils; and the Commissioners require that at least two hours each day be devoted to instruction in this branch.

2. If any Workmistress whose appointment has been sanctioned by the Commissioners, be employed during the remainder of the ordinary school-hours in giving literary instruction to the junior classes, it is competent for the District Inspector, if he considers her qualified, to recommend that she be paid at the rate of salary awarded to "Probationers:" any increase of salary granted under this regulation is not to have a retrospective effect.

3. In Schools attended by Female Children only, under the care of a Female Teacher, such Teacher must be competent not only to conduct the Literary Department, but also to give instruction in Needlework: but if the average daily attendance of girls exceed fifty, for a period of three months, application may be made for a grant of salary to a Workmistress to take charge of the Industrial Department, which, however, must be superintended by the principal Teacher, who will be held responsible for its efficient management.

7. *Industrial Schools.*

In National Schools where embroidery and other advanced kinds of needlework are taught, the amount of salary granted for giving such instruction is regulated by the nature of the work, and the number of pupils engaged in it subject to the conditions set forth in Part II., Sec. 8.

8. *Schools connected with Convents, Monasteries, &c.*

1. In Schools of this description, salary is paid according to a per centage on the average daily attendance:—

Average Attendance.			Salary. £		Average Attendance.			Salary. £ s.	
30	to	50	10	Increase at £20 per cent.	301	to	325	64 5	Increase at £17 per cent.
51	„	75	15		326	„	350	68 10	
76	„	100	20		351	„	375	72 15	
101	„	125	25		376	„	400	77 0	
126	„	150	30		401	„	425	81 5	
151	„	175	35		426	„	450	85 10	
176	„	200	40		451	„	475	89 15	
201	„	225	45		476	„	500	94 0	
226	„	250	50		501	„	525	98 5	
251	„	275	55		526	„	550	102 10

					576	„	600	111 0	

601 upwards, increase at £15 per cent.

2. As the amount of salary to Schools of this class will in all cases depend upon the average daily attendance of pupils, Managers are to be prepared for augmentation or diminution accordingly, at the expiration of each quarter.

9. *Paid Monitors.*

SALARIES.

Senior Monitors.		*Junior Monitors.*	
For the First Year,	£5	For the First Year,	£2
For the Second Year,	£6	For the Second Year,	£3
For the Third Year,	£8	For the Third Year,	£4
For the Fourth Year,	£10		

1. The Paid Monitors are selected from among the best pupils in the National Schools of each district, and are appointed by the Commissioners upon the recommendation of the District Inspectors.

2. No Manager of a National School is obliged to employ the services of a Paid Monitor, unless he wishes to do so.

3. The appointment of a Junior Paid Monitor cannot be held for a longer period than THREE YEARS, nor that of a Senior Paid Monitor for more than FOUR YEARS, at the expiration of which the salary will be discontinued.

4. The salary may, however, be withdrawn at any time, should want of diligence, of efficiency, or of good conduct on the part of the Monitor, or should any other circumstance, render such a course desirable.

5. The Commissioners select the Schools (on the recommendation of the Inspectors) in which the services of Paid Monitors may be employed.

6. When a vacancy occurs, whether before or after the expiration of their term of service, it does not necessarily follow that a successor shall be appointed in the same School.

Appendix B.

Rules and Regulations of Commissioners.

PART III. § VI.

7. The School for which a Paid Monitor is recommended by the Inspector should exhibit a tolerable degree of efficiency, should have a sufficient average attendance to require a Paid Monitor; but no School whose Teacher does not rank at least in 3[1] Class can get the benefit of the services of a Junior Monitor, nor can any School whose Teacher ranks not at least in 2[2] Class be allowed services of Senior Monitor.

8. The Programme of the course of study for Paid Monitors can be obtained on application to the District Inspector.

9. Paid Monitors who have completed their course in a satisfactory manner, are eligible, on examination by the Inspectors, as candidates for the situation of Assistant Teachers, or of Pupil-Teachers in District Model Schools.

10. *Scale of Gratuities to Literary Teachers of Workhouse Schools.*

1. The Commissioners of National Education (with the concurrence of the Poor Law Commissioners) award gratuities to a certain number (forty males and forty females) of the Teachers of the Workhouse Schools, in connexion with the National Board, who shall be recommended by the District Inspectors.

2. The gratuities are divided into two classes:—

For Male Teachers,	First Class,	Twenty	at the rate of £6	a-year each.
	Second Class,	Twenty	„ £4	„
For Female Teachers,	First Class,	Twenty	„ £5	„
	Second Class,	Twenty	„ £3	„

3. The awards are made half-yearly, for the periods ending 31st March, and 30th September.

4. It is to be understood that such gratuities are given in *addition* to the salaries paid to the Teachers of Workhouse Schools, under the provisions of the Poor Law Act.

5. No Teacher is precluded from receiving the gratuity two or more half years in succession, if recommended by the District Inspector as deserving of it; but a Teacher having received a gratuity for one half year, is not thereby *entitled* to the payment of another for the succeeding half year.

6. If the Local Guardians know any just cause for withholding the gratuity from the Teacher, they are to return the receipt unsigned, and communicate to the Commissioners of National Education the grounds for so doing.

11. *Gratuities to Agricultural Teachers of Workhouse Schools.*

The Commissioners award annual gratuities to Agricultural Teachers of Workhouse Schools, not exceeding £15 to each, on conditions stated in Part II., Sec. 6.

These gratuities are granted on the recommendation of the Agricultural Inspectors.

12. *Scale of Premiums to Masters and Mistresses of National Schools; Vested and Non-vested, who are most distinguished by the Order, Neatness, and Cleanliness observable in themselves, their pupils, and in the School-houses.*

1. The sum of £22 10*s.* will be allocated to each of the School Districts, and divided into Thirteen Premiums.

One of £4	£4	Five of £1 10*s.*	£7 10*s.*
Two of £3	£6	Five of £1	£5

2. These Premiums are awarded ANNUALLY on the recommendation of the District Inspector, at the expiration of the year.

3. No Teacher is eligible for this Premium for more than two years in succession, or who shall be in receipt of Good Service salary.

4. These Premiums will be awarded without reference to the Class in which the Teachers may be placed; but none will be deemed eligible to receive such Premiums against whom there is any well-founded charge of neglect in the performance of their duties, of impropriety in their conduct, or whose Schools are not conducted in a satisfactory manner.

5. If the Patron or Manager of a National School knows any just cause for withholding the Premium from the Teacher, he is to return the receipt unsigned, and state his reasons for so doing.

13. *Scale of Salaries to Head Masters and Mistresses of Model Schools.*

The head master to receive £60 per annum, and after the completion of three years' service to rise by £5 per annum, until the salary amount to £100, should he be reported faithful and efficient in the discharge of his duties.*

The head mistress to receive £55† per annum, and after three years' service to rise by £2 10*s.* per annum, on the same condition as in the case of males, and until the salary amount to £75 a-year.

Principals, both males and females, enjoy also one-half the school-fees received in their respective departments.

14. *Scale of Salaries and Allowances to Assistant Masters and Mistresses in District Model Schools.*

An assistant master to receive his class salary, one-fourth of the school fees, and a supplemental salary of £16 per annum.

An assistant mistress to receive her class salary, one-fourth of the school fees, and a supplemental salary of £12 per annum.

The maximum of the class and supplemental salaries to be £58 a-year for a master and £46 a-year for a mistress.

The grant of such supplemental salaries to be contingent upon the Report of the Head and District Inspectors.

15. *Scale of Salaries to Paid Monitors in Model Schools.*

First Year,	£6	Third Year,	£10
Second Year,	8	Fourth Year,	12

16. *Allowances to Teachers of District Model Schools who, possessing Certificates of Competency, shall give Instruction in Singing, Drawing, or Physical Science.*

The head master or mistress to be allowed £10 annually, but to be paid for teaching only *one* of these subjects.

The assistant master or mistress to be allowed for

Singing,	£8
Drawing,	8
When both are taught,	12
And an Assistant Master for teaching Physical Science,	8

When the assistant teacher is engaged in teaching both physical science and *either* drawing or singing (for not more than *two* of these extra branches are to be taken by the same assistant), a sum of £12 annually to be granted to him.

These allowances to be contingent upon the Report of the Head and District Inspectors.

17. *Gratuities to Pupil-Teachers and Paid Monitors in Model Schools.*

An annual gratuity not exceeding 30*s.* may be awarded to pupil-teachers (of *first* year) and paid monitors for good conduct, distinguished merit in their studies, and success in the instruction of the classes intrusted to their charge. Pupil-teachers who may be retained for training beyond their first year, will be allowed a gratuity of 30*s.* a quarter, as reward for good conduct, &c.

These gratuities are granted on the recommendation of the Head and District Inspectors.

18. *Scale of Supplemental or Good Service Salaries to Teachers of Ordinary National Schools.*

Supplemental or Good Service Salaries are awarded to a certain number of Teachers of National Schools on the recommendation of the Head and District Inspectors, subject to the following conditions:—

1. That the teacher ranks not lower than First Division of Third Class.
2. That the average attendance at his school amounts to thirty-five at least.
3. That teacher has given not less than eight years' service under Board, period of service to be reckoned from the date from which salary as a Classed Teacher was first paid.

* In case of head masters of model schools residence is provided, or in lieu thereof, allowance for house rent.

† This includes £20 a-year for lodging allowance.

Appendix B.

Rules and Regulations of Commissioners.

PART III. § VI.

4. No teacher to be eligible for such Supplemental Salary who shall have been depressed or fined for misconduct or neglect of duty, or on whose school a decidedly unfavourable report shall have been made, or who shall not have shown himself, throughout his whole career, to have been attentive and painstaking, and mindful of all the details of school-keeping.

5. Any teacher to whom such Good Service Salary shall have been awarded, but who shall subsequently cease to exhibit those qualities which first obtained for him this distinction, or whose school shall fall below an average daily attendance of thirty-five pupils, shall thereby forfeit such Supplemental Salary.

6. Teachers in receipt of Good Service Salary who may become entitled to an increase, on the ground of a more lengthened term of service, or on account of promotion to a higher class, must be specially recommended by Inspector for such increase.

7. In case of promotion from a lower to a higher class, teacher will not be entitled to the consequent increase of Good Service Salary until he shall have been a year in his new class.

Payments to be made annually; and in no case without the united recommendation of the Head and District Inspectors.

19. *Allowances to Teachers of Ordinary National Schools for teaching Drawing, Singing, and Navigation.*

To every teacher, possessing a certificate of competency, who shall give instruction in vocal music in his school, a gratuity ranging from £2 to £5 a-year, according to the number under instruction and the success of the teacher's efforts.

To every teacher possessing a certificate of competency from the drawing-master in the Central Model School, or from the master of a school of Art, who shall give instruction in drawing to a class with sufficient average attendance, an annual gratuity, varying from £3 to £10, according to the number under instruction and the success of the teacher's efforts.

To every teacher of a National school, possessing a certificate of competency from the masters of the Belfast, Limerick, or Waterford Model Maritime Schools, who shall give evidence of having an average attendance of at least six pupils under instruction in navigation, an annual gratuity of £5 for an attendance of six pupils, and £10 for an attendance of twelve or more.

20. *Gratuities to Teachers for Instructing Paid Monitors.**

		£	s.	d.
Senior Monitors,	For each monitor of 1st year a gratuity of	1	0	0
	do. of 2nd year do.	1	10	0
	do. of 3rd or 4th year, do.	3	0	0
Junior Monitors,	For each junior monitor a gratuity of	1	0	0

21. *Gratuities to Teachers of Organized Schools who give Extra Instruction to a Staff of Unpaid Monitors.**

A gratuity not exceeding *four pounds* may be awarded to teachers of organized schools, who shall give *extra* instruction to a staff of *unpaid monitors* appointed by Inspector or organizer.

No gratuity can be awarded unless the answering of the class of monitors be

found superior, and that such answering can be fairly referred, in great part at least, to the care bestowed by the teacher during time of such special instruction. *Appendix B.* Rules and Regulations of Commissioners.

Teachers must also, to entitle them to such gratuities, keep a record of the time devoted by them to the monitors' instruction.

22. *Gratuities to Teachers for Training Schoolmasters.** PART III. § VI.

For every pupil who, after having been appointed to a school, shall pass respectably the *first* annual examination, held subsequently to such appointment, the master or mistress by whom such pupil shall have been trained will be entitled to a sum of not less than £2, and not more than £3; but in no year is the amount to exceed £15 to any one school or teacher as the reward of such services.

The conditions to be observed in regard to the gratuities are—

I. That such pupil shall have attended in the school not less than two consecutive years immediately preceding his or her appointment as a teacher.

II. That the District Inspector shall certify that the school in which such pupil shall have been trained is efficiently conducted in all other respects.

III. That the Head Inspector before whom such pupil shall have been examined shall certify that the teacher is entitled to the gratuity.

IV. That not more than twelve months shall have elapsed between such pupil's first examination and the date of his leaving the school of his former instructor.

23. *Gratuities to Teachers from whose Schools shall proceed eligible Candidates for the Office of Pupil-Teacher in Model Schools.**

A gratuity not exceeding £2 may be awarded to teachers from whose schools shall proceed eligible candidates for the office of pupil-teacher in the Model Schools.

The conditions to be observed in regard to these gratuities are—

I. That such pupil shall have attended in the school not less than two consecutive years immediately preceding his appointment as pupil-teacher.

II. That the District Inspector shall certify that the school in which such pupil shall have been trained is efficiently conducted in all respects.

III. That the Head Inspector before whom such pupil shall have been examined shall certify that the teacher is entitled to the gratuity.

VII. *Training of Teachers.* § VII.

1. The Commissioners have provided a Normal Establishment in Dublin, for training Teachers, and educating persons who are intended to undertake the charge of Schools.

2. Teachers selected by the Commissioners for admission to the Normal Establishment, must produce a Certificate of good character from an officiating Clergyman of the communion to which they belong; also, a Certificate from a member of the Medical Profession that they are in good health, and free from any cutaneous disease; and must pass through an examination in the Books published by the Commissioners. They are boarded and lodged at the Establishments provided by the Commissioners for the purpose. They receive religious instruction from their respective Pastors, who attend at the Normal Establishment at convenient times appointed for the purpose. On Sundays they are required to attend their respective places of worship; and a vigilant superintendence is at all times exercised over their moral conduct. The Teachers undergo a final examination at the close of the course, and they then receive a certificate according to their deserts. The Teachers for a considerable time previous to their being summoned are required to prepare themselves for the course.

3. During the absence of the recognised Teacher, a temporary Teacher must be provided to take charge of the School, who is to be paid a portion of the salary falling due to the recognised Teacher during his or her attendance at the Normal Establishment.

4. Should any Teachers present themselves in a delicate state of health, or

* Teachers of Model Schools are excluded from obtaining this class of gratuities.

Appendix B.

Rules and Regulations of Commissioners.

affected with any cutaneous disease, they will be required to return home at their own expense. No Teacher can be admitted who has not had the Small-pock, or been vaccinated.

5. The Teachers trained in the Normal Institution are divided into three Classes, namely:—

PART III. § VII.

First—The General or Ordinary Class, composed of Teachers (males or females) of National Schools who have been recommended by the District or Head Inspectors as eligible Candidates for Training.

Second—The Special or Extra Training Class, composed chiefly of Teachers (males or females) who have been selected from the Ordinary or General Class, for additional Training.

Third—The Candidate or *Extern* Class is composed of a limited number of respectable and well-informed young persons, who wish to qualify themselves to act as Teachers. The Candidates admitted to this Class are permitted to attend, without any charge, the Model Schools and the Lectures of the Professors, and at the end of the course they are examined and classed as Teachers according to their merits and qualifications. Permission is also given to Teachers of Schools not connected with the Board to attend the Model Schools as *Auditors* or *Visitors*, for any period that may suit their own convenience.

§ VIII.

VIII. *Books.*

1. The Commissioners furnish gratuitously to each School a first Stock of School-Books, in proportion to the attendance of Children, which is renewed at the end of every three years. These books are to be kept as a School Stock, for which the Master or Mistress is held responsible, and they are on no account to be sold or taken out of the School. The Commissioners also supply Books from time to time for the general use of the Children, and also School Requisites, such as Paper, Slates, Quills, &c., at reduced rates.

2. The funds of the Commissioners do not enable them to give a Free Stock sufficiently large for the entire wants of the School. Any additional books, and maps, stationery, slates, clocks, and other requisites, must be purchased at reduced rates.

3. The value of the grant of Free Stock is regulated by the average daily attendance of Pupils as ascertained from the reports of the Inspectors. The Managers of Schools have the privilege of selecting their grants of Free Stock from the *whole* list of books supplied by the Commissioners, and are at liberty to choose such of them as they most approve of, and to omit any to which they object, except in the case of a *first Free Stock*, when the Commissioners require that a map of the world and a set each of spelling and arithmetical tablets shall be procured.

4. When Books, &c., purchased from the Commissioners at the reduced price, are sold to the children attending a National School, it is directed that in no case shall any advance be made on these prices; and the District Inspectors have instructions to inquire into and report upon any infraction of this rule.

5. Books Published by the Commissioners of National Education:—

First Book of Lessons.
Second do.
Sequel to Second Book, No. 1.
Sequel to the Second Book, No. 2.
Third Book of Lessons.
Fourth do.
Supplement to the Fourth Book.

Do. Geography Generalized.	Do. Zoology for Schools, Part I.
Do. Literary Class Book.	Do. do. Part II.
Fleming's Atlas of Outline Maps, coloured.	Dr. Thomson's Treatise on Arithmetic.
Dower's Atlas, 12 Maps, coloured.	Do. Key to do.
Kirkwood's Atlas, 12 Maps, coloured.	Do. Elements of Euclid, Part I.
Dawes' Hints on Secular Instruction.	Do. do. Part II.
Dr. Hodges' Agricultural Chemistry.	Do. Introduction to Algebra.
Easy Lessons on Reasoning.	Arithmetical Table Book.
Easy Lessons on Money Matters.	Hullah's Manual.

7. THE COMMISSIONERS WILL NOT WITHDRAW, OR ESSENTIALLY ALTER ANY BOOK THAT HAS BEEN, OR SHALL BE HEREAFTER, UNANIMOUSLY PUBLISHED OR SANCTIONED BY THEM, WITHOUT A PREVIOUS COMMUNICATION WITH THE LORD LIEUTENANT.

8. All applications for Books and Requisites at reduced prices must be addressed to the Secretaries, and be accompanied by a Money Order for the amount, in favour of MAURICE CROSS, or JAMES KELLY, Esq., and PAYABLE IN DUBLIN ON DEMAND.

9. Cheques or Money Orders drawn on Country Banks cannot be received in payment for Books.

10. When a Post Office Order or Letter of Credit is transmitted, and the amount is under TEN SHILLINGS, the cost of the remittance must be paid by the Person applying for the same; but if the sum exceeds TEN SHILLINGS, the cost of the remittance will be allowed, and Requisites given for the *full amount* PAID.

11. The Patron or Manager should not sign any Application for Books and Requisites without first ascertaining that they are actually wanted for the School on behalf of which the application is made. The Inspectors are required to report to the Commissioners whenever it appears that an undue quantity of Books or Stationery has been ordered for a National School.

12. When there are separate ROLL NUMBERS for Male and Female National Schools, the application should state for which of them the Books, &c., are required; and if for both, *two* forms should be used.

13. Parcels of Books, &c., when so desired, will be forwarded, carriage free, to the Depôt of the District in which the School for which the Books are required is situated, and the Inspectors will inform the Managers on what day they will be ready for delivery; or to the Depôt of any other District if more convenient; but in the latter case, the Inspector, not knowing the Managers of any Schools out of his District, cannot give notice.

14. Or the Parcel will be forwarded to any place nearest to the Manager's residence to which there is a mode of conveyance. In this case the Manager must point out the precise mode of conveyance by which the Parcel is to be transmitted, and he must also defray the cost of carriage.

15. When Parcels are forwarded to the Depot of a District it is *not* the duty of the Inspector to transmit the Parcel to the Manager's residence or to the School.

16. The Manager is required to send to the Depot on the day appointed by the Inspector for delivery of parcels, a Messenger, who must present the order on the Inspector, with which the Manager will be furnished; and which order the Inspectors are required to transmit to this Office as a proof of the delivery of the Parcels.

17. If a Parcel is to be sent by a Carrier, he must call at the Office in Dublin not sooner than two days after the Manager's directions shall have been received, and must produce the Manager's order to the Storekeeper here, for its delivery, on the form supplied for the purpose.

18. The Commissioners do not supply Books or Requisites to the public, or to Schools not connected with the Board of National Education.

IX.—*Miscellaneous.* § IX.

1. Persons desirous of obtaining assistance from the Commissioners of National Education, under any of the foregoing heads, will, upon intimating to the Secre-

Appendix B.
Rules and Regulations of Commissioners.
PART III. § IX.

taries the nature of the aid required, be furnished with the Forms, upon which their application must be laid before the Commissioners.

2. Applicants for assistance are not to understand that the Commissioners are bound to grant the full amount of aid, as set forth in the foregoing Regulations, in every case; nor can they grant any, unless they have sufficient funds for the purpose, which depends upon the amount placed at their disposal by Parliament.

3. The Commissioners desire it to be distinctly understood, that they do not hold themselves bound to grant aid, unless application shall have been made to them in the first instance, on the proper form, and unless the application shall have been favourably and finally decided upon by the Board. Applicants, therefore, should not incur any expense towards the payment of which they expect the Commissioners to contribute, until the decision of the Board shall have been communicated to them.

4. All communications in reference to National Schools should be signed and made by the Patron or Manager. The Commissioners do not correspond with Teachers of National Schools.

5. No attention can be paid to "anonymous" communications.

6. All letters, or other communications, in any manner relating to the business of the Board, or to the National Schools, are to be addressed to the Secretaries, and not to any other Officer or person connected with the Board.

7. All letters, &c., to be directed as under.*

* *The Secretaries,*
Education Office,
Marlborough Street,
Dublin.

Correspondents are requested to attend to the following directions, viz.:—

1. To write at the head of any letter addressed to this Office the name of the School referred to, and the county in which it is situated.
2. To make communications on different subjects in separate letters.
3. To state in every case the writer's Post Town; and, in the case of persons whose names are not recorded as Patrons or Managers of Schools, to give the name and style of address in full.
4. In replying to an Official letter, to quote its number and date.
5. It is particularly requested that all letters may be written clearly, and on paper of Foolscap size, or, at least, large-sized letter-paper.

By order of the Commissioners of National Education,

MAURICE CROSS, JAMES KELLY, } *Secretaries.*

Education Office, Dublin,
1859.

The Commissioners of National Education having deemed it advisable, in compliance with instructions of the Lords of Her Majesty's Treasury, to compress the Appendices to their Annual Reports within the narrowest limits, do not consider it necessary to reprint the following documents, which will be found in previous Reports.

Letters from Lord Stanley, when Chief Secretary of Ireland, on the Formation of a Board of Commissioners for Education in Ireland; also a Document Explanatory of the Conditions contained in those Letters—

No. 1. Original Draft of Lord Stanley's Letter, *see 21st Report, p.* 87, *Vol.* i.
No. 2. Copy of Amended Letter from Lord Stanley, „ „ „ 91, „
No. 3. Explanatory Document, „ „ „ 94, „
Forms of Leases and Assignment, *22nd Report, pp.* 62 to 75, *Vol.* i.
Charter of Incorporation, „ „ „ 75 to 78, „
Book and Free Stock List, „ „ „ 78 to 83, „
Official Forms:—Inspectors' Reports and Forms of Application for Aid, „ „ „ 83 to 129, „
Practical Rules for Teachers, „ „ „ 121, „
Programmes of Instruction for Pupils in National Schools, „ „ „ 122, „

APPENDIX C.

Appendix C.

I.—Head Inspectors' Reports on District Model Schools.

I. Reports on District Model Schools.

No. 1.—Annual Report upon the Inchicore Railway Model School, for the year 1860, by W. H. Newell, esq., ll.d., t.c.d., Head Inspector of National Schools.

Inchicore.

Gentlemen,—I have the honour to submit to you, for the consideration of the Commissioners of National Education, my annual report for the year just closed, upon the above-named school.

This school has, I hope, passed through its severest trial. Immediately after the public examinations of 1859, an active, and for some months a successful opposition was organized against it. The opposition assumed a practical character. Schools were established within a few hundred yards of the institution, on either side, one for elementary English, and the other for classical and English instruction. The effect at first was to draw away about thirty per cent. of the boys, who were accompanied in many instances by their sisters. The opposition was chiefly directed against the male department, but since July last the numbers in attendance have increased, and in the week preceding Christmas were very nearly as large as in the same week of the year 1859. The decrease in the whole year will be seen from the annexed figures:—

	Average on Rolls.				Average Daily Attendance.			
	Boys.	Girls.	Infants.	Total.	Boys.	Girls.	Infants.	Total.
1859, . . .	104·7	60·0	61·0	225·7	83·2	43·0	45·6	171·8
1860, . . .	78·3	52·6	58·6	189·5	61·5	37·7	44·8	144·0

The decrease in the numbers, both on the rolls and in average daily attendance, amounts to 16·1 per cent., so that the pupils attended equally regularly in both years.

The school is situated in a locality inhabited by a mixed population, fairly represented in the children's attendance. The numbers on the rolls on the 31st December, 1860, of each denomination, were as follows:—

	Males.	Females.	Infants.	Total.
Established Church, . . .	32	24	27	83
Roman Catholics, . . .	48	23	30	101
Presbyterians, ...	6	1	–	7
Total, ...	86	48	57	191

The school is visited occasionally by Roman Catholic clergymen, and weekly by Presbyterian and Church of England clergymen, who give special instruction to the children of their respective flocks. I am assured that there is much religious earnestness among the pupils, and I believe that harmony and Christian charity prevail throughout this whole institution.

Appendix C.

I. Reports on District Model Schools.

Inchicore.

The children on the rolls on the 31st December were classed as follows:—

Subjects.	Boys.	Girls.	Infants.	Subjects.	Boys.	Girls.	Infants.

				Drawing,	30	30	–

It appears from this table, that only 1 in 14·3 of the boys had attained to the Fourth Book of Lessons, and 1 in 6 of the girls; or more than twice as many. The latter attend much more regularly than the boys, and for a much longer period. The average age of the boys in this class was only 12·8, while that of the girls was 14·2 years. All these girls are candidates for employment as pupil-teachers or paid monitresses in the Board's service, while none of the boys are disposed to become teachers.

Boys are now taken into the Inchicore works at ten years of age, if only able to write their names, and their employment at this early age is regarded by most of the parents as a great privilege. Accordingly few boys remain at school when they reach the age of ten years. The provisions of the Factory Bill should be applied to all such establishments as that at Inchicore, and children under twelve years of age should receive instruction daily, for the specified time, in a school on the premises, or in this school, which is sufficiently convenient. The Directors of the Southern Railway have manifested no interest in this establishment, which was specially opened for the education of the children of their operatives. To the diligence and unflagging industry of the head master may be attributed the measure of success to which the school has attained.

I have this year to report favourably of the exertions of the principals in the girls' and infants' departments. These teachers have endeavoured to remove the bad impressions made by their previous inattention, and they seem to have at length learned that nothing but industry and efficiency will satisfy the Commissioners.

The District Inspector, Mr. O'Carroll, and I, held the annual examination of pupils early in November last. We went through the business of each class carefully, examining the pupils on the several subjects prescribed in the school programmes, and keeping a record of the number of questions answered by each pupil. I spent six, and Mr. O'Carroll two days at this examination. As it was the first annual examination held by Mr. O'Carroll, he was not in a position to contrast the answering of the pupils this year with their answering in 1859; but I can state, that in the classes examined by me—and they constituted three-fourths of the whole—a very decided improvement was manifest. The condition of the boys' school was, relative to the ages and attendance of the pupils, generally satisfactory, and in the girls' school, too, progress was visible, although the junior classes were not proficient in a few subjects, to which we directed the special

attention of the head mistress. In the fifth class of girls there were two who acquitted themselves so cleverly that one was appointed a monitress in this school at a salary of £10 per annum, and one a pupil-teacher in the West Dublin Model School, at a salary of £20 per annum.

The progress, as estimated by the number of promotions from class to class during the year was, in the boys' department, very considerable, but in the girls', I have nothing deserving of commendation under this head to record. There were, however, some promotions among the females, too, but the number was not large.

Plain needlework—for the mistress can give instruction in no other kind—has latterly received due attention; but it is to be regretted that the senior girls have not an opportunity of learning fancy work also, which is a branch of industrial education that should, in some of its departments, be understood by every clever needlewoman.

The progress made in singing, by both boys and girls, is satisfactory, but of the theory less is known than is desirable. The pupils have learned a great many very beautiful songs, and several of these are sung in parts. The assistant master has, himself, a fine appreciation of good music, and he instructs with a love of his subject.

Drawing has been taught on three days, weekly, for one hour each day. The progress appeared to me commensurate with the time devoted to the subject; but I have made arrangements, by which I hope to test more accurately than hitherto, both in this and in other Model Schools, the progress of the pupils and the value of the teachers' labours.

The Commissioners having been pleased to place the sum of £10 at my disposal, for premiums to the pupils, of which I distributed only £8 6*s*. The boys received £3 14*s*.; the girls £3 1*s*.; and the infants £1 11*s*. Of the last sum, £1 was for confectionery. The usual parchment certificates accompanied each sum of money.

Every year proves that the distribution of prizes is a useful practice. The hope of reward stimulates the pupils to application, and excites a wholesome rivalry among them, while the Inspector is obliged to examine the classes minutely, in order to be able to determine who is the best scholar, and to satisfy the parents that the examination is searching and impartial.

I have the honour to be your very obedient servant,

W. H. Newell, Head Inspector.

The Secretaries.

No. 2.—Annual Report on the West Dublin Model National School, for the year 1860, by W. H. Newell, esq., ll.d., t.c.d., Head Inspector of National Schools. *West Dublin.*

Gentlemen,—I have the honour to submit my annual report for the year 1860, upon the West Dublin Model National School.

During the last eleven months of the year 1860 the attendance was larger than for the corresponding months of the year 1859, but the attendance in January, 1860, was considerably smaller than in the same month of the year 1859, in consequence of the prevalence of epidemics. The average number of pupils on the rolls and in daily attendance during both years, will be seen from the following table:—

Departments.	Average No. on Rolls.		Average Daily Attendance.		School Fees.	
	1859.	1860.	1859.	1860.	1859.	1860.
					£ s. d.	£ s. d.
Boys,	351	335	261	256	137 11 9	138 7 4
Girls,	322	319	231	223		
Infants,	268	282	187	194		
Total,	941	936	679	673	137 11 9	138 7 4

Appendix C.

I. Reports on District Model Schools.

The numbers in both years have, therefore, been, on the whole, nearly equal; but although the average on the rolls was only 936, there passed through the schools, besides this number, 1,101 children, so that 2,037 distinct children attended the establishment during the past year.

The highest averages were attained in October, and the lowest in January.

West Dublin.

	Average on Rolls.		Average Daily Attendance.	
	January.	October.	January.	October.
Boys, . . .	355	313	300	218
Girls, . . .	345	298	272	269
Infants, . . .	334	223	252	139
Totals, . .	1,034	834	824	566

The names of children absent one fortnight consecutively are struck off the rolls. It is found that about seventy-two per cent. of the children enrolled attend school daily, but the attendance is more regular in the boys' school than in the girls', and in the girls' than in the infants', the duties of home requiring the presence of the boys less than that of the girls, while the attendance of infants is affected at every season by severity of weather. The number of attendances made in every hundred open to the pupils of each department during the year 1860, was as follows:—

	Attendances in every 100.
Boys, ...	76·4
Girls, ...	69·9
Infants, ...	68·4

There is only one Model School connected with the Board, namely, the Belfast Model School, in which the attendance is as large as the attendance at this school, but there is no Model School in which the expenditure is so small in proportion to the numbers in attendance. However, there is no domestic or boarding department connected with this school, and the absence of such department lessens the expenditure considerably; but regarded merely as a day school, the staff is smaller, and the outlay less in proportion to the numbers taught, than in any Model School under the Commissioners' control. It is to be regretted that there is not a residence for the pupil-teachers, who would be more effectively taught as boarders than as externs. The instruction they receive is neither adequate to the demands made upon their powers as teachers, nor sufficient for their own personal improvement. This instruction is, however, in some cases supplemented by private study at home; but as a training school for male teachers, this Model School is very inferior to the District Model School.

The confidence of the parents in the *bonâ fide* character of the school, as one to which children of every persuasion may be sent without any risk to their faith, as well as in the abilities and efficiency of the teachers, never was greater than at present. Indeed, one cannot see how the public feeling could reasonably be other than favourable to the establishment. The teachers are industrious, effective, and conciliating, the school appliances are excellent, and the inspection frequent, while the religious education is strictly cared for by the parochial clergy of the Established and Roman Catholic Churches, who constantly visit the schools, and catechise the children of their respective congregations.

These schools are attended almost altogether by the children of labourers, mechanics, and small traders, and it is remarked by visitors that those pupils who remain in attendance for any length of time, exhibit in their demeanour, appearance, and even in their apparel, a most marked improvement.

In October, the District Inspector, Mr. O'Carroll, and I, held an examination of the classes, and although I was actively engaged from ten till three o'clock, and frequently till four o'clock, on twelve days, assisted by Mr. O'Carroll on five of these, I was unable to complete the examination of all the classes in every subject, so that I was obliged to have some of the junior classes examined by the teachers. There were 860 pupils present, but of these 277 were infants, and their examination occupied me only during two days. The examination of 313 boys and 270 girls I was unable to complete in ten days. From experience, I have found that in the ordinary National Schools an attendance of thirty children will occupy an inspector in their examination for two hours; and that

about four minutes is the average time required for the examination of every additional pupil up to sixty pupils, classed as they are in National Schools. But the subjects taught at Model Schools are more numerous than those taught in other National Schools, and the literary classification of the pupils is much higher, so that the examination of the classes is twice as tedious. I think it would not be possible for an inspector to examine 600 pupils carefully, and determine the merits of each, in fewer than twelve school days, of five hours each. I wish to put forward my views on this subject, because it may appear to those not conversant with the examination of classes in elementary schools, that inspectors are unnecessarily tedious in their operations.

The annexed table exhibits the classification of the pupils on the rolls at the time of the annual examination :—

The proportion of boys in the senior classes was much higher than in 1859, while that of the girls was lower. The fluctuations in the attendance, and the contingencies common to all large schools, entirely explain this change in the relative proportions. In both schools the teaching has been effective, and the progress of the children satisfactory. The provisions of the school programme are duly regarded, and the classes generally realize all that it is reasonable to expect from them. As I proceeded, I required the teacher, whose special province it was to instruct the division under examination, to listen attentively to the pupils' answering, and to note their defects, with a view to having them remedied. To the pupil-teachers and paid monitors, whose classes were well prepared, the Commissioners, on mine and the District Inspector's recommendation, awarded gratuities, varying from 10*s.* to 30*s.* There were only a few who did not receive gratuities. Certificates with sums of money were bestowed upon the most deserving pupils, and the competition for these rewards was, as it ever is, very keen and exciting. To enter into a detailed description of the answering in each subject would be only to repeat the language of former years, for a well conducted school presents little variety from year to year in the amount of instruction, or in the general result of the pupils' examination. Mr. Murphy, the head master, has spared no exertions in endeavouring to advance the literary and moral interest of the boys committed to his charge. Mrs. Kennedy has, by her energy and ability, made a reputation for her school, which is attended by girls from the most distant parts of the city; and the infant school,

Appendix C.
I. Reports on District Model Schools.
West Dublin.

owing to Miss Lavender's efforts and skill, continues in its wonted state of efficiency.

The introduction of harmoniums has saved much wear and tear of voice. The incessant *leading* of large masses of children, without the aid of an instrument, was most exhausting to the female teachers. Vocal music was effectively taught by Mrs. Hudson, from whom the girls had learned altogether ninety songs. I regret deeply that a fatal illness has deprived the school of her services.

I cannot speak favourably of the progress of singing in the boys' school.

In another extra subject, free-hand and ornamental, and in the boys' school architectural, drawing, the pupils have progressed fairly. Outlining and mapping have been skilfully taught.

The elements of some branches of physical science continue to be taught daily to the advanced boys. The subjects which occupied their attention during the past year were mechanics, the steam engine, hydrostatics, and pneumatics. The answering on these subjects was generally poor. The only boys who answered fairly were those who had prepared the subjects from text-books, the answering of the others going far towards establishing the assertion, that mere oral teaching is not adapted to the capacity of boys. Convenient text-books have recently been issued by the Commissioners, so that I expect to find the classes in physical science better prepared at my next examination.

On one day of the public examination, His Excellency the Earl of Carlisle, accompanied by the Marquess of Kildare, one of the Commissioners of National Education, honoured the establishment with his presence. His Excellency inspected the various departments, inquired into the history and statistics of the school, and heard several classes examined; and at the close of his visit was pleased to express himself in favourable terms of the whole institution. His Excellency's approbation was regarded by the teachers as a requital for their past labours, and as a stimulus to future exertions.

I have the honour to be your very obedient servant,

W. H. NEWELL.

The Secretaries.

Galway.

No 3.—ANNUAL REPORT, for 1860, upon the GALWAY MODEL NATIONAL SCHOOL, by W. H. NEWELL, esq., LL.D., T.C.D., Head Inspector of National Schools.

GENTLEMEN,—I have the honour to report that the condition of the several departments of the Galway Model National School during the year 1860 was highly satisfactory. Indeed, the establishment has entirely fulfilled the object of its foundation. The attendance was larger during the year just closed than in any year since the school opened; the proficiency of the pupils was generally as good as in the year 1859, and the public confidence in the management of the institution is at present greater than it ever was. It would be difficult to find, in my opinion, a better elementary English school. I certainly am not acquainted with any in which all the subjects prescribed in the curriculum for Model Schools are better taught. I had, during the past year, special opportunities of watching the working of all the departments, having resided for some months in Galway. I also devoted an unusually long period to the examination of the classes, having been prevented in 1859 from discharging this duty by illness.

The next table will show that the number of pupils on the rolls in 1860 was greater than in any year since the school opened in 1852. It would seem as if the people of Galway felt, in the ninth year of the institution's existence, that they enjoyed all the advantages which, in the year 1852, they hoped for; but, in fact, they enjoy a great many additional ones, as in the management of Model Schools and in the course of instruction a marked improvement has been made within the last nine years:—

Year.	No. on Roll.	Year.	No. on Roll.
1852,	304	1857,	256
1853,	263	1858,	267
1854,	273	1859,	273
1855,	223	1860,	322
1856,	227		

Galway.

The annexed table exhibits the attendance and school fees for each month of the years 1859 and 1860. In my report for the year 1859 I said that "probably the attendance at the boys' school reached its maximum during the year," but the numbers in 1860 were still higher than in 1859 :—

October,	131	41	62	234	130	67	78	278
November,	131	44	46	221	126	69	85	280
December,	123	43	43	209	126	64	82	272
Total Averages,	114	40	57	211	129	59	71	259

SCHOOL FEES RECEIVED.

	Boys.	Girls.	Infants.
	£ s. d.	£ s. d.	£ s. d.
1859,	79 12 4	23 7 11	26 19 11
1860,	90 10 2	35 5 0	33 9 11

From the foregoing table it appears that for each of the last ten months of 1860 the daily average in the girls' school was higher than the average on the rolls for the same months of 1859, while this is also true of the last two months of these years in reference to the infants' school. The increase in the attendance in each department in the year 1860, as compared with that of 1859, was as follows.

Appendix C.

I. Reports on District Model Schools.

Galway.

INCREASE PER CENT. IN 1860.

	Boys.	Girls.	Infants.	Total.
Average on Rolls, . .	11·8	37·2	16·4	65·4
Daily Average, . .	11·6	47·5	24·5	83·6

Not only has the attendance increased thus largely in every department, but in two—the girls' and infants'—the centesimal proportion present daily was, in the former case, 10·3, and, in the latter, 8·1 higher than in 1859.

In September I examined the classes very patiently in all the subjects referred to in the next classification table:—

LITERARY CLASSIFICATION of 346 Pupils.

Of the 159 boys enrolled, seventy-three—or nearly half of the whole number—and of the eighty girls, thirty-three—or one in 2·4—had attained to the senior classes. The average ages of the boys in these classes was 12·4 years, and of the girls 13·5 years. I regard these proportions and ages as evidences of the success of the establishment.

In the boys' department the general answering was good, but I cannot say that it was better than in 1859, and the progress made by the pupils relative to their ages and to their length of attendance was considerable. In estimating the progress made by pupils attending an elementary day school, the difficulties that beset the teacher should be remembered. The fluctuating character of the attendance, the admission of new and badly-prepared pupils, the departure of well-prepared ones, the admission to the senior classes few, but those to the junior classes many, are among the chief of these difficulties. Between the 1st January and the 3rd November, 1860, the numbers admitted to each class and struck off in the boys' school were as follow:—

Class.	Numbers. Admitted.	Struck off.
First, or lowest, . .	8	2
Second, ...	57	29
Sequel, ...	33	34
Third, ...	11	14
Fourth, ...	5	19
Fifth, ...	2	11
Total, . .	116	109

Thus, of 116 boys admitted only eighteen belonged to the senior classes, while of 109 struck off, forty-four belonged to these classes.

The girls' department was intrusted to a new head mistress, Miss Finnegan, early in 1860. She has effected a very decided improvement in the girls' answering, and, indeed, in the department generally. It is chiefly owing to her exertions, and to the confidence she has inspired in the parents, that the attendance has increased so largely.

The infants' department is in a most flourishing state, and is deservedly popular with the people of Galway. Miss Short is an indefatigable and very effective teacher.

On the 3rd November Mr. Wilson, District Inspector, and I held the annual public examination, kindly assisted, as in the previous year, by Professors Melville and Nesbitt, of the Queen's College. The answering gave great satisfaction to the large assemblage of persons present. The singing of the classes was by far the best I had ever heard, and the progress in vocal music since the previous examination reflected the greatest credit on Mr. Quin, whose promotion to an appointment at Kingstown has deprived the establishment of his valuable services. The proceedings were similar in all respects to those of former years, but passed off, if possible, with more *éclat*.

The character of the attendance is mixed, and fully represents the religious denominations in the town of Galway. Of the pupils enrolled on the 3rd November the numbers belonging to each profession were as follow:—

	Boys.	Girls.	Infants.	Total.
Established Church, . . .	21	14	26	61
Roman Catholics, . . .	131	62	76	269
Presbyterians, ...	6	4	3	13
Other Denominations, . . .	1	–	1	2

The pupil-teachers and paid monitresses, with one or two exceptions, have been earnest and studious. The latter were examined by myself in the course prescribed for third-class teachers. Their answering was respectable. There are among these young women some who will, probably, rise to the highest rank among the Board's teachers. The pupil-teachers, who are all resident, have been frequently examined by Mr. Wilson, whose vigilant superintendence, as District Inspector, has contributed largely to the efficiency of this establishment, and he reports favourably of their literary progress. The desire of young lads to obtain admission to the house as pupil-teachers is very great, and the candidates are numerous, far more numerous than in past years.

National education has taken firm root in the town of Galway. There are, in addition to the Model School, twelve other National Schools in the town and its vicinity, attended by 2,840 pupils; and the entire number of pupils enrolled at all the National Schools in November last was 3,174. Setting down the population at 22,000 souls, it will be found that about one in seven is in attendance at National Schools; and estimating the attendance at other schools at 300, the proportion of the population of all classes at school in Galway will be nearly one in six.

I have the honour to be your very obedient servant,

W. H. NEWELL.

The Secretaries.

Appendix C.

I. Reports on District Model Schools.

Limerick, Clonmel, and Dunmanway.

No. 4.—Annual Report, for 1860, upon the working of the Limerick, Clonmel, and Dunmanway District Model Schools, by John E. Sheridan, esq., Head Inspector of National Schools.

I. Dunmanway.
II. Limerick.
III. Clonmel.

Gentlemen,—I have the honour to submit, for the information of the Commissioners, my Report upon the above-named Model Schools for the year 1860.

In my Reports for the years 1858 and 1859, in consequence of the efforts that had been made during these years to get up a public pronouncement of want of confidence in these institutions, I considered it expedient to enter at considerable length into their history, and to explain fully the rules and regulations under which they have been conducted from the commencement. In these Reports I showed:—

(*a.*) That these schools have always been managed on principles that afford most satisfactory guarantees to parents, not only that their children shall receive there a thoroughly good literary education, but also that their faith and morals shall be perfectly secure.

(*b.*) That owing to arrangements made by the Commissioners, the children attending these schools have ample opportunities of obtaining, and do actually obtain, a moral and religious training quite as good as, if not superior to, that which children receive in the ordinary National Schools that are under the exclusive management of clergymen.

(*c.*) That no attempt, direct or indirect, to tamper with the faith of the children, while within the walls of these schools, has ever been made by any person, or could possibly be made without immediate detection.

(*d.*) That no complaint has ever been made by any parents regarding the treatment their children have received in these schools.

Having proved all this in a way to defy refutation, I think I may fairly spare myself the trouble of travelling over the same ground again, the more particularly as I am satisfied—what the opponents of these schools also seem convinced of—that their repeated denunciations have failed to make any permanent impression upon the public mind.

In the present Report, therefore, I shall do little more than furnish the necessary statistics; but I shall endeavour to present these statistics in such a shape as will enable the Commissioners and the public to learn from them with ease all the most interesting details of the working of the schools during the past year.

The details of the practical working of a school will obviously range themselves under the four following heads, viz.:—

I.—The amount of accommodation which the school affords, and the quantity and quality of the material aids to teaching which are provided in it.
II.—The nature and extent of the instruction imparted in it.
III.—The number of pupils frequenting it, and the character of their attendance as regards regularity or irregularity.
IV.—The progress and proficiency of the pupils.

Under each of these heads I shall make a few remarks before setting forth the particular statistics of each school.

I.—First, then, as regards *accommodation*, I may observe that when the three establishments referred to in this Report came under my charge in the commencement of 1858, I found that only one of them was capable of affording suitable and adequate accommodation for the number of pupils in actual attendance. In the Clonmel Model School the accommodation had been for years inferior and insufficient, and had given rise to loud and long-continued complaints on the part of teachers, inspectors, and parents. In Dunmanway matters were in a still more unsatisfactory state. There the attendance had not only far outgrown the available accommodation, but there were actually some 200 or 300 children seeking for admission, against whom the Inspector was obliged to shut the doors, and who were thus debarred from enjoying the advantages which the District Model Schools were intended to confer upon their respective localities.

Well, I am happy in being able to state that all this either has been, or is in course of being, remedied, and I hope I shall be excused for saying that I take to myself some of the credit of having produced this result. In the Clonmel Model School additions and alterations have been already completed, in accordance with plans prepared by myself and approved of by the Board, which have secured accommodation of a very superior kind and amply sufficient for the largest attendance that the town of Clonmel has ever furnished to the school. These improvements comprise—

(*a.*) A new girls' school-room, which is spacious, lofty, well lighted, and well ventilated, with two suitable class-rooms attached.

(*b.*) Two additional class-rooms in connexion with the boys' school.

(*c.*) New apartments for the accommodation of the Head Master and his family.

(*d.*) An infirmary.

(*e.*) An office for the Inspector.

It is something to boast of that all these works have been completed without rendering it necessary to suspend the working of the schools for a single day.

In Dunmanway the necessary additions and alterations, also according to plans prepared by myself, were commenced some months ago, and are being pushed on to completion as rapidly as circumstances will permit. I confidently expect that all will be finished before the close of the current year, and that we shall thenceforth have the means of accommodating, most suitably and comfortably, not only the large number of pupils at present in attendance, but also the almost equally large number of children who have been so long and so anxiously waiting for admission.

As regards *material aids to teaching*, it will be sufficient to state that the liberality of the Commissioners has supplied these schools with every thing calculated to give effect to the teacher's instructions. Black-boards, globes, maps, charts, diagrams, models, picture and object lessons, chemical and philosophical apparatus, &c., have been supplied to every department of the schools; and much of the acknowledged efficiency of the instruction imparted in them is undoubtedly attributable to the fact, that the teachers have been enabled by means of such aids to simplify and illustrate their instructions, so as to render the subjects treated of plain to the very senses of their pupils.

II.—As regards *the nature and extent of the instruction* imparted in these schools, there can be no question that children attending them have an opportunity of acquiring an excellent English education. In each of the three Model Schools under my charge the *obligatory* course comprises reading, explanation, spelling, and writing from dictation, penmanship, arithmetic (practical and theoretical), English grammar and composition, geography (political, mathematical, and physical), the use of the globes, and vocal music, with (for boys) a rudimentary course of algebra, geometry, mensuration, and natural philosophy; and (for girls) plain and ornamental needlework.

I should add, in order to give a just notion of the extent of the obligatory course, that while learning reading from our lesson books the pupils acquire a large amount of useful information regarding history, chronology, political economy, the arts, manufactures, and commerce, the mineral, vegetable, and animal kingdoms, the habits and customs of foreign nations, &c., &c.

The *optional* course varies in the different Model Schools. In Dunmanway District Model School it comprises drawing and the principles and practice of agriculture; in Limerick, drawing and navigation; in Clonmel, drawing and *French*.

The last-mentioned branch is a recent addition to the Model School curriculum, and as yet partakes somewhat of the nature of an experiment. At present it is confined to the Clonmel Model School, but, as I have no doubt the experiment will prove a successful one, I entertain a confident expectation that ere long it will be introduced into the Limerick Model School also. As a commercial education is, admittedly, defective without a knowledge of the French language, which may be said to perform, as regards the interchange of *ideas* amongst different nations a function analogous to that which is performed by *money* in relation to the interchange of *commodities*, I am of opinion that the curriculum of all District Model Schools situate in large towns should include instruction in French; and I confess I cannot perceive that any valid objection can be urged

Appendix C. I. Reports on District Model Schools.

to the introduction of this branch that would not be equally valid against the teaching of drawing, singing, navigation, natural philosophy, &c., in such schools.

III.—In reference to *the number of pupils attending these schools*, the following points of information will suffice:—

Limerick, Clonmel, and Dunmanway.

(*a.*) The aggregate number of individual pupils whose names appeared upon the rolls of the Limerick, Clonmel, and Dunmanway Model Schools during the past year was 1,612. The number in 1859 was 1,587.

(*b.*) The aggregate number of pupils whose names were on the rolls of the three schools on the 31st December, 1860, was 992. On the 31st December, 1859, it was 923.

(*c.*) The average number on the rolls of the three schools for 1860 was 1,036. For 1859 it was 1,034.

(*d.*) The average daily attendance for 1860 was 759. For 1859 it was 727.

(*e.*) The centesimal proportion of the average daily attendance to the average number on the rolls (which is the recognised measure of the regularity of the attendance) was, for last year, seventy-three, in 1859 it was seventy, and the year before sixty-eight.

A much more correct test of the regularity of the attendance may be found by comparing the total number of attendances *actually made* during the year with the total number of attendances that *should have been made* had the pupils attended regularly on every school-day, or, to express the same thing in fewer words, by comparing the *actual* with the *possible* attendance of the pupils. This is done in the following table, in which is given the centesimal proportion of the actual to the possible attendance of each class in each of the three Model Schools for the year 1860:—

	Limerick Model School.	Clonmel Model School.	Dunmanway Model School.	All three Schools.
First Class, . .	75·0	70·7	67·5	71·6
Second Class, . .	74·2	77·3	70·7	72·9
Sequel Class, . .	78·5	74·8	70·2	74·5
Third Class, . .	77·8	78·5	70·2	75·4
Fourth Class, . .	78·8	85·1	73·3	76·5
Fifth Class, . .	77·3	85·0	–	82·2
All Classes, . .	77·0	77·8	70·8	74·8

Taking a general view of the three Model Schools, it appears from this table that, out of every *hundred* school-days in 1860, each first-class pupil attended, on an average, on about *seventy-two days;* each second-class pupil on about *seventy-three days;* each Sequel-class pupil on *seventy-four days;* each third-class pupil on about *seventy-five days;* each fourth-class pupil on about *seventy-six days;* each fifth-class pupil on *eighty-two days;* and that the average attendance of each pupil, without distinction of class, was about *seventy-five days* out of every *hundred.*

It is but fair to explain that, in these District Model Schools, *Saturdays* are counted as *school-days*, or, rather, have been so ever since I took charge of them. This is not the case in the ordinary National Schools, and I have not the slightest doubt that, if Saturdays (on which days the pupils are most frequently absent) had not been included in the calculations upon which the above table is based, the *actual* attendances would have averaged from eighty to eighty-five per cent. of the *possible* attendances. This would indicate an attendance on the part of the Model School pupils, not only far and away more regular than in the ordinary National Schools, but even fully as regular, according to my experience, as in *any* day school, public or private, in this country.

In this important respect, therefore, the condition of these Model Schools must be regarded as satisfactory.

IV.—*Progress and Proficiency of the Pupils.*—The curriculum in the District Model Schools being as I have shown, much more extensive, the teachers more numerous and more highly qualified, the instruction more solid and systematic, and the attendance of the pupils much more regular and punctual, than in the ordinary National Schools, it were superfluous to state that the proficiency of the several classes is very much higher in the former than in the latter. If it were otherwise, the District Model Schools should be pronounced a miserable failure. But, nevertheless, it is undoubtedly true that the teachers of these

schools have to contend, in common with those of ordinary National Schools, with a very serious obstacle to progress in *the short duration of the pupils' attendance*. In this respect, I do not hesitate to say that the Clonmel and Limerick Model Schools have very little, if any, advantage over the ordinary National Schools. The Dunmanway Model School is, to some extent, exceptional, because, from the great difficulty of procuring admission to that school, its advantages are very highly prized, and the pupils continue longer at school in consequence, being well assured that if they should suffer their names to be once struck off the rolls, they would find readmission all but impossible. But, as regards the other two Model Schools, I am convinced I am not making any misstatement in saying that the average duration of the pupils' attendance scarcely exceeds *two years*. This statement, I am well aware, will take a great many by surprise; but, unfortunately, it is only too easily proved. The following facts will suffice to establish its general accuracy:—

The number of pupils *admitted* into the Clonmel and Limerick Model Schools in 1858 was 525. In 1859 the number was 473. Now, the *total number* of pupils whose names appeared upon the rolls of both schools in the latter year (viz. 1,104) exceeds the sum of the two years' admissions by 106 only, or *about* 9½ *per cent.*

Again, the sum of the admissions to the same schools in 1859 and 1860 (viz., 1,035), falls short of the total number of pupils in 1860 (viz., 1,126), by ninety-one only, or *about* 8½ *per cent.*

It may be objected that the number of pupils *admitted* into a school in any one year will almost always include several pupils who had attended the school in previous years, but whose names had been struck off the rolls in consequence of continued absence. This is quite true, and I am of course well acquainted with the fact. But it was only after making liberal allowance on this score, that I arrived at the conclusion, that *the average duration of a pupil's attendance at the Model Schools scarcely exceeds two years.*

It may be urged, too, that in the case of the District Model Schools this evil is not so serious as at first blush it seems to be, inasmuch as many of the pupils admitted into these schools are young people, who, having received rudimentary instruction in other schools, are sent to these model institutions for the purpose of *completing their school education*, and of giving it, as it were, the finishing polish. This is undoubtedly true, but not at all to the extent that one might suppose; and, unfortunately, we very generally find that the rudimentary education of those pupils who are admitted from other establishments into the *senior* classes of the Model Schools, has been so defective, as to render careful instruction in reading, spelling, writing, and arithmetic, almost quite as necessary to them as to the pupils of the junior division.

View it as we will, and palliate it as we may, the evil is unquestionably a serious one, and all the more serious, that, although it is easy enough to discover its causes, it is extremely difficult, if not impossible, to suggest a remedy for it. The difficulty of prescribing a remedy for it arises mainly from the fact, that the evil is not partial, but general—it is not confined to Model Schools, nor to National Schools of any class, but affects the educational institutions of the country generally. For I venture to affirm, that there is not in Ireland a Principal of a school, public or private, who has not good reason to complain of this impediment to the progress of his pupils. I will go still further and assert, that if detailed statistics of our colleges and universities were published from year to year, it would be found, that of the many young men who enter these institutions, comparatively few continue in them to the end of the course.

The *causes* of the evil, I have said, are plain enough. As far as the schools for the children of the middle and poorer classes are concerned, they are chiefly three:—

(*a.*) *Parents in general cannot afford to continue their children at school long enough to enable them to acquire a good knowledge of the entire school course.*

To any person who is acquainted with the circumstances of the *poorer* classes, this proposition will appear manifestly true. Amongst the poorer classes the head of a family is seldom in continuous employment throughout the year, and for the most part when he *is* in employment, his earnings unfortunately are quite insufficient to provide even the humblest food, raiment, and shelter for

Appendix C.
I. Reports on District Model Schools.

the family, without the exercise of the greatest thrift, prudence, and self-denial, qualities, for which, it is well known the lower classes in this country are nowise remarkable. It follows from this, that the head of the family cannot dispense with the services of such members of the family as are capable of assisting him, and consequently that he is obliged by the very necessities of his social position to withdraw his children from school as soon as they are old and strong enough to contribute by their labour to the maintenance of the family.

Limerick, Clonmel, and Dunmanway.

In the case of the *middle* classes, the truth of the proposition is not quite so evident; but if we consider how rapidly the expense of maintaining a family of children increases according as the children advance in years, and how precarious are the means of support in that rank of society, we cannot fail to see that it is clearly the duty, as well as the interest, of the head of a family so circumstanced, to put his children in the way of earning a respectable livelihood as early as possible. Now, in the estimation of a parent, who has this object in view, the curriculum of a District Model School is either too extensive, or too limited, according to the station in life for which he intends his children. If, for instance, he wishes that his son should be qualified as soon as possible to become a merchant's or attorney's clerk, or his daughter to become a shop-assistant, he will consider the obligatory course of the District Model Schools entirely too extensive for his purpose. He will, consequently, withdraw his child from the school at ten or twelve years of age, and send him to some other, where he expects he will have an opportunity of learning in a comparatively short time the few branches which he regards as alone requisite. On the other hand, if his desire be, that his daughter should become a governess in a gentleman's family, or principal of a ladies' seminary, or that his son should enter the church, or one of the learned professions, or should take his chance at one of the competitive examinations for employment in the higher grades of the public service, he will consider the curriculum of the District Model School much too limited, inasmuch as it does not comprise classics, modern languages, and instrumental music.

I am satisfied that a large proportion of the children who annually leave the Clonmel and Limerick Model Schools without having completed the school course, are withdrawn for the reasons just stated, but principally for the latter.

(*b.*) *Parents for the most part are very imperfect judges of what constitutes a suitable education for their children, and of the time that is required to complete it.*

Amongst the poorer classes, parents are generally satisfied if their children acquire a mere mechanical expertness in "reading, writing, and ciphering." The advantage of a *thorough* knowledge of these branches, or of a wider field of instruction, they do not, and cannot appreciate. Nor, being themselves illiterate, are they competent judges, even of the degree of mechanical expertness that could be turned to useful account. They judge of this, not by actual examination of their children, but rather by their age and the length of time that may have elapsed since they were first sent to school.

In the middle classes, parents attach importance only to those branches which they deem absolutely necessary as qualifications for the particular calling for which they intend their children. If the calling fixed upon be that of a merchant's clerk, they consider that a good knowledge of reading, spelling, writing, arithmetic, and book-keeping, is all that is required to qualify their children to discharge their duties satisfactorily in that position, and they cannot clearly see that any advantage, commensurate with the loss and inconvenience resulting to themselves from delay in making their children enter upon the proper business of their lives, is likely to be gained by continuing them at school after they have acquired a competent knowledge of those necessary branches.

(*c.*) *Parents are extremely variable in their estimate of the merits of a particular school.*

In reference to this proposition I shall only remark that parents are very prone to ground their estimate of a school upon information derived from their children, and not upon a correct knowledge of facts, and that none but those who have been personally concerned with school-keeping in Ireland, can form an adequate notion of the extent to which this cause operates in shortening the duration of pupils' attendance at a particular school.

Appendix C.
I. Reports on District Model Schools.
Limerick, Clonmel, and Dunmanway.

Before quitting this subject, I think it right to bring under the notice of the Commissioners a defect which I regard as another obstacle to progress; although it is one of minor importance, and one that admits of an easy remedy. I allude to the want of a recognised *programme of instruction for the several classes in District Model Schools.* The want of some guide of this kind had been for a very long time felt in the ordinary National Schools, but was supplied some years ago, the Commissioners having then sanctioned a programme in which were specified, both the subjects proper to be taught to each class in a National School, and also the extent to which each subject should be taught. The advantages that have resulted from this, have been universally acknowledged by inspectors and teachers. Up to the present time, however, nothing of the kind has been decided upon by the Commissioners for the guidance of teachers and inspectors in charge of District Model Schools. In some of these institutions the inspectors have adopted the programme in use in the ordinary National Schools, a programme obviously *too low and too limited* for District Model Schools, which possess such striking advantages over ordinary National Schools in respect of teaching-power, facilities for communicating instruction, and regularity of attendances. In others, it has been left in a great measure to the teachers themselves to determine according to their own judgments a course of instruction for each class, and it commonly happens that they adopt a scale of proficiency *much too high.* In either case, the results cannot be satisfactory.

In the Dunmanway District Model School, there has been in use for the last three years a programme drawn up by myself in conjunction with Mr. Childs, the inspector in charge; and as it has been found to answer, on the whole, remarkably well, I beg to subjoin a copy of it, with a few alterations which experience has suggested. I should premise, however (what ought to be borne in mind by persons when passing judgment upon this document), that our object in drawing it up, was to prescribe, not, as in the ordinary National School programme, the *minimum* amount of proficiency required for each class, but, as definitively as possible, such an amount of proficiency as would qualify a pupil of any class for promotion to a higher class.

Programme of Instruction for each class in the Dunmanway District Model School.

I. First Class.—Pupils of the First Class should not be promoted into Second Class until they have learned:—

1. To read correctly the lessons in the First Book.
2. To spell the principal words and phrases therein, and to explain the meanings of such as are easily understood by children.
3. To count correctly and intelligently up to 100; to read any number up to 100; and to add mentally and with facility any number of digits up to thirty.
4. To name in order, and with correct pronunciation, the days of the week, and the months and seasons of the year.

II. Second Class.—Pupils of the Second Class should be required, before being promoted into Sequel Class:—

1. To read with facility and correctness the lessons in the Second Book.
2. To know the subject matter, especially of the Scripture History Lessons.
3. To be able to spell and explain the principal words and phrases occurring in the Lessons.
4. To be familiar with the addition and subtraction tables; to set down and read numbers to six places of figures; and to work easy exercises in addition and subtraction.
5. To be acquainted with the general outlines of the Map of the World.
6. To distinguish the article, noun, adjective, and verb in any simple sentence intelligible to young children.
7. To write on paper.

III. Sequel Class.—Pupils of the Sequel Class, before being promoted into Third Class, should be required:—

1. To read with facility and intelligence the lessons in Sequel No. 2.
2. To answer upon the subject matter of the more important lessons, especially the historical ones.

Appendix C.

I. Reports on District Model Schools.

Limerick, Clonmel, and Dunmanway.

3. To be able to spell and explain the principal words and phrases occurring in the lessons; to spell or write from dictation sentences from the Second Book or Sequel; and to be familiar with the first two classes of Verbal Distinctions in the Spelling Book Superseded.
4. To write small hand on paper.
5. To be familiar with the multiplication, pence, and shilling tables; to read and set down numbers to seven places of figures; and to work exercises in all the simple rules with expertness and accuracy.
6. To be acquainted with the Map of the World, and with the text of Dr. Sullivan's Small Geography, from page 21 to 32 inclusive.
7. To be able to distinguish and to give correct definitions of all the parts of speech, and to be acquainted with the *large* text of Dr. Sullivan's Grammar, to page 41 inclusive.

IV. Third Class.—Pupils of the Third Class, before being promoted into Fourth Class, should be required:—

1. To read the lessons of the Third Book with fluency and intelligence, and with correct pronunciation.
2. To be familiar with the subject matter of the most important lessons, especially those on natural history, scripture history, geography, and manufactures; and to repeat the poetical pieces correctly from memory.
3. To be able to spell and explain the principal words and phrases in the lessons; to write from dictation, with ease and correctness, any sentence selected from the Third Book; and to be familiar with the first four classes of "Verbal Distinctions," and the rules for spelling in the Spelling Book Superseded.
4. To write small hand neatly from head lines.
5. To know notation and numeration well; to be familiar with troy weight, avoirdupois weight, apothecaries' weight, linear, square, and cubic measures; to be well acquainted with the simple and compound rules, short accounts, and simple proportion, as explained in the First Book of Arithmetic; and to be familiar with the first five rules of mental calculation, as given in the same treatise.
6. To be acquainted with the Maps of the World, Europe, and Ireland, and with the text of Dr. Sullivan's *Small* Geography, from page 21 to page 36 inclusive, and pages 44 and 45.
7. To know *precisely* what is meant by *simple* and *etymological* parsing; to be able to parse easy sentences *etymologically;* and to be familiar with the large text of Dr. Sullivan's Grammar, up to page 98 (end of etymology.)
8. To be acquainted with the general characteristics of the three kingdoms of nature; the four great divisions of the animal kingdom; the four classes of vertebrate animals; the five orders of birds, and the orders of the mammalia, reptiles, and fishes.

9*. To know the definitions of the First Book of Euclid's Elements, the postulates and the axioms.

V. Fourth Class.—Pupils of the Fourth Class, before being promoted into Fifth Class, should be required:—

1. To read the Fourth Book with ease and intelligence, and correct pronunciation, and to repeat from memory, with good taste and expression, some of the poetical pieces.
2. To be well acquainted with the subject matter of the more important lessons, particularly those on natural history, scripture history, geography, political economy, and manufactures; and to be familiar with the prefixes, affixes, and Greek and Latin Roots, at the end of the Fourth Book.
3. To be able to write from dictation, with ease and correctness, any sentences selected from the Third or Fourth Books; to be well acquainted with the five classes of Verbal Distinctions, the rules of spelling, and the columns of difficult words in the Spelling Book Superseded.
4. To write small hand well and expertly.
5. To be well acquainted with numeration and notation, and all the most useful arithmetical tables; to be familiar with the theory and practice of simple and compound proportion, vulgar fractions, practice, interest, discount, and tare and tret; and with the rules of mental calculation given in the First Book of Arithmetic.

6. To be acquainted with the maps of the continents and Palestine; with the text of Dr. Sullivan's *Small* Geography, from page 21 to page 45 inclusive, and pages 67, 68, and 69 ("British Empire"); with the proofs of the spheroidal form of the earth; its motions and magnitude; with longitude and latitude; and the phenomena of day and night, the seasons, tides, and eclipses.
7. To be well acquainted with Etymology and the Rules of Syntax; and to be able to parse simple and compound sentences with correctness and readiness, both orally and by writing.
8. To know, in addition to the natural history prescribed for Third Class, the orders and characteristics of the class of insects, as treated of by Patterson.
9*. To know the first four sets of book-keeping, as explained in the Board's treatise.
10*. To be acquainted with the definitions, postulates, and axioms, and the propositions of the First Book of Euclid's elements.
11*. To be acquainted with the definitions and fundamental rules of Algebra, and the solution of easy simple equations.

N.B.—The subjects thus marked (*) are not intended for the female department. Girls of the fourth and fifth classes, however, ought to be made acquainted with the method of keeping and closing cash, personal, and real accounts.

Boys of the third, fourth, and fifth classes should be prepared for examination in such branches of natural philosophy, &c., as may be included in the school course.

Girls should exhibit a fair proficiency in such branches of plain and ornamental needlework, as may be suited to their age and class.

The above programme appears to me to be well adapted for District Model Schools. It has been in use, as I have already said, in the Dunmanway District Model School for the last three years, and has been found to work well. I beg leave, therefore, to recommend it to the favourable consideration of the Board.

I shall now proceed to set forth the statistics of each of the Model Schools referred to in this Report.

I.—Limerick Model School.

Limerick.

Table I.—Shows the Average Number on the Rolls, the Average Daily Attendance, and the centesimal proportion of the latter to the former for each Month of the year 1860, and for the entire year:—

Months.	Average Number on Rolls.				Average Daily Attendance.				Per-centage of average Daily Attendance to average Number on Rolls.			
	Male.	Fem.	Infant.	Total.	Male.	Fem.	Infant.	Total.	Male.	Fem.	Infant.	Total.
January,	129	120	66	315	90	70	41	201	70	58	62	64
February,	136	120	65	321	109	82	49	240	80	68	75	74
March,	140	123	76	339	115	92	55	262	82	75	72	77
April,	143	124	66	333	108	86	55	249	70	69	83	75
May,	152	134	87	373	124	97	64	285	82	72	73	76
June,	150	138	91	379	122	99	66	287	81	72	72	76
July,	149	140	94	383	96	74	57	227	65	53	61	59
August,	156	146	87	389	87	73	60	220	56	50	69	56
September,	143	140	86	369	111	96	76	283	78	69	88	77
October,	144	138	96	378	113	90	66	269	78	65	69	71
November,	139	134	101	374	115	99	76	290	82	75	75	77
December,	135	126	100	361	105	91	72	268	77	70	72	74
Entire year,	143	132	85	360	107	89	62	258	75	67	73	72

From this table it appears that the average number of pupils on the rolls of the Limerick Model School for the year 1860 was 360, the average daily attendance 258, and that the centesimal proportion of the latter to the former (which is the recognized measure of the *regularity* of the pupils' attendance) was 72.

Appendix C. I. Reports on District Model Schools.

Limerick.

TABLE II.—Shows, for the purpose of comparison, the Amount and Character of the Attendance, the Total Amount of School Fees received, and the value of School Requisites Sold to the Pupils at Reduced Rates during the years 1859 and 1860:—

For Year ended	Department.	Average Number on Rolls.	Average Daily Attendance.	Per-centage.	Amount of School Fees Received.	Value of School Requisites sold to Pupils
					£ s. d.	£ s. d.
31st December, 1859,	Boys,	152	107	70	66 5 11	10 8 6½
	Girls,	136	95	70	65 13 4	7 18 0½
	Infants,	70	46	66	25 2 11½	1 5 0
	Totals,	358	248	69	157 2 2½	19 11 6½
31st December, 1860,	Boys,	143	107	75	66 11 11	11 4 0½
	Girls,	132	89	67	60 5 11	8 0 0
	Infants,	85	62	73	33 12 2	1 2 4½
	Totals,	360	258	72	160 10 0	20 6 4¾

It will be seen from this table that, on the whole, there was no falling off in the Limerick Model School during 1860, as compared with 1859.

The total amount of the school fees received during 1860 was £160 10*s.*, which is at the rate of 5*s.* 2½*d.* for each of the pupils whose names appeared upon the rolls during the year; 8*s.* 11*d.* per pupil in average on rolls, and 12*s.* 5¼*d.* per pupil in average daily attendance.

The value of school requisites (books, copies, slates, &c.) sold to the pupils at reduced rates in 1860 was £20 6*s.* 4¾*d.*, which gives an average of about 8*d.* for each of the pupils whose names appeared upon the rolls during the year, 1*s.* 1½*d.* per pupil in average on rolls, and about 1*s.* 3¼*d.* per pupil in average daily attendance. Primâ facie these averages are all very low, and would lead one to imagine that the pupils of this Model School were badly supplied with school requisites. But no conclusion could possibly be more erroneous, as it is quite certain that every individual pupil who attended the school was always well supplied with books, copies, slates, and whatever other requisites were considered necessary. It may be seen, too, from a comparison of the centesimal proportion of the average daily attendance to the average on the rolls in 1859 and 1860, that, except in the female department, the attendance of the pupils was considerably more regular in the latter than in the former year. A more correct measure, however, of the regularity of attendance will be found in table VI.

Table III. shows the literary classification of the total number of pupils whose names appeared on the rolls during the year 1860.

TABLE III.

Class.	Number of Pupils on Rolls at opening of Year.	*Additional* Pupils admitted during the Year.	Total Number of Pupils appearing on Rolls during the Year, and classified according to— 1. Their *lowest* proficiency during the Year.	2. Their *highest* proficiency during the Year.	Number of Pupils that left the School, and did not return during the Year.	Number of Pupils remaining on Rolls at close of Year.
BOYS:

Sequel Class,	–	–	–	9	4	5
Total,	75	79	154	154	65	89

Of the 65 pupils who left the infant school during the year, 2 entered the boys' school, and one the girls' school, and are reckoned among the "admissions" in each of these departments in the above table. Making allowance for these, it appears that the total number of individual pupils whose names appeared upon the rolls of the three departments of the Limerick District Model School during the year 1860 was 619, viz., 303 boys and 316 girls, being less by three than the corresponding number for 1859.

This table shows the literary classification of the total number of pupils, both according to their *lowest*, and also according to their *highest* proficiency during the year 1860; that is to say—first, according to their proficiency at the commencement of the year, or when subsequently admitted to the school; and next, according to their proficiency at the close of the year, or when leaving the school. The object of this is to enable the Commissioners to judge of the amount of *progress* made by the pupils in the course of the year. The difference of the two classifications will be most clearly shown by means of the per-centages in the following table.

TABLE IV.—Shows the centesimal proportion of the total number of pupils in each class according to the two classifications:—

	According to *lowest* proficiency.				According to *highest* proficiency.			
	Boys.	Girls.	Infants.	Total.	Boys.	Girls.	Infants.	Total.
In First Class,	3·9	10·1	84·4	26·2	0·9	6·3	69·5	20·0
,, Second Class,	32·2	21·	15·6	23·8	24·3	16·8	24·7	21·5
,, Sequel Class,	29·1	36·1	–	24·6	28·7	33·6	5·8	24·9
,, Third Class,	16·7	18·5	–	14·	23·5	24·3	–	18·2
,, Fourth Class,	11·3	12·2	–	8·8	13·9	16·4	–	11·4
,, Fifth Class,	4·8	2·1	–	2·6	8·7	2·1	–	4·0

As I stated in a former Report, the most obvious effect of progress in a National School is to diminish the proportion of pupils in the junior classes, and to increase that in the senior. Thus, from the above table, putting out of view

Appendix C.
I. Reports on District Model Schools.
Limerick.

the infant school, in which, from the tender age of the children, the progress from class to class must be, and ought to be, very slow, and in which, too, from the same cause there can be no such thing as a senior class; it may be seen:—

(*a.*) That in the *male* department the per-centage of pupils in the *junior division* (composed of the first and second classes) was 36·1 according to the *lowest* proficiency, and 25·2 according to the *highest*; and in the *senior division* (composed of the third, fourth, and fifth classes) 34·8 according to the lowest proficiency, and 46·1 according to the highest.

(*b.*) That in the *female* department the per-centage of pupils in the *junior division* was 31·1 according to the lowest proficiency, and 23·1 according to the highest; and in the *senior division* 32·8 according to the lowest proficiency, and 43·3 according to the highest.

The differences between the two classifications are owing to the *promotions* from class to class that were made during the year, and which are set forth in the following table.

TABLE V.—Shows the number of promotions from class to class during the year 1860:—

	Boys.	Girls.	Infants.	Total.
From First Class,	7	9	23	39
„ Second Class,	25	19	9	53
„ Sequel Class,	26	25	–	51
„ Third Class,	15	10	–	25
„ Fourth Class,	9	–	–	9
Totals,	82	63	32	177
Per-centage of promotions to average daily attendance,	76·6	70·7	51·6	68·6
Corresponding per-centages for the year 1859,	37·4	57·9	58·7	49·2

In one of my Reports for last year, as well as in a previous part of this Report, I stated that the ratio of the "actual" to the "possible" attendances of the pupils during a given period, would furnish a more accurate measure of the general regularity of the attendance, than the ratio of the "average daily attendance" to the "average number on the rolls" for the same period. This will be apparent from the following table.

TABLE VI.—Shows the centesimal proportion of the actual to the possible attendances of each class during 1860:—

	Boys.	Girls	Infants.	Total.
First Class,	75·9	65·2	76·3	75·
Second Class,	76·4	73·7	72·	74·2
Sequel Class,	80·6	75·1	85·8	78·5
Third Class,	82 0	72·6	–	77·8
Fourth Class,	80·9	76·2	–	78·8
Fifth Class,	78·5	74·2	–	77·3
Entire school,	80·5	74·0	75·6	77·0

This table is based upon returns prepared with the greatest care and exactness, and its correctness may be fully relied upon. It appears from these returns—

(*a.*) That the *average* "possible" and "actual" attendances for each pupil during 1860 were,

	Boys.		Girls.		Infants.	
	Possible.	Actual.	Possible.	Actual.	Possible.	Actual.
In Junior Division,	123·4	94·3	116·5	83·7	136·8	102·
In Middle Division,	164·3	132·5	144·5	108·6	208·	178·4
In Senior Division,	185·7	150·8	148·5	110·	–	–
Entire school,	163·2	130·6	140·4	104·	141·5	107·

(*b.*) That the centesimal proportion of the "actual" to the "possible" attendance in each *division* was—

	Boys.	Girls.	Infants.
In Junior Division,	76·4	71·8	74·5
In Middle Division,	80·6	75·1	85·8
In Senior Division,	81·1	74·	–

TABLE VII.—Shows the classification, according to rates of payment, of the total number of pupils whose names appeared upon the rolls for the year 1860:—

	Boys.	Girls.	Infants.	Total.
At 1*s.* 1*d.* per quarter,	42	56	61	159
At 2*s.* 6*d.* „	103	107	79	289
At 5*s.* „	85	75	14	174
Totals,	230	238	154	622

It has been already shown that the average amount actually paid by each pupil during the year was 5*s.* 2½*d.*, which exceeds by 2*d.* the corresponding average for 1859.

TABLE VIII.—Shows the classification of the same pupils according to age.

	Boys.	Girls.	Infants.	Total.	
Under 5 years,	–	–	36	36	25·7 per cent.
5 years,	–	–	45	45

Average age,	11·6	11·7	5·5	10·1	
Corresponding averages for 1359,	11·0	10·9	4·9	9·6	

TABLE IX.—Shows the classification of the same pupils according to religious denomination.

	Boys.	Girls.	Infants.	Total.	Per centage.
Roman Catholic,	141	186	107	434	69·8
Established Church,	71	40	30	141	30·2
Presbyterian,	13	9	9	31	
Other Protestant Dissenters,	5	3	8	16	
Total,	230	238	154	622	

It appears from this table that the relative proportions of the Roman Catholic and Protestant pupils in 1860 were respectively about 70 and 30 per cent. The corresponding per centages for 1859 were 69 and 31. The actual number of Protestants that received instruction in the schools in 1860 was less by 3 only than the corresponding number in 1859.

The annual examination of the pupils commenced on the 17th September, 1860, and occupied the District Inspector and myself until the 24th. We subjected every class to a searching examination in every branch in which it had received instruction during the previous twelve months, and I am happy in being able to report that the results were highly satisfactory, and most creditable to the teachers of the male and female departments. We were not well pleased with the state of the infant department as regards either discipline or proficiency; but this was owing to causes which have since been removed; and I am now in a position to state, that under the management of the newly appointed principal teacher, Miss Clarke, and her assistant, Miss Russell, the infant department has made most satisfactory progress since the date of the annual examination.

The public examination and distribution of premiums took place on the 24th September, 1860, in the presence of a crowded and most respectable and influential assemblage of visitors, presided over by the Right Worshipful the Mayor of Limerick. Several of the classes were examined publicly in a variety of subjects, and acquitted themselves very creditably. After the conclusion of the examination, premiums of the aggregate value of £15 were awarded to the most deserving pupils.

Appendix C.

Entire Year,	111	108	68	287	87	80	49	216	78	72	72	75

From this table it appears that the average number of pupils on the rolls of the Clonmel Model School for the year 1860 was 287, the average daily attendance 216, and the centesimal proportion of the latter to the former 75.

Table II.—Shows, for the purpose of comparison, the amount and character of the attendance, the total amount of school fees received, and the value of school requisites sold to the pupils at reduced rates during the years 1859 and 1860.

For Year ended	Department.	Average Number on Rolls.	Average Daily Attendance	Per-centage.	Amount of School Fees received.	Value of School Requisites sold.
					£ s. d.	£ s. d.
31st December, 1859,	Boys, .	115	83	72	48 7 1	13 3 6
	Girls, .	120	78	65	34 19 1	6 18 10
	Infants, .	69	43	62	13 0 3	1 0 6½
	Total, .	304	204	67	96 6. 5	21 2 10½
31st December, 1860,	Boys, .	111	87	78	45 2 11½	12 7 7
	Girls, .	108	80	72	36 6 3	5 9 0
	Infants, .	68	49	72	15 13 10	1 3 4
	Total, .	287	216	75	97 3 0½	18 19 11

This table, while it shows a decrease of 17 in the average number on the rolls for the year 1860 as compared with 1859, indicates an increase of 12 in the average daily attendance, and of 16*s.* 7½*d.* in the amount of school fees. The per-centages indicate a considerable improvement in 1860 over 1859 in respect of regularity in the pupils' attendance, an average of 75 out of every 100 pupils on the rolls having been in daily attendance during 1860, the corresponding per centage for 1859 having been only 67.

Table III. Shows the literary classification of the total number of pupils whose names appeared on the rolls during 1860.

TABLE III.

Department. Class.	Number of Pupils on Rolls at opening of Year.	*Additional* Pupils admitted during the Year.	Total Number of Pupils appearing on Rolls during the Year, and classified according to— 1. Their *lowest* proficiency during the Year.	2. Their *highest* proficiency during the Year.	Number of Pupils that left the School, and did not return during the Year.	Number of Pupils remaining on Rolls at close of Year.
BOYS:—						
First Class,	–	17	17	9	9	–
Second Class,	25	58	83	48	37	11
Sequel Class,	26	14	40	56	20	36
Third Class,	30	12	42	58	17	41
Fourth Class,	13	6	19	18	11	7
Fifth Class,	9	–	9	21	12	9
Total,	103	107	210	210	106	104
GIRLS:—						
First Class,	–	–	–	–	–	–
Second Class,	16	27	43	31	16	15
Sequel Class,	47	26	73	63	30	33
Third Class,	28	14	42	51	20	31
Fourth Class,	15	1	16	21	6	15
Fifth Class,	7	1	8	16	4	12
Total,	113	69	182	182	76	106
INFANTS:—						
First Class,	31	72	103	91	56	35
Second Class,	13	2	15	21	8	13
Sequel Class,	5	–	5	11	5	6
Total,	49	74	123	123	69	54

Of the 69 pupils who left the infant department during the year, seven entered the male department, and one the female, and are reckoned among the "admissions" in each case. Making allowance for these, it appears from the above table that the total number of pupils whose names appeared upon the rolls of the three departments of the Clonmel District Model School during the year 1860 was 507 (*viz.*, 266 boys and 241 girls), *which exceeds by* 25 *the corresponding number for* 1859.

TABLE IV.—Shows the centesimal proportion of the total number of pupils in each class, according to the *lowest*, and also according to the *highest* proficiency attained during the year 1860.

	Boys.	Girls.	Infants.	Total.	Boys.	Girls.	Infants.	Total.
	1. According to *lowest* proficiency.				2. According to *highest* proficiency.			
First Class,	8·2	–	83·7	23·3	4·3	–	74·	19·4
Second Class,	39·5	23·6	12·2	27·4	22·9	17·	17·1	19·4
Sequel Class,	19·	40·1	4·1	22·9	26·7	34·6	8·9	25·2

Fifth Class,	4·3	4·4	–	3·3	10·	8·8	–	7·2

From this table it may be seen:—

(*a.*) That in the *male* department the per-centage of pupils in the *junior* division of the school (comprising the first and second classes) was 47·7, according to the *lowest* proficiency, and 27·2 according to the *highest;* and in the *senior* division (comprising the third and higher classes), 33·3 according to the lowest proficiency, and 46·2 according to the highest.

(*b.*) That in the *female* department the per-centage of pupils in the *junior* division was 23·6 according to the lowest proficiency, and 17·0 according to the

Appendix C.

I. Reports on District Model Schools.

Clonmel.

highest; and in the senior division 36·3 according to the lowest proficiency, and 48·4 according to the highest.

TABLE V.—Shows the number of promotions from class to class during the year 1860.

	Boys.	Girls.	Infants.	Total.
From First Class,	8	–	12	20
,, Second Class,	43	12	6	61
,, Sequel Class,	27	22	–	49
,, Third Class,	11	13	–	24
,, Fourth Class,	12	8	–	20
Total,	101	55	18	174
Per centage of promotions to average daily attendance,	116·1	68·7	36·7	80·6
Corresponding per centages for the year 1859,	68·7	61·5	46·5	61·3

TABLE VI.—Shows as the most correct measure of the regularity of the pupils' attendance, the centesimal proportion of the actual to the possible attendance of each class during the year 1860.

	Boys.	Girls.	Infants.	Total.
First Class,	57·9	–	71·	70·7
Second Class,	75·4	79·3	78·1	77·4
Sequel Class,	80·4	66·9	81·7	74·8
Third Class,	82·4	73·2	–	78·5
Fourth Class,	80·8	87·5	–	85·1
Fifth Class,	81·4	88·5	–	85·
Entire School,	80·6	75·8	74·7	77·8

From the returns of the pupils' attendance, upon which this table is based, it appears—

(*a.*) That the *average* "possible" and "actual" attendances for each pupil during 1860, were—

	Boys.		Girls.		Infants.	
	Possible.	Actual.	Possible.	Actual.	Possible.	Actual.
In Junior Division,	63·4	47·1	73·3	58·1.	119·5	87·4
In Middle Division,	142·9	115·	149·7	100·2	259·1	211·9
In Senior Division,	186·3	153·2	200·	160·6	–	–
Entire School,	140·	112·9	162·5	123·3	132·	98·6

(*b.*) That the centesimal proportion of the "actual" to the "possible" attendance in each *division* was—

	Boys.	Girls.	Infants.
In Junior Division,	74·5	79·3	73·2
In Middle Division,	80·4	66·9	81·7
In Senior Division,	82·	80·3	–

TABLE VII.—Shows the classification, according to rates of payment, of the total number of pupils whose names appeared upon the rolls for the year 1860—

	Boys.	Girls.	Infants.	Total.
At 1*s.* 1*d.* per quarter,	139	84	102	325
,, 2*s.* 6*d.* ,,	37	78	18	133
,, 5*s.* 0*d.* ,,	34	20	3	57
Total,	210	182	123	515

The total amount received as school fees during the year was £97 3*s.* 0½*d.*, consequently the amount paid by each pupil on an average was about 3*s.* 10*d.*

TABLE VIII.—Shows the classification of the same pupils according to age.

	Boys.	Girls.	Infants.	Total.	Per cent.
Under 5 years,	–	–	31	31	
5 years,	–	–	20	20	21·6

Average age,	11·5	12·1	6·	10 4	
Corresponding averages for 1859,	11·5	12·1	5·9	10·3	

TABLE IX.—Shows the classification of the same pupils according to religious denomination.

	Boys.	Girls.	Infants.	Total.	Per cent.
Roman Catholic,	134	129	82	345	67·
Established Church,	60	42	28	130	
Presbyterian,	10	4	8	22	33·
Other Protestant Dissenters,	6	7	5	18	
Total,	210	182	123	515	

From this table it appears that the relative proportions of the Roman Catholic and Protestant pupils of this Model School in 1860 were respectively 67 and 33 per cent. The corresponding per-centages for 1859 were 69·2 and 30·8. The difference was caused by an increase in the Protestant element, rather than a decrease in the Catholic, for the actual number of Catholic pupils whose names appeared upon the rolls during 1860, *was less by three only than the corresponding number in* 1859.

The annual examination of the pupils commenced on the 12th November, 1860, and was completed on the 19th. As in former years, it was conducted by the District Inspector and myself. We examined each class in every subject in which instruction had been given during the previous twelve months, and we were generally well pleased with the results. The answering of some of the classes in the female school, however, was not as satisfactory as we expected, and we considered it our duty to call the serious attention of the teachers to the fact. From what I have learned from the District Inspector's reports since then, regarding the progress of this department, I do not anticipate that any class will be found deficient at next examination.

The public examination and distribution of premiums took place on the 19th November, 1860. The spacious school-room, recently erected, was filled with an assemblage of visitors, amongst whom were several of the most respectable and influential residents in Clonmel and its neighbourhood. I can safely state that on no previous occasion since I took charge of this Model School, had there been a more important and unmistakable pronouncement of confidence in its management and working on the part of the public of Clonmel. Several of the classes were examined, partly by myself, partly by the teachers, in reading, spelling, grammar, geography, arithmetic, and physical and applied science; specimens of penmanship and needlework were also submitted to the audience, all of whom manifested the greatest interest in the proceedings, and seemed very much pleased with the amount of proficiency exhibited by the children. At the close of the examination, a large number of premiums were distributed amongst the most deserving pupils, by John Bagwell, esq., the Member for Clonmel, who presided on the occasion, and expressed himself highly gratified with the results of the examination, and the continued success of the school.

TABLE III.—Shows the literary classification of the total number of pupils whose names appeared on the rolls during 1860.

Class.	Number of Pupils on Rolls at opening of Year.	*Additional* Pupils admitted during the Year.	Total Number of Pupils appearing on Rolls during the Year, and classified according to—		Number of Pupils that left the School, and did not return during the Year.	Number of Pupils remaining on Rolls at close of the Year.
			1. Their *lowest* proficiency during the Year.	2. Their *highest* proficiency during the Year.		
BOYS:—						
First Class, .	25	33	58	33	5	28
Second Class, .	48	10	58	65	8	57
Sequel, . .	53	6	59	60	9	51
Third Class, .	31	5	36	36	8	28
Fourth Class, .	45	2	47	64	28	36
Fifth Class, .	–	–	–	–	–	–
Total, . .	202	56	258	258	58	200
GIRLS:—						
First Class, .	20	20	40	17	4	13
Second Class, .	25	31	56	59	6	53
Sequel, . .	47	10	57	42	8	34
Third Class, .	36	6	42	54	8	46
Fourth Class, .	29	4	33	56	14	42
Fifth Class, .	–	–	–	–	–	–
Total, . .	157	71	228	228	40	188

It may be seen from this table that the total number of pupils who received instruction in the Dunmanway District Model School, during the year 1860, was 486, viz., 258 boys, and 228 girls. As the additional accommodation, so much and so long required at Dunmanway, will have been provided before the close of the current year, I expect that my next report will show a considerable increase upon this number.

TABLE IV.—Shows the centesimal proportion of the total number of pupils in each class according to the *lowest*, and also according to the *highest* proficiency attained during the year 1860.

	1. According to *lowest* proficiency.			2. According to *highest* proficiency.		
	Boys.	Girls.	Total.	Boys.	Girls.	Total.
First Class, . .	22·9	17·5	20·2	12·3	7·5	10·3
Second Class, . .	22·9	24·6	23·5	25·2	26·3	25·5
Sequel Class, . .	22·9	25·0	23·9	23·2	18·4	21·0
Third Class, . .	14·0	18·4	16·0	14·0	23·7	18·5
Fourth Class, . . .	17·3	15·5	16·4	24 8	24·1	24·7

It appears from this table:—

(*a.*) That in the *male* department the per-centage of pupils in the *junior* division (first and second classes) was 45·8 according to the *lowest* proficiency, and 38·0 according to the highest; and in the *senior* division (third and fourth classes), 31·3 according to the *lowest* proficiency, and 38·8 according to the *highest*.

(*b.*) That in the *female* department the per-centage of pupils in the *junior* division was 42·1 according to the *lowest* proficiency, and 33·8 according to the *highest;* and in the *senior* division, 33·9 according to the lowest proficiency, and 47·8 according to the highest.

TABLE V.—Shows the number of promotions from class to class in each department during the year 1860.

	Boys.	Girls.	Total.
From First Class, ...	25	23	48
,, Second Class, ...	18	20	38
,, Sequel Class, ...	18	35	53
,, Third Class, ...	18	23	41
Total, ...	79	101	180
Per centage of promotions to average daily attendance, ...	54·9	71·1	63·0
Per centage for 1859, ...	65·5	64·6	65·1

TABLE VI.—Shows the classification, according to the rates of payment, of the total number of pupils whose names appeared upon the rolls for the year 1860.

	Boys.	Girls.	Total.
At 1*s.* 1*d.* per quarter, ...	177	136	313
At 2*s.* 6*d.* ,, ...	79	87	166
At 5*s.* ,, ...	2	5	7
Total, ...	258	228	486

The total amount paid during the year by the pupils was £112 19*s.* 4*d.*, which gives an average of about 4*s.* 8*d.* for each pupil.

TABLE VII.—Shows the classification of the same pupils according to religious denomination.

	Boys.	Girls.	Total.
Roman Catholic, ...	240	217	457
Established Church, ...	18	11	29
Total, ...	258	228	486

The relative proportions of Catholic and Protestant pupils in this Model School during 1860, were ninety-four and six respectively. The actual number of Protestant pupils was less by five than the number that attended in 1859.

Average age,	11·9	11·2	11·6
Averages for 1859,	11·8	11·8	11·8

The annual examination of the pupils of this school commenced on the 9th July, 1860, and was not completed till the 23rd, owing to the very large number of pupils who presented themselves for examination. The District Inspector and myself examined each class strictly in accordance with the programme which had been prescribed by us in 1858, and of which a copy has been given in the introductory part of this report; and I am happy in being able to state that, all things considered, the results were highly satisfactory.

The public examination and distribution of premiums took place on the 23rd July, 1860, in the presence of a very numerous assemblage of visitors, including many of the most respectable residents of Dunmanway and its vicinity, amongst others, the Roman Catholic clergy of the town and some of the adjoining parishes. Several classes were examined by Mr. Childs, myself, and the teachers, in the most important branches comprised in the programme, and the audience seemed very much pleased with the manner in which they acquitted themselves. After the examination a large number of premiums, of the aggregate value of £15, were distributed amongst the most deserving pupils.

I have the honour to be, Gentlemen, your obedient servant,

JOHN E. SHERIDAN, Head Inspector.

The Secretaries Education Office.

Ballymena. JOINT REPORT of JAMES PATTEN, esq., LL.D., Head Inspector, and JOHN CARLISLE, esq., District Inspector, on the Ballymena District Model School, for 1860.

April, 1861.

GENTLEMEN,—We beg to submit to the Commissioners of Education the following report on the Ballymena District Model School for the year ended the 31st December, 1860.

The same teachers continue in the boys', girls', and infant departments, with the exception of Mr. Feehan, the assistant master and teacher of physical science, who has been transferred to Coleraine, to succeed Mr. Morris, who has been appointed to the Londonderry District Model School. We feel much pleasure in reporting that the progress made by the pupils in the different departments in this institution has been highly satisfactory and creditable to the teachers, pupil-teachers, and monitresses.

TABLE I.—Showing, for the year 1860, the average number on rolls, the average daily attendance, and the centesimal proportion of the former to the latter.

	Boys.	Girls.	Infants.
Average number on rolls for twelve months,	104	77·8	33·1
Average number in daily attendance for twelve months,	85	61·6	26·2
Centesimal proportion of average attendance to number on rolls,	81·7	78·2	84

From a comparison of the above table with those of the two previous years, we find that the number on the rolls and the average attendance in the male and female departments have been steadily on the increase. In the infants' department

there has been some falling off; but when we consider the extreme severity of the weather during the past winter, we must be prepared for this as regards the infants.

TABLE II.—Showing the Classification of Pupils according to Rates of Payment:—

	Boys.	Girls.	Infants.	Total.
Number paying at the rate of 5*s.* per quarter, last week of Dec.,	30	7	1	38
,, ,, 2*s.* 6*d.* ,, ,,	48	42	15	105
,, ,, 1*s.* 1*d.* ,, ,,	38	41	22	101

The number paying the different rates contrasts favourably with former years, and it will be seen from a comparison of this return with former ones, that at no period of the school's existence has the income from school-fees been so large.

TABLE III.—Showing the Amount of School-fees received, and Requisites sold, in the year 1860.

	Boys.			Girls.			Infants.			Total.		
	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*
Amount of School-fees received in 1860,	51	2	3½	33	2	0	11	5	7	95	9	10½
Amount of Requisites sold in 1860,	17	18	11½	6	3	8	1	1	10½	25	4	6

This indicates a slight increase in the amount of requisites sold over the return of the former year.

TABLE IV.—Showing the Number of Children on Rolls during the year, with their Literary Classification.

		Classes.						
		First.	Second.	Sequel.	Third.	Fourth.	Fifth.	Total.
Number on rolls first week of 1860,	Males,	3	24	13	23	16	12	91

ANNUAL PUBLIC EXAMINATION.

The annual public examination was held on the 31st of July.

On the ten days previous the different classes in all the departments were carefully examined on all the subjects contained in the programmes of their respective classes, for the purpose of determining, previously to the public examination, the premiums and certificates of merit.

The weather was more favourable on the day of the examination, and a very large number of visitors, including many of the parents of the children, attended to witness the proceedings, who seemed much gratified in listening to the clever answering of their children in presence of the public.

As was the case, but not to the same extent, on the previous year, the examination-hall, the other school-rooms, and even the passages, were inconveniently crowded.

The clergymen of the different denominations were in attendance, and some of the teachers of the National Schools in the District.

We may observe that on this occasion the attendance of visitors was unusually large, and the solid and varied acquirements exhibited in the course of the examination must have satisfied all parties that the plan of secular instruction now in operation throughout these schools is admirably calculated to secure a large amount of proficiency in every important department of practical science, and in every useful branch of English literature.

Working models of the steam-engine, suction and force pump, and a good supply of other apparatus, are provided for the assistance of the senior pupils in their study of the mechanical arts; besides, the walls of the several departments are well supplied with maps and diagrams in illustration of natural his-

Appendix C.
I. Reports on District Model Schools.

tory, botany, and the physical sciences. In addition to these there are a considerable number of drawings, from copy or after nature, all framed, and some of them well coloured. These were described to the visitors as the production of pupils; and the style in which some of the designs were executed afforded ample evidence of considerable artistic genius in their production, as well as careful supervision on the part of their instructor.

Ballymena.

The examination commenced with the junior classes of boys, who were examined from the Lesson Books, and in geography and arithmetic by the pupil-teachers, Thomas Jackson and John Baird; and in the course of these exercises the visitors were afforded an opportunity of witnessing the amusing scene of two little boys, seven or eight years of age, examining and cross-examining each other upon various subjects.

The corresponding classes of girls were then examined in the Lesson Books, Tables, and Mental Arithmetic, by Miss Brown, assistant-teacher, and Miss Nicholl, monitress. After this the pupils of the infant department went through the exercises suited to their capacity, in a pleasing manner, under the superintendence of their monitress, Miss Chambers. In all these classes the answering was satisfactory, and in all respects creditable to the teachers.

About half-past twelve o'clock the proceedings were agreeably varied by the introduction of singing classes, in accordance with a programme which had been prepared for the occasion. The exercises commenced with the junior classes, and the music was led by Mr. Feehan, the teacher, and accompanied by Mr. Given, the head master of the school, on the harmonium.

The opening chorus was to the air of "Home, sweet Home," the words being Mr. Given's composition.

The pieces sung by this class were well executed, consisting of simple melodies and other judicious and agreeably diversified selections from some of the most popular authors.

The productions of the drawing-school were then specially exhibited, and were highly creditable to some of the pupils, who had only been a few months under tuition in that department. One of the pupils was called to the platform, and at the desire of Mr. Feehan, the drawing-master, sketched the figure of a greyhound very accurately, in the presence of the audience.

The senior class of girls was next examined in history, from the Lesson Books, geography, spelling, parsing, and exercises of memory, by Mrs. Hopkins, the head mistress of the female school. The questions were put with much clearness and precision, and the answering of this class on the above subjects, as well as in a subsequent examination in dictation and arithmetic, by Miss Brown, the assistant-teacher, afforded the audience ample proof that the duties of tuition in the female department of the institution had been very ably and faithfully discharged.

The audience were then treated to another juvenile performance of vocal music, which was followed by another exercise at the drawing-board. On this occasion one of the pupils, with a few rapid strokes in chalk, produced an admirable specimen of a boy whipping a top.

About two o'clock the senior class of boys ascended the platform, and were exercised in reading, &c., by Mr. Given; after which he proceeded to test their knowledge of sacred history, in a series of questions connected with the history of the Jews. This, to some, was probably the most interesting examination of the day. It embraced responses having reference to the Jewish Captivity in Egypt—the entrance and occupation of the Holy Land—the geographical position of Palestine, its chief cities, rivers and mountains, the names and character of the Jewish tribes—the time and manner of their separation—the kings of Israel and Judah—dates—political events—battles—captivities—distances, &c., &c.

The examination of the senior boys' class in the higher branches of education, including arithmetic, algebra, pneumatics, hydrostatics, the steam-engine, and geometry, was then proceeded with, the examiners being Messrs. Feehan and Connor, the subjects referred to being illustrated by maps, diagrams, and working-models. Some good specimens of writing from dictation, skeleton maps, mercantile invoices, and epistolary correspondence, were submitted for the inspection of the visitors.

We cannot omit, before closing this report, alluding in favourable terms to the work department in the female school, under the superintendence of Mrs.

Hopkins. Among the articles exhibited were some highly finished and beautiful specimens of bead-work, Berlin-wool patterns, designs in crochet, and fancy needlework, ornamental baskets, &c., &c. The specimens of plain sewing were numerous, and presented satisfactory evidence that proficiency in the less elegant, but more useful branches of needlework, is the primary object of labour among the pupils. *Appendix C. I. Reports on District Model Schools.*

At the close of the examinations the audience adjourned to the play-ground in the open air. In this place all the scholars, and a considerable number of the visitors united in singing the National Anthem, after which the proceedings of the day were brought to a conclusion by the distribution of premiums to the most deserving of the pupils. *Ballymena.*

The number of children present was about 200. The boys' school-room, used on the occasion as an examination hall, is inconveniently small for this purpose, but it might easily be enlarged at a small expenditure.

The grounds in connexion with the premises are tastefully ornamented with flowers and shubbery, and are kept in very nice order by the head master, Mr. Given, who possesses much taste and skill in matters of this sort. To his zeal and efficiency much of the success of the institution is to be attributed, while his exertions are aided, to an important extent, by frequent communications with the District Inspector.

We are, Gentlemen, your obedient servants,

JAMES PATTEN, Head Inspector.

JOHN CARLISLE, District Inspector.

The Secretaries, Education Office.

No. 6.—REPORT on the OMAGH MINOR MODEL SCHOOL for the year 1860, by W. A. HUNTER, esq., Head Inspector. *Omagh.*

Monaghan, April, 1861.

GENTLEMEN,—I have now the honour to submit my report on the Omagh Minor Model School for the year 1860.

It must be very gratifying to the Commissioners to know that this school, within a few months after the opening, commanded an attendance considerably in excess of what was anticipated, and that the prospects of steadily increasing numbers are such as to render it necessary to take immediate steps for the enlargement of the building.

In my report on the opening of the school, I stated that so far as the size of the building and the appliances for teaching were concerned, the "*Minor*" Model in Omagh was in no respect inferior to *District* Models in other towns. I can now state that, so far as attendance and proficiency are concerned, it is in no respect inferior to the elder establishments that enjoy the more pretentious title.

It was very soon apparent that the teaching staff appointed at the opening was quite insufficient for the work to be done. The inexperienced monitors that were of necessity appointed, could render very little effective assistance in the working of the school; they required to be instructed themselves, and it was evident that injustice was done to them as well as to the school in intrusting them with the charge of important classes. The necessity being thus urgent, the Commissioners sanctioned the appointment of additional teachers, and likewise the appointment of a small staff of pupil-teachers of a higher grade and with a higher rate of salary than the paid monitors.

The allowance for boarding to each pupil-teacher is at present £18 per annum; but as the pupil-teachers in the District Model Schools cost the public not less than £25 per annum, I submit that the allowance should be increased.

The teaching staff in the several departments is set forth in the following table.

108774

Emily Greer,	Do.,	Established Church,	8/60

The experience of the year that has closed furnishes ample proof that the Commissioners made a proper selection in their original appointments; all the teachers have afforded the highest satisfaction to the parents of the pupils and the visitors to the schools (who have been very numerous), as well as to the District Inspector and myself.

I have been enabled to make such arrangements as regards the teaching staff, as enables us to have all the *special* subjects of instruction efficiently managed without the employment of extra teachers. I have long considered that this was a matter of great importance, not merely on the ground of public economy, but likewise and especially from the example thus set. If singing and drawing are never taught, even in Model establishments, except by singing and drawing masters, the ordinary teachers soon come to conclude that it would be attempting something altogether above them were they to set about introducing these branches in the ordinary National School. One undoubted impediment to the extension of education in these branches, in the ordinary schools, has been thus removed.

By a judicious division of labour, and the allocation of congenial subjects among the respective teachers, the best results have been secured as regards the ordinary branches. The reading of one of the mistresses is very superior. She consequently has taken charge of that branch with the very best results; another has a particular aptitude for the analysis of arithmetical rules and processes: this and cognate subjects are superintended by her. Writing and needlework are attended to on similar principles with the happiest results.

The singing classes in both departments have been taught by Mr. O'Driscoll, assistant-master. This promising young teacher received a course of training in the Belfast Model School. He was instructed in music by Mr. Washington, and he knows how to teach the subject well. If Mr. Washington can send out year after year a number of young men trained to teach this subject as Mr. O'Driscoll has been, his services will be valuable indeed. I was anxious that Mr. Washington should have an opportunity of witnessing the success of his pupil, as this might stimulate him to further exertion. His attendance at the public examination enabled him to see how much had been done. The teaching of classes of children in a Model School is of little consequence to the interests of the community at large, compared with the teaching of those who are to be themselves teachers in various parts of the country.

The drawing classes in the boys' school are still attended to by Mr. O'Driscoll; the other assistant-master, Mr. Bresland, who is likewise competent to instruct in this branch, has charge of the classes in the girls' school. Considerable progress has been made in both departments.

Mr. Bresland has charge likewise of the several branches that come under the head "*Physical Science;*" the attention that was necessarily bestowed on the other branches of the ordinary school course, afforded but little time for the numerous subjects to be taken up under this head. The highest division of the school had been occupied with the subject of "*Animal Physiology*" previous to the annual examination, and the answering elicited by Mr. Bresland on that occasion was regarded as highly satisfactory.

I append several tables that show the state of the school and the progressive character of the attendance; the falling off in the autumn months is fully accounted for by the circumstances of the pupils, many of whom, coming from country districts, are required in the busy season to assist in agricultural operations.

The arrangements for religious instruction remain unaltered. The following is taken from my last report on the school, relative to this subject:—"Monday, from ten to eleven, is set apart for the instruction of the pupils by the respective clergymen. There is a sufficient number of separate rooms in the establishment for all, and the pupils, accompanied by the teachers belonging to the same denominations, have the opportunity of receiving instruction from a clergyman of their own faith. In addition to this, there is half an hour on each of the four following week days likewise devoted to religious instruction. This is given by the teachers belonging to the establishment."

The labour of love, voluntarily undertaken by the several clergyman of all the Protestant denominations, is diligently and regularly performed; and so far as I have had an opportunity of ascertaining their views, all these gentlemen speak highly of the assistance they receive, in carrying out the religious instruction, from the teachers of the respective denominations.

No Roman Catholic clergyman visits the school for this purpose. The efforts that have been made by their ecclesiastical superiors to prevent the attendance of pupils of that denomination have been wonderfully successful. A school under the Christian Brothers has been opened in the town within the year; there is a National School connected with the convent, where every effort is made to secure a large average attendance. In addition to these, the Omagh National Schools (male and female), under the management of the parish priest, are still in receipt of the Board's endowment, and were both in operation during the greater part of the year.

I cannot conclude this report without bringing under the notice of the Commissioners the faithfulness and zeal displayed by Mr. Currie, the District Inspector, in all matters relating to the management and progress of the Model School. He has contributed not only to lighten my labours, but to render my services effective.

A reference to the joint report upon the examinations of the school (which were held at the end of the year), will show the estimate in which we both hold the services of the teachers in the respective departments. If the school has been successful, as it has in a very eminent degree, this success is mainly owing to the diligence and ability which the several teachers have brought to bear upon the working of the establishment.

I have the honour to remain, Gentlemen, your very obedient servant,

W. A. Hunter, Head Inspector.

The Secretaries, Education Office.

No. 7.—JOINT REPORT of W. A. HUNTER, esq., Head Inspector, and R. S. CURRIE, esq., District Inspector, on the First Annual Public Examination in the OMAGH MODEL SCHOOL.

Omagh, 24th December, 1860.

GENTLEMEN,—We have now the honour to submit our report on the first annual public examination of the pupils in attendance at the Omagh Minor Model School.

The examination was held, according to previous arrangement, on Friday the 21st instant, so that it was immediately previous to the Christmas holidays; the attendance of the parents was invited, and a public notification was issued, as is usual on such occasions. This being the first examination here, the interest evinced by the public was very great, and although one of the largest rooms in the establishment was especially appropriated and fitted up for the examination, the accommodation which it afforded was very inadequate; at several periods of the day it was impossible to obtain even standing room; the interest continued unabated till the conclusion of the proceedings, which was about half-past four o'clock.

The examination of the pupils was agreeably diversified by the performance of the singing classes; and as the Commissioners had kindly permitted Mr. Washington (of the Belfast Model School), to attend for the purpose of superintending this part of the business; and as the pupils had been very carefully prepared previously by Mr. O'Driscoll, who has the exclusive charge of instruction in music in the boys' and girls' schools, the evident proficiency of the children (both boys and girls), afforded very great satisfaction.

The examination began at ten o'clock with the junior division of the boys; the like division of the girls next occupied the platform. The examination of the infants then followed, extending from forty-five minutes past eleven, to thirty minutes past twelve. The examinations of the senior classes of the male and female departments succeeded, and were concluded at fifteen minutes past three, when the names of the pupils were announced to whom premiums had been awarded, and a "certificate of merit," engrossed on parchment, was handed to each by the Head Inspector.

The appropriate school-song, "Try Again," was then sung under the direction of Mr. Washington, and the proceedings were finally wound up by the singing of

Appendix C.

I. Reports on District Model Schools.

Omagh.

"Rule Britannia," and the National Anthem in full chorus by all the pupils, which was done with great spirit and effect.

After the business of the day had been thus terminated, James Greer, esq., was moved to the chair; and a resolution, embodying the thanks of the meeting to the officers and teachers, was moved by the Rev. J. Byrne (rector of the parish), and seconded by R. D. Coulson, esq., R.M.; coupled with this was the adoption of a memorial to the Commissioners praying them to constitute the Omagh *Minor* a *District* Model School. We beg most cordially to recommend the prayer of this memorial to the favourable consideration of the Commissioners.

The preliminary private examination occupied six days, during which all the classes were examined by us with much minuteness on all the subjects of instruction. The premiums were awarded according to the answering at this examination taken in connexion with the general attention and proficiency of the pupils throughout the year, as determined from the weekly records kept by the teachers. It is gratifying here to be able to state that there was not a single instance of misconduct of any pupil to bring under our notice; had such been the case, the pupil offending would have been debarred from competition for a prize. The sum of fifteen pounds was granted by the Commissioners for distribution under this head.

We now proceed to furnish a synopsis of the answering in the several classes; the examination was conducted in conformity with programmes that had been previously drawn up by the respective teachers. We do not append these documents, but we can assure the Commissioners that the standard in each of the classes was a high one.

Girls' School, Second Class.—There is no First Book class in this school; there were two divisions in Second Book. In the junior division a fair amount of proficiency was attained, considering the age of the children. In the higher division the reading was steady and correct, the spelling most excellent, answering in tables very good, grammar and geography satisfactory.

Sequel.—Reading intelligent; the rules for spelling, and the first class of "Verbal Distinctions" most carefully prepared. Knowledge of parts of speech satisfactory, answering in maps of World, Europe, and Ireland, good. The pupils in this class can write a sentence from dictation with general correctness

Third Class.—Two divisions. In both the divisions of this class the pupils were prepared in the reading of portions of "Selections from British Poets;" the manner in which they acquitted themselves proved how much care had been bestowed on this important branch of the school business. Their knowledge of the text of the Lesson Books was by no means superficial. Spelling accurate, and writing from dictation satisfactory.

Grammar.—The examination in this subject included syntactical parsing, and (in the senior division) the text of the greater part of Sullivan's grammar; answering very good.

Geography.—An accurate knowledge of the leading maps has been obtained; the text-books are carefully employed in the preparation of "home lessons;" this gives a precision and an accuracy to the answering, that mere teaching by interrogation before a map can never produce.

Arithmetic.—Slate arithmetic very good; mental arithmetic well attended to, and progress satisfactory.

Fourth Class.—This class being the highest in the school, consisted of two divisions; thirteen on the rolls, some of whom were not long advanced from third class. We feel a difficulty about particularizing the answering here, lest our character of it might seem to be the adulation of the eulogist rather than the straightforward matter-of-fact statement of the inspector, who is always more occupied with detecting and exposing faults and shortcomings, than with seeking for and commending excellence.

The reading was easy and graceful; the spelling was almost faultless; the knowledge of principles displayed in the higher branches of arithmetic, and in mathematical geography, proved with what care the intellect had been cultivated. In grammar and composition much has been done to prepare the girls for "speaking and writing the English language with propriety." The style of penmanship is finished and elegant, neither too round nor too angular.

The specimens of needlework that were prepared proved that "industrial training" was receiving a fair share of attention. The plain useful work was

evidently kept in its proper place, in the foreground. This branch was so favourably regarded by visitors, that a gentleman of Omagh requested permission to award a premium in this department of half-a-sovereign. This amount was distributed in accordance with the recommendations of the teachers in charge of this branch of the school business.

Infants' School.—Although the school has not been much more than a year in operation, we found in the infant department no fewer than twenty-five pupils advanced beyond the First Book, of whom eight could read in Sequel very creditably; while of the remaining forty-three in First Book, many could read easy sentences in the third section correctly and intelligently.

It is gratifying to us to be able to report that while the usual exercises and drill of an infant school are carefully carried out, especial attention is given to the intellectual preparation of the pupils for entering on the business of the other schools. In reading, spelling, and explanation of words, the most satisfactory results have been attained; but in arithmetic and geography the attainments are truly surprising. Notation to nine places of figures presents no difficulty to some; the blank maps of Europe and Ireland are interpreted by several with the greatest readiness.

Boys' School, Junior Division, consisting of Second and Sequel classes:—

Reading.—As regards this branch, pupils' attainments were on the whole extremely satisfactory, more than half having obtained a mark indicating a degree of proficiency much above the average.

Grammar.—In this subject, too, pupils evinced considerable proficiency, as well in their acquaintance with the text of the grammar as in the application of this to the etymological parsing of simple sentences in the Lesson Books.

Geography.—Attainments in this subject comprehended a minute and correct acquaintance with the general outlines, local and physical, of the Maps of the World and Europe.

Arithmetic.—Children in this division exhibited considerable facility in working easy questions in the simple rules, while not a few in Sequel class showed themselves acquainted with the compound rules, including reduction.

Writing.—General character of this branch, as exhibited alike in pupils' copy books and in the specimens specially prepared for the examination, was marked by a degree of care and neatness not often to be met with in the writing of children so young, and which affords the best earnest of the attainment of a free and legible hand.

Middle Division, consisting of the two drafts of Third Class:—

Reading.—Attainments in this subject satisfactory. A degree of ease and correctness for the most part marked pupils' reading, such as to fully evidence how much care and attention had been given to teaching it. The answering on the subjects of the Lesson Books was very creditable.

Dictation.—The exercises in this consisted of sentences in prose and verse taken from the Lesson Books, varied by pupils being required to write out such words of unsettled orthography as afforded a fair test of their spelling. In both these requirements results extremely satisfactory.

Grammar.—In addition to a full and correct acquaintance with the larger text of the Board's Grammar, as contained under the heads of orthography and etymology, pupils in this division were equal to parsing syntactically easy sentences in prose, as presented in the Lesson Books.

Geography.—In addition to the simple and more elementary acquirements of pupils in Junior Division, a minute and detailed acquaintance with the general geography of the British Isles and Europe was required, the answering generally very good.

Arithmetic.—Pupils, when brought under examination in this branch, evinced a thorough knowledge of the principles and processes involved in the rules of commercial arithmetic, as far as Practice, as also considerable expertness and accuracy in the simple exercises of mental calculation.

Writing.—The style of the penmanship exhibited care and neatness in the execution, as also distinctness and uniformity in the formation of the letters.

Senior Division, including the Fourth and Fifth Classes:—

Reading.—The exercises for this subject were taken from the Lesson Books and

Appendix C. I. Reports on District Model Schools. *Omagh.*

the Selections from the British Poets. In the reading of the latter several of the pupils evinced a degree of ease and expression which was deserving of the highest commendation.

Grammar.—Pupils in the more advanced portion of this division showed themselves equal to analyzing sentences in prose or verse, as also to explaining the peculiarities of structure to be met with in such sentences. The examination, too, included the whole of Sullivan's Grammar.

Geography.—Pupils' acquirements in this branch extended to a mental and accurate acquaintance with the most prominent features of physical and mathematical geography, as also with the historical and descriptive details relative to most of the countries of Europe.

Arithmetic.—The exercises in the several rules of commercial arithmetic were wrought with a degree of accuracy and expertness which fully showed how well-grounded the pupils were in the principles and processes in same; with the rules of mental calculation they exhibited equal familiarity.

Writing.—The specimens exhibited, while not including any attempt at ornamental penmanship, in their general character gave full earnest of what must be regarded as the essential elements of a free and bold commercial style.

Book-keeping.—Under this head was included an accurate acquaintance with the general principles as applied to the simpler forms of accounts.

Mathematics.—Pupils of Fifth Class evinced a fair acquaintance with the propositions in the first three books of Euclid, including some of the simpler deducibles as given by Dr. Thomson, also with the rules for the mensuration of superficies, and algebra, as far as and inclusive of simple equations. The demonstration of propositions and the general answering of some of the boys in these subjects was highly satisfactory—much above what could have been expected, considering age and the time at school.

We have every reason to congratulate the Commissioners and the public on the satisfactory results of the first public examination of the Omagh Minor Model School.

We have the honour to remain, Gentlemen, your very obedient servants,

W. A. Hunter, Head Inspector.
Robert Stuart Currie, District Inspector.

The Secretaries, Education Office.

Newry. No. 8.—Report on the Newry District Model School for the year 1860, by W. A. Hunter, esq., Head Inspector.

Monaghan, April, 1861.

Gentlemen,—I have now the honour to submit, for the information of the Commissioners of National Education, my report on the Newry District Model School, for the year 1860.

The business of the several departments has been carried forward with regularity throughout the year, and there is little new or special to which the attention of the Commissioners can be directed.

The school-room accommodation is sufficient for the pupils in attendance; the want of a second room for the resident pupil-teachers has been considerably felt since some recent changes in the building; the same apartment is now occupied as study, refectory, and chemical apparatus room. The erection of a suitable class room for physical science and other lectures, and the separation of the present sitting-room appropriated to the use of the pupil-teachers into two rooms, one for study, and one for a dining-room, would be very desirable. The latter apartment could be appropriated for an Inspector's office when necessary. The want of such a room obliges the Inspector occasionally to intrude upon the privacy of the head master and his family, a circumstance that should be avoided, if possible.

I regret to be obliged to state that the play-grounds attached to the schools have been wet and uncomfortable at all times, throughout the year, except when the weather was perfectly dry. This very serious defect was frequently reported by the District Inspector and myself, and means were adopted by the Board of

Works for remedying the evil; such means, however, proved to be altogether ineffectual.

I believe that this circumstance contributed in no small degree to reduce the attendance at the schools; parents very naturally complained when they found their children returning from school with their feet wet and covered with mud; there was no possibility of carrying out the school time-table, as regards "*play*," during the greater part of the year. After the contemplated improvements had been completed, it was found absolutely necessary to shut up altogether the grounds attached to the boys' school, and to permit the pupils to enter and leave by the hall door of the establishment. Although the grounds in the other departments were not quite so bad, yet the inconvenience was equally felt. In order to show that this is no mere surmise, I beg to refer to the table No. II appended, showing the monthly averages for the years 1859 and 1860. It will be seen that the diminution in numbers for the last three months of the year 1860, as compared with the corresponding months in 1859, is very serious.

Notwithstanding this diminution in the average attendance for the last three months, amounting in the boys' school to four, in the girls' to nineteen, and in the infants' to ten, making a diminution in all of thirty-three; the average for the year was for the entire establishment, very nearly identical with the average for the year 1859. The great inconvenience to the schools, and the positive loss to the public has induced me to refer at so much length to an evil that has been grievously felt, and that might have been very readily removed.

When it is remembered that Newry is well supplied with educational establishments, and that it contains five schools receiving grants from the National Board, several of which are deservedly popular, it is not surprising that the Model Schools do not command a larger average attendance.

The only change in the staff of the principal teachers was caused by the death of Miss Martin, and the appointment of Miss Campbell as her successor.

The conduct of the pupil-teachers and paid monitresses has been such as to afford no ground for complaint or dissatisfaction.

The following list exhibits the names, &c., of the teachers in the several departments:—

MALE DEPARTMENT.

Name.	Office.	Religion.	Date of Appointment to the Model School.
Samuel Wallace,	Head Master,	Pres.	10/58
Walter M'Donnell,	Assistant Master,	R.C.	5/60
Arthur Markey,	Pupil-Teacher,	R.C.	2/59

Appendix C.

I. Reports on District Model Schools:

Newry.

The only teacher connected with the establishment, not included in the regular staff above enumerated, is Mr. Murray, who hitherto has had the exclusive charge of the drawing. Inasmuch, however, as Mr. M'Donnell, the assistant master has received the necessary instruction to qualify him for conducting the drawing classes, an arrangement has been submitted to the Board, and approved of, according to which the services of Mr. Murray will be secured for the female school only, at a reduced rate of salary; while Mr. M'Donnell takes charge of the drawing in the male school only. Considering that this teacher attends to music and physical science, it will be acknowledged that his duties are sufficiently onerous.

The singing classes in the female school are taught by the head mistress, Miss M'Quillan; her success in this department has been highly satisfactory.

I annex the usual tables, furnishing an opportunity of contrasting the present with the previous state of the school.

Annual Examination.—Instead of holding the public examination immediately before the Christmas vacation, as has been the practice for some time, I arranged to have it before the Midsummer vacation. Accordingly, with the consent and approbation of the District Inspector, and the teachers of the respective departments, Friday, the 2nd of August, was fixed for this purpose. The previous days of the week were occupied in the private examination of the pupils, and the premiums were awarded as usual, in accordance with the marks obtained at these examinations, which were conducted exclusively by Mr. Morell and myself. The following is a summary of the general answering in the respective classes.

Boys' School.—There is a Fifth Book class in this department, but at the time of the examination there were only five on the rolls, of whom four were examined. There were eleven on the roll of the fourth class, only six being present for examination. The programme on which these boys were prepared was extensive; but I regret to say that the general answering was not satisfactory; two boys answered well on all the subjects; but in the ordinary subjects of spelling, reading, grammar, and arithmetic, the boys constituting the fourth class were badly prepared. Some alteration in the organization of the school was made with the view of remedying these defects. I am unable as yet to report whether these will accomplish the desired result.

Third Book Class.—Fourteen on the roll, eleven present for examination; only one boy acquitted himself well in reading; the indistinct articulation, and the incorrect pronunciation, *leave* much to be improved and corrected in this important branch. The class had been receiving instruction in mensuration, but their knowledge of arithmetic was insufficient to entitle them to be placed in the higher branch; even in reduction of "*Square Measure*," and in the table connected with this, they failed to acquit themselves creditably.

In grammar and geography the answering exhibited a very superficial acquaintance with these branches; whenever tested upon the "*Text-books*" a deficiency was apparent.

The style of penmanship was good, but in writing from dictation no pupil was adjudged a high mark, while four got bad marks. It is evident that sufficient exertions were not made to have this branch taught in a satisfactory manner.

In the Sequel class about half the boys answered well in Lesson Books, grammar, and geography. There were no good readers, and the character of the spelling was only medium.

In the junior classes sufficient care was not taken to have the reading brought to a satisfactory state. This defect evidently arises from leaving these classes too much to the management of the pupil-teachers, many of whom read very badly themselves. In geography, grammar, and arithmetical tables, the answering was pretty fair.

When the extensive teaching power at command in this school is compared with the average attendance of pupils, it must be acknowledged that the general progress is by no means satisfactory. I believe it is not desirable for the present to keep up the full staff of pupil-teachers; with a smaller number the work would be more effectively performed, while the boys themselves would be better trained, because they would have more work to do when in the establishment.

Girls' School.—In the Fourth and Fifth Book classes there were twenty-four pupils enrolled; of these, seventeen were present at the examination. The reading, penmanship, writing from dictation, and grammar (including analysis of difficult sentences in blank verse), exhibited a high degree of excellence. The texts of the geographical lessons was well prepared, but in some respects there was a deficiency as regards knowledge of maps. In arithmetic there is much still to be attained; mathematical geography, likewise, may be considered as one of the weak points in the school.

In the third class, out of a roll of sixteen, twelve were examined; of these twelve, nine had been admitted to the class within the six months previous to the examination, a high degree of attainment was not consequently looked for. In reading, knowledge of Lesson Books, and geography, the deficiency was most marked. Nearly all knew the parts of speech, but very few could parse a simple sentence syntactically.

The "*Sequel*" was a large class, nineteen present, out of twenty-four on the roll. These were generally young, and taking this into account the answering upon the whole was respectable. In spelling, arithmetic, and tables, the proficiency was very good.

The remaining children were in Second Book, there being no First Book class in the school. The attainments in this class are not high, but a good foundation has been laid, giving promise of future success.

Infant School.—In the infant school the answering and general attainments were higher than on previous occasions. There was no class in the school higher than the "Second Book;" the mistress is more anxious to teach well than to teach much. All the children advanced to Second Book (nineteen in number), were present for examination. The reading, so far as page sixty-three, was very good, and the answering on other subjects was satisfactory. Taking into account the time the majority of the pupils have spent in the school, this result was to be expected.

The sum of ten pounds was distributed as premiums in the usual proportions, among the several schools.

On the public day the teachers of all the grades were required to take part in the examination, under the direction of the District Inspector and myself. The parents and visitors had thus an opportunity, not only of ascertaining what the children knew, but of seeing how they were taught. The attendance, as usual, was very large, and all appeared to be highly gratified.

Appendix C. I. Reports on District Model Schools. *Newry.*

The singing classes were superintended by Miss M'Quillan, the head mistress, who accompanied on the harmonium. I believe a higher degree of efficiency in this branch is rarely reached, even where classes are instructed by teachers whose sole attention is devoted to the subject.

Specimens of needlework were exhibited which elicited the approbation of the ladies who were present, and who were the most competent to give an opinion on the subject.

I beg to acknowledge, in concluding this report, the very efficient assistance rendered by Mr. Morell, the District Inspector, in all matters pertaining to the inspection and oversight of the establishment.

I have the honour to remain, Gentlemen, your very obedient servant,

W. A. Hunter, Head Inspector.

The Secretaries, Education Office.

Coleraine. No. 9.—Joint Report of James Patten, esq., ll.d., Head Inspector, and Thomas M'Ilroy, esq., District Inspector, on the Coleraine District Model School.

27th April, 1861.

Gentlemen,—We have the honour to submit, for the information of the Commissioners of National Education, the following report on the Coleraine District Model School for the year 1860.

The school, in all the departments, continues to maintain the high character for efficiency and usefulness which we reported last year; and as may be seen from the accompanying table, the attendance is largely on the increase, particularly in the male department.

Table I.—Average Number of Pupils on Rolls, and present during the past four years.

		Boys.	Girls.	Infants.
Average number on rolls for the 12 months ended December	1857,	73·2	88·5	57·1
	1858,	63·7	72·1	46·5
	1859,	78·4	65·1	52·3
	1860,	93·3	70·8	50·7
Average daily attendance for 12 months ended December	1857,	49·	60·	31·4
	1858,	52·3	57·	36·4
	1859,	67·4	56·3	37·
	1860,	76·9	60·	37·5

Table II.—Number of Pupils on Rolls in the last week of the year ended 31st December, 1858, 1859, and 1860.

		Boys.	Girls.	Infants.	Total.
Number paying 5*s.* per quarter,	1858,	24	30	11	64
	1859,	30	18	13	61
	1860,	42	36	1	79
Number paying 2*s.* 6*d.* per quarter,	1858,	32	30	13	75
	1859,	35	34	21	90
	1860,	37	34	27	98
Number paying 1*s.* 1*d.* per quarter,	1858,	11	11	19	41
	1859,	16	8	21	45
	1860,	20	14	24	58

Table III.—Amount of School Fees received, and Books and Requisites sold, during 1858, 1859, and 1860.

		Boys.			Girls.			Infants.			Totals.		
		£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*
Amount of fees received in	1858,	29	18	8	39	15	0	18	18	1	88	11	9
	1859,	47	5	7½	33	17	10	20	1	4	101	4	9
	1860,	54	9	5½	42	8	8½	20	4	3½	117	2	5½
Amount of books, &c. sold in	1858,	6	5	11½	6	6	4½	1	1	3½	13	13	7½
	1859,	6	18	2				1	2	11½	8	1	1½
	1860,	6	19	10½	5	13	2	1	8	2	14	1	2½

These tables indicate, in a marked degree, the prosperous condition of the school, and the increasing desire of the wealthier and educated classes to avail themselves of the superior advantages which the school affords. The amount of fees received in 1857, was £61 10*s.* 7*d.*; in 1858, there was an increase of £27 1*s.* 2*d.*; in 1859, there was a further increase of £12 13*s.*; while for the past year the increase was £15 17*s.* 8½*d.*, over that of 1859. Thus, during the past three years the annual increase has been over thirty per cent.

From the following table it will be seen that confidence of the parents of the different denominations in the arrangements for the religious instruction of the children continues unchanged.

TABLE IV.—Religious Denominations of Pupils on Rolls, for the last week of December, 1860.

Eliza Weir,	Ditto,	17	Presbyterian,	10/60
INFANTS' SCHOOL.				
Catherine M'Cormac,	Principal,	25	Roman Catholic,	2/60

In the male school no changes have taken place except the retirement of four pupil-teachers, their period of service having expired. Of these, three were appointed to National Schools, and one emigrated. At the close of 1859, Miss Entwissle resigned her situation as Principal of the girls' school; no appointment was made till February last, when Miss Caldwell was transferred from the infants' school. During the interval the school was conducted in a very satisfactory manner by the workmistress and monitresses. Miss M'Cormac, previously assistant in the Galway Model School, was appointed as Miss Caldwell's successor.

During the year three of the monitresses were appointed as assistants in the Belfast Model School.

TABLE VIII.—Showing the Names and Destination of Pupil-Teachers, who were trained in Coleraine Model School.

Pupil-Teacher.	Religious Denomination.	Time spent in Model School. Yrs. Ms.	Date of leaving.	Destination.
1. Robert Hickson,	Pres.	1 0	July, 1850,	Appointed teacher of Coleraine Poor Law Union; afterwards to Tullands National School; and subsequently to Miltown National School.
2. James O'Kane,	R.C.	0 3	Aug. 1850,	Resigned to enter the Constabulary.
3. Arthur Wylie,	E.C.	0 9	Nov. 1851,	Teacher of Tullands National School; since appointed to a National School in county Limerick.
4. Hugh Doherty,	R.C.	0 9	June, 1851,	Appointed to Attikeragh National School.
5. John Kirkpatrick,	Diss.	1 0	Jan. 1852,	Ballyrashane National School; afterwards to Armoyle National School.
6. Charles M'David,	R.C.	0 3	Mar. 1851,	Appointed to a National School in county Tyrone.
7. William Craig,	Pres.	1 0	Feb. 1852,	Crossroads National School; afterwards to Garry National School; subsequently to Ganaby National School; and now in a school in Ballymena.
8. John W. Aiken,	Pres.	1 0	June, 1852,	Appointed to Cornabridge National School; afterwards to Garvagh National School; since went to Belfast Queen's College, and entered the Ministry.
9. Edward Sheil,	R.C.	0 10	Feb. 1852,	Killowen National School: sent to special class; promoted assistant in Bailieborough Model School; afterwards appointed drawing master in Cork School of Design; and since resigned to study on the Continent.
10. Thomas M'Kay,	E.C.	1 0	Mar. 1852,	Drumcon National School; resigned for a clerkship under the agent to the Worshipful Company of Ironmongers.

11. William Byrns,	Pres.	1 2	Sept. 1852,	Crossroads National School; afterwards to Deffrick National School; and subsequently to Kirkcubbin National School.
12. Robert Cunningham,	Pres.	1 0	July, 1852,	Emigrated and taught a school in Canada, and is now entered there for the Ministry.
13. George M'Murray,	E.C.	1 0	Sept. 1852,	Tineroane National School.
14. Peter Herbison,	Pres.	0 10	Jan. 1853,	Appointed to a National School near Ballymena.
15. Samson M'Cotter,	R.C.	1 0	Feb. 1852,	Killowen National School; promoted as assistant master in Ballymena Model School; subsequently removed to Bailieborough Model School.
16. John Boyle,	R.C.	1 0	Mar. 1853,	A National School in the county Donegal.
17. James Clarke,	Pres.	1 0	Oct. 1853,	Ballymagarry National School; resigned to study classics.
18. John B. Greaves,	E.C.	0 2	Dec. 1852,	Resigned for business.
19. Thomas Moorhead,	E.C.	0 7	April, 1853,	Returned home.
20. John Anderson,	Pres.	1 0	Oct. 1853,	Appointed to Strabane National School.
21. Daniel M'Vicar,	R.C.	1 0	Mar. 1854,	Appointed to a National School near Ballycastle.
22. Thomas Scott,	E.C.	1 0	Mar. 1854,	Teacher of Deffrick National School.
23. William MacAdams,	Pres.	0 6	July, 1853,	Derrykeighan National School.
24. Gage Boyd,	Pres.	1 0	Feb. 1854,	Appointed to Letterloan National School, and afterwards to Garvagh National School.
25. Thomas Connor,	E.C.	1 0	Dec. 1854,	Rasharkin National School.
26. Samuel Bonar,	Pres.	1 0	Dec. 1854,	Dromore National School.
27. James M'Clelland,	Pres.	1 0	Oct. 1854,	Appointed to Portstewart National School; subsequently to Ballinteer National School.
28. William Doherty,	R.C.	1 0	May, 1855,	Entered business in Derry.
29. Samuel Hood,	E.C.	1 0	Dec. 1855,	Appointed to a National School in county Tyrone.
30. Edward Greenlees,	Pres.	0 10	Oct. 1855,	Teacher of a National School near Belfast.
31. Samuel Boyd,	Pres.	0 10	Oct. 1855,	Cullyvenny National School.
32. Robert Hunter,	E.C.	1 0	Feb. 1856,	Appointed to a National School near Belfast; afterwards in Antrim National School; now teaching a school in Belfast.
33. James M'Kenna,	R.C.	1 0	Feb. 1856,	Entered Albert Institution, Glasnevin.
34. James Bresland,	Pres.	1 0	April, 1856,	Appointed to a National School near Derry; afterwards in a National School near Belfast; now assistant in the Omagh Model School.
35. John Smyth,	R.C.	0 10	Feb. 1857,	Ballycastle National School.

58. George Adams,	Pres.	0 2	–	Ditto.
59. John Johnston,	Pres.	0 2	–	Ditto.

TABLE IX.—The Names and Destination of Paid Monitresses who were trained in Coleraine Model School.

Monitress.	Religious Denomination.	Time spent in Model School. Yrs.	Mo.	Date of Leaving.	Destination.
Bridget Griffith,	R.C.	0	1	July, 1850,	Resigned to retire to a convent in Derry; since dead.
Mary L. Caldwell,	Pres.	2	3	Sept. 1852,	Appointed to Maghera National School; promoted to Coleraine Infant Model School; now teacher of Coleraine Female Model School.
Mary A. Clarke,	Pres.	1	2	Dec. 1851,	Teacher of Ballyhackot National School.
Eliza Wylie,	E.C.	1	5	Feb. 1852,	Teacher of Woodlawn National School.
Sarah Doonan,	R.C.	0	4	Jan. 1851,	Living at home.
Jane Loughrey,	R.C.	0	7	Aug. 1851,	Teacher of Killowen National School, Coleraine.
Mary A. M'Allister,	R.C.	2	9	June, 1854,	Appointed to Dungiven National School; called to special class; now in Kenmare National School.
Martha Kennedy,	Pres.	4	1	Feb. 1856,	Teacher of Lancasterian School, Belfast; subsequently appointed as assistant in Belfast Model School.
Eliza Dugan,	E.C.	4	1	April, 1856,	Living at home.
Sarah Cowan,	Pres.	1	3	Aug. 1853,	Emigrated to America.
Sarah Hanan,	R.C.	1	2	Aug. 1853,	Teacher of Randalstown National School, since resigned.
Eliza Hickeson,	Pres.	0	8	June, 1853,	Appointed to Ahoghil National School; since emigrated.
Fanny D. Taylor,	Pres.	4	0	Sept. 1857,	Ballytintah National School; now teacher of Omagh Infant Model School.
Isabella Adams,	Pres.	2	5	Jan. 1856,	Drumeen National School; since appointed assistant in Ballymoney Female Model School.
Hessy M'Grath,	R.C.	0	9	May, 1854,	Appointed assistant in Donegal-street National School, Belfast.
Rosanna Hanan,	R.C.	1	7	Jan. 1856,	Teacher of Randalstown National School.
Susan Sheil,	R.C.	1	7	Feb. 1856,	Resigned to learn millinery.
Ellen Mackay,	Pres.	4	8	Nov. 1860,	Appointed to Tubbermore National School.
Isabella Martin,	R.C.	4	8	Nov. 1860,	Assistant in Belfast Model School.
Margaret Banford,	Pres.	1	0	Mar. 1857,	Teacher of Bushmills National School.
Eliza Griffith,	R.C.	1	0	Mar. 1857,	Emigrated to Australia.
Ada B. Dugan,	E.C.	3	6	Nov. 1859,	Appointed assistant in Omagh Model School.
Mary Weir,	Pres.	1	5	Feb. 1859,	Assistant in Ballymoney Model School; now teacher of Miltown National School.
Rosana M'Laughlin,	R.C.	–		–	Yet in Model School.
Jane Cunningham,	Pres.	3	3	Nov. 1860,	Appointed assistant in Belfast Model School.
Harriet E. Greaves,	E.C.	2	3	Nov. 1860,	Ditto.
Sarah Crawford,	Pres.	1	3	Nov. 1860,	Resigned to get married.
Mary A. Jenkins,	E.C.	0	11	–	Yet in Model School.
Eliza Weir,	Pres.	0	2	–	Ditto.

Appendix C.

I. Reports on District Model Schools.

Coleraine.

Annual Examination.—We had ample opportunity of forming an opinion of the state of the school, and the proficiency of the several classes, as we occupied eight days in a minute and searching examination of the pupils in all the subjects in their programme. In all the departments, the usual branches, reading, dictation, writing, arithmetic, grammar, and geography, are carefully taught, and the pupils have made satisfactory progress.

Composition.—In addition to these the pupils of the senior division of the male and female departments are required weekly to furnish a composition exercise on some given subject, which is carefully corrected by the teachers, and errors in spelling, style, &c., pointed out. The majority of the exercises furnished are entirely free from any serious errors, while many of them are of considerable merit.

Geometry, &c.—It was found, after trial, that these branches could not be efficiently taught during the ordinary school hours. They are, therefore, now taught from nine to ten o'clock. Geometry on Mondays, Wednesdays, and Fridays; algebra on Tuesdays and Thursdays; and mensuration and theory of arithmetic on Saturday. The whole of the senior division, including the third, fourth, and fifth classes, are taught these branches. The progress made is most satisfactory. In few schools have pupils of the same age and standing made such proficiency.

Physical Science.—This class is under the care of the assistant, Mr. Morris,

who conducts it from three to four o'clock each day. Instruction is given in the elements of mechanics, hydrostatics, pneumatics, optics, electricity, chemistry, and animal physiology, in all of which the pupils have made fair proficiency.

Vocal Music.—Vocal music is taught on five days of the week, twenty minutes each day being allowed for instruction in the theory and the teaching of pieces, two days to the boys exclusively, and the remaining three to a select class, consisting of pupils of both schools. In consequence of the time devoted to the instruction of the girls being so limited they have not made as much progress in the theory as the boys, having merely learned the names and value of the notes and the different kinds of time, while the boys, in addition to these, are acquainted with the uses of sharps and flats, the formation of the various scales, with their signatures, and the nature of transposition. All the pupils in both departments receive instruction in the theory, and are taught appropriate marching airs and simple pieces suited to their voices. The select class, composed of the best voices in both schools, have made considerable progress, and are capable of singing in parts a number of difficult pieces with great ease and expression, and many of them can make a respectable attempt at singing at sight.

Public Examination.—As on former occasions, as we have already observed, we occupied several days previous to the public examination in a careful private examination of all the departments of the schools, in order to ascertain the proficiency made in the several branches, and also to enable us to decide as to the relative merit of the pupils, with the view of awarding premiums to those most deserving of them. The answering, which was very satisfactory, was an improvement on that of last year, particularly in the higher branches. Home lessons continued to receive careful attention, and to this we attribute, in a great measure, the increasing popularity and success of the school.

The public examination was held on 16th August. As on previous occasions, the attendance of visitors was very large and respectable, being composed of the parents of the children attending the school and the clergy and gentry of the neighbourhood. Among those present were, Sir E. W. M'Naghten, Bart.; Sir H. H. Bruce, Bart.; Archdeacon Smith, Connor; Archdeacon Edwards, Derry; Rev. J. A. Canning, P.M., Coleraine; Rev. Thomas M'Clelland, Rector, Macosquin; Rev. J. Martin, P.M., Camus; Rev. J. Huey, Ballywillan; Rev. Mr. Murdock, Macosquin; Dr. Macaldin, Coleraine; Alexander Barklie, Esq., J.P., Mullamore; S. M. Greer, Esq., Springvale; Dr. Cavin, and Dr. M'Keay, Coleraine, &c., &c. All appeared highly pleased with the quick and ready answering of the pupils; and though the examination lasted upwards of six hours, and many of the subjects rather dry, the interest which the audience took in the proceedings did not appear to flag in the slightest degree.

The following is a programme of the proceedings:—

Time.	Class and Subject.	Examiners.
11 0 to 11 45	Junior Girls—Geography, America and Ireland.	Miss Greaves, Monitress.
"	" Reading and Grammar.	Miss Caldwell, Principal.
11 45 " 12 30	Junior Boys—Reading, &c., and Arithmetic.	Mr. Johnston, Principal.
"	" Grammar and Geography.	Mr. Morris, Assistant.
12 30 " 1 0	Infants—Reading, Geography, and Arithmetic.	Miss M'Cormac.
1 0 " 1 15	Singing Class.	Mr. Morris.
1 15 " 2 0	Senior Boys—Reading, &c., Grammar and Parsing, Mathematical Geography, Arithmetic and Geometry.	Mr. Johnston.
2 0 " 2 40	Senior Girls—Arithmetic.	Miss M'Laughlin, Monitress.
"	" Reading, Parsing, Derivation, and History.	Miss Caldwell.
2 40 " 3 30	Science Class—Chemistry, Optics, Metallurgy, Electrotyping, &c.	Mr. Morris.
3 30 " 3 45	" Electricity, &c.	Dr. Clarke.
3 45 " 4 0	Singing Class.	Mr. Morris.

The singing class, conducted by Mr. Morris, sang several well-selected pieces with such taste and expression as to elicit the hearty plaudits of the audience.

The examination of the various classes having been concluded, the Rev. J. A. Canning then rose and said that he felt constrained by a sense of justice and duty to say a word or two to the large assemblage who had witnessed, with such marked attention and interest, the proceedings of the day. He had attended many examinations of the Coleraine Model School, and had always been delighted

Appendix C.
I. Reports on District Model Schools.
Coleraine.

with what he witnessed, but the examination which had now terminated had made him feel more deeply than ever he felt before how thankful the friends of education should be that such a valuable institution had been established in Coleraine. He admired the patience with which so many ladies and gentlemen had sat for six hours, while class after class was examined—and, in truth, he admired, most of all, his own patience—but he took for granted that they all felt as he did, that the deep interest which they took in the cross-fire of searching questions, and the prompt and intelligent replies of the pupils prevented them from feeling that there was any trial of patience in the matter. He (Mr. Canning) was far from being persuaded that if he selected an equal number of under-graduates, from some of our colleges and universities, and had the searching examination addressed to them which some of the higher classes had now passed through, answers more prompt and displaying more knowledge and mental discipline would be received than those boys and girls had now given. Manifestly, those young people had been taught to think. Their mental energies had been called forth, as learning which is imparted simply by rote could never have borne them through the lengthened and searching examination which they had just undergone. From the rudiments of knowledge up to some of the highest branches of science, all present must have observed that a training had been given to the pupils and an amount of information imparted which displayed an ability and assiduity and success on the part of the teachers that he was sure they must all admire. He (Mr. C.) would say for himself that, as a Christian minister, taking, as he should do, a deep interest in the education of the young of Coleraine, he was deeply thankful to know that such a sound and thorough education was being imparted to so many of them as he saw assembled within the walls of this admirable Model School; and he felt persuaded that he might venture to associate every individual in this large assembly with himself in tendering his thanks to the managers and teachers of the school for the many advantages which, by their assiduous and successful labours, they are conferring on the rising generation of Coleraine and its neighbourhood.

The Rev. J. Martin said that he was delighted and very much gratified with the examination, and expressed his surprise at the proficiency of the boys in the higher branches, particularly in physical science and logic, and complimented the teachers, Mr. Johnston and Mr. Morris, on their success. He also expressed himself delighted with the answering of Miss Caldwell's class on history and derivation of words.

At the close of the proceedings the premiums awarded to the most deserving pupils were distributed.

The proceedings terminated with the singing of the National Anthem by the pupils, in which many of the visitors joined.

We remain, Gentlemen, your obedient servants,

JAMES PATTEN, Head Inspector.
THOMAS M'ILROY, District Inspector.

The Secretaries, Education Office, Dublin.

Trim.

No. 10.—GENERAL REPORT upon the TRIM DISTRICT MODEL SCHOOL, for the year 1860, by TIMOTHY SHEAHAN, esq., Head Inspector of National Schools.

GENTLEMEN,—I have the honour to submit, for the information of the Commissioners, this my report upon the Trim District Model School, for the year 1860.

Since the date of my last report upon the establishment nothing has turned up calling for special observations. The grounds and buildings are in good order. There still exists the defect to which I have already called attention, viz., the want of a spacious hall to accommodate the visitors at public examinations.

The boarding department I have reason to suppose continues to be conducted in a satisfactory manner. No complaints regarding it have reached me from the District Inspector, and the results of my own inspection and inquiries go to show that there are no grounds for any.

On the different occasions of my visits I was happy to observe amongst the pupil-teachers evidences of devotion to study and self-improvement, which in young persons of their age is the surest safeguard against impropriety of any kind. The conduct of those in the establishment at the end of the year was most exemplary, during the whole time they had been in it, and as such, challenged favourable reports from the District Inspector.

I was gratified to be able to trace their good habits and propriety of conduct to the nature of the tuition they had been receiving from the head master, Mr. Frechill, and the examples set them by himself and his assistant, Mr. M'Wharter, of close application to the study of works containing useful and practical knowledge. I submitted them to an oral examination early in February, and though I found in their answering much that was creditable both to themselves and their instructors, yet I had to expose defects which appeared to have been overlooked, but which clearly showed that essential subjects, such as grammar and arithmetic, had not been well understood before their attention was called to natural philosophy and other advanced subjects, which though good in themselves, and useful to study in due season, should not take precedence of the elementary and more important branches. Mr. Frechill, who is always ready to receive and act on whatever suggestions I leave for his guidance, will, I have no doubt, be more particular in future with regard to this point, and take due care to have his pupil-teachers well grounded in the subjects taught in the elementary schools.

I must add that their examination on the whole exhibited results sufficient to warrant my recommending them for the gratuities offered by the Commissioners as rewards for proficiency and good conduct during the year.

On the same occasion I examined the paid monitresses in the female department. Though the answering in grammar and arithmetic was, in some instances, of an inferior character, yet the general proficiency of those who had been over a year in the establishment was so satisfactory as to warrant my recommending them for gratuities.

TABLE I.—Showing the Names of the Head, Assistant, and Pupil-Teachers, and Monitors on 31st December, 1860:—

Names of Teachers, Assistants, Pupil-Teachers, and Paid Monitors.	Position in the School.	Age.	Religion.	Date of Appointment to this School.
BOYS' SCHOOL.				
M. Freehill,	Head Master,	38	Roman Catholic,	5/50

Hannah Corry,	Ditto,	17	Established Church,	11/60

Appendix C.
I. Reports on District Model Schools.
Trim.

Miss Grace, assistant in the female school, resigned in January, and the vacancy thereby created was filled by the appointment of Miss Eliza Perkins, who had been educated and trained in the Central Model School. She has proved a good selection, and already earned the character of a zealous, intelligent, and skilful teacher.

There has been no other change in the staff of teachers, and all, as far as I have been able to discover, have been diligent and successful in the discharge of their respective duties.

The attendance for this year differs very little from that of the previous one, the aggregate average attendance at the three schools being 261, whilst that of the previous year was 269. In the school-fees there has been a falling off of £8. In the female department the deficit is greatest, it being £5. In this school the fees have fallen considerably in the last two years. In 1858 they amounted to £47 18*s.* 9*d.*; in this year they are only £33 16*s.* 4*d.* In the infant school there is an increase of £3, and in that of the boys a decrease to the same amount.

The following tables show the numbers on the rolls at the end of the year, and their classification according to proficiency, age, religious denomination, and rates of payment; they also give, for the two last years, the average numbers on rolls and in attendance, the school-fees, and the sums received for books and other requisities sold at reduced rates.

Attendance.—Table II.—Showing the Averages on the Rolls, Daily Attendance, with the Amount of School-Fees, and the value of the School Requisites sold to the Pupils during each of the last two years:—

The general examination for the year was begun on the 5th and closed on the 12th December. In the infant and the male school the answering on the different subjects set down in the programme was very creditable, and fully sustained the high character of these schools. In the female school the advanced pupils did not exhibit as accurate a knowledge of grammar and geography as I had expected from them. The subjoined tables show the classification and proficiency of the pupils examined:—

Appendix C.

Trim.

PROFICIENCY OF PUPILS.

PROFICIENCY.	No. of Boys.	No. of Girls.	No. of Infants.	Total.	Proportion per cent. to Total No. examined.
Able to read First Book,	4	–	14	18	85·5
Able to read Second or Sequel with tolerable ease and accuracy of expression,	42	17	34	93	80·9
Able to read Third and higher books with ease and intelligence,	47	47	–	94	99·0
Able to distinguish parts of speech,	29	13	34	76	73·1
Able to parse and apply the rules of Syntax,	39	41	–	80	75·5
Able to trace blank Maps and answer fairly on Local Geography,	37	51	40	128	76·2
Able to answer satisfactorily on Mathematical and Physical Geography,	37	43	–	80	80·8
Able to write a sentence from dictation with tolerable accuracy,	53	43	19	115	90·6
Able to write from dictation with readiness and correctness,	51	20	–	71	93·4
Able to write fairly,	59	40	20	119	83·9
Able to write a good hand with ease and neatness,	41	20	–	61	67·0
Able to write from dictation and solve pretty correctly questions in simple rules of Arithmetic,	14	48	37	99	87·5
Able to answer fairly in first ten rules of Mental Arithmetic,	31	20	–	51	80·1
Able to solve exercises in Proportion, Practice, and Fractions,	39	24	–	63	85·1
Possessing a respectable knowledge of Spelling-book Superseded,	49	47	–	96	91·4
Possessing a respectable knowledge of Natural History,	43	37	26	106	79·1
Fairly acquainted with the sketches of Ancient, Modern, and English History,	23	20	–	43	87·8
Able to demonstrate either the whole or portion of First, Second, and Third Books of Euclid,	19	–	–	19	100·0
Able to solve questions in simple or quadratic equations,	23	–	–	23	100·0
Possessing a fair knowledge of first, second, and third sets of Book-keeping,	22	–	–	22	100·0
Possessing a good knowledge of the Physical and Applied Sciences,	26	–	–	26	100·0
Possessing a good knowledge of Mensuration of Surfaces,	19	–	–	19	100·0
Able to solve problems on the Globes,	26	–	–	26	100·0
Having a good knowledge of Astronomy,	26	–	–	26	100·0
Having a fair knowledge of Elementary Trigonometry,	16	–	–	16	100·0

The public examination came off on the 13th, before a crowded audience; amongst those present were the following, viz.:—Very Rev. Dean Butler and Mrs. Butler, Rev. John Brownlow and Lady Elizabeth Brownlow, Ardbraccan; Rev. R. Lauder, LL.D., Mrs. Lauder and family, Agher; Rev. Thomas Wetherall and Mrs. Wetherall, Shanloth; Rev. Charles Burton, Bective; Rev. C. Reynolds, P.P., Kildalkey; Rev. J. C. Macdonnell, D.D., Mrs. Macdonnell and family, Laracor; Rev. Samuel Craig, Summerhill; Mrs. Collins and party, Ardsallagh; Mrs. Winter and party, Agher; William Thompson, Esq., Mrs. and Miss Thompson, Rathnally; James Delaney, Esq., and Mrs. Delaney, Grennanstown; Miss Hamilton, and the Honourable Miss Brown, St. Mary's; Richard Odlum, Esq., Mrs. Odlum and family, Crowpark; Mrs. Pendleton and family, Trim; J. J. O'Reilly, Esq., Trim; T. K. Henderson, Esq., Mrs. Smartt, Trim; Miss Burrett and Miss Hanbury, Teaguestown; Rev. Frederick Wetherall and party, Navan; Lady Harriet Fowler and family, Rahinstown; the Misses Mooney, Trim; together with a great number of the parents and friends of the children, who were attentive witnesses of the proceedings of the day.

The examination was conducted by the head and assistant teachers, so that all present were afforded an opportunity of forming an opinion, not only of the pupils' attainments, but of the abilities, method, and address of their instructors. The middle classes from the adult schools were the first to enter the room, and were submitted to a short but testing examination by Miss Perkins

and Mr. M'Wharter, assistant teachers. Miss Murphy, teacher of the infant school, next introduced her little ones, all of whom appeared remarkably neat and tidy. They sung their little song with good voice and spirits, and went through their various exercises in spelling, reading, geography, and arithmetic in a manner highly creditable to their kind and accomplished teacher. Miss Whittaker was equally successful in her examination of her senior classes. Mr. Freehill, head master, had a higher and a wider range of subjects on his programme; in all of which, however, he questioned his advanced boys, and elicited from them answers in history, arithmetic, grammar, physical geography, mathematics, and the different branches of natural philosophy, that really astonished many highly educated gentlemen who were present. At the close of the proceedings Mrs. Butler very kindly distributed premiums amongst the pupils who had been selected for these distinctions at the private examination.

I have the honour to be, Gentleman, your obedient servant,

TIMOTHY SHEAHAN, Head Inspector.

The Secretaries, Education Office.

No. 11.—GENERAL REPORT upon the BAILIEBOROUGH DISTRICT MODEL SCHOOL for the year 1860, by TIMOTHY SHEAHAN, esq., A.M., T.C.D., Head Inspector of National Schools. *Bailieboro'.*

GENTLEMEN,—I have the honour to submit, for the information of the Commissioners, this my report upon the Bailieborough District Model School for the year 1860.

I am happy to state that the alterations and additions to the buildings, which were in progress at the date of my last report, have been completed. New and suitable class-rooms are attached to the male and female schools, while a separate room has been fitted up for the purpose of an infant school. This, which has become a distinct department, is now in full operation, and conducted according to the principles approved for the education of pupils of tender years. There is already a prospect of a large attendance, independently of the children drafted from the adult schools. It is presided over by Miss Anne M'Carthy, who had been previously assistant in the Waterford Model School. Before entering here on a new sphere of duty, she attended some time at the Central Infant Model School, to become acquainted with the organization and system pursued there.

The great and peculiar advantages of infant schools have been so frequently put forward and made palpable by proofs based on results showing a progress and proficiency on the part of children, which before their establishment had been looked for only from pupils far beyond the age prescribed for infant pupils, that I shall not dwell upon the subject here. To do so would be a mere waste of time, for few, as far as I am aware, who have any acquaintance with their working, are sceptical on the point.

I am the more gratified in securing for Bailieborough, and the District of which it is the centre, the advantages of a Model School complete in all its parts, and conducted in its various departments by efficient teachers; for here, where the different persuasions are as evenly represented as perhaps in any other part of Ireland, this school, which was amongst the first established, was cordially received and supported by the clergy and laity of all denominations, whose confidence in it, and the principles on which it is conducted, has grown with their experience of its working, and, I am happy to state, still continues unabated. Since it was first opened in 1850, the hundreds of pupils who sat side by side at the same desks, and in their respective classes competed with an honest and a laudable emulation for the distinctions and premiums offered every year as rewards of merit and good conduct, must have escaped that mutual estrangement arising from differences of religion which should have been unavoidably felt by them if brought up in separate and denominational schools. Numbers of them have long since entered on the pursuits of life, and it may be presumed that the acquaintances and friendships formed and cherished in the school-room cannot have failed to give a character to their intercourse in the world.

I regret to have to report that the play-grounds are imperfectly laid down,

Appendix C.
I. Reports on District Model Schools.
Ballieboro'.

especially that attached to the infant school, the surface of which is higher than the floor of the school-room. These defects, as well as the necessity of enclosing the rear of the grounds with a wall, have been brought under the notice of the Board of Works.

With the exception of Miss M'Carthy, there was no new appointment amongst the teachers; the head and assistant teachers continue on and are giving entire satisfaction to all parties.

Mrs. Gibson resigned her situation of workmistress, and the duties are now performed by the head mistress and the assistant.

The following table gives a return of the teachers, pupil-teachers, and monitors, connected with the establishment at the close of the year.

TABLE I.—The names of the Head, Assistant, Pupil-Teachers, and Monitors, in both Schools on the 31st December, 1860.

Names of Teachers, Assistants, Pupil-Teachers, and Paid Monitors.	Position in the School.	Age.	Religion.	Date of Appointment to this School.

TABLE II.—Destination, or cause of Removal, of Pupils who left these Schools in the year ended 31st December, 1860.

BOYS' SCHOOL.	GIRLS' SCHOOL.
Three became Teachers in National Schools.	Seven appointed Teachers.
One appointed Pupil-Teacher.	One a Monitress in Model School.
Three apprenticed to Grocery Trade.	Three Emigrated.
One apprenticed to a Printer.	Two gone to Service.
One has become a Railway Porter.	One gone to live in Dublin.
Five gone to a Classical School.	Fifteen finished their time at School.
Seventeen Farming.	

Within the year two pupil-teachers left for the Central Training School, having spent each two years here. A recent rule of the Commissioners, permitting pupil-teachers to continue two years in a District Model School, is the cause of our having so few changes. After this year, however, we shall have half the full number going out every year.

From amongst the pupils, four males and eight females have entered the service of the Commissioners. Of these, three males and seven females have become teachers, one was appointed pupil-teacher, and one made paid monitress.

There have come under my notice cases where teachers who had been pupils here failed to realize all that the character of the schools had led me to expect from them; but it has seldom happened, if even once, that any pupils who had remained long enough to attain a proficiency up to the requirements of the programme for teachers, and exhibited a capacity and an aptitude for teaching, did not prove faithful and efficient instructors; and so great is my confidence in the present teachers, and the effectiveness of their tuition, that I feel certain no pupils recommended by them as fit to undertake the charge of ordinary schools will be found unequal to the trust reposed in them.

The following tables show the numbers on the rolls at the end of the year, and

their classification according to proficiency, age, religious denomination, and rates of payment; they also show the average numbers on rolls and in attendance during the year, the amount of school-fees, and the sum received for requisites sold at reduced rates, and the promotions and changes amongst the pupils.

TABLE III.—The Children on the Rolls on the 31st December, 1860, were classed as follows:—

	Girls,	19	16	14	12	-	-	61
Number on Rolls in last week of 1860,	Boys,	16	15	14	14	16	15	90
	Girls,	9	14	21	22	17	-	83

The pupil-teachers and paid monitresses attended the written examinations of the teachers of the District, and wrote answers to the questions given probationers and those seeking promotion to the higher division of third class. Again, in the early part of this year, they were examined orally by Mr. Adair and myself on the different subjects set down in the programme.

The monitresses, on the whole, acquitted themselves very creditably, and clearly proved their claims to the gratuities offered by the Commissioners at the end of each year.

Of the results of the pupil-teachers' answering I cannot speak with the same unqualified praise. In one or two cases it fell far below what should have been expected, and seemed the result less of due care and attention on part of the teachers than of neglect or incapacity on that of the pupil-teachers themselves. I had an opportunity of calling the head master's attention to these defects, discovered in the course of examination, and left such suggestions as appeared calculated to obviate any ground of complaint in future.

As regards order, discipline, and observance of rules, the pupil-teachers and monitresses, without exception, maintained a high character throughout the year. There was no complaint on the part of their teachers or themselves; they worked in their respective departments in perfect harmony; and I have no doubt, discharged, to the utmost in their power, the duties intrusted to them as teachers.

The general examination for the year, which was begun on the 1st December, engaged Mr. Adair, District Inspector, and myself, several days. There was the usual close inquiry into the proficiency of the different classes, and the answering of every pupil was tabulated, in order to show at once the absolute and the relative merit of each. We had a twofold object in view—to measure the work

performed by the teachers and pupils during the year, and distinguish those whose superior answering, industry, and good conduct established claims to the distinctions and premiums placed at our disposal by the Commissioners. Here I cannot avoid bearing testimony to the spirit and ability with which Mr. Adair conducted the examinations of the classes intrusted to him. He went through the heaviest part of the work with patience and earnestness, and, at the close, presented true and accurately-prepared tables showing the answering of each class on the different subjects stated in the programme. I shall best give an idea of the proficiency attained by the more advanced pupils in both schools by subjoining the programme for the senior classes in each. In all the subjects therein mentioned the pupils of the different classes were carefully and individually examined. The general answering was, indeed, very creditable, and quite sufficient to sustain the programme as a true expression of the pupils' requirements.

Appendix C. — I. Reports on District Model Schools. — *Bailieboro'.*

FOURTH CLASS.—BOYS.

Grammar.—Parse Complex Sentences—Text to end of Syntax.
Geography.—Six Chapters of Geography Generalized, Political, British Islands, and Europe.
Logic.—Eight Lessons.
Book-keeping.—Four Sets.
Spelling Book.—To end of English Etymologies.

GIRLS.

Lesson Books.—Fourth Book to the end.
Spelling Book Superseded.—Verbal Distinctions (5 Classes)—Rules for Spelling—Difficult Words—Prefixes, Affixes, and Roots—English Etymologies and Forms of Epistolary Correspondence.
Grammar.—Orthography, Etymology, and Syntax.
Parsing.—Compound Sentences.
Geography (Local).—British Empire and Continents—First Six Chapters Geography Generalized.
Arithmetic.—Fractions—Practice and Interest.
Dictation.—Any Sentence from Fourth Book.

The public examination was held on the 6th December, and, notwithstanding the severe weather, was largely attended by the gentry of the town and neighbourhood. The parents and friends of the pupils were sufficiently numerous to prove the necessity of the increased accommodation which the enlargement of the building then, for the first time, afforded.

The examination, as on former occasions, was conducted by the head and assistant teachers. The advanced classes were examined by Mr. M'Cotter and Mr. Brown in reading, grammar, arithmetic, and writing from dictation. They had to pass quickly from one subject to another to give evidence of the proficiency in each. Judging from the impressions made upon the minds of all present, and the deep interest manifested by them, which continued to the close of the proceedings, it would appear that the examination had given entire satisfaction, and secured for the teachers and the schools the confidence of all interested in the prosperity of schools.

At the close of the examination the prizes were distributed by Lady Young amongst those pupils who had been most successful at the private examination. Sir John Young then addressed the meeting at some length, and in very happy terms. He showed how peculiarly gratifying the occasion was to him, who had been at all times and in all places, whether as their representative or in a private capacity, a strong supporter of the National System, which had now, after many years of trial, proved itself to the country. After dwelling upon the advantages of the schools, and the liberality of the Commissioners in establishing them, he alluded to his intended departure from the country, and expressed a hope that the institution would continue to uphold the high character which it then well merited and possessed.

I have the honour to be, Gentlemen, your obedient servant,

TIMOTHY SHEAHAN, Head Inspector.

Appendix C. I. Reports on District Model Schools.

Belfast.

No. 12.—JOINT REPORT of JAMES PATTEN, Esq., LL.D., Head Inspector, and WILLIAM R. MOLLOY, Esq., District Inspector, on the BELFAST DISTRICT MODEL SCHOOL for the year 1860.

Belfast, May 4, 1861.

GENTLEMEN,—We beg to submit the following Report on the Belfast Model School for the year 1860.

It affords us much pleasure to be able to state, for the information of the Commissioners, that this Model School continues to maintain its well-known reputation for efficiency in its several departments. The teachers, with scarcely any exception, have been unremitting in their attention to the pupils, and have discharged the onerous duties devolving on them with the utmost zeal and assiduity. As the teaching staff was found to be inadequate to the requirements of the establishment, it was augmented in September last.

By a comparison of the *subjoined per-centages* of the pupils and teachers, according to their religious denominations, in the Model School towards the close of 1860, it will be seen that the numbers of pupils of the several denominations are fairly represented in the staff of instructors, viz.:—

	Of Pupils.	Of Teachers.
Established Church,	22·7	22·7
Roman Catholic,	23·	25·7
Presbyterian,	40·9	38·6
Unitarian,	2·3	2·
Wesleyan,	9·9	11·
Others,	1·2	–
Total,	100·	100·

The arrangements as to time for the *separate* religious instruction of the pupils continue unaltered since the opening of the school, and are, we believe, fully satisfactory to the parents of the children.

As the school building has been described in a previous report, we deem it superfluous to make any reference thereto on the present occasion. Large as the building is, it is at times inconveniently crowded with pupils, and we consider it inexpedient to extend the number of admissions much beyond what it is at present.

The annexed tables will give the Commissioners a succinct view of the most important heads of statistics connected with this establishment.

TABLE I.—Shows the number of Pupils of the different Religious Denominations on the Rolls on the 31st December, 1860:—

			Infants.			
	Boys.	Girls.	Boys.	Girls.	Total.	Per cent.
Established Church,	126	92	21	33	272	22·7
Roman Catholic,	123	80	43	31	277	23·
Presbyterian (Trinitarian),	213	169	64	45	491	40·9
Unitarian,	9	13	5	1	28	2·3
Wesleyan,	57	33	12	16	118	9·9
Others,	8	4	2	1	15	1·2
Total,	536	391	147	127	1,201	100·

By comparing the above with the numbers given in the Reports of this school for 1858 and 1859 it will be perceived that there is no appreciable variation in the per-centages of the different religious denominations of children in attendance. This fact speaks well for the confidence which the parents continue to entertain of the safety of their children in a religious point of view; and not merely are the religious denominations well represented in the attendance, but there is also a complete admixture of the various social grades:—

TABLE II.—Exhibits the Classification and Average Ages of the Pupils for the last week of December, 1860:—

In the amount and quality of the instruction imparted, the earnestness displayed by both pupils and teachers, the discipline, and general tone of the establishment, we are confident that the Belfast Model School, though, comparatively of very recent origin, would admit of being most favourably contrasted with the elder institution.

Appendix C.
I. Reports on District Model Schools.
Belfast.

Public Examination.—The public examination took place on the 6th and 7th November. For nearly three weeks previously we were engaged with the usual preliminary examination, held for the purpose of determining the merits of the pupils individually, and of awarding to the most deserving the premiums granted by the Commissioners. We may state, in general terms, that the results of the private examination were such as to merit our warmest approval.

At the public examination there was a large and influential attendance of visitors, both clerical and lay, and of the parents and friends of the children attending the school. We were also favoured with the presence and assistance of Wm. M'Creedy, esq., Chief of Inspection; R. Nesbit, esq.; A. T. Osborne, esq.; J. Patterson, esq.; W. Bole, esq.; R. Irvine, esq.; and J. Carlisle, esq., District Inspectors.

The examination, as on former occasions, was held in the boys' principal room, the several classes being brought, in succession, on a large platform before the visitors. The subjects of examination included grammar, geography, arithmetic, mensuration, political economy, natural philosophy, drawing, and music. A junior class of boys was examined on the first day by Mr. Greer, one of the assistant-masters, on grammar and geography, and a higher class, on the second day, by Mr. Linehan, on the same subjects and political economy. The answering was, in all respects, admirable. Mr. Moore, head master, examined the senior boys in arithmetic and mensuration. To prove that the pupils were not "made up" for the occasion, the visitors were invited to examine them, and one of the clergymen present, Rev. J. Scott Porter, proposed some questions in interest, which were solved by the boys with such quickness and accuracy as to elicit applause. The pupils' copy-books were suspended on the walls, to admit of being inspected by the visitors. In style and execution the penmanship throughout the classes was highly creditable. Both arithmetic and writing receive a degree of attention proportioned to their importance, especially in a town of such commercial enterprise as Belfast.

The physical science class, under the care of Mr. Eardley, first assistant, was examined by him on mechanics, pneumatics, steam engine, galvanism, and the electric telegraph, with the principles of which the pupils exhibited a satisfactory acquaintance. A working model of the electric telegraph having been brought in, a message given by one of the gentlemen present was sent and read by the pupils with promptness and accuracy. Several interesting experiments illustrating the above subjects were successfully performed by Mr. Eardley, and the processes explained clearly and readily by the pupils. The senior girls were examined by Miss Stewart, first assistant in the female school, on local and mathematical geography, and acquitted themselves most creditably.

Miss Collins, head of the female department, exhibited to the lady-visitors a variety of useful and ornamental needlework executed by the pupils. The examination of the infants by Miss Heritage, head mistress of the infants' school, was one of the most attractive features in the proceedings. The little ones were questioned on natural history, and showed considerable knowledge, for their tender years, of many of nature's productions. The visitors were much gratified with their neat and cheerful appearance and the style in which they sang several simple pieces of music.

The walls of the school-rooms were ornamented by numerous well-executed drawings, the productions of the pupils under the charge of Mr. Smeeth, Drawing Master; and the surprise of the visitors was excited by the degree of skill and taste with which large classes of boys and girls sketched flowers, &c., from nature in their presence.

Ample opportunity was afforded to the visitors of forming an opinion on the proficiency attained by the pupils in vocal music, under the direction of Mr. Washington. Several choruses, in which upwards of 250 pupils joined, were executed in excellent style; there were also songs by two or three voices in harmony, and some solos. The degree of accuracy and taste displayed called forth the plaudits of the audience, and drew from the Lord Bishop, in the closing address, a well-merited compliment on the success of Mr. Washington's labours.

At the close of the examination, the Head Inspector, addressing the public, teachers, and children, said that the examinations had been highly creditable to both teachers and scholars. He believed the public must observe that the

National System, in imparting such varied and useful instruction to the rising generation, was doing great good to society at large. In the examinations during the two days, a principal place had been given to drawing and music, the proficiency of the children in which was very creditable. The prizes about to be distributed were not given by the Board merely for the proficiency exhibited during the two days, but as the result of examinations conducted by the District Inspector and himself for several days in the various classes of the school. After several other remarks, he called upon the Lord Bishop of Down and Connor.

The Lord Bishop said—

"My dear friends, Dr. Patten has told you that the examinations have now terminated, and he has called upon me to say a few words. In doing so, I have merely to repeat what I have often said before, namely—and I can say it with confidence and certainty—that these examinations have been most satisfactory, highly creditable to all concerned—teachers and pupils—and clearly demonstrate the privileges which the young now possess in obtaining a sound education. They have been most satisfactory to the public, and reflect great credit upon the teachers. Dr. Patten has mentioned that it would be impossible on an occasion like the present to tell all the good these schools have done, or the statistics of true knowledge and thorough information imparted in them. We have called here the parents of the children, and the patrons, friends, and admirers of this noble institution, and have shown them the proficiency of the pupils in the popular branches of education. Among those examined were classes in drawing; and I think the manner in which the pupils have been taught to draw on natural principles, with accuracy of detail, is highly creditable to their instructor. With regard to the music, we have all been highly delighted. It dispels, in my mind, the charge which has been often made—that we are not a musical people. It has been said often that we Northerns have no love of music and sweet sounds. Well, perhaps it may be true of the older portion of the community, but of the rising generation it cannot be said. I think Mr. Washington, the accomplished teacher of music in this place, has plainly demonstrated to all who have had the pleasure of being present and heard the admirable proficiency to which he has trained his classes, that such is not the fact. It must have been highly pleasing to the parents, and to the general public the exquisite musical performances must have been a great treat. You will perceive, as Dr. Patten has said, that the premiums now about to be distributed are not given on account of the examinations that have just taken place, but they are the result of a searching examination in every class in the school within the past fortnight. There has been set apart by the Board in Dublin the large sum of £40 to be distributed among the successful candidates; and, while I am the channel of conveying these prizes, I do so as the agent, and have associated with me in doing so the ministers of the various denominations present. The beauty and glory of the National System is its non-sectarian character: it is the spirit and life of the institution. Here the ministers of all denominations can meet together on a common footing, and for a common object—the spread of information among the young. It now falls to my lot to distribute to the successful candidates the following premiums."

The distribution of prizes having concluded, his Lordship said he was happy to announce that Mr. M'Creedy, Chief of Inspection, had agreed, at his request, to give the pupils of the institution holidays for the remainder of the week.

The girls and boys then sang some pieces, concluding with the National Anthem, after which the proceedings connected with the examinations terminated.

We cannot conclude this Report without adverting to the success of the Belfast Model School as a *training institution* for young teachers. Within the past year *seven* monitors were appointed pupil-teachers, and eight pupil-teachers became principals or assistants in ordinary National Schools. Similarly, in the female department, of *twelve* monitresses who left during 1860, *ten* are now in charge of National Schools; and of *nine* young women, pupils of the Model School, *seven* are teaching in National and *two* in private schools.

Almost daily applications are made to the Head and District Inspectors by managers of National and other schools for teachers trained in this establishment; and the most satisfactory accounts continue to be received of the success of those who have obtained appointments from it.

We are, Gentlemen, your obedient servants,

JAMES PATTEN, Head Inspector.

WILLIAM R. MOLLOY, District Inspector.

The Secretaries, Education Office.

Appendix C. I. Reports on District Model Schools. *Kilkenny.*

REPORT of J. G. FLEMING, esq., Head Inspector, on the KILKENNY DISTRICT MODEL SCHOOL.

Waterford, 1st June, 1861.

GENTLEMEN,—I have the honour to submit, for the information of the Commissioners, my Report upon the Kilkenny Model School, for the year 1860.

The institution comprises three distinct departments, viz., boys', girls', and infants' school, under the charge of three principal and three assistant teachers. In the boys' and girls' schools the principal teachers are Roman Catholics, and the assistants Protestants. In the infants' school the principal teacher is a member of the Established Church, her assistant is a Roman Catholic. These arrangements afford the most ample guarantee against undue interference on the part of any of the teachers with the religious belief of their pupils, and give the fullest confidence to parents that the rules of the Commissioners, both as regards secular and religious instruction, will be scrupulously observed. Upon this subject the public have had abundant means of forming an opinion, as the schools are open to visitors of every class and denomination from ten till three on Mondays and succeeding week days, during which there is every opportunity afforded them of witnessing the management and discipline of the classes, as well as the arrangements for giving secular and religious instruction. It is quite in place to mention that, although some thousands of children have received the whole or the greater part of their education in the Kilkenny Model School, in no instance has the slightest expression of dissatisfaction emanated from any parent or guardian in reference to the all-important subject of religious training.

One would suppose that a school conducted on principles so impartial and so strictly in accordance with sound public opinion would be sure to command the cordial support of all classes of the community. I regret to add such is not the case. The opposition of the local clergy has diminished the number of scholars, and it is entirely owing to this circumstance that the average attendance during the past two or three years has continued so low. The usual statistics, in reference to the attendance of pupils, amount of school-fees, and value of books and requisites sold in the Kilkenny Model School during the year 1860, will be found in the annexed table:—

	Boys.	Girls.	Infants.
Average on rolls,	57·4	47·5	62·8
Average daily attendance,	46·6	42·5	50·5
Proportion of average attendance to 100 on rolls,	80·	83·9	80·4

Amount of School-Fees received for the year 1860.

	Boys.			Girls.			Infants.			Total.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.
Requisites sold,	5	8	4½	3	12	4½	1	1	5½	10	2	2½

Boys' School.—In my last Report I stated that the proficiency of the classes in penmanship and arithmetic was not quite equal to my expectation of what should be realized in a Model School some five years in operation, and enjoying so many peculiar advantages not available to teachers in the ordinary National Schools. The results of the special examination held in December last, convinced me that the defects referred to did not at all exist to the same extent. At the same time increased exertion on the part of the teacher will be required before the proficiency of all his classes in penmanship and arithmetic can be regarded as satisfactory. It is but just to observe that his pupils, with very few exceptions, read extremely well and answered intelligently on the meaning of the lesson. The more advanced boys parsed sentences of average difficulty very correctly, and their knowledge of maps and descriptive geography was equally satisfactory. The most effective discipline is enforced, and the pupils, with scarcely an exception, have acquired habits of order, neatness, and personal cleanliness, all which is most creditable to the principal teacher, Mr. Casey.

Girls' and Infants' School.—I devoted several hours to the special examination of the pupils in the girls' school, and I had every reason to feel perfectly satisfied with their answering in the customary branches. I am happy to add, that the additional experience of the past year has strengthened the opinion which I expressed in a former report of Miss Ryan's ability, assiduity, and zeal in the discharge of her duties as principal teacher. In her method of conveying instruction she is not surpassed by any teacher I know.

In the infants' school, under Miss Palmer's charge, similar evidence of careful and judicious teaching presented themselves. In my general report for the past year I alluded to the beneficial influence which a good infants' school exercises, by preparing the children of the poorer classes for receiving instruction in the more advanced schools for boys and girls. A single visit to the Kilkenny Model Infant School would, I think, satisfy any impartial inquirer of the correctness of this view; the good effected by schools of this stamp, in advancing and stimulating popular education, cannot be too highly appreciated.

In the annexed Table will be found the classification of the pupils on the rolls, their respective ages, and the results of their answering at the general examination held in December last.

The Children on the Roll are Classed as follows:—

Vocal Music and Drawing.—Miss Orr, the assistant teacher in the girls' school, gives occasional instruction in singing, a task for which she is imperfectly qualified. It is, of course, very easy to get a number of children to sing by ear a few simple airs, and Miss Orr has succeeded in doing this; but she has not had the special training, the necessary experience; and the requisite musical knowledge to fit her for the situation of teacher of vocal music. I do hope the suggestion I forwarded to the Secretaries some time back, recommending the appointment of a really qualified master to organize and teach the singing classes in the Waterford, Clonmel, and Kilkenny Model Schools, may be speedily carried into effect. He could readily give instruction week about in these schools; his travelling expenses would be but trifling, and his salary would involve very little additional expenditure. Some arrangement of the kind is imperatively required, for I am sorry to be obliged to state that the classes of singing in the Waterford and Kilkenny Model Schools reflect no credit on these institutions.

No provision, whatever, is made for teaching drawing, a want which I hope to see supplied before long. Much as I regret the absence of effective teaching, I regard the want of instruction in drawing as a much greater evil. The ability to draw plain and curved figures is readily acquired by most children, and as a step in preparing them to draw common objects, such as an umbrella, stool, leaves, flowers, and some shells, should be by all means encouraged. Easy drawing copies for elementary instruction can be had at a very moderate price, and may be turned to practical advantage by intelligent teachers. "To teach children," observes Mr. Cole, "to see straight and curved lines, to know a sphere from an oval and to prove that they know it by drawing it; to show them how to perceive that most objects appear with light and shade, and that there are colours in the world which may be artificially brought together well or ill, according to certain laws, only ordinary intelligence is required." It is not imperative that every one should be an incipient Raffaelle to teach these things. In fact, next to reading, and in some cases before writing, a correct appreciation of form and power to delineate it is necessary. A sense of correct form is indispensable to the artizan,—carpenters, masons, bricklayers, smiths, sempstresses, &c., who spend their lives in trying to realize it in material substances; and not less indispensable to the purchaser, and, therefore, critic, of their works.

I remain, Gentlemen, your very obedient servant,

J. G. FLEMING, Head Inspector.

The Secretaries, Education Office.

* Address on Art Education.

No. 14.—ANNUAL REPORT for 1860 upon the WATERFORD DISTRICT MODEL SCHOOL, by J. G. FLEMING, esq., Head Inspector of National Schools.

GENTLEMEN,—I have the honour to transmit, for the consideration of the Commissioners, my annual report on the Waterford District Model School for the year 1860.

During the past year, I inspected the several departments of the institution on eight different occasions, devoting, in all, four days to the examination of pupil-teachers and monitresses, and four days to the examination of the children attending the schools as ordinary pupils. It is quite in place to mention, that institutions of this character are something more than first-class schools established for the sole object of conferring on a limited number of pupils a thoroughly sound education. They are, besides, training schools, although necessarily on a small scale; and they greatly contribute to advance the interests of education by exemplifying in a practical, comprehensive manner the best and most effective methods of teaching.

Before entering into details relative to the proficiency of the pupils, methods of instruction, and other points deserving of consideration, I shall give a brief abstract, specifying the character of the attendance, the amount of school-fees received, and the value of the books and stationery purchased by the pupils during the past two years.

	Boys.	Girls.	Infants.	Total.	School Fees.			School Roquisites sold.		
					£	s.	d.	£	s.	d.
1859.										
Average on rolls, . . .	77·6	65·9	57·5	201	99	8	6	16	5	7
Average daily attendance, .	62	51	45·1	158		–			–	
Proportion of average attendance to 100 on rolls, .	79·8	75·9	78·5	78·2		–			–	
1860.										
Average on rolls, . . .	83	67	54·2	204	99	3	2	17	17	0
Average daily attendance, .	70·5	54	46	170·5		–			–	
Proportion of average attendance to 100 on rolls, .	85	80·4	80·2	83·4		–			–	

These figures exhibit an increase in the average attendance for 1860 of eight pupils in the boys' school, of three in the girls' school, and one in the infants' school. The attendance is gradually increasing, and promises to be considerable during the ensuing summer months. I am sure it will not sensibly diminish, as I believe all classes repose the fullest confidence in the teachers, and are convinced that the spirit and strict letter of the rules respecting the time and place for giving religious instruction will continue to be scrupulously observed. Already some thousands of children, differing in religious belief, have been educated in the Waterford Model Schools, yet no complaint from any quarter has ever been made on the subject of religious instruction. It has never been said that secular instruction monopolized or unduly absorbed the teachers' attention, or that they ever exceeded in the slightest degree the limits of their duty. It is worth noticing that while the proportion of average attendance to 100 on rolls was for the past year as high as 84·3, it did not exceed fifty to every 100 on the rolls of the ordinary National Schools;—a convincing proof that parents fully appreciate the advantages open to their children in the Waterford Model Schools.

In the annexed table will be found the classification of 258 pupils on rolls in December last. Of this number 226 were examined by the District Inspector and myself in all the subjects mentioned in the school programme. Our examination extended over the greater part of three days, and would have occupied more time, but for the valuable assistance I received from that gentleman. This will be readily understood when I mention that the answers of every child were marked and subsequently calculated with a view of selecting the most deserving for premiums and certificates of merit. This was a tedious and troublesome task, nearly as much so indeed as the examination of so many probationary teachers; in the case of fourth and fifth class pupils it was quite as minute and searching on all the subjects it embraced.

Boys' School.—The essential branches are thoroughly taught. The pupils of the fifth, fourth, and the great majority of third class read extremely well. They have, with very few exceptions, acquired a peculiar distinctness and accuracy of pronunciation, and their facility in making with the voice the divisions of each sentence correctly, and with expression, showed that they perfectly understood the subject-matter. Of ninety-seven pupils examined, thirty-four read in this excellent manner, and the remaining fifty-three were able to read words of three syllables with ease and accuracy. In fact, I do not remember having ever before met with so large a proportion of really good readers in a boys' school. I cannot, however, speak in the same favourable terms of their penmanship, which in many instances was stiff, cramp, and ill-proportioned, both as to the style and form of the letters. In the copy books these defects were sufficiently apparent, but still more so in the dictation exercises, which afford the surest test for determining the character of one's handwriting. Increased attention is now given to so essential a branch; and it is only just to add, that on looking over the copy books of the several classes a short time back, I noticed a marked improvement in the style of penmanship.

In my last report I observed that the best readers in the school failed to analyze and explain in a satisfactory manner a few short and not very difficult passages in verse. This is no longer the case—many of the fourth class and all the fifth class pupils can now parse and analyze most of the poetical pieces in their respective Lesson Books. It is due to the principal teacher, Mr. Dowling, to mention this, as it is evidence of his zeal and earnestness in carrying into effect the suggestions left by the inspector for the improvement of the school. I have also to notice some improvement in the answering of the more advanced pupils on theory of arithmetic, in which however the younger boys are still deficient. It is not, of course, expected that a lad of ten or eleven should understand the reason and meaning of the higher rules, because his judgment is not sufficiently formed to comprehend their sense and mutual relation. He should, however, be well acquainted with the meaning of the simple and compound rules; but this is rarely the case, as young children learning arithmetic are scarcely ever accustomed to think and reason on the principles which they

apply when working sums. I have only to add, in reference to this subject, that the pupils of *all* the classes acquitted themselves very creditably in mental and slate arithmetic.

The exercises written from dictation exhibit comparatively few errors in spelling, punctuation, and the use of capital letters; but the style of the writing was, as before observed, stiff and laboured. The examination on rules for spelling and pronunciation, on grammar, geography, and tracing of outline maps, was extremely searching; and it is my gratifying duty to add, that I was not disappointed in the character of the answering—I say character, because the standard of proficiency by which the pupils were tested was very high. The fact is, a well-conducted lad of average abilities and application can readily qualify in this school for any of the ordinary situations in the Civil Service, now open to public competition.

In the girls' school the answering of the pupils gave me entire satisfaction, and the ease and quietness with which the business of the several classes was managed afforded the best proof of the suitableness and efficacy of the discipline. I am happy to have this opportunity of bearing my humble testimony to the zeal, ability, and good judgment of the principal teacher, Miss Denniston. She is esteemed by all who know her, and her pupils, for whom she has accomplished so much, respect and love her as their truest friend.

The reading, especially of poetical extracts, was still better than in the boys' school; but I have already observed, and a more lengthened experience tends to confirm the impression, that, generally speaking, girls read better than boys. The useful exercise of writing letters and short themes on interesting subjects proposed by the teacher has been successfully practised by the more advanced classes—the style and penmanship of many of these compositions were very creditable to the writers. The less advanced pupils wrote several sentences from dictation with remarkable neatness and accuracy, and the general proficiency of the classes in grammar and geography was equally satisfactory, but many of the pupils failed in punctuation and rules for spelling and pronunciation. In needlework too, there was some room for improvement, as the specimens worked by the pupils were fewer in number, and less finished than those produced at previous examination. The assistant teacher is mainly responsible for this serious defect which calls for immediate remedy. The present assistant, Mrs. Dowling (an experienced and skilful needlewoman), has already organized two large classes, numbering some forty girls, all of whom are now busily employed learning the most useful branches of needlework, including the cutting out of articles of plain clothing. Ornamental or fancy work is not for the present taught.

I stated in my general report that young children who are fortunate enough to attend a good infant school for any length of time are invariably among the best and most intelligent pupils of the upper schools. The reason of this is obvious enough: they come thoroughly prepared for receiving instruction. In this respect they have immense advantages over the ordinary class of children, who spend the greater part of the time they remain at school learning to spell and read. In the Waterford Model Infant School this is almost daily exemplified. The young children, who, on completing their seventh year, leave for one of the upper schools, can, at this early age, read any lesson in Second Book, without difficulty; and, as they are proportionately advanced in other elementary branches, they at once take their place in some division of Sequel class. It is also essential to observe that their information on rudimentary subjects has been very slowly acquired—the average stay of children at the infant school being rather more than two and a-half years. During this time everything approaching an unhealthy excitement or premature development of their mental faculties is sedulously avoided. The lessons are short, appropriate, and judiciously varied—marching to and from the play-ground, object lessons, and singing occupy nearly all their time. Nevertheless, imperceptibly, and without any apparent effort, these little children learn to read, write, spell, and to add, subtract, and multiply numbers, and, what is still more important, they are trained to habits of order, neatness, and cleanliness, and they quickly learn to be docile and obedient. The truth is, few persons not practically acquainted with the subject of infant school teaching fully comprehend the extent to which young children are improved by attending a good infant school for two or three years. Of course, a great deal depends on the teacher. I can very sincerely state, that

Appendix C.
I. Reports on District Model Schools.
Waterford.

Miss Bible, the principal teacher in the Waterford Infant School is everything the infant teacher should be. I may add, her influence is felt beyond her own school—she has been very successful in qualifying several young persons to take charge of infant schools.

The annexed table exhibits the proficiency of the 226 pupils examined, December last, by myself and the District Inspector, Mr. M'Lochlin, the preceding observations have special reference to the results of that examination:—

	Boys.	Girls.	Infants.
Able to read correctly Second Book *only*,	56	47	16

There are at present five pupil-teachers and eight paid monitresses employed in the three departments of the Waterford Model School. The pupil-teachers are exclusively engaged in the boys' school—six of the monitresses in the girls' school—and the remaining two in the infants' school. The monitresses are not, however, permanently attached to either school. They take their turn of duty alternately in the girls' and infants' school, the object being to give them a prac-

tical knowledge of the business of infant school teaching. I examined, during the past year, all the pupil-teachers and monitresses on their prescribed course of study. The former acquitted themselves tolerably well, and their written exercises gave proof of study and preparation; but, I regret to add, the monitresses failed in some very essential subjects, among others, Lesson Books, rules for spelling and arithmetic. The consequence was, they were not recommended for the usual gratuity, and if they do not answer much better at next examination they cannot be permitted to retain their situation. During the last two years, twelve young men, pupil-teachers in the Waterford Model School, were prepared for the office of teacher. The great majority of them are now in charge of National Schools, and promise to become very useful and efficient teachers.

Singing and Drawing.—Singing is still very indifferently taught. The children's voices are more or less injured by inattention to time, correct intonation, and many other essential points which are always kept in view by the qualified singing master. I make this statement very reluctantly, but I cannot avoid expressing my decided opinion that the singing classes are anything but creditable. If not very soon improved (which I do not anticipate), they should, I think, be discontinued.

Drawing.—The classes are, I believe, steadily improving. In order that the Commissioners may have the fullest opportunity of ascertaining the proficiency of the pupils learning this useful accomplishment, I have instructed the Drawing Master to forward, each quarter, the specimens executed by his classes. In the absence of any communication to the contrary, I am justified in assuming that the Commissioners regard those specimens as satisfactory evidence of due attention on the part of master and pupils to this branch of instruction.

Before concluding this report, I wish to bear my willing testimony to the good conduct and exemplary behaviour of all the pupil-teachers and monitresses during the past year. Not a single complaint of a serious character has been preferred against any of them. They are tractable and obedient and in their dress and person afford the children under their care examples of neatness and cleanliness.

With respect to the order, the domestic arrangements, and the general state of the buildings, I am happy to be able to repeat what I said in my last report on the Waterford Model School. The house, premises, and grounds are in admirable order, and evidence of the strictest attention to cleanliness in the dormitories, class room, kitchen, and other apartments, is everywhere discernible.

I remain, Gentlemen, your obedient servant,

J. G. Fleming, Head Inspector.

The Secretaries, Education Office.

No. 15.—Report on the Athy District Model School, for the Year 1860, by J. G. Fleming, esq., Head Inspector.

Waterford, 25th May, 1861.

Gentlemen,—I beg to transmit for the consideration of the Commissioners my annual report on the Athy District Model School, for the year 1860. In it I shall briefly refer to the character of the pupils' attendance, their proficiency in the several branches of their course, the answering of the pupil-teachers and paid monitresses, at the usual periodical examinations, and, lastly, to the order, discipline, and internal arrangements of the institution. The information comprised under these three heads will enable the Commissioners and the public to form an accurate opinion of the character of the instruction given in this Model School, and to determine for themselves how far it has attained the ends for which it was established.

Attendance.—In the annexed table will be found the average number of pupils on rolls and in average attendance, amount of school-fees received, and value of books, stationery, &c., sold during the year 1860. I also furnish corresponding returns for 1859, which, as compared with those of last year, exhibit some slight points of difference; for, while the average number on rolls was greater in 1860

Appendix C. — I. Reports on District Model Schools. — *Athy.*

than in 1859, the average attendance was less. The cause of this discrepancy will be explained in a subsequent part of this report.

	Boys.	Girls.	Infants.	Total.	School-fees.	Requisites Sold.
					£ s. d.	£ s. d.
1859.						
Average on Rolls, . .	151	87	71	309	100 1 9	19 4 9
Average daily attendance, .	101	54	56	211	—	—
1860.						
Average on Rolls, . .	139	97	75	311	92 2 8	17 7 11½
Average daily attendance, .	92	57	52	201	—	—

Taking into consideration the unexampled wetness of the past summer and autumn and the unwonted severity of the succeeding winter months, a considerable falling off in the attendance might reasonably have been anticipated. It is certain that the harsh ungenial weather which prevailed last year seriously affected the attendance of pupils in the ordinary National Schools; and the steadiness of the attendance at the Athy Model School is all the more remarkable from the fact that nearly four-fifths of the pupils do not live in Athy, but reside in the country, at a distance of one, two, three, and, in some cases, four miles from the town. I think these facts support the conclusion that parents who send their children to the Athy Model School fully appreciate the many educational advantages it affords, and they also go far to prove that the principal teachers have done their duty by their pupils. It may be taken for granted that a low rate of school-fees encourages irregularity of attendance, for what can be got for a penny or two-pence per week is not very much valued by the ignorant or imperfectly educated classes. This is one of the causes which keep the children of the poor from school for the most trifling causes. If, therefore, great regularity of attendance co-exists with a very low scale of school-fees, it may be assumed, without any doubt, that a result so contrary to the usual course of things, has been secured mainly through the ability and energy of the teacher. Now the average rate of school-fees in the Athy Model School does not exceed 1½*d.* per week, and yet the attendance has always been extremely regular, the pupils rarely absenting themselves except for reasons valid and satisfactory. The conclusion is obvious, and all in the teacher's favour.

Boys' School.—As the great bulk of the pupils examined belonged to the more advanced classes, the reading was proportionately good. Of fifty-four in third or higher divisions, considerably more than three-fourths read with ease and expression. Their pronunciation was correct and their accent true and remarkably free from local peculiarities. This has often been remarked by strangers, and my own experience is in accordance with the opinion that the accent of the Kildare people is, as regards distinctness of enunciation and freedom from marked provincialisms, the most pleasing of all Irish accents.

The proficiency in arithmetic was, on the whole, satisfactory—twenty-one boys solved difficult questions in practice and proportion, while twenty-four worked questions of average difficulty in simple and compound rules; the junior classes were proportionately advanced. I have to suggest more attention to theory and meaning of rules and greater diversity in the character of the examples. Some of the questions I proposed, although by no means difficult, were seldom answered, merely because they differed slightly in their wording from the ordinary class of sums given in the Board's text-books. Judicious questions from Colenso's examples, or some similar work, should be occasionally proposed to the advanced boys studying fractions, proportion, or the higher commercial rules. These questions should be varied as much as possible, for the purpose of opening new views to the learner, and thereby qualifying him to apply the principles of the rules to all cases, without exception. This observation is equally applicable to mental arithmetic, in which even the advanced classes are deficient, although there is hardly any other subject so popular with boys. They always take pride in answering correctly and rapidly questions by mental calculation—to excel in such exercises is a great object of ambition with the advanced pupils in every good school. Laudable emulation of this kind should be encouraged by all possible means.

The pupils reading in Sequel and higher Lesson Books were carefully examined in geography, grammar, parsing, and tracing of outline maps. In the two last-mentioned subjects, the advanced classes acquitted themselves very well indeed;

but, in descriptive geography and grammar the answering was not equally satisfactory, although better than what I meet with in ordinary National Schools and considerably above the requirements of the school programme. Much more than this, however, should be accomplished in a Model School, with its efficient teaching staff, ample supply of books, maps, globes, and apparatus, and extreme regularity of the pupils' attendance.

The dictation exercises of third, fourth, and fifth class pupils were creditable enough, regarded merely as evidence of their knowledge of orthography and rules of spelling—as specimens of penmanship they were deficient in neatness, proportion, and freedom of style. The principal teacher, will, I am sure, spare no exertions to remedy this serious defect, and I expect to find the style of penmanship greatly improved at next examination. As I think it very desirable the Commissioners should have frequent opportunities of judging how far penmanship is successfully taught in the Model Schools, I purpose, henceforth, sending them, once or twice each year, specimens of the handwriting of every pupil in third, fourth, and fifth class, attending any Model School under my superintendence.

Girls' School.—I was much pleased with the reading of all the classes in this school. Of seventy-two girls examined, all, but fifteen, might be returned as able to read books of ordinary difficulty with ease and intelligence. The pupils of the most advanced classes read some pieces in verse with great taste and expression, and they afterwards parsed several passages in prose and poetry very correctly. I can also add that their explanation of the subject matter of their reading lessons was lucid and accurate. This I attribute to the searching character of the teacher's questions on the subjects which her pupils study. She has accustomed them to *think* on what they read, and, although they are occasionally slow in answering questions, they never answer in a random, haphazard fashion, without due thought and reflexion. They exhibited considerable proficiency in arithmetic, grammar, geography, and writing from dictation, although they were tested in these subjects very rigorously. The public examination was necessarily brief and imperfect; but, as far as it extended, it was very strict. I have no doubt it sufficed to convince every one present that Mrs. O'Reilly (the principal teacher) deserved well of her pupils. I wish to add that she has been unwearied in her exertions to improve her classes in needle-work. The youngest child in her school receives instruction every day in knitting or some other branch of plain work; the more grown girls have been taught to cut out and make their own clothing. Embroidery and other kinds of fancy work are comparatively neglected, but unavoidably so, as more useful subjects engage all the teachers' time.

Infants' School.—The new apartment built for the accommodation of the infants, and completed some months ago, is now occupied by Mrs. Sutor, the head teacher, and her little scholars. It is a large, spacious room, admirably lighted and ventilated, and abundantly supplied with school apparatus, adapted for the use of very young children. Hitherto the want of adequate school space prevented Mrs. Sutor from carrying into effect several arrangements which her experience and judgment suggested; that defect having been supplied, she will, I fully anticipate, make the Athy Infants' School perfect in every respect. The Inspectors who preceded me in the Athy district spoke very favourably of Mrs. Sutor's capabilities and qualifications for the situation of infant school teacher —my own experience of the manner in which she has performed her duties during the past year enables me to support that opinion to the fullest extent.

I give below the classification of the pupils on rolls, at the date of the examination, held conjointly by myself and the District Inspector, Mr. Coyle, in December last. By instituting a comparison between this return and the results of the answering of the classes, as set forth in the subjoined Table of Proficiency, the Commissioners can at a glance ascertain how far the teachers have succeeded in realizing the main object for which they were appointed.

[The Children

The singing classes have greatly improved under Mr. Drill's instruction: His pupils sang several pieces on the day of the public examination with remarkable taste and correctness, which gave an agreeable variety to the proceedings of the day. They were warmly and deservedly applauded at the termination of each song by the large assemblage present at the examination. It was gratifying to witness this public testimony to Mr. Drill's worth and ability as a teacher, for he fully merited it by his strenuous efforts to improve his pupils in the theory and practice of vocal music.

Pupil-Teachers and Monitresses.—There are six pupil-teachers employed in the boys' school, six monitresses in the girls' school, and two monitresses in the infants' school, to which, however, they are not permanently attached, as the same arrangement is carried out as in the Waterford Model School, in which the monitresses assist in turn in the infant school. They are thus enabled to witness the best method of instructing young children, and, although they may not be appointed to the charge of infant schools, the information they gain during the time they assist in the Infant Model School must prove of great service to them in conducting any ordinary National School, in which the younger children usually constitute one-half of the pupils in average attendance.

I tested, last year, the literary attainments of the pupil-teachers and monitresses. The pupil-teachers acquitted themselves satisfactorily in the subjects which the examination of probationary and third-class teachers embrace. In fact, their answering would have warranted me in recommending them for some division of third class, assuming that they had charge of National Schools favourably reported upon by their Inspector. But I cannot speak at all favourably of the proficiency of the monitresses in the elementary branches, upon which they are expected to answer at least moderately well. They failed in Lesson Books and arithmetic, and their style of composition was harsh and laboured, abounding in useless repetitions and idle redundancies. In consequence of these serious defects, I declined recommending any of them for the usual gratuity awarded to paid monitresses in Model Schools, who answer satisfactorily on their prescribed course of study. The truth is, the monitresses belonging to the Athy Model School seldom devote any time to home study. What they know they learn at school; but I believe they make very slight efforts to co-operate with their teachers who give them private instructions morning and evening, that is before and after the usual school-hours. Of course some allowance should be made for the want of natural abilities and quickness in mastering arithmetic and other elementary subjects; but when there is every reason to suppose that idleness and neglect of study are the true cause of the monitresses' bad examination, they should be made to understand that in case their answering at next examination exhibits similar want of due preparation by private study, they will be dismissed without further notice.

Before concluding this report it is my pleasing duty to mention that both pupil-teachers and monitresses have been regular and punctual in the discharge of their school duties during the entire of the past year. Their teachers report most favourably of their conduct, and state that they have on all occasions acted with great kindness and gentleness towards the children placed temporarily under their care for special instruction or repetition of home lessons.

I remain, Gentlemen, your obedient servant,

J. G. Fleming, Head Inspector.

The Secretaries, Education Office.

II.—Reports on Agricultural Schools, for the Year 1860.

II. Reports on Agricultural Schools.

Report of Thomas Kirkpatrick, Esq., M.D., Inspector of Agricultural Schools.

Dr. Kirkpatrick.

Albert National Agricultural Training Institution,
Glasnevin, Dublin.

Gentlemen,—I have the honour to submit my Report on the Agricultural School branch of the system of National Education for the year 1860.

The following is a tabular return of the National Agricultural Schools in connexion with the Board, on the 31st December, 1860:—

No. 1.—Nineteen School Farms of the First Class under exclusive management of Commissioners.

County.	School.	County.	School.
Antrim,	Ballymoney.	Tipperary,	Kyle Park.
„	Ulster (Belfast).	„	Derrycastle.
Cavan,	Bailieboro'.	„	Gormanstown.
Donegal,	Templedouglas.	Dublin,	Albert.
Monaghan,	Bath.	Kildare,	Athy.
Cork,	Dunmanway.	Kilkenny,	Woodstock.
„	Glandore.	„	Kilkenny.
„	Farrahy.	Leitrim,	Leitrim.
„	Munster (Cork).		
Limerick,	Limerick.		Total, 19.
„	Mt. Trenchard.		

No. 2.—Seventeen School Farms of the First Class under Local Management.

County.	School.	County.	School.
Antrim,	Ballycarry.	Kilkenny,	Piltown.
„	Larne.	Louth,	Dromiskin.
Londonderry,	Templemoyle.	Meath,	Woodpole.

Appendix C.

II. Reports on Agricultural Schools.

Dr. Kirkpatrick.

The great falling off in the number of boys sufficiently advanced, as regards both age and literary attainments, to constitute an agricultural class, rendered agricultural teaching no longer necessary in the following *fifteen* Workhouse National Schools, which were accordingly struck off during the year:—

Workhouse Agricultural Schools.	Counties.	Workhouse Agricultural Schools.	Counties.
Ballinasloe, . .	Galway.	Scariff, ...	Clare.
Carrick-on-Shannon,	Leitrim.	Skibbereen, . .	Cork.
Carrickmacross, .	Monaghan.	Tulla, ...	Clare.
Clonakilty, . .	Cork.	Longford, . . .	Longford.
Dungarvan, . .	Waterford.	Cahirciveen, . .	Kerry.
Dunshaughlin, . .	Meath.	Roscommon, . .	Roscommon.
Galway, . . .	Galway.	Omagh, ...	Tyrone.
Granard, . . .	Longford.		

The remarks which I made in my last Report on the striking off of a considerable number of Workhouse Agricultural Schools, in the year 1859, are applicable to the present occasion. I said it may at first sight appear strange that so large a number of Workhouse Agricultural Schools should have been struck off the rolls during the last twelve months; but instead of this circumstance being a cause for regret, it is, on the contrary, a gratifying proof of the greatly altered, and happily improved state of Ireland. In numerous instances, where but a very few years since, there were many hundreds of boys of all ages in the Workhouse National Schools, the numbers have so decreased, and the few who are now inmates are so young, that an agricultural class cannot be kept up; indeed, in several Workhouse Schools the services of male teachers have been dispensed with by the Guardians and Poor Law Commissioners.

In my last Report I made the following remarks: "Owing to the extraordinary and long continued drought of the summer of 1859, the result of the year's transactions on the school-farms has not been so favourable as otherwise might have been confidently expected, when the greatly improved and very promising state of the greater number of them is taken into consideration. The root crops, especially the turnips, were most seriously affected by the parched state of the ground, and the produce was very materially lessened. The grain crops, especially the oats, suffered to a very considerable extent; indeed, in several instances, the straw was so short that it was only with difficulty it could be reaped, and in some cases it had to be pulled. The pasture and meadow lands were scorched and parched to an extent seldom, if indeed ever before seen in this country; and the latter, as was to be expected, gave an unusually light return. The extraordinary drought of the summer of 1859 is forcibly shown by the remarkable circumstance that water sold at fabulous prices in some districts, where formerly considerable expense had to be incurred to get rid of it." I have now to observe that the past year, though differing widely in character from the preceding one, has been equally, if not more severe and disastrous. The season of 1860 has been one of almost unparalleled severity, as regarded both the low range of temperature and unexampled amount of rain-fall. The latter is shown to have been six and a-half inches above the average, and the mean temperature is stated to have been lower in the year 1860 than in any since 1789.* The consequence

* The following remarks are taken from the last number of the *Journal of the Royal Dublin Society*:—"Professor Barker made some remarks on the amount of rain-fall in Ireland during late years. He referred particularly to the rain which fell during the present (1860), as compared with that of the previous year, showing that the greater apparent wetness of this year was due rather to the distribution than to the actual quantity of rain, a large quantity having fallen during the four months of May, June, July, and August; whilst the other months were comparatively dry. The total excess of the rain-fall in 1860, over that of 1859, was about four inches. Dr. Barker observed that the dryness of a season for agricultural purposes depended, not on the total quantity of rain, but on the period at which it took place. The greatest sufferers during the present year had been tuberous plants, such as the potato and the Jerusalem artichoke, the unusual quantity of rain which fell during the months of May, June, and July, having checked their develop-

of this very unusual severity of weather was, as might naturally be expected, productive of most serious consequences. One of the leading English agricultural journals says: "The crop of 1860 has turned out in quality as miserable, and in quantity as deficient as we expected, and the season has throughout been a disastrous one for all wet and ill-conditioned soils." It is, however, a great gratification to me to be enabled to state that the Board's school-farms, generally speaking, suffered much less than could have been anticipated, and this fortunate circumstance I am inclined to attribute to the improvements effected by thorough drainage, deep tillage, and the general judicious management on the part of the Board's Agriculturists.

On some of the school-farms, as those of Ulster and Bailieborough, the green crops were almost an entire failure, arising from the injurious effects of the unusual coldness of the weather, and of the almost incessant wet on those heavy, tenacious, and cold clay soils, especially that of the former, which is a soil of unexampled tenacity; but is being greatly ameliorated by the processes of drainage, charring, &c., which are now being carried out upon it. A very considerable portion of the wheat crop on the Limerick school-farm was mildewed to a serious extent; and of the potato crop—about eight acres—there was scarcely one-tenth of the tubers sound or marketable; the consequence was, that this farm, which, in former years, had given remunerative returns, showed a considerable loss on the transactions of the year 1860. Notwithstanding the unfavourable results in these and a few other cases, the general working of the farms has been attended with satisfactory and remunerative returns.

The greatly and happily improved state of Ireland obviates the necessity for extending the system of agricultural education. On the contrary, the time, I think, has now come for curtailing as much as possible, consistent with the continued efficiency of the system, the expenses incident upon the National Agricultural Schools. The heavy but unavoidable outlay which was incurred in the erection of buildings—in the effecting of necessary permanent improvements—and in the purchase of live-stock and implements for the school-farms, is, unless to a very trivial extent, at an end. But in addition to those circumstances, it has appeared to me that a considerable reduction of expenditure might be effected by letting some of the smaller school-farms to persons duly qualified to give agricultural instruction, and possessing the necessary capital to purchase the Board's live and dead stock on the farms, and to cultivate them on their own account. It will be borne in mind that when the extension of the system of agricultural education took place some years ago, efforts were made to have the Board's smaller school-farms cultivated and managed by agricultural teachers on their own account; but it was found that, with the exception of the cases of

ment. The average temperature of Ireland, in 1860, was much below the mean temperature of many years past.

"Mr. David Moore, Curator of the Botanic Gardens, Glasnevin, in the course of some remarks on the subject, observed that few persons were aware of the immense quantity of water contained in a rain-fall of one inch. On Saturday evening, the 3rd of June, the rain at the Botanic Garden lasted exactly half an hour, during which it fell 0·525 of an inch. One inch of rain to the English acre will give a weight of 101·28 tons; or, roughly speaking, every tenth of an inch is equivalent to a weight of ten tons per acre, or every 100th of an inch to one ton. Looking at it in another point of view, every 100th of an inch is equal to 224 gallons; and, therefore, the quantity which fell on Saturday evening, the 3rd of June, in half an hour, is equal to 13,838·72 gallons per English acre, or 61·78 tons. The two wettest days of the year 1860 were 21st July, when 1·130 inches fell, and August 16th, when the rain-fall was 1·190 inches, equal to 120 tons per acre. Mr. Moore read the following statement of the temperature in London, from a communication by Doctor Lindley to the *Gardener's Chronicle*: 'April.—The mean temperature averaged in the neighbourhood of London 42·20, being the lowest of any corresponding one in the present century, being below average, 4·84 degrees. June.—The coldest during the last sixty-three years. Mean temperature averaged in the neighbourhood of London, 54·66, being below average, 5·80 degrees. Rain-fall, 5 inches 15 decimal, being 3 inches 20 decimal above average. August.—Coldest experienced within this century, temperature in neighbourhood of London averaged 57 21 degrees, Fahrenheit, being below average 4·28 degrees. Rain-fall, 4·16, being above average 1 inch 73 decimal.' Mr. Moore observed that it was not only tuberose plants which suffered from the wetness of the year 1860; leguminous plants had also suffered greatly, and many complaints had been made of the want of flavour in fruits, beans, &c., resulting from the cloudy atmosphere, which intercepted the rays of the sun."

Appendix C. II. Reports on Agricultural Schools. *Dr. Kirkpatrick.*

Mount Trenchard and Woodstock National Agricultural Schools, the want of adequate capital on the part of young men, who, in all other respects, were properly qualified, proved a barrier to the general adoption of such an arrangement. Since then the circumstances of several of the Board's agriculturists have so improved, by their having made prudent marriages, &c., that they are now enabled to undertake the management of the small school-farms on their own responsibility; and as the cases of Mount Trenchard and Woodstock, to which I have above alluded, have worked very satisfactorily, it has been decided, on my recommendation, that the following five school-farms should be let, viz.: Ballieborough, Farrahy, Glandore, Kyle Park, and Leitrim.*

The agriculturists to whom the school-farms are let are obliged, by properly-framed contracts, to adopt and carry out such systems as will exemplify both to the pupils and the public, correct courses of cropping and general farm management, in addition to giving the usual agricultural instruction to the classes of boys in attendance at the National Schools, to which the farms are attached.

This arrangement will lessen the Board's responsibility, and effect a diminution in the annual cost of the system of agricultural education, especially if it be extended, as I think it may be, in the cases of three or four of the other small school-farms.

Albert Institution.—During the past year some important changes have been adopted with reference to the admission of pupils. In accordance with suggestions made by the Chief Secretary of Ireland, the Right Honble. E. Cardwell, M.P., subsequently to a lengthened visit with which he honoured the establishment, all candidates for admission into the Albert Institution, and for *free* places in the minor Agricultural Schools, must now undergo strict *competitive* examinations (*vide* the Prospectuses of the Albert Institution, and of the Model Agricultural Schools, which are appended to this Report). This arrangement, it is confidently expected, will not only prove a means of rewarding merit and exemplary conduct, but also stimulate pupils, especially those of the National Schools throughout Ireland, to increased application to their studies.

The pupils are, in future, to be admitted twice in the year—the two sessions commencing respectively in January and June. This plan of admission has been brought into operation, and the course which was pursued was as follows: seventy-four young men whose names, in accordance with the directions given in the prospectus above alluded to, had been transmitted to the Education Office, were considered eligible candidates for the thirty-four vacant places, and received instructions to attend for examination on a given day and hour at the residences of the Inspectors of National Schools in their respective districts. The following instructions for conducting the examinations, and the accompanying questions had been previously transmitted to the Inspectors.

EXAMINATION FOR ADMISSION TO THE ALBERT AGRICULTURAL INSTITUTION.

No. I.—TO BE CONDUCTED BY THE DISTRICT INSPECTORS ON THE 22ND DECEMBER, 1860.

ORAL PART.

Time allowed.		Highest value for excellence in the subject.
A few minutes for each candidate.	To read a passage in the Fourth Book of Lessons, . . .	70

WRITTEN PART.

	Penmanship—(to be judged from the written papers generally, and from a line of large-hand, and a line in small-hand, to be written for the Inspector), ...	60
½ an hour,	Writing from Dictation and Spelling—(a few passages from a lesson in the Third Book), ...	60
1 do.	Grammar—(5 questions), ...	60
1 do.	Geography—(5 questions)	50
1½ do.	Arithmetic—(10 questions), ...	100
¾ do	Book-keeping—(4 questions), ...	40
1 do.	Geometry and Mensuration—(6 questions), ...	60
	Total, . . .	500

a. The District Inspectors are to assign the mark for *reading* only.

b. The exercises are to be forwarded to the Education Office on the day following the examination.

c. The written exercises will be marked at the Education Office.

* The Tervoe School-farm has been annexed to the Limerick agricultural establishment, their proximity rendering it unnecessary to have a separate staff for the management of the former.

GRAMMAR—(1 hour).

1. Besides nouns and pronouns, what else may be the subject or object of a verb? Give examples.
2. State the rule for the regular formation of the plurals of nouns, and mention any exceptions you may recollect.
3. What is meant by "apposition"? Give examples.
4. Give an illustration of a relative pronoun having a clause of a sentence for its antecedent.
5. Parse this sentence—"Ah! but too happy if they only knew their peculiar blessings."

GEOGRAPHY—(1 hour.)

1. Define the following geographical lines, viz.:—circumference, diameter, axis, equator, parallels of latitude, meridians, and ecliptic, distinguishing those which relate to the surface from those which do not.
2. Name the zones, and mention the parallels of latitude which bound them.
3. Name the oceans or seas which the following straits connect; also the continents or countries which they separate:—Behring's, Magellan, Gibraltar, Babelmandeb, Ormuz, and Malacca.
4. Name the counties watered by the Shannon. Where does it fall into the sea, and what are the principal towns along its course?
5. What three rivers unite and fall into Waterford haven, and what are the principal towns along the course of each?

ARITHMETIC—(an hour and a-half).

1. Write out the tables of "Long Measure" and "Square Measure."
2. Multiply nine millions seven thousand and four by five thousand and one, and state the names of the terms and answer.
3. Divide £371 2*s.* 9½*d.* by 29.
4. Reduce 1,000,000 inches to Irish miles.
5. Reduce 1,000,000 lbs. avoirdupois weight to tons.
6. What is the price of 6 barrels 13 stones of wheat, at 35*s.* 6*d.* per barrel—tare being 3 stones and 10 lbs.?
7. How much barley, at 13*s.* 9*d.* per cwt., may be bought for £62 7*s.* 9¾*d.*?
8. Calculate, by Practice, the price of 16 cwt. 2 qrs. and 21 lbs. of oatmeal, at £17 11*s.* 6d. per ton.
9. Which is the greater—$\frac{7}{13}$ or $\frac{8}{11}$; also, what are their sum and difference?
10. If the yearly rent of 45 acres, 2 roods, 20 perches, be £44$\frac{7}{10}$, what is the rent of 1$\frac{3}{8}$ acre?

BOOK-KEEPING—($\frac{3}{4}$ of an hour).

1. What is the use of a Cash Account?
2. What sums appear on the Dr. and what on the Cr. side of it?
3. What is meant by the Balance of a Cash Account?
4. Make out a Cash Account from the following particulars, and show the Balance, viz.:—

1860.
January 1, Cash on hands £400.
" 2, Paid John Brown for a horse, £35.
" 5, Received from William Robinson, for 4 fat pigs, at £7 each, £28.
" 10, Ditto from William Hamilton, for 20 barrels of wheat, at £2 per barrel, £40.
" 15, Remitted to William Taylor, for 7 store bullocks, purchased at £18 per bullock, £126.

GEOMETRY—(1 hour).

1. How are triangles classified—first, as regards their sides; second, as regards their angles?
2. Enunciate the 5th, 32nd, and 47th Propositions of the First Book of Euclid.
3. Name the propositions which prove the equality of triangles—first, as to their equality *in every respect;* second, as to their equality merely in *magnitude.*
4. Give the rule for finding the area of a square when a side is given (and prove the rule).
5. Show that a triangle cannot have its three sides 10, 20, and 30, respectively.
6. To find the area of a rhombus, why is it necessary to have more than one dimension?

Appendix C. II. Reports on Agricultural Schools. *Dr. Kirkpatrick.*

TABLE showing the result of Answering of Candidates for Admission to the Albert Training Institution, Glasnevin, at Examinations held by District Inspectors on 22nd December, 1860. Number of Candidates, 74; total number of Marks obtainable, 500

Names of Candidates.	Total No. of Marks obtained by each.	Names of Candidates.	Total No. of Marks obtained by each.
R. Lithgow,	420½	H. M'Ilhone,	279½

J. Hayes,	293½	P. Benlan,	170½
J. Frawly,	289	J. Mulvey,	157
P. M'Monagle,	286	J. M'Alister,	154½
J. Cleenan,	285	W. Quinn,	117½
E. Brehan,	283	T. Blair,	117

The pupils' exercises having been forwarded to the Education Office, were most carefully examined; and from amongst the total number of candidates who had been examined by the Literary Inspectors, fifty of the best answerers were summoned to Glasnevin, where they were subjected to a second and more searching examination in presence of the Resident Commissioner, Chiefs of Inspection, Head and Agricultural Inspectors, and a considerable number of visitors. The candidates were most minutely examined on a large number of *oral*, in addition to the following questions:—

No. II.—TO BE CONDUCTED AT THE ALBERT INSTITUTION.

ORAL PART.

Time allowed.		Highest value for excellence in the subject.
A few minutes for each candidate.	To read a passage in the Fourth Book of Lessons,	70

WRITTEN PART.

	Penmanship—(to be judged from the written papers generally, and from a line of large-hand, and a line of small-hand),	60
½ an hour,	Writing from Dictation and Spelling—(a few passages from a lesson in the Fourth Book),	60
1 do.	Grammar—(5 questions),	60
1 do.	Geography—(5 questions),	50
1½ do.	Arithmetic—(8 questions),	100
¾ do.	Book-keeping—(4 questions),	40
1 do.	Geometry and Mensuration—(6 questions),	60
1 do.	Agriculture—(10 questions),	50
	Total,	550

GRAMMAR—(one hour).

1. What is the distinction between the *transitive* and *intransitive* verb?
2. Write down the several divisions of adjective pronouns, and the words included under each.
3. If the *perfect participle* of any verb is put after the several persons of the verb *to be*, the passive voice, as it is called, is formed. Explain what you mean by the *passive voice*.
4. Syntax is divided into two parts, namely, *concord* and *government*. Explain what you mean by *concord* and *government*, and give examples under each.
5. Parse this sentence—"There is in souls a sympathy with sounds."

GEOGRAPHY—(one hour).

1. Name the counties in the province of Leinster, and the chief towns in each.
2. Name the counties of England from the Thames to the Tweed, and the principal towns in each.
3. Give the area and the population of Ireland, England, and Scotland, respectively, and the latitude and longitude of the first.
4. Name the rivers of Europe which flow westward, from Archangel to Gibraltar.
5. Name the principal mountain chains in Europe, Asia, Africa, and America.

ARITHMETIC—(an hour and a-half).

1. Reduce an Irish acre and a statute acre to square yards, respectively.
2. In a field of turnips each plant occupies a space of $2\frac{1}{2}$ feet, and weighs $3\frac{3}{4}$ lbs.; what is the weight of turnips on 1,000 square yards?
3. A farmer pays £2 4*s.* 11*d.* for insuring his stock—the rate of insurance is 4*s.* $9\frac{3}{4}$*d.* per cent. on the value of the stock: find the value of the stock.
4. If a statute acre be worth a guinea, what is an Irish acre worth?
5. Find the price of twenty-eight bags of wheat, each weighing 3 cwt. 2 qrs. 25 lbs., at 12*s.* 9*d.* per cwt.—the weight of the empty bags, $3\frac{1}{2}$ lbs. each, is to be deducted, of course.
6. Add together $\frac{2}{3}$ and $\frac{4}{5}$, from the sum take $\frac{6}{7}$, multiply the difference by $\frac{4}{5}$, and divide the product by $\frac{3}{4}$.
7. Multiply ·376 by ·587 and divide the result by ·000365.
8. *Three-fifths* of a property, worth £764 13*s.* 8*d.*, belongs to A, *one-fourth* of it belongs to B, and the remainder to C: find the share of each.

BOOK-KEEPING—(one hour).

1. If you have transactions in money with several persons, such as paying and receiving, borrowing and lending, what accounts should be opened; how should the items be entered in each; and how should the account be closed?
2. What items appear, respectively, on the Dr. and Cr. of the stock, cash, goods, profit and loss, and balance account?
3. The difference between the Dr. and Cr. side of the balance account when carried to the stock account, and entered in its proper place, renders the two sides of the stock account equal. Explain how this occurs.
4. What are the *first* and the *last* items which are entered in the *journal*, and where else will these items appear?

GEOMETRY (one hour).

1. The diagonal of a square is 45: find its area and its perimeter.
2. A box is six feet 8 inches in length, 4 feet 9 inches in breadth, and 3 feet 10 inches in depth: find its *surface*.
3. The area of a rectangle is an Irish acre, and the sum of its two *opposite* sides is 224 yards: find the other sides.
4. Prove the thirty-second Proposition of the First Book of Euclid.
5. The exterior angle of a triangle is greater than either of the interior remote angles: prove the *two* cases.
6. Whether does it take more timber and slates to put a *low roof* on a house or a *high roof*? Prove your answer.

AGRICULTURE (one hour).

1. Name the elementary substances of which the *organic* portion of the soil consists.
2. What are the three substances of which the *inorganic* portion of the soil is chiefly composed?
3. On what substances does the chief value of a manure depend?
4. Name the groups of substances which consist of carbon, oxygen, and hydrogen.
5. What are the substances which, in addition to carbon, oxygen, and hydrogen, contain nitrogen?
6. How may the productive powers of the soil be improved?

Appendix C.

II. Reports on Agricultural Schools.

7. Enumerate the injurious effects resulting from an excess of water in the soil, and how they may be remedied.

8. Name some of the benefits which follow from an application of lime to the land.

9. What is understood by "rotation of crops," and what are the advantages derived from alternating crops?

10. Write out in a tabular form the "four" and "five-course rotations," and particularize the soils for which they are best adapted.

Dr. Kirkpatrick.

The examinations were chiefly and ably conducted by Mr. James M'Donnell, the Head Literary Teacher at the Albert Institution, who has submitted to me the following interesting particulars and table, to which I beg to direct particular attention:—

"DEAR SIR,—In submitting to you the result of the recent competitive examinations for admission to the Albert Institution, I beg to make a few observations on the subject. Of the forty-three young men who presented themselves here for examination,

16 were natives of Munster.
11 " " Leinster.
11 " " Ulster.
5 " " Connaught.

"The examinations occupied two and a-half days, commencing each morning at ten o'clock, and continuing—with an hour's intermission—till five in the evening.

"The subjects included reading, writing from dictation, penmanship, grammar, geography, arithmetic, First Book of Euclid, book-keeping, and agriculture. This last branch—agriculture—formed only a small portion of the examinations, the number of marks allowed for it was less than one-eighth of the whole, so that the test was almost entirely of a literary kind.

"The examination was partly written and partly *viva voce*. The written part embraced all the subjects, but the *viva voce* was confined to grammar, geography, arithmetic, mensuration, and agriculture.

"The making up of the candidates' papers occupied the Sub-Agricultural Inspectors (Messrs. Donaghy and Brogan) and myself for four days. The number of papers to be examined was *three hundred and one*. The names were then written out in the order of merit, and the *thirty-four* first on the list were returned as the successful competitors. The examinations were sufficiently extensive and searching to test the comparative merits of the competitors, and passed off in the most gratifying manner. The conduct and demeanour of the young men gave much satisfaction.

12 of the successful candidates are natives of the Province of Munster.
9 " " " " " Leinster.
10 " " " " " Ulster.
3 " " " " " Connaught.

Twenty are sons of farmers, *four* of land-stewards, *one* of a gardener, *two* of shopkeepers, *two* of National School teachers, *two* of police sergeants, *one* of a law-agent, and *two* of widows.

8 of the successful competitors are Episcopalians.
22 " " " Roman Catholics.
4 " " " Presbyterians.

Twenty-three had been pupils of National Agricultural Schools, and the remaining eleven of ordinary National Schools.

"From the table which I send herewith it will be seen that *five* of the young men answered upwards of seventy per cent. of all the questions; *thirteen*, upwards of sixty per cent.; *thirty-three*, upwards of fifty per cent.; and the lowest of the successful candidates, forty-six per cent. The average answering of the thirty-four competitors on all the subjects was fifty-eight per cent. This very high average affords satisfactory evidence of the character of the education afforded in National Schools. It is also worthy of remark that all the *best* answerers had been for some time pupils of National Agricultural Schools.

"The average answering on the particular subjects was as follows:—

Arithmetic	72 per cent.
Writing from dictation	70 "
Geometry and Mensuration	58 "
Agriculture	57 "
Grammar	54 "
Geography	46 "

It thus appears that the most important subjects receive the largest share of attention at the Board's National Schools.

"I am, truly yours,

"To Dr. Kirkpatrick, &c., &c." "J. M'DONNELL."

TABLE II.—Showing the Per-centage of Marks obtained by Successful Candidates at Second Competitive Examination, held 23rd and 24th January, 1861.

Names of Candidates, arranged according to merit.	Native Town or County.	Where educated.	Profession or Occupation of Parents.	Reading.	Penmanship.	Writing from Dictation.	Grammar.	Geography.	Arithmetic.	Geometry.	Book-keeping.	Agriculture.	Average per Cent.	Total No. of Marks.
		Maximum number of marks on each subject,		70	60	60	120	100	164	92	40	110	100	816
				Per Cent.	Per Cent.	Per Cent.	Per Cent.	Per Cent.	Per Cent.	Per Cent.	Per Cent.	Per Cent.	Per Cent.	Per Cent.
1. John Berkery,	Co. Limerick,	Farm School, Limerick,	Shopkeeper,	50	75	95	98	57	100	86	70	79	82	669
2. John Meharg,	Co. Down,	Farm School, Cork,	Teacher under National Board,	50	58	81	88	67	100	69	57	87	78	639
3. James Charles,	Co. Meath,	Farm School, Limerick,	Farmer,	57	58	71	90	66	84	88	85	84	78	638

			Average per cent.,	54	54	70	54	46	72	58	39	57	58	473

The distribution of the prizes, at the end of one of the sessions, was honoured by the presence of His Excellency, Lord Carlisle, who, with his usual benevolent and kindly feeling, at once complied with the favour which I took the liberty of asking of His Excellency, that he would honour the Albert Institution with a visit on the occasion.

The interesting proceedings on the occasion to which I allude, were thus accurately and succinctly laid before the public by the Reporter of the *Freeman's Journal*:—"His Excellency the Lord Lieutenant having signified his intention to distribute the prizes, amounting to £50, to such of the pupils of the Albert Agricultural Institution as had distinguished themselves by their superior answering at the several examinations held during the session by the professors and teachers; the pupils, numbering sixty-five, assembled in the spacious lecture-hall awaiting the arrival of his lordship. The subjects in which the pupils had been examined comprised Agricultural Chemistry, Geology, Botany, Animal Physiology and the Diseases of Farm Animals, Horticulture and Practical Agriculture, in which their answering showed that their knowledge on these subjects was well-grounded, extensive, and practical.

Dr. Kirkpatrick.

"His Excellency the Earl of Carlisle arrived at half-past three o'clock, accompanied by his private secretary, J. Hatchell, Esq., and was received by the Right Hon. Alexander M'Donnell, James Gibson, Esq., Captain Lindsay, D.L., and Dr. Kirkpatrick, who conducted his Excellency to the Lecture Hall, and explained to him the objects for which the examinations had been held, and pointed out the following persons as the successful answerers (the names are given in the table). They are fine, intelligent young men, and appeared from their bearing and answering to have derived a great deal of practical advantages from the system of training which they had undergone under the direction of Dr. Kirkpatrick and the professors and teachers of the Agricultural Training School.

"His Excellency addressed the pupils and said: 'My young friends, I need not tell you how delighted I am to meet you all here on the present occasion, and to distribute those prizes which have been awarded to you by your teachers and professors in their several departments. You are receiving here from the State very excellent instruction—instruction of the best kind, and such as those who are placed over you have considered most suitable to the sphere of life which you have embraced. I do not require to inform you how much you are indebted for the education you receive, and for the kindness and attention paid to your requirements by the superior and excellent teachers of the institution. I have been told that some of the young men who have been educated here have got good situations—some of them even in the Colonies; and I trust that, by good conduct, they and you will reflect credit on the establishment in which they were trained, as well as on old Ireland, which gave you birth. The excellent education imparted to you here will fit you specially for improving the soil, and it is expected that you will pay back something of what you owe to your country by making the soil of our fair island more fertile, more ornamental, and more productive than you found it. In conclusion, I have only again to repeat what very sincere pleasure it gives me to meet you all here, and to state what great interest I take in your welfare, and to wish you, individually, success when you enter on the great business of life.'

"His Excellency then proceeded to distribute the prizes, and, after expressing to Dr. Kirkpatrick the gratification he felt at the progress of the institution, took his departure for the Viceregal Lodge."

Appendix C.

II. Reports on Agricultural Schools.

Dr. Kirkpatrick.

The following letters with which I have been favoured by Messrs. Sullivan and Moore, lecturers at the institution, when submitting to me the examination papers of the pupils, after they had been examined and marked by those gentlemen, are peculiarly gratifying. They testify to the assiduity and consequent high attainments of many of the young men, whilst they exhibit irrefragable proof of what may be effected by a combination of such mental and physical training as are carried out *in* the Albert Institution, and *on* the Albert Model Farm. It must be borne in mind that the principal part of their time is occupied in the performance of all the various operations on the farm and gardens; and it is not merely to the young men themselves that the beneficial results of such training will be confined, as on leaving the institution they go forth prepared to leaven with their knowledge and improved habits the population into which they shall be absorbed:—

"53, Upper Leeson-street, Dublin.

"DEAR SIR,—I herewith submit the results of the examinations of the pupils of the Albert Agricultural Institute, for the second Session of 1860.

"I wish you to convey to Mr. John M'N. Fullerton and Mr. Charles Farrelly the very high opinion which I entertain of their answering. I have rarely had the good fortune to receive papers like theirs; indeed I might extend this well-deserved praise also to Mr. Bernard M'Laughlin.

"I remain faithfully yours,

"WILLIAM K. SULLIVAN."

"Dr. Kirkpatrick, Albert Institute."

"Albert Training Institute, Second Session, 1860.

GEOLOGY.

2nd.—Charles Farrelly,	940
3rd.—Bernard M'Laughlin,	870

"WILLIAM K. SULLIVAN."

"Royal Botanic Garden, Glasnevin,
October, 1860.

"DEAR DOCTOR,—I herewith send you the papers containing the answers of the pupils to my examination questions on the second course of lectures, during the Session of 1860, which were on *Systematic Botany*.

"The answering, in general, is creditable to the writers, as you will perceive; but I have to beg particular attention to the papers which have obtained first places, as I consider them remarkably clever.

Apart from the scientific matter altogether, you will see how admirably this system of training is calculated to regulate the mind to a systematic observance and proper classification of objects, which will be of the greatest importance to those young men in after-life.

"I remain, dear Doctor, yours faithfully,

"D. MOORE.

"To Dr. Kirkpatrick, Albert Model Farm."

In order that the Commissioners of National Education, and the public also, may be enabled to form an accurate estimate of the character of the scientific instruction imparted to the pupils, I consider it desirable to submit the questions put respectively by Messrs. Sullivan and Moore, at the written examinations held by those gentlemen at the termination of the second session of 1860, and extracts from the answers of the pupils who gained the first prizes.

The annexed reports, which have been submitted to me by Messrs. Donaghy and Brogan give full particulars regarding the agricultural schools and farms in their respective districts for the past year.

I am, Gentlemen, your obedient servant,

THOMAS KIRKPATRICK.

The Secretaries, Education Office,
Marlborough-street, Dublin.

Appendix to Report on Agricultural Schools.

GEOLOGY.

Questions.

1. Define what is meant by the following terms:—*a.* a crystal; *b.* faces, edges, and angles of crystals; *c.* morphological or symmetrical axis, and crystallographic axis; *d.* holohedral and hemihedral forms?

2. How many systems of crystals are adopted? Mention the principles on which these systems are founded, and state the geometrical elements of each.

3. What do you understand by isomorphism, and how is it applied to explain variations in the composition of minerals?

4. What is the chemical composition of the following minerals:—gypsum, calcite, talc, augite, hornblende, schorl, chlorite, uniaxial mica, albite, labradorite, orthoclase, biaxial or potash mica, and zeolites?

5. How may rocks be classified as regards the agency by which they were formed?

6. What are metamorphic rocks?

7. How are igneous rocks classified?

8. What is the distinction between trachyte and dolorite?

9. What are the minerals which form each of the following rocks:—diorite or greenstone, felstone, granite, syenite?

10. What do you understand by the term porphyry?

11. Describe the general character and composition of the following rocks:—conglomerate, breccia, gritstone, sandstone, shale, slate, oolitic limestone, chalk, and marl.

12. What are the chief cementing materials that bind together the substances which make up mechanically formed rocks?

13. What do you understand by the terms lamination, stratification, joints, and cleavage?

14. What do you understand by contorted strata, synclinal valleys, anticlinal ridges, denudation, faults, dip, strike, outcrop, conformability, and unconformability?

15. How would you employ the dip and strike of the beds in making an ideal section representing the appearance a piece of country would present if a great cutting were carried through it? and how would you thereby find the depth below the surface at which a boring would cut any particular rock? Illustrate your statements by a section.

16. In what position are the ores of metals usually found?

17. How may mechanically formed rocks be classified as regards the general characteristics of their chemical composition?

18. What are fossils as now understood, and what important use do they serve in geology?

19. Mention the great divisions into which stratified rocks may be classified according to their fossils.

20. Arrange the following formations of rocks according to their relative stratigraphical order:—*a.* Triassic; *b.* Greensand; *c.* Silurian; *d.* Chalk; *e.* Kimmeridge clay; *f.* Permian; *g.* Cambrian; *h.* Eocene; *i.* Carboniferous; *k.* Pleistocene; *l.* Oolitic.

21. State generally the characteristics of the organic remains or fossils of each of these formations. [See 20.]

22. What are the chief substances which are dissolved in river water?

23. What substance communicates to natural waters an increased power of acting upon rocks?

24. Mention the chief circumstances which influence the fall of materials in water.

25. What is drift?

26. What is a soil, and how may soils be classified according to their mode of production?

27. What are the general geological features of Ireland.

28. State generally the geological relations of the soils of Ireland.

29. State generally the qualities and circumstances upon which the fertility of soils mainly depends.

30. What is the worth of the attempts which have heretofore been made to determine by chemical analysis the comparative values of soils?

Written Answers to Questions on Geology, by John M'N. Fullerton.

1. *a.* The regular form assumed by a mineral passing from a state of solution or fusion to a solid state. *b.* Faces are the plane surfaces which bound a crystal; angles, the solid points or corners formed by the meeting of three or more faces; edges are the lines made by the intersection of two faces. *c.* Morphological axes are the straight lines passing through the centre of the crystal, and terminating in the middle points of opposite corresponding parts; crystallographic are those three or four symmetrical axes which are required for constructing or defining it. *d.* Holohedral—typical forms, or those deduced from them by truncating all their edges or angles, or by the treatment of each part sym-

metrically; hemihedral—those forms obtained by the symmetrical modification of one-half of the edges, angles, or surfaces.

2. Six are adopted for general purposes, but there are seven, founded with regard to the relation in length and inclination of their crystallographic axes: 1st, three equal axes at right angles to one another; 2nd, three, but two equal to one another only; 3rd, three, none of them equal to one another; 4th, three equal, and at an angle of 60°, and one at right angles to their plane, passing through their intersection; 5th, two at right angles, other oblique to them, all unequal; 6th, all oblique and unequal to another.

3. Perfect isomorphism consists in bodies having the same crystalline form, similar chemical formula, and equal atomic volumes. It is said that bodies possessing those isomorphic properties perform the same chemical functions, and so can replace one another in compounds and minerals without visibly altering their forms, as exemplified in the alums, and thus the composition of what is called the same mineral may vary very much.

5. Igneous, aqueous, and aerial. Metamorphic formed by heat or compression, or both. Some rocks have been formed by organic influences.

6. Metamorphic rocks are any rocks which have been altered or changed by heat or compression, or both, and thus differ from their earlier appearance or texture. Gneiss, mica, and chlorite slates, are good examples.

7. Igneous classified into—volcanic, trappean, and granitic.

8. Trachytes—composed of feldspar (orthoclase, or those rich in silica) in fine or coarse crystals; dolorites—composed of feldspar and augite (feldspars are the more basic ones, as labradorite, and not so rich in silica as the others).

10. When fine crystals are disseminated through a compact base, or larger crystals through a fine-grained base, the rock from this texture is said to be "porphyritic," or a porphyry. It was formerly confined to those having the crystals of feldspar, but not now.

11. Conglomerate, or puddingstone, composed of rounded fragments, from the size of an egg, or less, to that of a man's head, or larger. They are cemented together by silica, carbonate of lime sometimes, and iron compounds. The fragments are generally quartz, or sandstone, &c. Breccia are like conglomerate, only the fragments are angular and more generally of quartz, or some such hard substance. Gritstone—a hard variety of coarse-grained sandstone, like our millstones, most commonly of quartz, and cemented together with silica, carbonate of lime, and iron compounds (these substances mostly enter into the cementing material, sometimes compose it). Sandstone—fine particles of sand, from the size of a pea downwards; they are generally of quartz, but often contain particles of lime, magnesia, feldspar, &c.; colours vary—white, red, green, and brown, &c., cemented like gritstone. Shale—highly indurated clay rock, or any of those substances of which slate is composed—not so hard as slate, nor has it the cleaved structure of slate, but otherwise like slate; it splits with tolerable facility. Slate is composed of very finely-divided rocks; the chief ingredient is clay, but mica, talc, chlorite, magnesia, &c., occur, and accordingly the slate may partake of their name; it possesses the superinduced structure of cleavage; colour varies—blue, black, green, whitish, &c. Oolite—composed of concretionary globules about the size of the roe of a fish; they generally contain in the centre grains of sand, quartz, carbonate of lime, &c., about which the layers of carbonate of lime are deposited and cemented together; it is pretty hard; colour, commonly yellow, but varies to brown, &c. Chalk—composed of carbonate of lime; soft, earthy structure; sometimes hard, but pulverulent; colour white, sometimes a little changed to dark; it contains flints. Marl—clayey limestone of gravelly texture; colour, generally dark, but varying; it may contain several other substances, as magnesia, &c.

12. Cementing materials—silica, lime, and iron, and many of their compounds, as fluor spar, calc spar, &c. (silicates of magnesia, potash, lime, &c.); protoxide and sesquioxide of iron, &c.; fluoride of calcium, gypsum.

13. Lamination signifies the splitting up of aqueous rocks into the original layers or lamina of deposition. Stratification refers to the deep beds of which aqueous rocks are formed; they are large tabular masses, containing numerous laminæ. They are naturally and entirely separated from one another. A few books on one another represent beds, while the leaves represent laminæ. Joints are the cracks which every rock has (by contracting, principally). Primary, cubical, secondary, diagonal joints, they may run in any direction. Cleavage—a superinduced structure of slates and some fine-grained rocks. It extends always over a large area in the same direction, either in the direction of bedding or not, and divides the rocks into thin plates, as common slates.

14. Contorted—curved or twisted, or crumpled, variously like the folds of tightly-packed cloth when compressed at the ends. Synclinal—when the strata have been contorted so that they meet down in a valley or basin, the valley is called synclinal. Anticlinal—when the beds widen out as they come down, like the roof of a house, they are said to be anticlinal. Denudation—applied to those valleys and ravines which were occasioned by the eating and corroding away of the beds, or to rocks from which the overlying masses have been carried away by water. Fault—when a rock is split, and the parts on each side caused to stand at different levels, it produces a fault; or interruption in the strata with displacement make a fault. Dip—the angle of inclination of a bed with the horizon. Strike—the direction of any horizontal line on a stratum, or the line of bearing of strata. Outcrop—

where the strike or bed comes out to the surface; where an inclined bed first shows itself at the surface. Conformability—when the planes of bedding of successive strata are parallel, they are said to be conformable.

16. Mostly in veins of rocks, fissures, cracks, &c., and in fine particles through the rocks and crystallized more or less perfectly, and usually one little bed of them, besides another down along the sides of the vein, intermixed in layers.

17. Calcareous, arenaceous, and argillaceous.

22. Clay, lime substances, as carbonate of lime, and organic matter, as peat, &c; silicates of potash and soda, and all salts of lime, potash, and soda; common salt also.

23. Carbonic acid.

24. Form, specific gravity, and size, and volume, and velocity of the water itself.

25. Drift is that gravelly deposit like that over the central plain of Ireland. It may be partly fine and partly coarse. It was produced by the denuding action of the sea, of rivers running into the sea; and when the sea dries off, it leaves this gravelly sandy mixture behind, which is well exemplified in Ireland.

26. The top of any loose mass of mineral deposits containing enough of organic matter to cause plants to grow, or a considerable quantity of organic matter, is a soil; sand, gravel, stones, marl, &c., and organic matter, all mixed comparatively loosely, form a soil. We may classify them into drifts, or those obtained by the drying away of the sea; alluvial, or those got by reclamation, as in Ireland at the loughs (Neagh and Foyle), or the deltas of rivers, as of the Mississippi, Ganges, &c. Holland, Italy, and Belgium were deltas. Third, those formed by the crumbling down of rocks, rock crumbled down, volcanic ashes, peat, &c. We may classify them into argillaceous, arenaceous, and calcareous, according to the rocks from which they were derived.

27. All round the coast of Ireland we get the mountains of the largest size. The centre of Ireland, then, is almost a plain, the surface of which is covered with gravel of the drift referred to. Mostly in the west there are large areas of peat bog still in process of formation. This, with the reclaimed alluvial soil, is of the present recent period, and the drift is of the tertiary epoch, or older. In several parts, particularly of the south, there are blocks of coal settling on the limestone, the rest of which has evidently been denuded away. The mountain limestone occurs underneath this, and is exposed at several places, but in others covered 900 feet or so with drift; in the Curragh of Kildare, 70 feet; in Wicklow, 60, and some places 700 feet. In the north these are of the primary epoch and carboniferous period, and we find the chalk and greensand of the cretaceous period. The basalt also is found in Antrim, Derry, at Lough Foyle, and around the north-east coast principally. This formation is of the Miocene. There is also brown coal in the north, but older coal in the south, of the carboniferous period; there is some old coal in the north too.

28. We have clay-slate soils in Monaghan, Cavan, Armagh, and Down; poor mica slate in Donegal and round the west. The plain and great portion of Ireland consists of that drift, which contains lime, potash, soda, &c. Much of the north is of a heavy character, but part of it is light and loamy, but not altogether sandy or siliceous.

29. They should contain enough of aluminous matter to make them retentive and stable to support the plants; sandy matter, to make them porous for easy working and for drying readily by allowing the water to sink down; lime, potash, soda, phosphoric acid, carbonic acid, &c., to afford nourishment for the plants, and, in general, all organic matter; hence, the good qualities of alluvials and deltas, as Belgium, Holland, and in Ireland of the drift and reclaimed lakes. Rocks containing magnesia or iron give bad soils. Situation as regards climate, as being mountainous or in valleys, or eastern or northern aspects. Drainage—according as the underlying rock is cleaved or bedding, running with the openings or separations vertically or horizontally.

30. Their worth is not a great deal, for of analyses of two soils, taken at short distances from each other in the same field, one might give a fertile result and the other a poor one. The per centages of the phosphoric acid, potash, &c., are so small and difficult to take out, that the chemist may go wrong more than the real quantity amounts to one way or other.

BOTANY.

Questions.

1. Describe a natural order.
2. Describe a genus.
3. Describe a species.
4. Describe a variety.
5. Refer the potato oat to its natural order, genus, species, and variety.
6. Refer the York cabbage to its natural order, genus, species, and variety.
7. Describe the bean botanically from root to apex, and refer it to its natural order, and also to its class, according to the Linnæan system.
8. State the names of some of the rare plants noticed when on the excursion to Wicklow.
9. Give the principal characters by which you can distinguish the following natural orders from one another, viz.:—Ranunculacea, Papaveracea, and Rosacea.

Appendix C.

II. Reports on Agricultural Schools.

Dr. Kirkpatrick.

Written Answers to Questions on Systematic Botany, by Charles Farrelly.

1. A term that includes a number of nearly-allied genera or a single genus. Thus, the natural order Ranunculaceæ includes the genera Ranunculus, Aconitum, and Delphinum, and so of any other natural order.

2. A term applied to a number of nearly-allied species; thus, the genus Trifolium includes a large number of species that have a number of characters in common. It includes the trifolium pratense, repens, &c.

3. A term applied to a plant answering a certain description by means of characters which are peculiar to it in addition to those that are common to plants in general, and which will reproduce itself from seed. The origin of it must be unknown to us. It is supposed to date from the time when plants came from the hand of the Creator. At present there is a considerable amount of doubt and discussion concerning species. Mr. Darwin says that it may arise by accident: he says that if 100 plants were growing on the side of a bank, the plants that grow rapidly would smother or nearly destroy the others. Suppose the rose and blackberry. The blackberry grows rapidly, and would, therefore, keep down the rose so much as to stunt and alter its character very much, and the difference that would arise, no matter how small, would alter and make a fixed state of the plant. Take an example out of the animal kingdom—suppose the cat genus. If a tiger had six cubs, and by some means some one of them was stunted in its growth, either by starvation or otherwise, it would be an animal much smaller and having some difference between itself and the rest of the cubs; and in this manner he supposes that the different species arise.

4. The offspring of a sport is called a variety. They are propagated by means of cuttings or slips, but do not produce their like by seeds; but there are sub-species or permanent varieties that would reproduce their like from seed. All our different kinds of wheat and oats are fixed varieties.

5. Natural order, Graminæ; genus, avena; species, sativa; variety, potato, so called from the first stalk being found in a potato field.

6. Natural order, Cruciferæ: genus, Brassica; species, Oleraceæ; variety, York, probably from being first grown in Yorkshire, or from a man bearing that name.

7. Root, fibrous; stem, herbaceous, bearing compound, ovate, and decurrent leaves. Mode of inflorescence, a raceme. Flower, papilionaceous. Stamens, ten; petals, five; sepals, five. Seed-vessel, a pod, or legumen, seeds attached to the upper suture. Linnæan class, Diadelphia—nine stamens in one bundle, and the other separate.

8. Lithosspermea, found growing along the sea coast. Sea-holly, also growing on the sea coast. Ononis spinosa, found nearly in every field about Dublin. Ladies' bedstraw, common. Convolvulus soldanella, a very rare plant. I am not very sure about this last plant, but I know it belongs to the family *Convolvulaceæ*. Sheep-rot (Pedicularis palustris), so called from being found in marshy places, and from it being supposed to cause the disease in sheep known as "rot." Wild Thyme (Thymus vulgaris). Bladder Wort (Utrecularia vulgaris), a very curious plant, found growing in the water; when it wants to flower, it gets the little "bladders," attached to the stem, filled with air, and ascends to the top, and as soon as seed is formed and carried away by the water, it sinks again. Ranunculus flammula, found also growing in water. Yellow mignonette (Resida lubola). Trifolium fragiferum, having flowers like a strawberry, with the little seeds placed on the receptacle Marsh rush (Typha latifolia), a monœceous plant, having the male flowers on the top, and the female under these. We also met with the fungus known as "puff-ball," and a host of other plants which most persons are familiar with.

9. Ranunculaceæ—sepals, three to six; deciduous petals, three to fifteen, in one or more rows, sometimes wanting; stamens indefinite, hypogynous; carpels numerous, and seated on a torus; fruit, either a berry or acherium, they contain an acrid juice; herbaceous; seldom shrubs. Papaveraceæ can easily be distinguished from Ranunculaceæ by its parietal placenta. The rose family is distinct from either of the other two, having its stamens inserted on the calyx and superior ovary. I will give all the characters of the Papaveraceæ:—sepals, two, deciduous, this distinguishes it from the rose family; petals, four, crimpled before expanding; stamens numerous and hypogynous; ovary one-celled or capsular, with several seeds; and the Papaveraceæ has got a milky juice; by putting a hole into the pod, you will see a very good mark to distinguish between it and the two others.

No. 2.—General Annual Report on Agricultural National Schools in Southern (No. 2) District, for year ended 31st December, 1860.

Prospect Hill, Limerick, May, 1861.

M. Brogan, esq.

Sir,—In accordance with instructions, I beg to submit my Seventh General Report on the working of the Agricultural School system in the above district during the year 1860.

In the first place, I beg to submit a statement of the manner in which my time has been employed, and of the work performed by me:—

Employment of Time.

	Days.
On business at the Education Office and employed in other incidental Official Duty,	85
Engaged in inspection of Agricultural National Schools,	207
On leave of absence,	10
Sundays and Official Holidays,	63
Total,	365

Work performed.

Visits of Inspection reported upon in the ordinary way,	261
Visits to Model Agricultural Schools on Special Duty,	48
Total distance travelled on Official Duty (Statute miles),	9,904
Average distance travelled for each Visit of Inspection,	38

Distribution of Inspection.

Class of School.	Visited Once.	Visited Twice.	Visited three times.	Visited four times.	Visited five times.	Visited six times.
Model Agricultural,	All more than once,	2	6	10	2	1
Ordinary do.,	Do.,	2	9	8	–	–
Workhouse do.,	7	10	12	16	–	–

No Agricultural School of any class was left unvisited at the close of the year, and those which appear as having been visited only *once*, are "Workhouse" Agricultural Schools which were struck off from connexion in the early part of the year.

Notwithstanding that a more than usual amount of *special* duty devolved on me during the past year, I was able to perform a more than average amount of *ordinary inspection* duty; and I find that the *frequency* and *certainty* of this inspection exercises a most effective influence in insuring a due amount of industry and efficiency in the working of the agricultural department.

The number of Agricultural Schools of all classes in my district at the close of the past year was sixty-eight, being a decrease of nine on the number in connexion at the close of the previous year; but this decrease is confined exclusively to the class of "*Workhouse* Agricultural Schools."

Model Agricultural Schools.—The number of schools of this class in my district, on 31st December, 1860, was twenty-one, being the same as at the corresponding period of 1859, of which twenty are in full operation, and one (Rahan, King's County) is suspended since the death of the late teacher, in consequence of the difficulty the Manager experiences in procuring the services of a teacher with an adequate amount of skill and capital to conduct both departments (agricultural and literary) with efficiency.

The Model Agricultural Schools that are in operation continue to be conducted with a satisfactory amount of efficiency, both as agencies for imparting industrial instruction to the pupils attending them, and as examples of improved industrial management in their respective localities. The proportion of "day pupils" who receive agricultural instruction from the agricultural teacher in the school, continues about the same as that of the previous year; and in most cases,

all the advanced classes, without any exception, are enrolled in the "agricultural class," and receive theoretic instruction in agriculture every day, as regularly as they receive instruction in grammar or geography. To those not destined for agricultural pursuits, this arrangement does not involve a *sacrifice of time*, as the knowledge they obtain of the sciences connected with agriculture (chemistry, geology, botany, &c.) will be of the greatest advantage to them in other departments of industry, or as tending to develop their intellectual faculties and enlarge the sphere of their general knowledge. The attendance of "agricultural boarders," though exhibiting a slight increase (three per cent.), is not so progressive as might be expected, owing to causes explained in my last annual report; and I fear that the new arrangement, whereby preparatory training in a District Model Agricultural School is abolished as a qualification for admission to the Central Agricultural Training Institution at Glasnevin (the principle of "*competitive examination*," open to pupils of all National Schools, whether agricultural or otherwise, being substituted), will have a depressing effect on the attendance of *paying* boarding pupils at the minor Agricultural Schools. The addition of a series of questions in agriculture, as an element of the local or district examination, as well as at the second or final examination of candidates for admission to Glasnevin, would partially counteract this backward tendency by causing intending candidates to pass some time at an Agricultural School, in order to qualify themselves for successfully competing in this branch of the programme of examination. I continue to devote as much care and attention as possible to the supervision of the progress and proficiency of this class of agricultural pupils, especially at the Limerick and Cork institutions, where I hold bi-monthly examinations, each alternate examination being both an "oral" and "written" examination; and on those occasions, when there is no *written* examination, I examine as to their ability in effecting agricultural calculations, such as expense of thorough-drainage at different rates and different distances apart; acreable produce of various root crops, with different distances between the plants, and different average weights of roots; measurement of manure, and ascertaining what extent of land would be manured by a heap of given dimensions, at a certain number of tons per acre, &c., &c. I find that these exercises *interest* and *improve* the pupils very much, as they soon perceive their great practical utility, and how obviously necessary it is for them to be able to make such calculations when they come to have the performance or direction of business intrusted to them, or begin farming business on their own account. I have latterly adopted this plan of examination with the ordinary day-pupils in schools where there are large and intelligent agricultural classes organized.

The moral conduct and amenity to discipline of the agricultural boarders, in the schools subject to my supervision, continue, on the whole, perfectly satisfactory. The agriculturists appear fully sensible of the deep responsibility that attaches to them of acting in *loco parentis* to the young men placed under their charge as resident pupils; and they are scrupulously exact in observing and reporting to me, at my periodic visits, any violation of moral duty, or of good order and discipline, on the part of their pupils. If the matter be not of a very serious nature, I administer the necessary reproof and admonition; but should it be of any serious importance, or, though apparently trivial, *per se*, afford evidence of a systematic disregard of order and admonition, I at once report the matter to the authorities at the Education Office, in order that incipient abuses may be energetically and effectively repressed. I am happy, however, to be in a position to state, that the occasions on which a resort to the latter alternative has become imperative are very few indeed, and that, in most instances, a few words of gentle reproof and friendly admonition are sufficient to keep them in the path of duty and subordination.

The practical operations on the Model Farms connected with the Model Agricultural Schools, both those under the exclusive control of the Commissioners and under local management, continue to be conducted in a systematic and effective manner, according to the principles of improved husbandry. The past year having been unfavourable for the success of *tillage* operations, owing to the excessive wetness and low average temperature of the summer months, the results realized from the cultivation of these Model Farms have been much below an average. Nevertheless, owing to the progress of improvement on them, the in-

creased facilities for, and diminished expense of cultivating them, in consequence of this improvement, the aggregate result exhibited by the "balance sheets" of these Model Farms in my district, which are worked for the account of the Commissioners, shows that they are making fair progress towards realizing satisfactory and successful *pecuniary* results.

With the view of insuring greater accuracy in the "valuation returns," as well as in the farm accounts, of which they form an important and indispensable item, the time of effecting the annual valuations has been changed from 31st December to 31st March, there being a much less quantity of "produce on hands" at the latter period than at the former, and consequently much less liability to error in estimating either the *quantity* or the *value* of what remains on hands. This change necessitated the taking of these valuations a second time within the past year, viz., as soon after the 31st March as my other business arrangements permitted.

I continue to devote special attention to the working of the Limerick and Cork (Munster) Agricultural Schools, which are rapidly progressing towards matured organization, and an important degree of public utility. My residing near the Limerick establishment enables me to visit it very frequently; but I visit monthly at the Cork establishment, and examine and certify all the accounts before their transmission to the Education Office. The Munster School-Farm, being the longest in operation, being naturally a better soil, easier to labour, and requiring a less amount of "permanent improvements," presents a much higher appearance of cultivation and fertility than the Limerick School-Farm, which required an enormous amount of improvement to render it all susceptible of deep and effective culture. What was called the *tillage* portion of it, when it came into the possession of the Commissioners, was so shallow and full of rocks as to render it impossible to penetrate more than four or five inches deep with a plough, and the greater portion of the untilled land was a *lake* in winter, and a coarse, worthless "bottom" in summer. All this has been changed—the deep roots of the mangel and carrot now penetrate where the arid rock not long since protruded above the surface, and the wheat and clover grow luxuriantly where the rush and water-flag in summer and the snipe and wild-duck in winter found a congenial habitat. In a short time hence I expect that the appearance of both these school-farms will fully realize the most sanguine expectations of their founders, and that they will be as successful in pecuniary results and in reimbursing the Commissioners for the large outlay incurred in bringing them to their present highly improved condition, as they have already been in awakening the attention of the farmers in their vicinity to the extraordinary and beneficial changes which skill and capital, judiciously applied, can effect on land of the most unpromising description.

Ordinary Agricultural Schools.—The number of schools of this class in connexion at the close of the past year (19) continues the same as at the close of the previous year, none having been struck off, nor none received into connexion. I am quite satisfied with the manner in which both the theoretical and practical departments of agricultural instruction continue to be carried out in them. As regards the theoretic instruction of day pupils in agriculture, they are fully as effective as the "Model Agricultural Schools," the average number in the "Agricultural Class" in the former being quite as large as in the latter class of schools. There are, however, no *resident* pupils; and the farms connected with this class of schools, being generally of very limited extent, do not admit of such a comprehensive system of management, or of such improved appliances for working them as those connected with the Model Agricultural Schools, which are designed for affording a much more extensive and effective course of instruction in practical agriculture than can be available at ordinary agricultural schools. There have been some changes in the conductors of this class of schools during the past year; but as the farms, in these cases, were the property of the patrons of the schools, and as regard was paid to capacity for managing the agricultural department in the appointment of successors to those teachers who left, these changes did not lead to the cessation of the agricultural departments, except in one instance, Ballyegan Ordinary Agricultural National School, King's County, where the teacher was removed in November, but no successor was appointed prior to the close of the year.

Workhouse Agricultural National Schools.—The number of schools of this

Appendix C.
II. Reports on Agricultural Schools.
M. Brogan, esq.

class in my district continuing in connexion at the close of the past year was twenty-eight, being a decrease of nine on the number in connexion at the close of the previous year. The cause of this decrease is the falling away in the numbers constituting the agricultural and industrial classes in these establishments; for, though there was a slight increase in the amount of pauperism last year, in consequence of the extremely high rates of provisions, and the diminished demand for labour, occasioned by the unfavourable weather, the *juvenile* element did not increase in the same proportion as the general mass. Indeed, I observed in some workhouses that while the *aggregate* amount of pauperism *increased*, the *juvenile* portion of it *decreased*. This decrease is almost exclusively confined to the *boys*, as the efficient industrial training and instruction they receive in those workhouses, having their agricultural departments in connexion with the system of National Education, fits them for maintaining themselves by their own exertions once they leave the workhouse. From all the information I have been able to glean on the subject, I find that but a very small proportion of those boys trained in workhouses where a judicious and effective system of industrial training is established, ever return after they once obtain employment outside; and it is generally found that those who do return are chiefly such as have been prematurely drafted out, before they had strength or experience enough to bear the hardships to which boys of their class are exposed, or to adapt themselves to the altered circumstances in which they find themselves after leaving an establishment which they had been in the habit of looking upon as a *home*, and where they were effectively protected from the harsh and abusive treatment which too often falls to their lot where there is no stringent regulation to prevent it.

In those workhouse schools whose agricultural departments still continue in connexion, the agricultural instruction and industrial training of the school-boys continue to be carried out efficiently, with scarcely any exception. I find that the officers who superintend the agricultural department not only evince a due amount of zeal and ability in working it effectively, but that they pay every attention to the suggestions which I leave from time to time, with the view of promoting greater efficiency. I find this the case also with most Boards of Guardians, whenever my suggestions do not involve a question of *expense;* but, in many instances, in the south and west of Ireland, I have long urged in vain the expediency of introducing *improved implements of tillage*. I often find an implement of heavy and rude construction, that would try the physical powers of an adult, placed in the hands of a boy of ten or twelve years of age, which not only prevents him from effecting much good for the time being, but, by rendering his work unnecessarily difficult and painful, disgusts him with labour, and seriously mars his future progress and usefulness. A little judicious expenditure on implements of a suitable size and construction would, in these cases, not only insure more successful and profitable results from the workhouse farms, but tend to introduce a taste for improved implements in the locality, and prove a *judicious economy* in the end.

In those cases where *one* officer (the schoolmaster) has charge of both the *theoretic instruction* of the agricultural class in the school and of the *practical operations* and industrial training on the farm, I find the agricultural department to work most effectively; but where these two sections of the agricultural department are superintended by different officers, I do not find the general working so satisfactory, as the amount of gratuity latterly awarded (which is greatly reduced from what it used to be a few years ago), having to be *divided between two parties*, the sum that falls to each is so trivial as to form but a very slight stimulus to exertion on their part. Indeed, I often find that the expectation of *having justice done to their exertions* by having a full and fair report of their successful operations submitted to the Board is a greater stimulus than the small amount of *pecuniary reward* they may receive in the shape of a gratuity.

In my former annual reports I submitted statistics showing how the school boys in the workhouse school under my inspection were disposed of as regards *industrial training;* and I now beg to submit similar details for the past year, which will show that the great object of training up every boy capable of working, in some useful industrial employment, is steadily progressing.

The following details have been compiled from the *last* reports furnished by me for each of the two years to which they refer, and though they are not absolutely correct, from not having been taken simultaneously, they are still practi-

cally correct, for the purpose of comparison, as they embrace corresponding periods in each year:—

	1859.	1860.
Total number of school-boys present, ...	934	801
Number employed at agricultural labour, . . .	601	522
Ditto trades, ...	140	125
Number unemployed from want of ability, &c., . .	193	154
Total as above, ...	934	801
Per-centage of total attendance receiving industrial training,	79·3	81
Ditto employed at agricultural labour, . . .	64·3	65
Ditto ditto trades, ...	15	16
Ditto unemployed, except as messengers, &c., .	20·7	19

The following is the per centage of unemployed for the last five years:—

Unemployed in the year 1856, ...	37	per cent.
Ditto, „ 1857, ...	34·2	„
Ditto, „ 1858, ...	26	„
Ditto, „ 1859, ...	20·7	„
Ditto, „ 1860, ...	19	„

From this it will be seen that the proportion of unemployed has been annually decreasing, and that it is now little more than half what it was six years ago. Indeed, I think there is now scarcely any room left for further decrease, as the "industrial classes" in workhouses are now, for the most part, constituted of boys of very limited age and strength, and none are permitted to be idle that are capable of any reasonable amount of industrial effort.

School Gardens.—The only institution in my district, exclusively of this description, is Loughglynn, County Roscommon. There are "garden allotments" attached to some of the ordinary Agricultural National Schools, cultivated by the pupils, as in the case of the Loughglynn School Garden, but there are no "*home allotments*" connected with the dwellings of the pupils, and cultivated by them during their leisure hours, subject to the inspection and direction of the visiting teacher, except at Loughglynn. The annual exhibition and award of premiums for the past year, which I attended specially on behalf of the Commissioners, took place on the 29th September last, and was as successful as usual. I transmitted a special report of the proceedings on that occasion, in which I gave full particulars of the number of exhibitors, of the variety and perfection of the specimens of garden produce exhibited, and of the prizes awarded to the most successful competitors.

Having now passed in review the progress and present state of efficiency of the different classes of agricultural schools, and having already transmitted various special reports on some of the most important points connected with those under the Board's own management, it only remains for me to express my decided conviction that they are generally progressing in efficiency and usefulness, and to express a hope, that each succeeding year will afford evidence of further increased progress and stability.

I remain, Sir, your very obedient servant,

M. Brogan, Sub-Agricultural Inspector.

Thomas Kirkpatrick, Esq., M.D., Head Inspector of National Agricultural Schools, Education Office, Dublin.

Appendix C. No. 3.—REPORT of JOHN DONAGHY, Esq., Agricultural Sub-Inspector.

II. Reports on Agricultural Schools.

John Donaghy, esq.

SIR,—I beg respectfully to submit for your consideration my Annual Report for the year 1860.

In the course of the year it was found necessary, either from inefficiency of working, or from reduced attendance, to strike off three Ordinary and five Workhouse Agricultural Schools, leaving at the close of the year, in my District, eight Model Agricultural Schools *solely* managed by the Commissioners, eight ditto managed by *local* patrons, twenty-four Ordinary ditto, thirteen Workhouse ditto, and one Industrial School—making in all fifty-four. There is thus a decrease in the number of schools on the rolls as compared with that of the foregoing year; but, though this be the case, it is gratifying on the other hand to be able to say, that the general working of those in operation has been more efficient and useful, and the example of cropping, cultivation, and management exhibited by them more extensively followed.

Model Agricultural Schools exclusively managed by the Commissioners.—This class comprises Kilkenny, Athy, Leitrim, Ballieboro', Bath, Ulster (Belfast), Ballymoney, and Templedouglas. As these schools may be considered the most important connected with the agricultural school system, from the facilities afforded at them for affording the groundwork of a good agricultural education to their pupils, I shall make a few observations in reference to each, with the view of placing before you their general working.

The Kilkenny establishment, both as regards its in-door and out-door operations has progressed most satisfactorily throughout the year, under the care of its indefatigable and clever Agriculturist. A well-attended boarding agricultural class has always been present, the members of which made exceedingly creditable advancement in the course of instruction afforded. As proof of this, it is only necessary to mention, that five out of six of its pupils gained admission to the Albert Institution by competitive examination. The farm, also, which previously consisted of comparatively small and irregular fields, has been re-divided, old fences levelled, new fences erected, and the whole brought into proper shape for following out systematic cropping and economical and efficient cultivation. A few additional operations of a permanent character still remain to be effected, after the completion of which, the general appearance of the farm will be most satisfactory, and show to advantage what may be effected by superior knowledge and persevering industry in the improvement of the agriculture of the country. Another part of the operations of the establishment is also worthy of notice, inasmuch as through its instrumentality most essential benefits have been and are being conferred on the farming community in the surrounding neighbourhood, viz., the keeping of pure-bred sires and the letting of them at reasonable rates to all who desire to avail themselves of their services. The advantage thus afforded by this part of the operations of the establishment can be more readily perceived and appreciated by stating the fact, that, so far have the farmers availed themselves of the means thus placed within their reach of improving their live-stock, that no less than eighty cows and thirty pigs have been served at the farm during the past year.

As regards Athy, the attendance of agricultural boarding pupils—taking into account the number of such pupils for which provision is made—has been, on the whole, fair, whilst that of the agricultural class has been in general large. The pupils in the course of the year made considerable progress in agricultural knowledge, still there is room for improvement in this respect. Owing to circumstances, it was considered advisable to remove the late Agriculturist, who merely filled the situation in a temporary manner, and to replace him by another. This change, so far as I have been able to form an opinion, was a judicious one, as the general management of the establishment since the appointment of the present Agriculturist has afforded me great satisfaction. The farm at present presents a highly creditable appearance, and exhibits an example of cropping and cultivation which, if copied, is well calculated to prove useful to the locality. Here, as well as at Kilkenny, pure-bred sires have been, and still are kept for the improvement of the live-stock of the surrounding neighbourhood; and their services, though not so extensively useful, have been considerably beneficial.

At Leitrim, the boarding agricultural class, though not full, has been, on the whole, fairly attended; whilst the agricultural class has been comparatively

large throughout the year. The progress made by the pupils has been satisfactory, and the general management of the farm—taking into account the tenacity of the soil, and the wet and ungenial season—as well executed as could reasonably be expected. Amongst the beneficial effects which have emanated from the cropping and cultivation of the farm may be mentioned, the more extensive growth of green-crops in the locality, and the pretty general adoption of the improved method of laying down land in grass.

The Bailieboro' establishment, both as regards the indoor instruction of the pupils and the outdoor management of the farm, has been very satisfactorily conducted. A large agricultural class has been, throughout the year, in attendance, and a fairly-attended agricultural boarding class—the pupils belonging to each of which have made very creditable progress in agricultural knowledge. The general appearance of the farm and of the premises adjacent to the buildings, also, has been much improved; and I cannot but express the opinion, that had it not been for the ungenial nature of the season—acting injuriously on the natural qualities of the soil—the results of the working of the school, as well pecuniary as otherwise, would have been favourable. That the example shown on it has been productive of useful changes in the agricultural practices formerly followed in the neighbourhood appears to be beyond doubt, as the testimony afforded me on this point is from a source on which every confidence may be relied.

The attendance of agricultural boarding pupils at the Bath School was pretty fair during the foregoing part of the year, but reduced towards the end of it. The progress made by the pupils, however, in useful agricultural knowledge was exceedingly creditable. As regards the farm, nothing can be more satisfactory than its general appearance. Systematic cropping is strictly pursued on it, and an example of general management exhibited which has greatly attracted the notice of the public and induced useful and important changes in the usual agricultural practices of the locality. Originally it was poor, wet, spouty land, of a very tenacious character; but by draining and other operations of a permanent or improving nature it has been rendered comparatively rich and productive. Unless in seasons such as the past, it may always be expected, if properly managed, to make favourable returns of produce.

Very considerable progress has been made by the Ulster (Belfast) establishment during the year both as regards the indoor and outdoor departments. A satisfactorily-attended boarding class has been, for the most part, present, the members of which made rapid advancement in their agricultural studies—so much so, that two of them obtained admission to the Albert Institution by competitive examination. The tillage and management of the farm also, considering the extremely unfavourable quality of the soil, have been as well attended to and as efficiently executed as could at all be expected in such a season as the past. To those unacquainted with the character of the soil of this farm, a description of it would scarcely be credited. The greater part of it has not more than three inches of active soil, whilst the subsoil is of the most tenacious quality which can possibly be imagined. Neither in wet nor in dry weather, therefore, can it be laboured with any degree of satisfaction. It is surprising, however, to witness the degree of amelioration to which the reclaimed part has been brought by drainage and judicious management. Judging from the cropping of the last few years, I have no doubt but that it will ultimately become a productive wheat and bean soil. Its reclamation is being gradually effected, whilst, in the meantime, steps are being taken to establish regular courses of cropping on it.

The boarding class at Ballymoney has been comparatively small, but there has always been a large agricultural class in attendance—the useful agricultural knowledge of the members of which has uniformly afforded me great satisfaction. The farm is in a high state of cultivation, systematic cropping is pursued, and an excellent course of tillage and management exemplified. In the part of the country in which this school is situated a good course of farm management pretty generally prevails; it is somewhat difficult, therefore, to trace with certainty how far the operations of the establishment have contributed to the result referred to. One thing is certain, however, that most of the farmers' sons belonging to the neighbourhood have received—when in attendance at the day-school—an amount of both scientific and practical information on agricultural subjects which neither time nor circumstances will likely obliterate. Another feature connected with the working of this school deserves particular notice, as

Appendix C.

II. Reports on Agricultural Schools.

John Donaghy, esq.

through its instrumentality, I have no doubt, much good has been effected. The agriculturist, with praiseworthy zeal for the dissemination of agricultural knowledge, lectured occasionally on agricultural subjects to well-attended audiences of practical farmers belonging to the surrounding country. This practice, I believe, he pursued for some years; and, judging from the handsome testimonial presented to him on his removal to another establishment, his services in the way mentioned must have been highly appreciated.

Some slight progress has been made during the past year at Templedouglas, but not to that extent to which those warmly interested in its welfare could wish. One boarding pupil only was present. He, however, must have profited very considerably by the course of instruction afforded him, as *he* also was one of the successful candidates at the competitive examination for admission to the Albert Institution. As stated in some of my former reports, the farm is not only of a cold and unproductive character, but from its situation, the crops grown on it suffer severely from unpropitious weather. Only about the one-half of it has as yet been reclaimed and brought under arable tillage, but steps are now about to be taken for the improvement of the remainder.

Model Agricultural Schools managed locally.—These comprise Templemoyle, Loughash, Larne, Garryhill, Woodpole, Cornagilta, Dromiskin, and Ballycarry.

Carefully reviewing the working of these schools during the past year, I can come to no other conclusion, on the whole, than that their operations have been carried out with both energy and efficiency, and, as a consequence, with much success. Templemoyle and Loughash continue to maintain the position which they have for so considerable a time occupied, viz., that of highly useful agricultural establishments, imparting to their pupils a good agricultural and literary education, and exhibiting an example of cultivation, cropping, and general farm management well worthy of imitation. The boarding classes at each have been well attended, and the progress made by the members of them very satisfactory. Two pupils belonging to the former gained admission by competitive examination to the Albert Institution. Without entering with particularity into the working of the other schools belonging to this class, I would say, generally, that they have all been conducted throughout the year with zeal and ability on the part of their respective teachers, that the farms attached to them have been as well cultivated as the unpropitious nature of the season would permit, that at each a largely attended agricultural and a very fairly attended industrial class have been present, and that the progress of the pupils in almost every case has been very creditable. The only drawback in reference to their operations is one which, I believe, cannot, under existing circumstances, be easily remedied, viz., the absence of *boarding* agricultural classes. This appears to arise from the preference which young men, whose object in life is to become agriculturists, give to the schools *exclusively* managed by the Board.

Ordinary Agricultural Schools.—In the course of the year *two* of these schools were struck off the rolls for inefficiency of working, and *one* on account of a change of teacher, the farm, at the same time, having been detached from the school. With a few exceptions, the schools remaining on the rolls have been conducted in a very creditable manner, the farms attached to them being examples of neat and efficient cultivation, rotatory cropping, and good general management, whilst, at the same time, well attended agricultural classes have been kept up, the pupils belonging to which made very creditable proficiency in agricultural knowledge. It is much to be regretted that this class of schools is not more widely established throughout the country, as through their instrumentality, at a very trifling outlay, agricultural knowledge, based on sound principles, is brought within the reach of those whose pecuniary means prevent them from acquiring it from any other source. At all events, the suggestion is worthy of consideration—and the more so as it has been long since proved that a combination of agricultural with literary education in our common schools does not by any means act injuriously on the latter. I could refer to many instances in proof of this remark, but shall adduce only one. Throughout the last twenty years the system has been carried out in the Larne Agricultural School, and I have never heard from any source that the agricultural education afforded has had the slightest injurious effect on the literary, nor do I believe that there is a single individual connected with the school who would assert the contrary.

Workhouse Agricultural Schools.—Diminished attendance, consequent upon the decrease of pauperism, and want of proper qualification on the part of the pupils, both as regards age and literary attainments, caused the striking off of five of these schools in my District in the course of the year. Those remaining on the rolls, however, have given much—in some cases, great —satisfaction in their general working. As stated in some of my former reports, a demand for agricultural labourers, for the last few years, as compared with the supply, coupled with the practice which prevails in some workhouses of hiring out young lads of comparatively tender years before they have acquired either sufficient strength for the endurance of constant labour, or an adequate amount of literary education, has lessened the number of inmates, and produced a class of boys of too limited attainments to profit by a course of agricultural instruction. These remarks, of course, have merely reference to the past. It is very gratifying, however, to find that few, if any, of the pupils who have been retained till they acquired sufficient physical strength for the daily performance of active labour and till their education was completed, have returned again for eleemosynary relief; and that most, if not all of them—so far as I have been able to ascertain —have given great satisfaction to their employers. Accustomed as the agricultural pupils at workhouse agricultural schools are to manual labour, they gradually become reconciled to it, and adopt it cheerfully as the future means by which they intend to meet the wants and exigencies of life—and the more so as, in time, they become skilled labourers from the training they have acquired in their youth, and ultimately, with few exceptions, well-conducted members of society. The aid, therefore, afforded to these schools by the co-operation of the Board of National Education with the Poor Law Commissioners, has been by no means lost, but has, on the contrary, been returned with tenfold interest to the public in general by the knowledge afforded and the habits of industry engendered through their instrumentality.

School Gardens.—The only school garden in my District is that at Glasnevin. As regards it, I would say, that I have been much pleased on my several visits with the clean and neat cultivation pursued, and with the rotatory cropping exemplified; but that, owing to the lengthened indisposition of its teacher, the pupils have not made that progress in their indoor horticultural and agricultural knowledge which otherwise they would have done. The allotment system is still carried out with both zeal and efficiency.

General Remarks.—The excessive and almost continuous wet weather during the past year operated most injuriously against the growth of root crops—especially on heavy lands—so much so that, in the great majority of cases which came under my notice, the produce would scarcely repay the cost of cultivation. The cereals, also, suffered considerably from the same cause, but by no means to the same extent. Altogether, the season was one of the most unpropitious for farming operations which we have had for many years.

All the information which I have been able to procure relative to the influence which the agricultural schools are exercising in the improvement of the farming operations in their respective localities goes to say, that they are gradually producing most beneficial and useful changes. My own observation when making my periodical visits corroborates the view thus expressed, and fully convinces me of its correctness. The very existence of an agricultural school in a neighbourhood not only awakens a spirit of inquiry, but also stimulates all those who witness and who may profit from the example exhibited in its management to more active and successful exertion. These effects, even in themselves, cannot but be looked upon as highly favourable to the onward march of agricultural improvement; but, when the useful course of agricultural instruction which such schools afford to their pupils is coupled with them, the beneficial effects which must unavoidably emanate from their working become quite apparent, as "knowledge is power" in every profession in life.

I have the honour to be, Sir, your humble and obedient servant,

JOHN DONAGHY, Sub-Agricultural Inspector.

To Thomas Kirkpatrick, Esq., M.D.,
Head Agricultural Inspector, Albert
Model Farm, Glasnevin.

STATISTICS of SCHOOL-FARMS in operation in 1860.

I.—SCHOOL-FARMS of the first class under the exclusive management of the Board.

This is the most important class of Agricultural Schools. With seven exceptions, marked with an asterisk in the lists, the School-farms are worked by their respective Agriculturists for the public account.

II.—SCHOOL-FARMS of the First Class under the management of Local Patrons.

The expenses incurred on account of this class of Schools, are—1st, an allowance for the maintenance of a few residents or boarding agricultural pupils; 2nd, a special salary to the teacher for affording agricultural instruction, the amount of such special salary being £10 a-year in each case, with the exception of Loughash and Templemoyle, where the allowance for salary is greater; 3rd, a small grant towards the payment of an industrial class.

† The Agricultural Class includes the boys in the Industrial Class.
‡ These are extern or non-resident pupils.
§ Of these 31 belonged to the Mungret, and 39 to the Tervoe School.
‖ Included in live stock at Limerick.
¶ The Tervoe School was attached to the Limerick one during the year.

III.—Ordinary School-Farms.

These consist of Ordinary National Schools, having small farms or garden-farms attached. The teacher of one of these schools receives £5 a-year in addition to his class salary, for giving agricultural instruction to the more advanced boys in his school. The Commissioners make a small grant towards the payment of an industrial class.

IV.—Workhouse School-Farms.

The payments made by the Commissioners on account of this class of schools consist of gratuities awarded on the reports of the Agricultural Inspectors, to the officers who conduct the in-door and out-door training of the boys: the amount of such gratuities in no case to exceed £15 per annum for each school.

This return is compiled from documents furnished by the Clerks of the several Poor Law Unions.

Per cent.,		–	–	–	–	–	–	37·9	18·9	30·0	11·7
								56·8		41·7	

NOTE.—Except in the cases of Arithmetic, the centesimal proportions set down under the different heads are exclusive cent. able to read Second Book; 56·8 is the centesimal proportion of the pupils able

spectors themselves during the Year, under each Head, at all the Inspections made to a reckoned for each School.

of Proficiency of Numbers returned in Section I.

Geography.			Dictation.		Arithmetic.				Writing.		No. of District.
Acquainted with outlines of Map of World only.	Acquainted with Maps of Europe and Ireland.	Able to answer on General Course of Geography.	Able to write a sentence from Dictation with tolerable accuracy.	Able to write from Dictation with case and correctness.	Able to set down accurately any number of not more than seven places of figures.	Able to work correctly a sum in Subtraction.	Able to work correctly a sum in Division of Money.	Able to solve readily and correctly questions in Proportion or Practice.	Able to write on paper fairly.	Able to write with ease and freedom.

OF

COMMISSIONERS OF NATIONAL EDUCATION IN IRELAND.

(1860.)

APPENDIX D.

PROGRAMME of INSTRUCTION for PUPILS in the NATIONAL SCHOOLS, or the MINIMUM amount of proficiency required for each Class.

Programme of Instruction.

No. 1.—FOR MALE NATIONAL SCHOOLS.

I. CLASS.

I. Children in the highest division of First Class will be expected *at least*—

1. To name the Days of the Week, and the Months and Seasons of the Year.
2. To count correctly and intelligently up to 20.
3. To read any number up to 20.
4. To add *mentally* any two or more single digits (as 5+4+6+3) whose sum shall not exceed 20.
5. To spell correctly the simpler words of the lessons they shall have previously read, and to understand their meaning.
6. To know the vowel sounds.
7. To answer simple questions on the subjects of the lessons already learnt by them.

NOTE.—So soon as Children have learned the Alphabet, or even some few of its letters, they are to commence at once to *read* as well as spell.

II. CLASS.

II. Children in the senior division of the Second Class will be expected—

1. To read and set down any number of three places of figures.
2. To know the Addition and Subtraction Tables.
3. To be able to work on slate or black board simple questions in Addition and Subtraction, no part of the work including any number of more than three places of figures.
4. To name the Syllables in a Word.
5. To distinguish readily, in any easy sentence selected in their daily lessons, the Article, Noun, and Adjective.
6. To know the outlines of the Map of the World.
7. To write on Slates.
8. To spell correctly the simpler words of the lessons they may have already read, and to understand their meaning.
9. To answer simple questions on the subjects of the lessons already learnt by them, and to be able to repeat correctly and neatly such lessons as are in rhyme.

SEQUEL CLASS.

III. Children enrolled One Quarter or more in either Sequel Class will be expected—

1. To read and set down any number of five places of figures.
2. To know the Multiplication, Pence, and Time Tables.
3. To be able to work easy questions in Simple Multiplication, and Simple Short Division.

Appendix D.

Programme of Instruction.

4. To distinguish readily, in any easy sentence selected in their daily lessons, the Article, Noun, Personal Pronoun, Adjective, Verb, and Adverb.
5. To know the Map of the World.
6. To write on Paper.
7. To write out from memory any part of the Multiplication Table.
8. To write out from memory, in proper order, the names of the Months of the Year, with the number of Days in each.
9. To spell correctly the simpler words of the lessons they may have already read, and to understand their meaning.
10. To answer simple questions on the subjects of the lessons already learnt by them.
11. To read with a fair degree of ease and correctness.

III. Class.

IV. Children enrolled One Quarter or more in the Third Class will be expected—

1. To know Notation and Numeration well, and to repeat all the more useful Arithmetical Tables.
2. To work readily questions in the Simple and Compound Rules of Arithmetic.
3. To distinguish readily and with certainty, in any easy sentence, selected in their daily lessons, all the parts of speech.
4. To know the Maps of the World and Europe.
5. To write on Paper, and to write a fair hand.
6. To know and to be able to write down the Characters or Marks used in punctuation.
7. To write down correctly easy sentences from Dictation.
8. To write out from memory the Time and Money Tables.
9. To spell correctly the words of the lessons they may have already learnt, and to explain their meaning.
10. To answer simple questions on the subject-matter of those lessons, and to repeat such of them as are in rhyme neatly and correctly.
11. To know what is meant by Accent and Emphasis, and to read with ease and correctness, and with due attention to the pauses.

IV. Class.

V. Pupils enrolled One Quarter or more in the Fourth Class will be expected—

1. To know *all* the Arithmetical Tables, and to be able to write out from memory, and in a neat and correct form, any one of them.
2. To be able to work sums in Proportion, Fractions, and Practice.
3. To know the Prefixes, Affixes, and principal Roots given in the Fourth Book.
4. To know so much of English Grammar as to be able to parse easy sentences.
5. To know the Maps of *all* the Continents and of Ireland.
6. To know the definitions of the more common technical terms of Geography, as *Axis, Poles, Equator, Latitude, Longitude, Zones, &c.*
7. To write correctly from dictation *any* sentence selected from Third Book.
8. To answer readily on the subject-matter of the lessons they may have already read, and to explain with clearness the meaning of the words contained in them.
9. To write a good hand.
10. To read with fluency and correctness.

V. Class.

VI. Pupils enrolled One Quarter or more in the Fifth Class will be expected—

1. To know the Commercial Rules of Arithmetic, and the Mensuration of Superficies.
2. To know how to keep Cash, Personal, Real, and Farm Accounts, and how to write out Bills, Shop Accounts, &c.
3. To analyze and parse correctly Complex Sentences.
4. To know the Geography of the British Empire, and the *simpler* portions of the Geography Generalized.
5. To write correctly from dictation any ordinary sentences selected for them.
6. To draw on a slate any of the simple plane Geometrical Forms.
7. To write out from memory, with correct spelling and syntax, the substance of any fable or short story chosen from the Second or Third Book.
8. To know the forms of Epistolary Correspondence, and how to Address, Subscribe, and Direct Letters.
9. To analyze the words of their ordinary lessons, pointing out their Roots, Prefixes, and Affixes, and to explain their meaning with clearness and precision.

10. To answer with intelligence and judgment on the subject-matter of the lessons already learnt by them. *Appendix D.*
11. To write a good hand with ease and freedom. Programme of Instruction.
12. To read with entire ease, fluency, and judgment, both poetry and prose.

NOTE I.—The *Spelling Book Superseded* should be taught III., IV., & V. Classes.
NOTE II.—Mental Calculation should be taught to the same Classes.
NOTE III.—The "*Knowledge of Common Things*" is to be learnt from the Lesson Books; and the Classes should be regularly and carefully examined upon the *subject-matter* of the lessons read by them.
NOTE IV.—*Periodic Repetitions* should be regularly instituted, the three great means of instruction being EXPLANATION, INTERROGATION, and REPETITION.

No. 2.—FOR FEMALE NATIONAL SCHOOLS.

I. CLASS.

I. Children in the highest division of First Class will be expected—

1. To name the Days of the Week, and the Months and Seasons of the Year.
2. To count correctly and intelligently up to 20.
3. To read any number up to 20.
4. To add *mentally* any two or more single digits (as 5+4+6+3) whose sum shall not exceed 20.
5. To spell correctly the simpler words of the lessons they shall have previously read, and to understand their meaning.
6. To know the vowel sounds.
7. To answer simple questions, on the subjects of the lessons already learnt by them.

NOTE.—So soon as Children have learned the Alphabet, or even some few of its letters, they are to commence at once to *read* as well as spell.

II. CLASS.

II. Children in senior division of Second Class will be expected—

1. To read and set down any number of three places of figures.
2. To know the Addition and Subtraction Tables.
3. To be able to work on slate or black board simple questions in Addition and Subtraction, no part of the work including any number of more than three places of figures.
4. To name the Syllables in a Word.
5. To distinguish readily, in any easy sentence selected in their daily lessons, the Article, Noun, and Adjective.
6. To know the outlines of the Map of the World.
7. To write on Slates.
8. To spell correctly the simpler words of the lessons they may have already read, and to understand their meaning.
9. To answer simple questions on the subjects of the lessons already learnt by them, and to be able to repeat correctly and neatly such lessons as are in rhyme.

SEQUEL CLASS.

III. Children enrolled One Quarter or more in either Sequel Class will be expected—

1. To read and set down any number of five places of figures.
2. To know the Multiplication, Pence, and Time Tables.
3. To be able to work easy questions in Simple Multiplication, and Simple Short Division.
4. To distinguish readily, in any easy sentence selected in their daily lessons, the Article, Noun, Personal Pronoun, Adjective, Verb, and Adverb.
5. To know the Map of the World.
6. To write on Paper.
7. To write out from memory any part of the Multiplication Table.
8. To write out from memory, in proper order, the names of the Months of the Year, with the number of Days in each.
9. To spell correctly the simpler words of the lessons they may have already read, and to understand their meaning.
10. To answer simple questions on the subjects of the lessons already learnt by them.
11. To read with a fair degree of ease and correctness.

Appendix D.

Programme of Instruction.

III. Class.

IV. Children enrolled One Quarter or more in the Third Class will be expected—

1. To know Notation and Numeration well, and to repeat all the more useful Arithmetical Tables.
2. To work readily questions in all the Simple Rules of Arithmetic, and in Addition, Subtraction, Multiplication, and Division of Money.
3. To distinguish readily and with certainty, in any easy sentence, selected in their daily lessons, all the parts of speech.
4. To know the Maps of the World and Europe.
5. To write on Paper, and to write a fair hand.
6. To know and to be able to write down the Characters or Marks used in punctuation.
7. To write down correctly easy sentences from Dictation.
8. To write out from memory the Time and Money Tables.
9. To spell correctly the words of the lessons they may have already learnt, and to explain their meaning.
10. To answer simple questions on the subject-matter of those lessons, and to repeat such of them as are in rhyme neatly and correctly.
11. To know what is meant by Accent and Emphasis, and to read with ease and correctness, and with due attention to the pauses.

IV. Class.

V. Pupils enrolled One Quarter or more in the Fourth Class will be expected—

1. To be able to write out from memory, and in a neat and correct form, any of the more useful Arithmetical Tables.
2. To be able to work sums in the Compound Rules, Simple Proportion, and Practice.
3. To know the Prefixes and Affixes in the Fourth Book or *Spelling Book Superseded.*
4. To know the inflections of a Noun, Pronoun, Adjective, and Verb, and to be able to parse an easy sentence.
5. To know the Maps of *all* the Continents and of Ireland.
6. To know the definitions of the more common technical terms of Geography, as *Axis, Poles, Equator, Latitude, Longitude, Zones,* &c.
7. To write correctly from dictation *any* sentence selected from Third Book.
8. To answer readily on the subject-matter of the lessons they may have already read, and to explain with clearness the meaning of the words contained in them.
9. To write a good hand.
10. To read with fluency and correctness.

V. Class.

VI. Pupils enrolled One Quarter or more in the Fifth Class will be expected—

1. To know Fractions, Practice, and Interest.
2. To know how to keep a Cash Account, and how to write out a short Shop Bill.
3. To be able to parse Compound Sentences.
4. To know the Geography of the British Empire, and to explain the ordinary proofs of the Earth's Sphericity.
5. To write correctly from dictation any ordinary sentences selected for them.
6. To write out from memory, with correct spelling and syntax, the substance of any fable or short story chosen from the Second or Third Book.
7. To know the forms of Epistolary Correspondence, and how to Address, Subscribe, and Direct Letters, &c.
8. To be able to explain the composition and meaning of the words of their ordinary reading lessons.
9. To answer with intelligence and judgment on the subject-matter of the lessons already learnt by them.
10. To write a good hand with ease and freedom.
11. To read with ease, fluency, and judgment, both poetry and prose.

Note I.—The *Spelling Book Superseded* should be taught to at least the III., IV., and V. Classes.

Note II.—Mental Calculation should be taught to the same Classes.

Note III.—*Needlework* should be taught to all the children beyond the I. Class.

Note IV.—The "*Knowledge of Common Things*" is to be learnt from the Lesson Books; and the Classes should be regularly and carefully examined upon the *subject-matter* of the lessons read by them.

Note V.—*Periodic Repetitions* should be regularly instituted, the three great means of instruction being Explanation, Interrogation, and Repetition.

APPENDIX E.

LIST OF SCHOOLS IN OPERATION

ON THE

31st DECEMBER, 1860;

WITH

SUMMARIES IN COUNTIES AND PROVINCES;

ALSO,

SCHOOLS IN PROGRESS OF BUILDING,

AND

SCHOOLS SUSPENDED,

ON THE

31st DECEMBER 1860.

I.—List of Schools in operation on the 31st December,

ULSTER—

COUNTY OF

NOTE.—In the column headed "*Vested or Non-Vested*," the letters V.T. denote Schools *Vested* in *Trustees*; V.C., those letters are "*Non-Vested*." Religious denominations of Managers and Teachers are expressed thus—

In Appendix D in this Volume is shown the *minimum* amount of proficiency required for each

APPENDIX G.

I.—List of One Hundred and Forty Workhouse Schools in connexion on the 31st December, 1860, with the Total Number of Distinct Pupils at any time on Rolls, the Average Number on Rolls, and the Average Daily Attendance of Pupils, as returned for the Year ending 31st December, 1860.

Extract from Commissioners' Rules, as to nature of aid granted to Workhouse Schools.—"1. Such Schools are received into connexion, and grants of Books made thereto, on condition that they shall be subject to inspection by the Commissioners, or their Officers, and that all the Rules of the Board applicable to Non-Vested Schools be faithfully observed.

"2. The Commissioners award half-yearly gratuities to a certain number of the Teachers of Workhouse Schools in each District, on the recommendation of the Inspector.

"The gratuities are divided into two classes:—

For Male Teachers,	First Class,	Twenty at the rate of	£6 a-year each.
	Second Class,	Twenty "	£4 "
For Female Teachers,	First Class,	Twenty "	£5 "
	Second Class,	Twenty "	£3 "

"3. In Workhouse Schools to which farms are attached, the Commissioners award to the Agricultural Teacher, a gratuity, not exceeding £15 in one year, and make a free grant of books on agriculture. These gratuities and grants are awarded on the recommendation of the Agricultural Inspectors."

IV.—List of Thirty-two Industrial Schools in connexion with the Commissioners on the 31st December, 1860.

Extract from Commissioners' Rules, as to nature of aid granted to Industrial Schools.—"1. In these Schools embroidery and other advanced kinds of needlework are taught. The Commissioners grant salaries to the Teachers, on the following conditions:—"First. That *all* the pupils of the industrial department shall receive literary instruction, for at least *two hours* daily. Second. That no religious instruction or religious exercise shall take place during the time the pupils are engaged in industrial occupation. Third. That a separate room be provided for industrial instruction. Fourth. That in addition to the literary Teacher, there shall be a suitable person appointed to conduct the industrial department.

"2. None but lay Teachers are entitled to a salary from the Commissioners, for conducting an industrial department in connexion with a *Convent School*.

"3. The amount of salary will depend upon the circumstances of the case."

VI.—List of One Hundred and Twenty-four Convent and Monastic Schools in connexion on the 31st December, 1860, with the Total Number of Distinct Pupils at any time on the Rolls, the Average Number on the Rolls, and the Average Daily Attendance, as returned by the Managers, for the Year ending 31st December, 1860.

Convent Schools receive aid under the conditions applicable to Non-Vested Schools, and they are subject to the same Rules and Regulations.

The members of the community may discharge the office of teachers either by themselves or with the aid of such other persons as they may see fit to employ; the salaries of such assistants to be defrayed by the community.

The Commissioners will grant aid to *one School only*, in *connexion with the same* Convent.

In Schools of this description, salary is regulated by the average daily attendance, and is paid in accordance with the following scale:—

Average attendance.	Salary.		Average attendance.	Salary.	
30 to 50,	£10	Increase at £20 per cent.	301 to 325,	£64 5	Increase at £17 per cent.
51 to 75,	15		326 to 350,	68 10	
76 to 100,	20		351 to 375,	72 15	
101 to 125,	25		376 to 400,	77 0	
126 to 150,	30		401 to 425,	81 5	
151 to 175,	35		426 to 450,	85 10	
176 to 200,	40		451 to 475,	89 15	
201 to 225,	45		476 to 500,	94 0	
226 to 250,	50		501 to 525,	98 5	
251 to 275,	55		526 to 550,	102 10	
276 to 300,	60		551 to 575,	106 15	
			576 to 600,	111 0	

601 upwards, Increase at £15 per cent.

As the amount of salary will in all cases depend upon the average daily attendance of pupils, as shown by the quarterly returns, Managers are to be prepared for augmentation or diminution accordingly.

VII.—List of One Hundred and Twenty-one Agricultural School Farms in connexion with Board on 31st December, 1860.

Extracts from Commissioners' Rules, as to nature of aid granted to Agricultural Schools.—"1. Teachers of Model Agricultural Schools under the exclusive control of the Board, receive such amount of Salary as the Commissioners deem sufficient, according to the circumstances of each case.

"2. Masters of Model Agricultural Schools under Local Patrons, who are competent to conduct both the Literary and Agricultural Departments, receive £10 per annum, in addition to the salary of the class in which they may be placed; but if their income from the Board, with this addition, should fall short of £30 per annum, the difference will be granted to them, so that, in all cases, such Teachers shall have secured to them for their *combined* services a salary of £30 a-year at least.

"3. Masters of Ordinary Agricultural Schools to receive £5 per annum, in addition to the salary of their class, provided they are competent to conduct both the Literary and Agricultural Departments, and that the Commissioners shall have previously approved of Agriculture being taught in the School.

"4. In Workhouse Schools to which farms are attached, the Commissioners award to the Agricultural teacher a gratuity not exceeding £15 in one year, and make a free grant of books on agriculture. These gratuities and grants are awarded on the recommendation of the Agricultural Inspectors."

Nineteen School Farms under exclusive management of the Commissioners.

APPENDIX H.

I.—List of Teachers in receipt of Supplemental or Good Service Salaries.

With a view to encourage efficient and earnest teachers to labour zealously for the improvement of their schools, Supplemental or Good Service Salaries, in addition to the ordinary class salaries, are awarded upon the recommendation of the Head and District Inspectors, and in accordance with the following graduated scale, based upon classification and length of service combined :—

Scale of Good Service Salaries.

Males.									Females.								
Of Class.	After good service of								Of Class.	After good service of							
	8 Years.			12 Years.			17 Years.			8 Years.			12 Years.			17 Years.

II[2]	4	0	0	5	0	0	7	0	0	II[2]	3	0	0	4	0	0	6	0	0
II[1]	5	0	0	6	0	0	8	0	0	II[1]	4	0	0	5	0	0	6	10	0
I[3]	6	0	0	7	10	0	9	10	0	I[3]	4	10	0	5	10	0	7	10	0
I[2]	7	0	0	8	10	0	11	0	0	I[2]	6	0	0	7	0	0	9	0	0
I[1]	8	0	0	11	0	0	13	0	0	I[1]	7	0	0	9	0	0	11	0	0

The regulations under which these Salaries are awarded, and continued, are:—

1. No teachers less than eight years in the Commissioners' service from date of first obtaining classification, or who may rank below III[1] Class, or at whose schools the daily average attendance is under thirty-five, shall be entitled to Good Service Salary.
2. No teachers shall be eligible for this salary who have been fined or depressed for misconduct, or who have been reprimanded or admonished for serious neglect.
3. When a teacher in receipt of Supplemental Salary, shall have completed the period of service next above that on account of which such award was made, the higher rate of Good Service Salary attached to such higher period shall not be paid until so recommended by Inspector.
4. When a teacher shall become entitled to a higher rate of Supplemental Salary by promotion from one class to another, such higher rate shall not be paid until the expiration of one year in the new class, nor until such increase shall have been specially recommended by Inspector.
5. Teachers who, after having obtained Good Service Salaries, shall relax in their efforts or fail in those qualities that first obtained them this distinction, or at whose schools the average attendance shall fall below thirty-five, shall thereby forfeit such Supplemental Salary.
6. The number of teachers for the present admissible to benefit of Supplemental Salaries to be limited to 500—*i.e.*, 330 males and 170 females.

II.—List of Teachers in National Schools to whom Premiums were paid in the Year 1860, for Order, Cleanliness, and General Efficiency, in accordance with the following Scale.

Scale of Premiums to the Masters and Mistresses of National Schools who are most distinguished for order, cleanliness, and general efficiency.

The sum of £22 10s. is allocated to each of the School Districts, to be divided into Thirteen Premiums, viz.:—

One of	£4 0 0	Five of £1 10s. each,	£7 10 0
Two of £3 each,	6 0 0	Five of £1 each,	5 0 0

These Premiums are awarded annually, on the recommendation of the District Inspector.
No distinction is made between the Teachers of Vested and Non-Vested Schools.
No Teacher is eligible for these Premiums for more than two years in succession, nor who may be in receipt of Supplemental or Good Service Salary.
These Premiums are awarded without reference to the Class in which the Teachers may be ranked: but none will be deemed eligible to receive them against whom there may be any well founded charge of neglect in the performance of their duties, of impropriety in their conduct, or whose Schools are not conducted in a satisfactory manner.

III.—List of Teachers of Workhouse Schools to whom Gratuities were paid in the Year 1860, in accordance with the following Scale.

Scale of Gratuities to Masters and Mistresses of Workhouse Schools in connexion with the Board of National Education.

The Commissioners of National Education award gratuities to a certain number (Forty Males and Forty Females) of the Teachers of the Workhouse Schools, in connexion with the National Board, who shall be recommended by the District Inspectors.

The Gratuities are divided into two Classes:—

For Male Teachers, { First Class, . . 20 at rate of £6 a Year each. / Second Class, . . 20 at rate of £4 a Year each. | For Female Teachers, { First Class, . . 20 at rate of £5 a Year each. / Second Class, . 20 at rate of £3 a Year each.

The awards are made for the half years ending 31st March, and 30th September, in each Year.

Such gratuities are given in *addition* to the Salaries paid to the Teachers of Workhouse Schools under the provisions of the Poor Law Act.

No Teacher is precluded from receiving a gratuity for two or more half-years in succession, if recommended by the District Inspector as deserving of it; but a Teacher having received one half-year's gratuity, is not thereby *entitled* to another for the succeeding half-year.

Appendix I.

Questions proposed at the Examinations.

Male Teachers.

APPENDIX I.

QUESTIONS (for answer in writing) proposed at the District Examinations of 1860.

No. 1.—MALE TEACHERS.

A.

Grammar.—1.

Be not over-exquisite
To cast the fashion of uncertain evils;
For grant they be so, while they rest unknown,
What need *a man* forestall his date of grief,
And *run* to meet *what* he would most avoid?

(*a.*) Give the meaning of the expression, "to cast the fashion."
(*b.*) What is the exact force of the word "uncertain?"
(*c.*) Say how many logical propositions the passage contains.
(*d.*) Parse the words in *italics*.

2. Give the derivation of the following words—Alnwick, Heliopolis, Balearic, Exeter, curate, tent, utilize, type, parasite, dotation, quiet, cheiroptera.

3. How is it shown that words are Arbitrary and not Natural signs? Explain, with examples, the nature of each, and state what class of words appears to you to partake most of the character of natural signs, and why?

4. State the circumstances under which the ellipsis of the relative pronoun is admissible, and where it is not. Give examples to illustrate your answer.

5. What is meant by the accidents of a word? Account for the use of this term, and show that its application in this sense is a proper one.

Geography.—1. Draw an outline map of the Black Sea; mark the countries by which it is surrounded; the mouths of the rivers flowing into it, and the positions of the chief towns or cities on its shores.

2. Whence arises the difficulty of reckoning time by lunations? State how this difficulty was met in the Jewish mode of computation; and also how the commencement of the Jewish year was determined.

3. There are four movements in the heavens to which navigators have recourse in determining their longitude: what are these, and how have they been rendered available for the purpose?

4. Enumerate Newton's three laws of motion, his two laws of gravitation, and Kepler's three laws of the planetary motions.

5. Spain:—Give its ancient name; its area in square miles. Mention its northern and its southern provinces; and the period of its subjection to the Visigoths, and subsequently to the Moors.

Lesson Books.—1. Give a brief sketch of the life of Samuel. Who were his immediate successors as chief rulers in Israel, and for what reasons were they deprived of the supreme power?

2. "A beautiful prospect delights the soul as much as a demonstration; and a description in Homer has charmed more readers than a chapter of Aristotle." Who is the writer of this observation? Give the substance of his remarks on the eye.

3. What changes does the sap undergo in its passage through the leaves and bark, and what facts point to the conclusion that capillary attraction is not the sole cause of the rise of the sap in plants?

4. In what respects do shells differ from bones? Mention the component parts of each, and explain why shells are so little liable to decay.

5. Point out the most striking marks of design in the structure and uses of the spine and muscles of man.

History.—1. Enumerate some of the circumstances which led to the Peloponnesian war; name its duration, and the immediate consequences to the vanquished.

2. Marcus Aurelius—say by what second title he was known; name his colleague, and the principal events of his reign.

3. By what right did James the First ascend the throne of England? Name the sovereigns of his house, and an event in the reign of each.

4. Give a brief historical sketch of the Kingdom of Prussia.

Money Matters.—1. State the circumstances that are generally supposed to lead to a combination amongst workmen, and mention the laws which belong to all such combinations.

2. Show that the results of a successful strike may be more injurious even than those of an unsuccessful one to the parties engaged in it.

3. In what way do high profits affect the trade or manufacture in which they are realized, and what bearing, if any, have they on the wages of the labour employed therein?

Art of Reasoning.—1. (*a.*) Give examples of propositions whose *matter* is respectively "necessary," "contingent," "impossible," and "possible."

(*b.*) How may it be ascertained, from the matter of an *indefinite* proposition, whether it should be referred to the class of universal or particular propositions?

2. (*a.*) Indicate by letters the several conclusions that may legitimately be drawn in each of the four figures; and (*b.*) explain why E cannot be the conclusion of any syllogism in the third figure.

3. "In Mathematics the definitions are the principles from which our reasonings set out" Show that this is the case, by putting the demonstration (or a part of it), of any proposition in Geometry into Syllogistic form, and explain what part of the Syllogism is supplied by the definitions.

4. State the rule which is violated in the following apparent syllogism:—

> What exists in England exists in the world.
> Only one queen exists in England.
> Only one queen exists in the world.

Explain your answer fully.

Arithmetic.—1. (*a.*) To what will £256 10*s.* amount in seven years at 6 per cent. per annum compound interest?

(*b.*) State the method of working the above question by Logarithms.

2. Divide ·364 by ·8008, and ·364 by ·8008.

3. A person invests £5,000 in the 3 per cent. Consols, when stocks are at 90, what will this sum amount to in 15 years, supposing the half-yearly interest, as it becomes due, to be invested also at 3 per cent.?

4. Divide 5 by 19 in such a way that the answer shall appear in the form of *tenths.*

5. Insert two Geometric means between ·02 and 20.

Algebra.—1. State in *words* the four fundamental properties of Logarithms, represented by the following formulæ; and demonstrate each of them in general terms:—

$$(1.)\ \text{Log. } ab = \text{log. } a + \text{log. } b.$$

$$(2.)\ \text{Log. } \frac{a}{b} = \text{log. } a - \text{log. } b.$$

$$(3.)\ \text{Log. } a^n = n \text{ log. } a.$$

$$(4.)\ \text{Log. } a^{\frac{1}{n}} = \frac{1}{n} \text{ log. } a.$$

2. Find in the simplest terms the sum, and also the difference of the two imaginary quantities:—

$$(5+12\sqrt{-1})^{\frac{1}{3}} \text{ and } (5-12\sqrt{-1})^{\frac{1}{3}}$$

3 If a be the first, and x the last term, of a Geometrical progression, consisting of n terms, prove that the continued product of all the terms is equal to $(ax)^{\frac{n}{2}}$.

4. A merchant trading for three successive years gained 15 per cent. on his capital the first year, 20 per cent. the second year, and 25 per cent. the third. His entire gains amounted to £1,000 12*s.* 6*d.* With what capital did he commence?

Appendix I.

Questions proposed at the Examinations.

Male Teachers.

5. (*a.*) If in any quadratic equation, such as $x^2-ax+b=d+b$, the first member is a complete square, show in general terms that $b=\frac{1}{4}a^2$

(*b.*) Supposing the roots of the quadratic equation $x^2-ax+b=0$, to be represented by r_1 and r_2, express the given equation *in terms of these roots*, and explain the process.

(*c.*) In such an equation as the last, when the coefficient of the highest power of the unknown quantity is unity, show that $r_1+r_2=a$, and state the proposition generally.

Geometry and Mensuration.—1. Required the plan and area of a field from the following notes:—

	to ⊙ C 1020	
F 470	890	f
e	610	50 E
D 320	585	d
C 70	440	c
b	315	350 B
Begin	at ⊙ A	Go. E

2. The area of a triangle is equal to half the continued product of two of its sides and the sine of their contained angle.

3. A flag-staff, of a given height, is erected on a tower whose height is also given; at what point in the horizon will the flag-staff appear under the greatest possible angle?

4. If from the extremity of a diameter of a circle tangents be drawn, any other tangent to the circle terminated by them is so divided at its point of contact that the radius of the circle is a mean proportional between its segments.

5. Given the base, area, and the ratio of the sides to construct the triangle.

Natural Philosophy.—1. Prove that the times of descent down different inclined planes are as the lengths of those planes divided by the square roots of the heights, and explain the principle on which such rule depends.

2. A solid block of ice, in the form of a parallelopiped—its dimensions being, length, 50 feet, breadth, 20 feet, height, 10 feet—is found floating in the sea. To what depth is it emerged, the specific gravity of ice being ·930, and that of sea-water, 1·206?

3. How is the intense cold of freezing mixtures explained? Give an example of a most effective freezing mixture, containing neither ice nor snow.

4. Show that if two bodies oscillate in similar arcs, the times of their oscillations are as the square root of the lengths of the strings by which they hang.

5. Show that the following observation of Liebig is abundantly illustrated by the growth, development, and final decay of plants:—"All the innumerable products of vitality resume, after death, the original form from which they sprung. Thus the destruction of an existing generation becomes the means for the production of a new one, and death becomes the source of life."

Book-keeping.—1. Bought of John Brown, for cash, 15 pipes of wine at £66 10*s.* per pipe. What are the entries for this transaction in the Journal and Leger?

2. If one sells goods on commission, and is called upon to balance his account before all the goods are all sold, what course is he to pursue?

3. The ship A 1 arrives at Cork from London, consigned to the agency of B C, having to her credit, receivable from various parties in Cork, freight amounting to £500, on which B C, as agent, is allowed commission at 2½ per cent.

B C obtains for the ship A 1 freight outwards, amounting to £400, on all of which he is to be allowed commission at 5 per cent.; B C receives £50 of outward freight—the remaining £350 being receivable by the agent at the port of discharge.

What Journal entry is to be made:—

(*a.*) In reference to freight inwards.

(*b.*) In reference to commission inwards.

(*c.*) In reference to commission outwards.

4. In the same transaction—

(*a.*) What is the cash entry in reference to freight outwards?

(*b.*) What is the Leger balance of account for Ship A 1?

B.

Grammar.—1. Parse the words in italics:—

They live, and live without *extorted alms*
From grudging hands; but *other board have none*
To soothe their honest pride, *that scorns to beg;*
Nor comfort else but in their mutual love.

Refer to any peculiarity in the construction and to the rules in Syntax that are exemplified.

2. State the word from which each of the following words is derived, and specify the process of derivation exemplified:—*shuffle*, *satchel*, *crouch*, *haft*, *drench*.

3. State the rule in Orthography applicable to the terminations "*tion*," "*cial*," with the reason.

4. Define *metonymy*, and give examples of at least three varieties of the figure, with explanations.

5. State, with examples, the difference between a logical proposition and a grammatical sentence.

Geography.—1. Draw an outline map of the South Coast of England, marking all the counties that lie between the Bristol Channel and the mouth of the Thames.

2. Name the five physical regions into which North America naturally divides itself.

3. Define the following, with reference to the *celestial* globe: longitude, right-ascension. Which of these can be changed into time, and how?

4. State the principal towns of the following counties, giving your answer in a tabular form:—

Lanark,	Kildare,	Forfar,
Berks,	Somerset,	Essex.

5. Name the six rivers of France which may be regarded as basins for all the others, and at least two cities on each.

Lesson Books.—1. What important achievements marked the beginning of David's reign? In what way were the last years of his life employed?

2. What provision was made for the administration of justice under the Jewish polity?

3. How many kinds of microscopes are there? Explain the construction peculiar to each.

4. How is it established that the leaves of plants give out moisture, and may be regarded as organs of insensible perspiration?

5. What are essential oils? Enumerate their distinctive properties, and mention in what substances they are found in the highest perfection.

History.—1. Say into what four kingdoms the empire of Alexander the Great was divided after his death, naming the first sovereigns.

2. Describe the immediate results of the following battles, naming the century in which each was fought:—Cheronea, Issus, Zama, Pharsalia, and Lutzen.

3. Mention the remarkable events which connect the history of the Jews with the reign of Antiochus Epiphanes.

4. Name an event of English history connected with each of the following dates:—1172, 1215, 1603, 1649, and 1707.

Money Matters.—1. Enumerate some of the advantages—social, moral, and political—commerce conducted on true principles is calculated to render the countries that may be engaged in it.

2. Reconcile the two following propositions:—

(*a.*) "It is not the labour which any thing has cost that causes it to sell at a high price."

(*b.*) "It costs only as much in labour and other expenses to obtain about fifteen pounds of silver as one pound of gold, and this is the reason why one pound of gold will exchange for about fifteen pounds of silver."

3. Mention the conditions essential to the creation and preservation of wealth in a state; and show, that even in the hands of the most selfish persons, it will still be found an important agent in stimulating the industry, and thereby promoting the prosperity of the community.

Appendix I.

Questions proposed at the Examinations.

Male Teachers.

Art of Reasoning.—1. Name the defect to which each of the mental operations, Simple Apprehension, Judgment, and Reasoning, is subject; and state which of the three defects may be effectually guarded against by the rules of Logic. Explain why not the other two.

2. Define the term "proposition;" and state how propositions are divided (*a.*) according to *quantity*; (*b.*) according to *quality of expression*; (*c.*) according to *quality of matter*; (*d.*) according to *substance*; giving an example of each.

3. Show that a particular proposition may be deduced from a universal, by *two* methods.

4. (*a.*) From the following premises deduce the conclusion, and state the mode and figure of the Syllogism.

(*b.*) Explain how the Syllogism may be brought under the Dictum.

Every man is an animal.
Every animal has feeling.

Arithmetic.—1. Express the numbers 550 and 225 in the *Quinary* scale of notation, and multiply them together in this scale.

2. In what circumstances can a number ending in 5 be a perfect square? Prove your answer.

3. What sum of money at $3\frac{1}{2}$ per cent. per annum will clear £38 10*s.* in 15 months?

4. How much tea at 2*s.* 3*d.* and 3*s.* 6*d.* per pound must be taken or mixed with 365 lbs. at 4*s.* 6*d.*, that the whole may be worth 3*s.* 9*d.* per pound?

5. Reduce the following expression—

$$\frac{0{\cdot}68 \times {\cdot}0056}{{\cdot}00008}$$

Algebra.—1. As exercises in Algebraic notation—

(*a.*) Express, without using the radical sign, the cube root of the square of the sum of a and b.

(*b.*) Express, in the form of an integral product, the fractional quantity $\frac{a+b}{c-d}$

(*c.*) Calculate the value of x in the following expression in which $a=5$, $b=4$, and $c=3$:

$$x=3(c^4-b^2+a-b)-4\sqrt{a^3-(b^2+9)}.$$

2. Divide, by the method of detached co-efficients, a^5+2a^4 by a^2+2.

3. Prove, in general terms, that *any* quantity is divided by another by multiplying the dividend by the reciprocal of the divisor.

4. If x, y, z represent three unequal quantities, prove that their continued product is greater than—$(x+y-z)\times(x+z-y)\times(y+z-x)$.

5. Find the value of x in the following simple equation:—

$$(x+b)^{\frac{1}{2}}+(x-b)^{\frac{1}{2}}=\frac{a}{(x+b)^{\frac{1}{2}}}.$$

Natural Philosophy.—1. A stone is dropped into a well; after three seconds it is heard to strike the water. What is the depth of the well, the velocity of sound being about 1,127 feet per second?

2. Explain why it is that vehicles having *high* wheels are readily drawn over obstacles arising from slight hollows or prominences on the roads.

3. In a straight lever of the first order, the power and weight are respectively 26·2 lbs. and 125·4 lbs., and the length of the lever itself 42 inches; required the position of the fulcrum.

4. State the method of finding the specific gravity of a fluid and of an æriform body, by the specific gravity bottle.

5. The interval between the threads of a screw are 0·15 inches, and the radius of the circle described by the power 11·2 feet: find what resistance a power of 100 lbs. will sustain.

Geometry and Mensuration.—1. Required the solid content of a pentagonal frustum, its height being 5 feet, each side of the base 18 inches, and each side of the top or less end 6 inches.

Explain the principle of the rule by which it is found.

2. From the following notes plan and find the content of a field: —

Perpendicular on left.	Base or Station line.	Perpendicular on right.
	to · C	
	3250	
	2504	
B 1278	1072	1046 D
Begins	at · A	and range W.

3. Draw a straight line parallel to the base of an isosceles triangle, which shall be terminated in the sides, or the sides produced and equal to either of them.

4. If from the middle point of one of the sides of a right-angled triangle, a perpendicular be drawn to the hypotenuse, the difference between the squares of the segments into which the latter is divided is equal to the square of the other side.

5. If from the three angles of a triangle lines be drawn to the points of bisection of the opposite sides, the squares of the distances between the angles and the common intersection are together one-third of the squares of the sides.

Book-keeping.—1. On the 1st January I have on hands—

Cash, ... £650
Wine, 58 pipes at £80 per pipe, . £4,000 } £4,650.

On the 1st July I took stock and found on hands—

Cash, ... £1,500
Wine, 30 pipes at £80, . . £2,400
„ 10 „ at £70, . . £700 } £4,600.

Give the leger entries for these transactions.

2. Describe the method you would adopt in closing the stock account of the books of a company.

3. When I get bills in my possession discounted, how are bills receivable credited?

4. Remitted Latouche & Co. John Brady's draft on Paget and Bainbridge for . . . £210 0 0
Discount ½ per cent. received, 1 1 0—208 19 0
Give the journal and leger entries for this transaction.

C.

Grammar.—1. Parse the following, and specify all the rules in Syntax that are exemplified in the passage:—

"You and your son are better able to carry the poor beast than he you."

2. State the meaning of each of the following affixes, with examples:—*some*, *ism*, *ee*, *acy*.

3. State, with examples, under what circumstances two nominatives coupled by *and* may take a verb singular.

4. What verbs take the same case both before and after them? State the reason.

5. Give the derivations of the following words:—*loiter*, *tantalize*, *garner*, *deed*.

Geography.—1. Draw a map of any one of the following counties, and mark, as accurately as you can, the position of the counties by which it is surrounded, giving the names:—Cavan, Roscommon, Kildare, Tipperary.

2. Explain how it is that a degree of latitude is longer in one place than in another.

3. Specify the six provinces into which Portugal is divided, with a chief town of each.

4. What appearance to a person at the North Pole would the sun present—
(1.) When on the Tropic of Cancer.
(2.) When passing from the Tropic to the Equator.
(3.) When on the Equator.

5. Why did the inhabitants of Judea look upon those of Galilee and Samaria as inferior to themselves? Mention a town of importance in each of these provinces.

Appendix I.

Questions proposed at the Examinations.

Male Teachers.

Lesson Books.—1. Under what circumstances, and at what period of David's life, were many of his beautiful psalms composed?

2. Give the precise meaning of the term *zoöphytes*. In what respects do they resemble plants, and how do they differ from them?

3. What is the surest indication of wet weather? Why regarded as such by naturalists?

4. From what sources is salt chiefly obtained? Mention some of its most useful applications in the arts, and state the supposed yearly average consumption of salt by the inhabitants of the British Islands.

5. Enumerate the poetical pieces in Third Book best suited to impress on a child's mind the value of time. Write down the first six lines of any one of them.

Money Matters.—1. Explain the order in which the "Lessons on Money Matters" should be learnt, and give the reasons for recommending this method.

2. Define the terms *wealth*, *money*, *coin*, *value*, as far as the meaning of each may be inferred from these "lessons."

3. Name the three elements that constitute value, and mention the surest test to ascertain whether any article possesses these or not.

Arithmetic.—1. What principal being put to interest will amount to £354 4*s.* 5*d.* in 7 years, at 3½ per cent. per annum?

2. A person has $\frac{2}{9}$ of a cargo, worth £900, and he wishes to sell $\frac{3}{5}$ of his share; what is it worth?

3. Divide ·4368 by ·0078.

4. If I have owing to me £1,000, and compound with my debtor at 12*s.* 6*d.* per pound, how much must I receive?

5. Find the interest of £365 15*s.* 6*d.* for 7 days, at 7 per cent., by the shortest method, and account for the process.

Mensuration.—1. What is the area of a trapezium—the south side being 27·40 chains; the east side, 35·75; the north side, 37·55; and the west side, 41·05 chains—the diagonal from south to north-east being 48·35 chains?

2. The breadths of an irregular figure at five equi-distant places being 8·2, 7·4, 9·2, 10·2, 8·6, and the whole length 39 feet; required the area.

3. The length of a room being 20 feet; its breadth 14 feet 6 inches, and its height 10 feet 4 inches; how many square yards of painting are in it, deducting fire-place of 4 feet by 4 feet 4 inches, and two windows, each 6 feet by 3 feet 2 inches?

4. The parallel chords of a circular zone are each 2½ feet, and the radius of the circle 1¾ feet; required the area.

Book-keeping.—1. Describe the method of tracing transactions from one book to another, with a tabular example.

2. Why is the cash account, although a real account, closed by a simple balance?

3. When goods are sent to sea for my factor's account, which were formerly entered in my books, what entries are to be made?

Female Teachers.

No. 2.—Female Teachers.

A[1].

Grammar.—1. Punctuate the following, and parse the words in *italics*:—

His praise ye winds that from four quarters *blow*
Breathe soft or loud and wave your tops ye pines
With every plant in sign of worship *wave*
Fountains and ye that warble as ye flow
Melodious murmurs warbling tune his praise

2. When adjectives are used to modify each other, how should they be parsed? Give examples.

3. State, with examples, the several ways in which a noun in the nominative case may appear in a sentence.

4. What are the different parts of speech under which the words *much*, *more*, *most*, may be classed?

5. Give the derivations of the following words, and trace the connexion in the meaning in each case between the word and its root:—*tantalize*, *quagmire*, *philippic*, *shuffle*, *wander*.

Geography.—1. Name the colonies which Australia comprises, and give a brief account of the climate, produce, and government of each.

2. Show, by examples, that the distribution of animals is modified according to longitude as well as latitude.

3. What evidence is there to prove the existence of a line of country between the Atlantic and the Pacific Oceans—no part of which is more than 134 feet above the level of the sea?

4. Explain the different causes that tend to produce the irregularities in the *trade* winds.

5. How is it shown that if the earth were where Mercury is the sun would appear about seven times as large as he does now?

Lesson Books.—1. By what miracle were the Levites confirmed in the office of the priesthood? By whom were their rights unjustly assumed, and in what way was this sinful usurpation of the sacred office punished?

2. How are the roots of plants classified by botanists? Illustrate your answer by a few examples.

3. In what seas is the pearl oyster found? Describe the means employed to take it, and explain in what way the pearl is formed.

4. Mention the five principal shades of colour in the human species. To what are those varieties of colour attributable?

5. Name the first and the last of the sovereigns of the House of Stuart. Mention the last two important events that took place during their reigns.

Arithmetic.—1. (*a*) Name the first three orders of units that *decrease* in a tenfold ratio from the unit of comparison. (*b*) By what name are such units, and all numbers formed by the continual addition of each of them, distinguished from those that *increase* in a tenfold ratio from the same point?

2. A merchant, having lost one-third of his capital by the failure of a speculation, has £250 remaining. Find, by *simple proportion*, what was the entire amount of his capital. Explain what each of the three terms in the statement represents.

3. The product of a fraction by an integer may be obtained in *two* ways. State them, and explain, as you would to a class, the reason of each method.

4. A sum of money was put to interest on the 1st January, at $4\frac{3}{4}$ per cent., and on the 1st October following the interest due amounted to £8 10*s*. What was the principal?

5. Explain the terms tare, tret, cloff, gross weight, net weight; and calculate the price of 5 cwt. 2 qrs. 15 lbs., at 17*s*. 6*d*. per cwt., allowing 11 lbs. tare, and the tret being 4 lbs. in every 104 lbs.

A².

Grammar.—

Folly such as yours,
Graced with a sword, and *worthier* of a fan,
Has made—*what enemies* could ne'er have done—
Our arch of empire, *steadfast but* for you,
A mutilated structure, soon *to fall.*

1. Parse the words in *italics*, and write out a paraphrase of the passage.

2. State instances in which the *adjective* form instead of the *adverbial* should be used, while the connexion of the words appears to require the latter.

3. Give examples of *synecdoche*, and state to what other figure this is closely allied.

4. State the six variations of tense as given by Murray, and define the "*Second Future.*"

5. The following may be considered as words of unsettled orthography; state which mode of spelling should be adopted, with the reason in each case:—

Bell-man,	Bowlder,	Edile,	Jelly,
Bel-man,	Boulder,	Edile,	Gelly.

Geography.—1. Fix the positions of the following cities, and give a brief description of each of them:—Adelaide, Nice, Lubeck, and Vera Cruz.

2. Show that the distribution of plants over the surface of the globe is modified by various combinations of climate, soil, longitude, and moisture.

Appendix I.

Questions proposed at the Examinations.

Female Teachers.

3. How may the absence of trees to the west of the Andes be accounted for?

4. Water is said to possess the widest sphere of activity in contributing to the "changes in the surface of the earth." Explain how these changes are produced, and give any instances you may know to prove the truth of your statement.

5. The inhabitants of half the moon would never see the earth, and would therefore be in darkness for the half of every month. Explain this.

Lesson Books.—1. On which side of the Jordan, and for what reason, were the tribes of Reuben and Gad, and half the tribe of Manasseh desirous to settle? Subject to what condition was this privilege conceded by Moses?

2. How are shells classified by naturalists? Give examples of each class.

3. In what way is rice cultivated by the Chinese? What are the peculiar properties of this grain, which render it an article of food well suited for the inhabitants of warm countries?

4. Mention some of the most remarkable artificial changes effected in the shape of the head by Asiatic and African nations.

5. Name the writer of the following lines, and explain, as you would *to a class*, the meaning of the entire passage:—

"North and west receding far
From the evening's downward star;
Now I mount Aurora's car—
Pale Siberia's deserts shun,
From Kamschatka's headlands run,
South and east to meet the sun."

Arithmetic.—1. What is the ratio of increase in the value (I.) of successive orders of units in the *same* period; (II.) of the corresponding units of successive periods (*a*.) in the French method of notation, and (*b*.) in the English?

2. A certain workmistress can make half a dozen of shirts in six days; another can make the same in three days. Find, *by simple proportion*, in what time the two, working together, could make the shirts. Explain what each of the three terms in the statement represents.

3. The quotient of a fraction by an integer may be obtained in two ways. State them, and explain, as you would to a class, the reason of each method.

4. What principal, put to interest at 5 per cent. per annum, on the 1st January, 1860, will amount to £1,021 5*s*. on the 1st July, 1861?

5. If, by selling cloth at 15*s*. per *yard*, I gain 10 per cent., how much per cent. shall I gain or lose by selling it at 17*s*. 6*d*. per *French ell*?

A[3].

Grammar.—

"In one diffusive band
They drive the troubled flocks, by many a dog
Compell'd, to where the mazy, running brook
Forms a deep pool: *this bank abrupt and high*,
And *that far-spreading* in a pebbled shore.
Urged to the giddy brink, much is the toil,
The clamour much, of men, and boys, and dogs,
Ere the soft, fearful people to the flood
Commit their woolly sides."

1. Parse the words in *italics*, and write out in a column all the words of Latin origin.

2. What words in the above passage can you trace to roots from other languages, or to primitive words in English? Explain the process of derivation in each case, and refer to any peculiarity of meaning that you may observe.

3. In *complex* sentences the subordinate clauses may be of three kinds. State what these are, and why they have been so designated.

4. Whence arises the necessity for making additions, from time to time, to the stock of words in any language?

5. State the rule for the proper use of *shall* and *will*, and give at least three examples of incorrect phraseology in the use of these auxiliaries.

Geography.—1. Describe the positions of the following places, and mention their chief towns:—La Plata, Paraguay, Guatemala, Styria, The Deccan, Mozambique.

Appendix I.

Questions proposed at the Examinations.

Female Teachers.

2. How is it shown that the distribution of animals is regulated in a great measure by climate, arising from latitude or from elevation above the level of the sea?

3. Give the different names by which the plains in South America are distinguished, with a short description of them respectively.

4. How do you account for the prevalence of calms to a certain distance at each side of the equator?

5. From what has it been inferred that the progress of light is progressive, and not instantaneous?

Lesson Books.—1. What remarkable arrangement, in reference to the possession of land, existed in many parts of Canaan, while Abraham and Isaac dwelt there? Show that such an arrangement is inconsistent with an advanced state of civilization.

2. What is said by Sir H. Davy of the old proverb—

> "A rainbow in the morning is the shepherd's warning;
> A rainbow at night is the shepherd's delight."

3. In what respect does bone differ from cartilage? Enumerate the three classes of cartilaginous fishes.

4. Enumerate the several steps in the manufacture of sugar. To what useful purpose are the leaves and tops of the sugar-cane applied?

5. Mention three distinct classes of endogenous plants.

Arithmetic.—1. Of the two geometrical ratios, 7 : 3 and 11 : 5, which is the greater? Give the exact difference of their values.

2. One pound *Troy* of standard silver being coined into sixty-six shillings, what is the weight *Avoirdupois* of £145 17*s.* 6*d.* in silver?

3. Divide $\frac{3}{4}$ by $\frac{4}{5}$ of $\frac{5}{9}$, and divide the quotient by 128.

4. A sum of £850 is put to interest on the 1st January, 1860, at 3½ per cent. per annum; at what date will the interest amount to £39 13*s.* 4*d.*?

5. If thirteen persons spend £64 in eight months on butchers' meat, at 6*d.* per lb., how much money, at the same rate of consumption, should twelve of them spend in nine months, when meat is 6½*d.* per lb.?

A⁴.

Grammar.—1.

> Thou sure and *firm-set earth*,
> *Hear* not my steps, *which way* they *walk*, for fear
> Thy *very* stones prate of my *whereabouts*.

Parse the words in *italics*, and name the figures of speech in the passage.

2. Write down six dissyllabic Latin prefixes, and explain their meaning by examples of their use in composition.

3. Conjugate fully through all persons and numbers the present, the past, and the perfect tenses of the intransitive verbs, *lie* (to rest), and *lie* (to speak falsely), and name the past tense of the transitive verb *lay*.

4. Write down the four personal pronouns of the second person, and the possessive adjective pronouns allied to them.

5. Explain, with examples, the several meanings or applications of the word *sound*.

Geography.—1. Describe the positions of the following towns, and mention anything interesting you may know regarding them:—Pittsburg, Mobile, Konigsberg, Rangoon, and Amoy.

2. Explain how Noah's prophecy respecting the distribution of his posterity over the earth affords a key to the tracing of the different races of which the great human family is composed.

3. Describe the position, physical features, and government of Araucania; and mention the circumstance that signalizes the inhabitants amongst the native tribes in South America.

4. How do you account for the prevalence of southerly and south-westerly winds along the coast of Africa, from Sierra Leone to the equator? On what other coast is there a constant breeze from the south-west?

5. Name the parallels of latitude that mark the first and the second climates, and explain why the old subdivision of the earth's surface into climates has been abandoned.

Appendix I.

Questions proposed at the Examinations.

Female Teachers.

Lesson Books.—1. What special obligation, in addition to the celebration of the Passover, was imposed by God on the Israelites for his mercy in saving their first-born, when he inflicted the tenth plague on the Egyptians?

2. Through what portion of the stem does the sap rise? By what experiment has this been determined?

3. What does the class amphibia include? What peculiarity of structure enables animals of that species to live either on land or water?

4. Illustrate the necessity of strict attention to the lesser duties of behaviour in every walk of life, and explain in what true politeness consists.

5. Mention *all* the properties of gold which render it the best medium of exchange among commercial nations.

Arithmetic.—1. State the rule according to which numerical characters are *combined* in the Roman notation, giving examples.

2. The rent of a farm of 98 acres 3 roods 21 perches *Irish* measure, being £150, find the rent per *English* acre.

3. Divide 671·3 by ·547, and give the rule.

4. A sum of £750 was put to interest on the 1st May, 1858, and on the 1st January, 1860, it amounted to £812 10*s*. What was the *rate?*

5. If two merchants, trading in partnership, gain £175, how should this sum be divided between them, the capital of the one being £320, and of the other £280?

B[1].

Grammar.—1. Parse the following:—

"Happy thou art:
For what thou hast not, still thou striv'st to get,
And what thou hast, forget'st."

2. Give three examples of the syllable "*en*," used both as a prefix and an affix in the same word.

3. When should the relative *which* be used to represent persons?

4. What are the variations to express number and person, of which the English verb admits? In other cases how are these known?

5. State from what words the following are derived, and show how the meaning of the original word is modified or preserved in the derivative:—*loiter*, *garner*, *grenadier*, *palmer*, *grotesque*, *niggard*.

Geography.—1. Switzerland: give its length and breadth in miles; its area in square miles, and its population.

2. Mention the principal group of the Polynesia, naming their positions with reference to the equator.

3. Upon what principle was the old subdivision of the earth's surface into climates made to depend? What new arrangement has superseded this subdivision?

4. Affix the proper geographical term to each of the following names, and refer each to the country to which it belongs:—*Salisbury*, *Cupar*, *Corinth*, *Ticino*, *Otranto*, and *Vermont*.

5. Describe the Ionian Islands—their extent, population, inhabitants exports, and form of government.

Lesson Books.—1. Who succeeded Moses as leader of the Israelites, and by what miracles was his call to that high office attested?

2. Mention the name of the lesson and the book, from which the following lines are taken, and explain the entire passage:—

"There may we tread on depths of ice,
That the hairy mammoth hide,
Perfect, as when in times of old,
The mighty creature died."

3. Show that inequality of condition naturally arises in every society where property is secure.

4. What facts are referred to by naturalists to show that voracity and cruelty are not characteristic of the fish tribe?

5. "*There is a wide difference between reason and instinct.*" Write an explanation of this extract as nearly as you can in the terms of the lesson from which it is taken.

Appendix I.

Questions proposed at the Examinations.

Female Teachers.

Arithmetic.—1. Find the precise difference between seven billions nine thousand one hundred and twelve, according to the *French* method of notation, and the number similarly expressed in the *English* notation.

2. (*a.*) Define the term "ratio." (*b.*) How many kinds of ratio are there? (*c.*) What are the terms of a ratio called?

3. What principal, at 5 per cent. per annum, will bring £125 in three years?

4. Calculate the expense of carpeting a room, sixteen feet long, and fifteen feet broad, with carpet two and a-half feet wide, at 2*s.* 11*d.* per yard.

5. The wholesale price of an article is 7*s.* 6*d.* The expense of carriage, &c., is equal to 6 per cent. more. What must the selling price be, so as to gain 15 per cent.?

B².

Grammar.—

"To teach the canvas innocent deceit,
Or lay the landscape on the snowy sheet—
These, these are arts pursued without a crime,
That leave no stain upon the wing of time."

1. Parse the first and third lines of the above passage; and state what figures of speech are exemplified in it.

2. What is the French form of the affix *ish* adopted in English? Give examples.

3. Form sentences, each having a subject, predicate, object, and adjunct, in which the following words occur:—*The school, state, satisfactory, business,* and *promotion.*

4. State how the following forms of conjugating a verb are obtained:—

1. Progressive form.
2. Passive form.
3. Emphatic form.

5. Give the root of the following words, and append in each case others belonging to the same *family*:—*symmetry, insipid, dissuade, assault.*

Geography.—1. Greece: state its length and breadth; its area in square miles, and its population.

2. Arrange the following names in a table according to their geographical denominations, stating the country to which each belongs:—Cairngorm, Ushant, Abo, Catalonia, Trebizond, and Sennaar.

3. Mention a few facts connected with the incursions of the Turks into Europe, and their repulses.

4. What is the position of the earth with reference to the sun, when our antipodes have their summer?

5. Mention some of the mountains of Palestine, with the most remarkable circumstances connected with each.

Lesson Books.—1. Name the place where the Israelites celebrated the passover for the *first* time in the Land of Promise, and state any remarkable circumstance associated with the event.

2. Describe the country lying between Jerusalem and the Dead Sea.

3. It is said if you were to melt down several shillings into a lump of silver, you would get from the silversmith very nearly as much for it as for the shillings themselves. Why is the limitation *very nearly* introduced?

4. What means are employed by the Swiss to procure a supply of water in those parts of their valleys in which there are no streams?

5. In bulbous plants what strictly speaking is the bulb? Where is the true root situated?

Arithmetic.—1. If a piece of cloth be bought for £22 10*s.*, and sold for £17 10*s.*, what is the loss per cent.?

2. Divide 27 yards, 3 quarters, and 1 nail of silk among six persons, and make up the price of each one's share at 3*s.* 8*d.* per yard.

3. Find the least common multiple of 63, 12, 84, 7.

4. Reduce 28lbs. 5 oz. avoirdupois weight to an equivalent in Troy weight.

5. A grocer mixes two qualities of tea, viz.:—at 3*s.* and 4*s.* per lb., in the proportion of 4 lbs. of the former to 7 lbs. of the latter. What will he gain per cent. by selling the mixture at 3*s.* 9*d.* per lb.?

Appendix I.

Questions proposed at the Examinations.

Female Teachers.

B³.

Grammar.—

Go! *let the diving negro seek*
For gems hid in some forlorn creek;
We *all pearls* scorn,
Save what the dewy morn
Congeals upon each little spire of grass,
Which careless shepherds *beat down as they pass.*

1. Parse the words in *italics*.
2. State *four* affixes that denote "*to make*," with examples.
3. State the principal *adjuncts* by which a sentence may be enlarged, and say how they may be arranged under their respective heads.
4. What auxiliaries are used only before the infinitives of verbs, and what are used before the participles?
5. From what roots are the following words derived:—procrastinate, comprehension, promiscuous, implicate? State the *precise* meaning of each word as well as the meaning of its root.

Geography.—1. What are the three modes of sustenance, to some or all of which men would, in a savage state, betake themselves?
2. State the political divisions of South America, naming the chief town of each.
3. Describe the position of the earth's axis, with respect to the sun, at the solstices and at the equinoxes.
4. Name the counties of Wales and of Scotland which consist of islands, and state their chief towns.
5. Which are the most mountainous counties of Ireland, and the chief elevations in each?

Lesson Books.—1. Give the ancient and modern name of the lake on the borders of which the nations, under the command of Hazor, king of Jabin, were defeated by the Israelites.
2. Describe the country inhabited by the Druses, and give a brief sketch of their dress, customs, and mode of living.
3. In what county of England are the people chiefly employed in working the copper and lead mines?
4. How should a child's birth-day be celebrated, and what considerations should be set before his mind on such an occasion?
5. Mention some classes of insects that undergo but *two* changes.

Arithmetic.—1. If a stone of sugar be bought for 6*s*. 8*d*., and sold for 7*s*. 10*d*., what is the gain per cwt.?
2. If the $\frac{1}{5}$ and $\frac{1}{9}$ of a piece of cloth come to £1 5*s*., what is the price of the whole?
3. Add $\frac{3}{5}$, $\frac{2}{10}$, and $\frac{5}{12}$, and divide the sum by 12.
4. At 30*s*. per *Irish* acre, what is the rent of 15 acres 3 roods *English* measure?
5. If five acres suffice for the grazing of twenty oxen for one week, how much pasture of the same quality will maintain thirteen oxen for thirty-five days?

B⁴.

Grammar.—

1. The bell strikes *one*. We take *no note* of time.
But from its loss: to give *it* then a tongue
Is wise in man. As if an angel *spoke*,
I feel the solemn sound. If *heard aright*,
It is the *knell* of my departed hours.
Where are they? With the years *beyond* the flood.

Explain, as you would to the children of your school, the preceding lines, and parse the words in *italics*.
2. Show by examples that conjunctions do not always connect the same tenses of verbs.
3. "Etymology treats of the derivation, classification, and inflection of words." How do you explain to children the meaning of the terms, *derivation*, *classification*, *inflection*?

4. Exemplify in three short sentences the several meanings of the word *Hind.* Also of the word *Corn.*

5. Explain on what ground we may regard the infinitive mood as a verbal noun or verb substantived.

Questions proposed at the Examinations.

Geography.—1. Point out the situation of each of the following straits:—Messina, Ormus, Torres, Sunda, Cook's, The Sound, Malacca, and Menai.

Female Teachers.

2. Extreme uncertainty is often expressed by the maxim, "*At the mercy of every wind that blows;*" state where this does not apply, and the reason.

3. Show why the latitude alone of a place is not sufficient to mark its position on the earth. Are there any places for which it would suffice?

4. Give the substance of what is said in the Fourth Lesson Book on Italy.

5. Name two of the principal cities in each of the following countries:—*Norway*, *Bavaria*, *Piedmont*, *Rhenish Prussia*, and *Wurtemberg*. Give your answer in a tabular form.

Lesson Books.—1. Write down as accurately as possible the words of encouragement spoken by Moses to the Israelites hemmed in by Pharaoh's army.

2. In what various respects may the sea be regarded as an emblem of the world, and of what passes therein?

3. Name the writer of the following lines, and give as you would to a class, a full explanation of the words printed in italics:—

> The *shapely* limb and *lubricated* joint,
> *Within the small dimensions of a point*,
> Muscle and nerve miraculously spun,
> His mighty work, who speaks and it is done.
> The *Invisible*, in things *scarce seen* revealed,
> *To whom an atom is an ample field.*

4. For what purposes are lime and charcoal employed in the manufacture of iron?

5. Describe the western coast of Ceylon. What is the interior of the island called, and why is it so unhealthy to Europeans?

Arithmetic.—1. If a cwt. of sugar be bought for £2 16*s.*, at what price must it be sold in order to gain 5½ per cent.?

2. What sum put to interest at 4½ per cent. per annum will give £13 in seven months?

3. Find the greatest common measure of 28, 84, and 140.

4. If twelve men dig a trench 130 yards long in six days, working twelve hours each day, in what time will sixteen men, working eight hours each day, dig a trench 140 yards long?

5. Find by the shortest method the rent of a farm of 175 acres, 3 roods, 27 perches, at £2 17*s.* 6*d.* per acre.

C[l].

Grammar.—1. Parse the following—

> The father, upon this rebuke, made his son dismount, and got up himself.

2. Decline the following:—*I*, *who*, *attorney*.

3. In cases when the form of the verb is not changed to express number and person, how are these determined?

4. The following nouns have double plurals, with different shades of meaning; specify them and state the meaning in each case: *brother*, *genius*, *pea*, *penny*.

5. Give the derivations of the following words, and specify the process of derivation exemplified: *shovel*, *straddle*, *ramble*, *niche*, *thimble*, *girth*.

Geography.—1. Name the three principal Duchies in the German Confederation, with the capitals of each.

2. Name the parallels of latitude between which Europe lies.

3. Refer the following places to the countries to which they belong:—St. Malo, Coimbra, Leipsic, and Upsal.

4. To what circumstances is the excess of humidity in the climate of Ireland attributed?

5. Name a town or city on each of the following rivers:—Suir, Foyle, Bann, Derg, and Ovoca.

Appendix I.

Questions proposed at the Examinations.

Female Teachers.

Lesson Books.—1. State the nature of the promise exacted by Joseph, shortly before his death, from the children of Israel. Why did the patriarch exact the promise referred to?

2. Describe the persons, habits, and dress of the Hindoos, and name their principal manufactures.

3. Mention *all* the qualities of the camel which render him so well adapted for crossing vast sandy wastes.

4. What are the most important combinations of lead and tin with other metals?

5. Explain as you would to a class the words in *italics* in the following passage, taken from the lines on a Laplander:—

Where *tapering* grows the *gloomy* fir,
And the *stunted* juniper;
Where the wild *hare* and the *crow*
Whiten in surrounding snow;
And *tardy* suns to deserts drear
Give *days* and *nights* of *half a year*.

Arithmetic.—1. (*a.*) Define addition, and state on what principle the rule for performing it depends. (*b.*) Explain the two common methods of proving the correctness of the answer in a sum of addition.

2. Multiply 75082 by 999 according to the contracted method, and explain the reason.

3. Divide 760854 by the factors of 168, viz.:—8, 7, 3, and explain how the true remainder may be obtained.

4. Find the rent of a farm containing 275 acres, 2 roods, 24 perches, at £1 18*s.* 10*d.* per acre.

5. Write out *neatly*, in the form of a shop bill, the following items, and calculate the amount:—Mr. Jones bought of Bewley & Co., 19¾ lbs. of tea, at 3*s.* 10*d.* per lb.; 4½ stones of sugar at 5¾*d.* per lb.; ½ cwt. of salt, at 3*s.* 7½*d.* per stone.

C².

Grammar.—1. Parse the words in italics:—

Some seeds are furnished with *down* feathers, *by which they are blown about* over the earth, and *supply food far and wide for birds.*

2. State the precise meaning of each of the following verbs, and write out in regular form the present tense, the past tense, and the perfect participle of each: *fly, flee, flow.*

3. Give examples of adjectives of two syllables, compared as monosyllables, and state the best guide in such cases.

4. What are the proper diphthongs in English?

5. Give the derivations of the following, and state the process by which the derivative is formed in each case: *fulsome, broth, collier, dawn, starch, hilt.*

Geography.—1. Name the islands of the Mediterranean, with the country to which each belongs.

2. Give such an explanation of the adoption of the pictures of *two* hemispheres (on the Map of the World) as would be understood by a class reading the "Sequel."

3. State the substance of the account given of Holland in the Fourth Lesson Book.

4. Describe the situations of the following places:—Circassia, Lower Canada, Tyrol, The Punjaub, Cape Colony, Japan, and Guiana.

5. Name the seas of Asia, with the chief gulfs of each.

Lesson Books.—1. For what double purposes was the Ceremonial Law established among the people of Israel?

2. Describe the Date Palm, and mention the several ways in which its fruit is used by the Arabs.

3. In what respects do plants differ from minerals?

4. Give a brief sketch of the personal appearance and modes of life of the Caffres and Hottentots.

5. Explain, as you would to a class, the following passages, and give the name of the lesson with the number of the book from which they are taken:—

"They had likewise a method of preparing a grass-like plant steeped in water, with the addition of a bitter herb, and then set to work or ferment."

"But," said Jack, "we don't burn stones, or eat grease and powdered seeds, or wear skins and caterpillars' webs, or play with tigers."

Arithmetic.—1. "Every number, except unity, is an assemblage of units." How would you show to a class that this definition is applicable to fractions as well as to whole numbers?

2. Divide 75082 by 125 according to the abbreviated method, and explain the reason of the process.

3. Divide £90876 12*s.* 6*d.* by $7\frac{1}{8}$ (according to the rule given for case III., of compound division in First Book of Arithmetic.)

4. The moon revolves round the earth in 27 days, 7 hours, 43 minutes, 11 seconds. Through how much of her orbit does she move in 7 days?

5. Write out *neatly*, in the form of a shop bill, the following items, and calculate the amount:—Mr. Murphy bought of John Green $17\frac{1}{2}$ yards of cloth, at 14*s.* 8*d.* per yard; $18\frac{3}{4}$ yards of silk at 4*s.* 10*d.* per yard; $27\frac{1}{4}$ yards of calico, at $7\frac{3}{4}d.$ per yard.

C[3].

Grammar.—1. Parse the following:—

There is no harm in people's desiring to be well dressed, according to their station in life.

2. Give the three principal parts of the following verbs, and state the irregularity in each case: *sweep*, *hurt*, *knit*, *dare*.

3. Write out in order the plural numbers with the cases of each of the personal pronouns.

4. What is meant by the progressive form of conjugation? What verbs do not admit of this?

5. What is the meaning of the following prefixes? Give an example in each case: *ad*, *apo*, *ante*, *intro*, *retro*, *hypo*.

Geography.—1. On maps where the meridians rapidly converge, what cautions must be observed in *estimating* the longitude of places between the meridians, and why?

2. Describe the position of each of the following seas and gulfs: Marmora, Carpentaria, Frith of Forth, Lough Swilly, Arabian, Yellow, and Baffin's.

3. In what way would you avail yourself of mountains in the vicinity of your school, in order to illustrate and explain the snow-line, and the varieties in its height?

4. Name the maritime countries in Europe, beginning at the Sea of Azov, and going round westward.

5. Draw an outline of the county in which you reside, marking in the names of the adjoining counties and their chief towns.

Lesson Books.—1. Why were Moses and Aaron excluded from entering the land of Canaan?

2. What vegetable substance is used for clothing by the people of the Society Islands? Describe the process by which it is converted into articles of dress.

3. Give the double moral deducible from the fable, "*The Fox and the Goat.*"

4. Name the subject of the lesson, and the number of the book from which the following lines are taken. Explain *fully* the words printed in italics:

No more shall *worms* with me *compare;*
This is the *raiment* angels wear;
The Son of God, when here below,
Put on this *blest apparel* too.

5. Give the names of the two most important towns of Syria in the time of the Apostles. In which of them were the disciples first styled Christians?

Arithmetic.—1. Explain, as you would to a class, the following different classifications of numbers:—*a.* Odd and even numbers; *b.* Abstract and applicate numbers.

2. Multiply 75,082 by 75 according to the abbreviated method, and explain the reason of the process.

Appendix I.

Questions proposed at the Examinations.

Female Teachers.

3. How much should a person save per week on the average in order to save £16 within a year?

4. Find the price of 103 cwt. 0 qrs. 27 lbs. at £5 14*s.* 10*d.* per cwt.

5. Write out *neatly*, and in the form a shop bill, the following items, and calculate the amount:—Mrs. Thomas bought of Samuel Williams 36 yards of linen, at 2*s.* 3*d.* per yard; 24½ yards of cashmere, at 5*s.* 3*d.* per yard; 14 gross of buttons, at 4½*d.* per dozen.

C⁴.

Grammar.—1. Correct the following passage, and parse it:—

Into these common places look,
Which from great authors I have took.

2. How many persons has the imperative mood, and why?

3. Give examples wherein the infinitive mood is governed by nouns or by adjectives.

4. Give the sense of the following words, and, connected with each, write down and explain all words that may occur to you the same respectively in sound with them: *rain*, *raise*, *sent*, *seen*, *tray*, *vale*.

5. Write out the conjugation of the verb to *drink*, indicative mood, past and second future tenses.

Geography.—1. Give tracings of the rivers Boyne and Slaney, marking the towns on each, and the counties through which each passes.

2. How would you illustrate for children reading the "*Sequel*," the cause of day and night? What technical terms would you need to use and explain?

3. Describe the situations of the following places:—Zealand, New Zealand, York, New York, Orleans, New Orleans, Scotland, Nova Scotia.

4. Name the most important of the capes of Ireland, and the county in which each is situated.

5. Define what is meant by *great*, and what by *small*, circles of the globe; and state the four most important of the latter, marked on a Map of the World.

Lesson Books.—1. Where, and at what period of his life, did Moses behold, at a distance, the land of Canaan?

2. State all you know about the bread fruit. By what people is it used as an ordinary article of food?

3. Describe the city of Constantinople, and the manners, dress, and general appearance of its inhabitants.

4. Write down the substance of the fable, "*The Swallow and other birds.*" What moral would you draw from it for the instruction of your pupils.

5. What remarkable appearance does the mould of vegetables present when viewed through a microscope?

Arithmetic.—1. If a person save £36 in a year and a half, how much must be saved per week at an average?

2. Divide 75,082 by 175 according to the abbreviated method, and explain the reason of the process.

3. Find the difference in linear feet between an English mile and an Irish mile.

4. Calculate the rent of a farm containing two qualities of land, viz.:—27 acres 3 roods, at 15*s.* 6*d.* per acre, and 10 acres 1 rood, at 25*s.* per acre.

5. Write out neatly, in the form of a shop-bill, the following items, and calculate the amount:—Mrs. Smith bought of Samuel Richards 25¾ yards of linen, at 2*s.* 8½*d.* per yard; 7½ yards of cloth, at 17*s.* 6*d.* per yard; 19¾ yards of silk, at 3*s.* 6½*d.* per yard.

Dictation Exercises.

Male and Female Teachers.

3.—Dictation Exercises for both Male and Female Teachers.

First and Second Class Teachers.

In looking at this wreck of governments in all European countries, there is one consideration that suggests itself, sadly elucidative of our modern epoch. These governments, we may be well assured, have gone to anarchy for this one reason, inclusive of every other whatsoever, that they were not wise enough; that the spiritual talent embarked in them, the virtue, heroism, intellect or by

whatever other synonyms we designate it, was not adequate—probably had long been inadequate—and so in its dim helplessness had suffered or perhaps invited falsity to introduce itself; had suffered injustices, and solecisms, and contradictions of the Divine Fact, to accumulate in more than tolerable measure; whereupon said governments were overset, and declared before all creatures to be too false.

THIRD CLASS TEACHERS AND PROBATIONERS.

It is by the Thames that the stranger should enter London—the broad breast of the great river, black with the huge masses that float upon its crowded waters—the tall fabrics, gaunt and drear, that line its melancholy shores—the thick gloom through which you dimly catch the shadowy outline of these gigantic forms—the marvellous quiet with which you glide by the dark phantoms of her power into the mart of nations—the sadness, the silence, the vastness, the obscurity of all things around—prepare you for a grave and solemn magnificence: full upon your soul is shadowed the sombre character of the "golden city;" deep into your thoughts is breathed the genius of the great and gloomy people, whose gloom and whose greatness are perchance alike owing to the restless workings of a stern imagination.

N.B.—After writing the dictation exercise, each Teacher is to write in *large hand* the word "*ephemeral.*"

4.—PAID MONITORS.

Questions proposed at the Examinations.

Paid Monitors.

1st and 2nd Years.

Grammar.—1. Parse the following sentence:—"*Animals that ruminate have several stomachs.*"

2. Write out the rule of Syntax exemplified in the word "*several*" in the above sentence.

3. Into how many classes are irregular verbs divided? Give an example of each.

4. (*a*). "*Neither* you nor I wrote the letter."

(*b*). "*Neither* of us wrote the letter." State what part of speech "*neither*" is in each of these sentences, *and why?*

5. Write out in proper form the 1st, 2nd, and 3rd persons, singular and plural, of the pluperfect tense indicative mood of the verb "to run;" and say what part of the auxiliary, and what part of the principal verb is employed in it.

Geography.—1. Name, *in order*, the five seas that wash the eastern coast of Asia, commencing with the most northern.

2. Name, *in order*, the maritime counties of Ulster, with the chief towns of each.

3. Name the large gulf in the north of New Holland; and describe some of the peculiarities of the animal and vegetable kingdoms in that country.

4. State, in your own language, and briefly, what you have learned of the geography and history of Africa from the Lesson on Africa in the Third Book.

5. Define the following terms: "Longitude," "Latitude," "Spheroid," "Antipodes."

Lesson Books.—1. "A desert is a sandy plain, generally of great extent, without vegetation, and almost entirely without water." How would you explain to a Sequel Class the meaning of the phrases: "*Sandy plain*," "*of great extent*," "*without vegetation?*" and what reason would you give them for the absence of vegetation in deserts?

2. Name the three *edentate* animals described in Sequel No. 2, and mention some peculiarity of each.

3. Mention the different kinds of trees which grow (*a*) in the hot regions, (*b*) the cold regions, and (*c*) the temperate regions, of America, as described in the Lesson on America in the Third Book.

4. Write out one stanza of the poem in the Third Book entitled, "Heaven, or the Better Land."

Appendix I.

5.

Questions proposed at the Examinations.

"The *hollow* winds begin to blow,
The clouds look black, *the glass is low.*"

Why are the winds described as "*hollow?*" What is meant by the phrase, "*the glass is low?*"

Paid Monitors.

Arithmetic.—1. Set down *five millions seventy thousand and ten*, and find by how much it is greater than *seventy-two thousand and fifteen.*

2. How is Reduction divided? Explain each kind; and find how many *English* miles there are in 13,200 feet.

3. Write out the rule for *stating* sums in Simple Proportion; and *state* the following sum:—"If seven men do a piece of work in twelve days, in what time will thirteen men do it?"

4. Find, by Practice, the cost of 7 cwt. 3 qrs. 27 lbs. at 37*s.* 6*d.* per cwt.

5. A person pays £22 7*s.* 5*d.*, Income Tax, the rate being 7*d.* in the pound. What is his income?

PAID MONITORS.—*3rd and 4th Years.*

Grammar.—1. Parse the following:—"*The Arabs dwell in tents which they carry about with them.*"

2. Write out the rule of Syntax referring to the *case* of "which" in the above sentence.

3. Write out, in proper form, the three cases, singular and plural, of the two words, "*lady*" and "*thou.*"

4. Name (*a*) the reflective pronouns, and (*b*) the reciprocal pronouns; and state why each class is so called.

5. Name the *compound* tenses of the *indicative* mood, giving an example of each from the verb "to read;" and state what part of the principal verb is employed in each of these tenses.

Geography.—1. Name, in order, the several branches of the Atlantic Ocean on its eastern side.

2. Name the four great capes of Africa; and also the three countries through which the Nile flows, giving the chief towns of each.

3. The two middle counties of Leinster are Kildare and Carlow. Name, *in order*, the other ten, and also the bays and harbours that wash any part of that province.

4. Define the following terms: "Tide," "Ebb tide," "Flood tide," "High water," "Low water;" and state, if there is high water at twelve o'clock to-day in a certain place, at what time precisely there will be high water in the same place *to-morrow.*

5. State, in your own language, and briefly, what you have learned of the geography and history of Arabia from the Lesson on Arabia in the Fourth Book.

Lesson Books.—1. In the first paragraph of the Lesson on the Dog, in the Third Book, the following words and phrases occur; explain each of them as you would to a Third Class:—

(*a*) "*In his domestic state;*" (*b*) "*Brutes;*" (*c*) "*in prosperity and adversity;*" (*d*) "*he is indifferent to every one else.*"

2. Name the combustible minerals described in the Fourth Book; and state why they are so called.

3. Mention, briefly, any facts you have learned regarding the manufacture of pins from the lesson on that subject in the Third Book.

4. Write out the first two stanzas of the poem on "Prayer" in the Third Book.

5. What is the *moral* of the fable of "The Stag Drinking?"

Arithmetic.—1. Distinguish applicate from abstract numbers, giving examples; and say what sort of number the *quotient* will be, if the dividend and divisor are both applicate, and why?

2. Calculate by the *shortest* method the rent of 17 acres, 1 rood, and 17 perches at £2 18*s.* per acre.

3. Write out Apothecaries' weight, and state what use is made of it.

4. Calculate the value of the following expression:—$\frac{3}{5} \div (\frac{1}{3} - \frac{2}{9})$.

5. If the carriage of 9 tons for 100 *English* miles be £12 10*s.*, what should be charged for conveying 27 tons for 90 *Irish* miles? Abbreviate the operation as much as you can by *cancelling*.

Paid Monitors.

Geometry and Algebra.—1. Define Rectangle, Rhombus, Rhomboid. Distinguish *two* kinds of *irregular* quadrilaterals.

2. State a rule for finding the area of an equilateral triangle, the length of the side being given.

3. Erect a perpendicular from the extremity of a given right line without producing the line.

4. Extract the square root of:—$x^4 - 2x^3y + 3x^2y^2 - 2xy^3 + y^4$.

5. Given $\frac{a}{1+x} + \frac{a}{1-x} = b$, to find the value of x.

5.—Paid Monitresses.

Paid Monitresses

1st and 2nd Years.

Grammar.—1. Parse the following:—

"He who cannot bear a jest ought never to make one."

2. Repeat, in full, the rules of spelling exemplified by the words *roguish*, *dissipated*, and *epic*.

3. Give examples of real, abstract, and participial nouns.

4. Write down three English derivatives from the Latin root *duco*.

5. Give the several meanings of the word *deal*, and state to what class of verbal distinctions it belongs.

Lesson Books.—1. What were the words of the blessing pronounced by Isaac in favour of Jacob?

2. Name the chief personage mentioned in the "*Story of a Desert;*" where had he been travelling, and how many persons accompanied him as a guard?

3. Enumerate the several varieties of the dog tribe, and mention some wild animals that are supposed to be of a kindred species.

4. To what orders of birds do *Parrots*, *Snipe*, *Owls*, and *Pelicans* respectively belong?

5. Name the metals specified in Fourth Book, and enumerate the properties of any three of them.

Geography.—1. Explain the causes of the earth's annual and diurnal motions.

2. What proportion of the land on the surface of the globe lies north of the equator?

3. Name the most important island groups in the Pacific Ocean.

4. Write down the names of the capital cities of the following kingdoms and empires:—Persia, Japan, Egypt, Brazil, and Peru.

5. What is meant by the *snow-line?* Where does it attain its greatest elevation?

Arithmetic.—1. Subtract ninety thousand nine hundred and nineteen from twenty millions twenty thousand two hundred and twelve.

2. What is the *shortest* method for finding the price of any number of articles when the price of each is given in *pence?*

3. Find the value of 12 cwt. of sugar, at 7½*d.* per lb.

4. How many sovereigns may be coined from a pound, *Troy weight*, of gold, assuming each sovereign to weigh 5½ dwts.?

5. Calculate the amount, and write out in a neat form, the following:—

Mr. Brown bought of James Whelan—

9 stone of sugar,	at	7*d.* per lb.
15 lbs. spices,	at	3½*d.* per oz.
91 lbs. of tea,	at	3*s.* 2*d.* per lb.

Appendix I.

PAID MONITRESSES.—*3rd and 4th Years.*

Questions proposed at the Examinations.

Grammar.—1. Parse the following:—

"When a man has once forfeited the reputation of his integrity, nothing will then serve his turn, neither truth nor falsehood."

Paid Monitresses

2. To what rules of spelling are the following words exceptions:—*judgment, traceable, modelled.*

3. Correct the errors of Syntax in the following:—*Divide this field between your three friends, but let each have their due share. It was either his brother or him that begun this business. I should have spoke of it before I bade him to go.*

4. Give the roots, prefixes, and affixes of the following words:—*adhesive, epidemic, constructive.*

5. Write down, in *separate* columns, all the emphatic and reciprocal pronouns.

Lesson Books.—1. Specify the nature of the second, fourth, and eighth plagues inflicted on Egypt through the hands of Moses.

2. Give a brief account of the *esculent swallow.* State where it is found, and for what purpose its nest is sometimes used.

3. In what respect do worms differ from reptiles?

4. For what three purposes do spiders weave their webs? Why cannot they be regarded as true insects?

5. How may it be shown that the position of the labouring classes would not be permanently improved by dividing the properties of the wealthy among them?

Geography.—1. Explain why it is that the days and nights are of equal length throughout the year in all places situated on the equator.

2. In what countries are the following places situated:—*Kirkwall, Zurich, Leghorn, Prague,* and *Konigsberg*?

3. Through what oceans and seas must a ship pass during a voyage from the West Indies to the Philippine Islands? How often will she cross the line before she reaches her port of destination?

4. Enumerate *all* the principal rivers that empty their waters into the Mediterranean Sea.

5. Mention the several vegetable zones or regions into which the earth's surface is divided by Humboldt's system of Isothermal lines.

Arithmetic—1. Divide sixty millions sixty-six thousand and sixteen by ninety-one thousand nine hundred and ten.

2. Find the price of 14 hhds. of tobacco, *each* weighing 6 cwt. 1 qr., 12 lb. at 3*s.* 6*d.* per lb.

3. Given the rate of wages per day, state the *shortest* method for finding their amount per year. Explain the reason of your answer.

4. How much must a person save per day, in order that he may have £39 17*s.* 6*d.* saved at the end of a year?

5. Write out, in a neat form, the following account, and calculate its amount:—

9 gross of needles, at 1¾*d.* per dozen.
106 yards of calico, at 8½*d.* per yard.
21 lbs. of silk, at 3¼*d.* per ounce.

Appendix K.

Programme of Examination for Inspectorships.

APPENDIX K.

Course of Examination for Candidates for Inspectorships under the Board of National Education, Ireland:

Obligatory Subjects.

	No. of Marks for each Subject.	
1. English:—		
Consisting of English Composition,	600	
,, Spelling, Grammar, and Language,	500	
,, Literature—Bacon's Essays, some of Edmund Burke's Works (Thoughts on causes of present discontents, Speeches on Economic Reform, American Taxation, and on conciliation with America, and Address to Electors of Bristol before going to Poll, 1780.) Two or three Plays of Shakspeare (Othello, Macbeth, and Julius Cæsar), and Parts of Milton (Sonnets, L'Allegro, Penseroso, and I., II., IV., Books of Paradise Lost), and Pope (Essay on Criticism, Essay on Man, Moral Essays, and Imitations of Horace),	500	2,000
Rhetoric and Criticism, such as Blair's Lectures, and Whately's Rhetoric,	400	
2. Elementary Mathematics:—		
Consisting of Arithmetic,	600	
,, Euclid, 1st, 2nd, 3rd, and 6th Books,	400	
,, Algebra, including Quadratic Equations,	400	1,700.
,, Trigonometry, to solution of Plane and Spherical Triangles, inclusive,	300	
3. Geography,		500
4. History, including Smith's Greece, Liddell's Rome,		400
5. Physical Science, Selections from Board's Course, as—Mechanics, Hydrostatics, Pneumatics, and Optics,		600
6. Logic (Lessons on Reasoning),		300
7. Political Economy (Smith's Wealth of Nations, Books I. and II., and Easy Lessons on Money Matters),		300
8. Book-Keeping,		200
Total,		6,000

Note—No Candidate will be appointed whose marks on the whole course above mentioned do not amount to 2,000, or who shall fail in showing a competent knowledge of any one of the above subjects.*

*Optional Course.

1. Language, Literature, and History of Greece and Rome,	1,000
2. ,, ,, ,, of France,	400
3. ,, ,, ,, of Germany,	400
4. ,, ,, ,, of Italy,	400

Note—No Candidate will be allowed to be examined in more than one Modern Language.

5. Logic (Whately, Mill, Books I., II., III., and V.),	400
6. History and Philosophy of Education,	400
7. Political Economy, Smith's Wealth of Nations—Books I., II., III., and V., Malthus (Essay on Population), Senior, and J. S. Mill (Books I., II., III., and V.),	400

Appendix K.

Programme of Examination for Inspectorships.

	No. of Marks for each Subject.
8. Higher Mathematics (Theory of Equations, Differential and Integral Calculus),	600
9. Natural Science:—	
(a) Chemistry,(1) Heat,(2) Electricity,(3) and Magnetism,(4) as treated of in Board's Course of Lectures,	500
(b) Animal(5) and Vegetable(6) Physiology, with Principles of Classification (Carpenter),	500
(c) Geology,(7) Mineralogy(8) (Ansted, Page),	300
Total,	5,300

No Candidate will be allowed to be examined in more than three of the branches of knowledge included under last head—Natural Science.

A Candidate will not get credit for any subject in the optional course unless his marks show him to be possessed of a competent knowledge of that subject.

The successful Candidate at the Examination must attend at the Inspection Office and Schools in Marlborough-street to learn the details of his future duties, and he will not receive his Appointment unless he shows by his conduct, and the tests to which he may be submitted there, that he is fully competent to perform the duties of an Inspector.

Candidates must be at least 23 years of age and not more than 38.

Candidates must produce satisfactory Certificates of age, of general good health, and of moral character and regular habits.

All persons nominated to Inspectorships, in the service of the Commissioners of National Education, must pass a satisfactory Examination in the subjects in the above Programme, under the direction of the Civil Service Commissioners.

Memorandum Explanatory of Inspectors' Programme.

Obligatory Subjects.

Under Head I. (a) English Grammar, such works as the following may be made use of in Examination, namely:—

Louth's Grammar.
Crombie's Etymology and Syntax of the English Language.
Lennie's Grammar.
Hunter's Text Book of Grammar.
Allen and Cornwell's Grammar.

And for (b) English Language, such works as—

Richardson's Discourse on English Language.
Trench's Study of Words.
Trench's English, Past and Present.

And for (c) English Literature, such as—

Spalding's History of English Literature.
Craik's History of English Literature.
Johnson's Lives of the Poets.
Campbell's Criticisms.

Under Head II., Arithmetic, the following books may be used:—

Thompson's Arithmetic.
Allen and Fitch's Arithmetic.

Under Head III., Geography, such works as the following:—

Hughes's Physical Geography.
Dr. Sullivan's Geography Generalized.
Guyot's Earth and Man.
Cornwell's Geography.

Under Head VIII., Book-Keeping, The Board's small Treatise may be used.

OPTIONAL COURSE. *Appendix K.*

Programme of Examination for Inspectorships.

Under Head VII., HISTORY AND PHILOSOPHY OF EDUCATION, such books as the following may be chosen wherein to examine, namely:—

Tracts of Ascham, Milton, and Locke, on Education.
Edgeworth's Essays on Practical Education.
Mrs. Hamilton's Work on Education.
Dunn's Normal School Manual.
Wood's Account of Edinburgh Sessional School.
Potter and Emerson's School and Schoolmaster.
Morrison's School Management.
Ross's Manual of Method.

In ALGEBRA, Thomson's Treatise may be used; the first nine chapters treating of:

1. Definitions, Principles, Rules, &c.
2. Addition, Subtraction, &c.
3. Miscellaneous Propositions and Investigations.
4. Fractions.
5. Surds (Radicals).
6. Involution, Evolution, &c.
7. Arithmetical and Geometrical Progressions.
8. Simultaneous Equations.
9. Quadratic Equations.

As to the marks assigned to the groups of subjects under head 9 (Optional Course), the maximum (500) is to be allowed if *any three* of the subjects under (*a*) be selected by Candidates for examination.

Similarly, the maximum (500) is to be allowed if Candidates take up all the subjects under (*b*).

And similarly, again, the maximum (300) is to be allowed to those who take up all the subjects under (*c*).

Each subject of the *three* that may be taken under (*a*), is to be allowed one-third of the maximum (500).

Each of the *two*, again, that may be selected under (*b*)—the principles of classification being included under either—is to have *one-half* the maximum of 500 marks allowed.

Similarly, *each* subject under (*c*) is to be allowed *one-half* of the maximum number of marks (300).

NOTE.—What is meant by the "Board's Course of Physical Science" will be learnt best from the works themselves, copies of which can be easily procured.

Appendix L.

Lists of Inspectors of National Schools.

APPENDIX L.

Lists of Inspectors of National Schools.

Head Inspectors.

Name and Address.	Districts in Charge.
James Patten, Esq., LL.D., T.C.D., M.R.I.A., Streamville, Lisburn,	1, 2, 3, 4, 5, 6, 7, 8, 9, 10,
Timothy Sheahan, Esq., A.M., T.C.D., Malahide,	21, 22, 23, 24, 25, 26, 27, 28, 29, 30.
William H. Newell, Esq., LL.D., T.C.D., Georgeville, Rathgar, Dublin,	31, 32, 33, 34, 35, 36, 37, 38, 39, 40.
William A. Hunter, Esq., Monaghan,	11, 12, 13, 14, 15, 16, 17, 18, 19, 20.
John E. Sheridan, Esq., Cork,	51, 52, 53, 54, 55, 56, 57, 58, 59, 60.
J. G. Fleming, Esq., Tramore, Waterford,	41, 42, 43, 44, 45, 46, 47, 48, 49, 50.

District Inspectors.
